# Usenet Newsgroup Archive: rec.radio.scanner

## 2004-01 - 2004-05

These Usenet messages were preserved as a plain-text archive. This PDF was generated by Digital Library of Amateur Radio & Communications from the source text file in 2026.

Date span: 2004-01-01 through 2004-05-31

Source text: rec.radio.scanner.txt

Source item: https://archive.org/details/usenet-rec

Messages included in this PDF: 3,171

Message records with no readable body available in the source text: 10

Messages are presented chronologically by archived date.

Binary or encoded payloads are not printed as blocks of encoded text; a placeholder appears where such material was detected. The original source text is unchanged.

## 1. Re: Pro-95. info please

Newsgroup: rec.radio.scanner
Date: 2004-01-01 00:16:10 UTC
From: michael agner <ka3jjz@erols.com>
Message-ID: <3ff366a9$0$4748$61fed72c@news.rcn.com>
Source record: 23541

I would suggest joining the PRO95 Yahoo group, and keeping the Win95
page handy. Make *sure* you read the programming cable information on
that page. The Yahoo group may also have programming files you can use;
don't let the RS people do the programming; most folks I know that have
done this said it's a waste of time. There's also a PRO95 info page
that's well worth keeping.

Here are all the appropriate URLs;
http://groups.yahoo.com/group/PRO95/
http://www.starrsoft.com/freeware/win95/default.asp
http://www.pro-95.info/

If your system isn't digital, the PRO95 is a keeper.
73s Mike

What about that crummy Icom R71A you sold me in October? All it does
is light up for a few minutes and then powers off. I'm still waiting
on a refund for that.

Stay away from Grove.. way overpriced.

for that amount of money you could get an antennex gold annodized
log periodic with 50 feet of LMR400 and connectors.

www.antennex.com

## 10. Re: JD HAVRY DUNEDIN FL??? Anyone buy from him???

Newsgroup: rec.radio.scanner
Date: 2004-01-01 07:41:44 UTC
From: TailGator <nomail@privacy.net>
Message-ID: <YaQIb.35877$E17.26227@nwrddc02.gnilink.net>
Source record: 23450

By the way, do your research - I posted by the name I've been using on the internet for years, (TailGator, only use radiobuff on wife's new comp) should be easy for you - you won't find one sour deal or ripoff post about me anywhere. My callsign is kf4anc, name is John Haury NOT Havry, and I'm tired of looking at the typo by this idiot, and I used to play music and tour nationally with my own band opening for acts such as Lynyrd Skynyrd, Marshall Tucker, Charlie Daniels, and others. Look my name up on amazon.com and read the review, order the book and read all about me. My life is an open book. I am documented and known, I am not some fucking ripoff scammer on the internet. Search back thru my ads - the only aor I ever owned I sold to Ron Fairchild of the Oak Ridge Boys, right through this newsgroup. I have an R71 right here on my desk, only one I've ever owned and its still sitting here. Never sold it. Tried to sell or trade it (which is obviously the post Terry saw when he fabricated this one) back in October, but got no offers. Yet another lame attempt. This terry/frank/mike/randy guy had me ship the 785 the 'cheapest way possible' and instructed me to write on the package 'amateur radio for repair - value $10' to cheat the Canadians out of their import taxes. Never shipped anything that way before. If it got lost its his own damn fault, not mine. Is he trying to hustle me for half the money back, which is what he alluded to when he emailed me and said he would 'post to all lists that I was a scammer'? But, after all this lying, I can't believe a word he says. Who knows what is really going on. Did he get the radio? At this point, I don't know and I don't care. I don't rip people off, never have. These claims are not only unfounded, but fabrcicated by this Terry/Frank/Randy/Mike character. My reputation speaks for itself. I might be a redneck at times, but I am not a thief.

Not gonna waste anymore of anybody else's time on this. I know I've said that before, but everytime I read a fabricated post by this asshole my redneck comes out and I feel like fighting. I'm done with it. I guess the only way not to argue anymore is not to read anymore...it's waste of everybody's time.

This is the absolute last post to this newsgroup. One of my New Years resolutions is not to respond to this crap anymore...hah. Have fun with it and Happy New Year, folks:)

Flame on, Terry, Mike, Frank, Randy, or whoever you are...I'm thru with your games.

JD

A Very Old Benelec 16 element Discone
the mast I had it on was 10 metres
the new "tower" should put it up....about the same height
but seeing as my new location is 5 metres higher and clear of most of
the houses
should be much better

I use Belden 9913 cable as well

The "As New" BC 785 XLT you sold me almost two months ago for alot of money looked like it came out of a car wreck. "No Mars or Dings" Yeah right! When I complained what did you tell me?

Be very careful with this person. He's very slick and once he cashes your check you will never see your money again even if you threaten to sue him.

## 18. Re: Antenna's

Newsgroup: rec.radio.scanner

I just ordered a AX-31B, active UHF antenna, made by WiNRADiO, though Grove Enterprises. It's a very small, indoor, directional log-periodic antenna, with a 20dB amplifier. I intend to point it at Selfridge Air Base, about fifteen miles from me. I can hear them now, on the telescoping antenna, that came with the BC796D, but sometimes it's a little weak, with some noise. This should provide full quieting on the signal.

[link] http://www.grove-ent.com/ANT4.html

I'm also considering the purchase of a PAR MON-3, omni-directional, outside antenna, through Universal Radio. It's optimized for 144~174, 440~470, and 800~900MHz. They claim it has 1.7dBi. I like it for it's simplicity, and ruggedness. Here in Michigan, we get some fairly high winds, and nasty winters with ice storms that can really build up on an antenna.

[link] http://www.universal-radio.com/catalog/scanants/4464.html

I'll post my results when available.

JD,

To date I did not posted your house # /street address or your real last name or ham call sign.

The info I have posted has only been with you and your bullshit email addy's you have been sending me directly.

Trying to convince me to give up my efforts, or nobody living at that address/rental sign in the window/no cars/i will look up his number/did u check his feedback on Ebay/ or he even delivered it to me/ i could add more but why!!

I just read the group postings this morning, you have posted pretty much everything including your correct info now.I had no intentions on posting any other info on you, but i guess you did'nt mind doing it yourself.

Your original address email, the info is a V in your last name not U, the U on the key board is not anywhere near the V? Suppose it's simple enough to make a U out of a V on a money order :)

I did not post any other emails other than the ones from my email addy PERIOD. IT IS NOT ME POSTING IN OTHER NAMES....

You have posted many radio's for sale in the past, and have been a ham for several years now, hams don't rip people off?

At least I've never heard of it.

So I will sit it out and WAIT and WAIT for the radio.

I too have been scanning for many years and currently own 5 scanners including the new Bc296 and 2 Bc796, I had bought your radio to sell up here and help fund one of these new ones thats it.

The original posting of this ordeal on here was my first on the groups, I was directed to look here and see if anyone had dealt with you in the past.

The responses I got were fabricated from you, SAD EH. Not one REAL person had anything to say of any dealings with you? So how do I take it??

This will to be my last email, I will chalk it up to a loss and lesson learned. $270 US at the time $375 Canadian. So yes I have been upset.

I have NOT received the radio, did i say that clear enough!!

If I do you will hear about it.... O Ya Thx for the pro tip on opening up the emails on here for the service provider/IP - Neat :)

Thx to the few posters that could see thru the clouds on this one.

Happy New Yr to all and Happy scanning :)

Cheers,

Terry

## 21. Pro 92 SPG files

Newsgroup: rec.radio.scanner
Date: 2004-01-01 18:08:17 UTC
From: rjj <not@telling.com>
Message-ID: <vv8ogoafvbh3a4@corp.supernews.com>
Source record: 23461

Are there any web pages out there with Pro 92 spg files?

Thanks

## 22. Re: Antenna's

Bill Crocker <l_KdnWxBC_ONqWmiRVn-ig@comcast.com>...

^ I'm also considering the purchase of a PAR MON-3, omni-
^ directional, outside antenna, through Universal Radio.
^ It's optimized for 144~174, 440~470, and 800~900MHz.
^ They claim it has 1.7dBi.

A di-pole has a gain of about 2.5 dBi. Before you spend money on an expensive antenna, try a homemade vertical di-pole with one element for each band you want to receive soldered to some good coax. For protection from the weather you can seal it in a suitable length of PVC pipe with endcaps.

For the bands you mention above, your elements would be: 17", 6", and 3.3". One of each soldered to the center conductor and another of each soldered to the shielding. This is not a transmitting antenna so no impedance matching mechanism is necessary and the coax can run down alongside the lower half of the di-pole.

To calculate other lengths: FEET=234/MHz (i.e. 17'=234/160.000).

Frank

## 23. Pro-95

Newsgroup: rec.radio.scanner
Date: 2004-01-01 19:52:24 UTC
From: jjenkins_juno@yahoo.com
Message-ID: <12a2b72.0401011152.622fea90@posting.google.com>
Source record: 23463

Is it safe to say that I will be able to receive channel 19 truckers when driving on the interstate? That is one of the reasons I bought the scanner. Also, I seem to have trouble with the scanner stopping on frequencies that are motorola trunked in a bank. When I manually step through the channels I hear transmissions but when it is in scan it rarely ever stops on them. What am I doing wrong?

## 24. Who is JD Haury Washed Up Rock Star or Scam Artist? Possible Class Action Suit. Read

Several people have claimed that this person has not delivered or
delivered faulty or misrepresented merchandise. He claims he is a
washed up Rock Star. Anyone else have bad dealings with him?

This guy sold me a aor.I payed for it and never received radio.He is a
scammer.
---

I too have been scammed on a BC785 with Butel CD, sent him $270 US
money order and NEVER GOT THE RADIO :(

Thx Frank for your response

Cheers,

Terry

Excellent cosmetic condition Icom 8500 works perfectly looks like new with original plastic on display. Comes with radio, origial box and manual. Also includes Icom control software with cable. Original software not a copy. This is the US version and does NOT pick up the cell range.

$900 shipped CONUS
I take Paypal.

Greg

## 28. Battery stores in Florida?

Newsgroup: rec.radio.scanner
Date: 2004-01-02 01:01:03 UTC
From: Bob <raluska@optonline.net>
Message-ID: <jp3Jb.34834$Do6.8131984@news4.srv.hcvlny.cv.net>
Source record: 23468

Going back awhile ago I remember seeing some posts about some battery stores (I think they were in Florida) that I could bring in my battery pack from my BC-245 and they would rebuild it on the spot with new cells. Any help out there what the name of this chain is and any suggestions as to what type of battery pack I sould have made up for me? I have a 235 and a 245 that are both in need of new batteries. I'll be going down to the Boca Raton area next week and was thinking of bringing my old packs and have them overhauled! Thanks!

Bob

check out Batteries Plus in Ft Lauderdale at:

http://www.batteriesplus.com/store063.html

They should be able to open up the pack and replace the cells.
I've had it done for my BC-205xlt pack.

We have several in Tulsa, "Interstate All battery Center", "The Battery
Company" and several others that I can't lay my hand on right now. I've
never used them but do know that they will rebuild battery packs. I checked
on having a battery rebuilt for a power tool and it was going to be more
than I wanted to invest in an older tool but was considerably less than a
new one. RM~

Geeze man do some searching on your own! I'd suggest you use your favorite search engine and try entering "cordless phones" as a start. Read a owners manual etc. Hint: Old 49mhz phones should be scanned in 46mhz range.
That's what most people get out of scanning... the thrill of the chase. How really cares what you listen to, it's the fact that you can.
IF you still can't figure it out ask again.

Oh boy here we go again with the fabrications. I challenge anyone to present PROOF that I ripped anyone off for anything. There would be postings about it somewhere other than your empty little head, Terry. This is still a smear campaign by a weirdo in Canada who claims he did not rec the scanner and then fabricated emails (we matched IPs by the way and he still wouldn't admit it) trying to get money out of ME. The bottom line is there are no facts because there are no scams - PERIOD. This is my absolute last post as to this bullshit. My ISP will laugh at you - there is no proof because there are no scams. Give it up, little boy.

You and your alter egos are a joke.

The antenna that comes with it is lousy on CB freqs. I used my pro-93 with
a CB antenna and it received them great.

VHF UHF scanner radios that can tune down into
the HF band I. E. 150 kHz -30 MHz where a long wire antenna is needed,
do not make very good SSB/AM FM receivers.
Your better off purchasing a portable AM FM short-wave(SSB capable)
receiver.
Make sure it has a antenna jack and add a after market antenna tuner
to tweak 50' of copper wire!

These portables don't make for good HF scanners. Although they may scan
there
individual pre sets , unless there is a power house SSA signal
the squelch won't open up. Most portables under $300 won't have squelch.

When doing SSB work on HF (unless you
go with a $500 to $1000 communication receiver) sitting on one (1)
frequency
and the SSB utility signals are weak, monitoring the traffic is be best
way to go.
It's a different aspect of our radio hobby , then listening to AM air
band or the VHF UHF FM band

.It really takes two (2) different radios, each built for the specific
mode and bands to be worked.

What sort of proof would you like? And what sort of proof could possibly be posted here? You have at least 4 individuals claiming that you ripped them off in one way or another. Not just 1 person but 4 people. Why would 4 people take the time to call you a scammer? To date no one has come forward to say that they have had successful dealings with you. The proof you want everyone to see lies in the people who have not been scammed by you. Since no one has come to your defense then it seems to me that you are what they claim you are which is a scammer.

Triple check all the frequencies in the trunk bank. I had this problem and found that I had an incorrect frequency.

Once and for all I will put these lies to rest - proof, meaning proof of payment. What other proof could there be? Let's see some returned checks or money orders. Do it NOW. You can't and you know it. If you got a money order with your name and my name on it, whether you have the numbered receipt or not, you contact the issuing bank or company and they will produce. You can track by approximate date and amount, too. That's what I mean by proof, you idiot. Let's see my name on your 'payments' Terry and/or your four alter-egos. This will go absolutely nowhere because there aren't any and you know it. Let's see some real names and addresses. I'm not hiding mine, am I? .If you were ripped off by me - PROVE IT and post your information and your proof and/or send your proof of payment to me AND the postal authorities. I would glady pay all 'four' of you right this minute if it were true. You are a liar, and if you cannot document your claims, shut the fuck up. Once and for all, prove your lies, Terry. It should be easy, man:) Put up or shut up.

JD Haury

Sorry again, for the reply to this idiot, but furnishing this information is the only way 'Mike Terry Randy or Frank' can validate their claims or shut up. Come on, Terry and all your alter-egos. Let's see what you have. You can't furnish any proof because there isn't any, so post away, and I'm sure people will see this for what it is. I will not post again unless documented proof is furnished. You are a liar and this will prove it once and for all. I'm sure I will not be posting again:) I apologize for any inconvenience to the cross-posted newsgroups.

## 48. Oldie Newbie

Newsgroup: rec.radio.scanner
Date: 2004-01-02 19:23:48 UTC
From: outintheburbs@yahoo.com
Message-ID: <1ccc745.0401021123.7af5ba71@posting.google.com>
Source record: 23488

Hi there. Sorry that my initial post was in error. My test-post worked but not the actual one that I intended.

I use to enjoy listening to scanners as a hobby. I own several eqarly-to-mid 90's scanners including an AOR 8000. Due to various life circumstances (marriage/divorce, work, family illness, etc.), I have not really had the time to do so for the last eight or nine years. As such, I am in a sense, an Oldie Newbie.

A lot has apparently changed in the hobby since the mid-90's. I am hoping that someone can clarify some of the recent developments. I know that much of this has likely been discussed already but a Google search did not yeield the results that I was after. So please bare with me.

1. It appears that almost all 800 MHz broadcasts, particulalry you know what, are now digital. Theoretically (I know about "the Law"), are there any radios or devices that can decode the cellular band? Would the latest European versions of scanners work in that sense?

2. What exactly does a voice "inverter" do?

3. I was recently scanning the NYPD and they have not appeared to heave converted to digital. How essential is having trunking and digital capability in a scanner?

I thank you all for your assistance and guidance. Happy Holidays to all.

## 50. Pro-95 Scanner

Newsgroup: rec.radio.scanner
Date: 2004-01-02 20:16:23 UTC
From: jjenkins_juno@yahoo.com
Message-ID: <12a2b72.0401021216.73dbb6f2@posting.google.com>
Source record: 23490

I just purchased a Radio Shack Pro-95 scanner on sale. This thing is so nice. You get a lot of nice features that would usually come on a more expensive scanner. I really like it. I did have some problem at first trying to scan Motorola type II trunked channels. I had entered a bunch of frequencies into a bank and set the bank into "Open" mode. As I started receiving transmissions and saving the group ID's, the scanner would no longer stop on the channels when it was in scan mode. It is acting like it is in "Closed" mode. When I deleted all of the group ID's the scanner began to operate as expected and would stop on active channels. By reading the manual I thought that as long as the scanner is in "Open" mode it doesn't matter what group ID's you have stored, it will just disregard them, except for looking up text tags. It's when in "Closed" mode that it will only stop on channels that have the group ID stored. Is there a setting that I am overlooking or could there be something wrong with my scanner? The scanner works perfectly in all other respects.

Thanks.

## 51. Re: Pro-95

Newsgroup: rec.radio.scanner

Source record: 23491

After thinking about it for awhile I thought the same thing. The
scanner
antenna is definately not even close to a CB walkie-talkie antenna. I
figured if I change the antenna it should pick up 11 meters fine. I
tested the scanner with a CB I have and it did receive, albeit I was
transmitting within 20 feet of the radio. Also, the other day I
managed to receive one of the channel 6 massive watt stations from who
knows were.

Thanks.

You need to consider that scanners can interact with each other with using a T connector. A scanner will actually generate it's own RF frequencies.

When I had a T connector installed, I would here pulsing noises on my ICOM R8500 whenever my PRO-2006 would lock onto a frequency. The pulsing corresponded to the blinking bank indicator on the PRO-2006. Installing a Stridsberg MCA204 solved that problem and also improved reception.

^ You need to consider that scanners can interact with
^ each other with using a T connector. A scanner will
^ actually generate it's own RF frequencies.

I don't doubt that is true but I haven't experienced it. I generally keep at least two receivers connected to a single antenna and I've had up to four on the same antenna. Of the two, one is Sony and the other is RS. The other two receivers are both RS and they are sometimes on the same antenna too. I have experienced it though on an RS receiver from a Yaesu radio that's on a completely separate system, but in close proximity.

Frank

Hi,
I have 2 scanner for sale, Both were imported from Europe and have no gaps!

Radio Shack Pro-26 25-1300 Mhz (NO GAPS FULL CELLULAR BAND)
Like new condition, with box, antenna, belt clip, (no manual) but can be
downloaded from Radio Shack website.
$200 Plus shipping

Yaesu VR-120 100Khz- 1299.999Mhz (NO GAPS FULL CELLULAR BAND)
Like new condition, with box manual, antenna.
$185 plus shipping

I accept Pay-Pal or International Money Orders Only
Any questions please e-mail directly at rdsmith@dccnet.com
-Thanks

....seems some of the restaurants felt they had to remind some patrons
of that, specifically over the weekend of the Dayton Hamvention.

(I wonder why...? grin : )

I guess they wanted to avoid an argument from some 'groups'
or 'seasonal itinerant patrons' who might have thought they
were getting scammed on their bill or something else. : )

I *also noted* VERY amusingly, that the motel across the street from
us had posted a 15" by 15" sign in their office window, reminding
his 'patrons' for Hamvention weekend, that there was a *strict
maximum limit of two adults occupancy to each single and
four adults to each double room*. (I guess the indian owner
got tired of seeing 8 or 12 stinky overweight middle-aged
white men, leaving a 20 by 20 foot motel room carrying sleeping
bags and leaving a mess like modern-day gypsy traders
whilst only 4 were actual paying patrons...)

: ) : )

I'll try my hand at some of this .. but in my neck of the woods they are still using non-trunked analog for things I'm interested in so this may not be 100% and I'll watch the thread to get the rest of the story.

1) Listening to digital transmissions from just about any source is not within the capabilities of scanners available to the public for any reasonable amount of money. The transmitter and receiver link up/ synch up and share protocols which are not easily matched by universal scanning devices that you might get from RS etc.

2) Voice inversion is a (now) primitive form of encryption used for analog transmissions which can be easily un-done ... probably not many users of this technique anymore.

3) Most municipalities are headed toward trunking systems of some sort if they aren't already there .. but as in #1 above, if they have gone digital and trunked that can be tough to monitor. I wouldn't bother with a non-trunkable scanner any more.

With the increasing use of digital by cops/fire etc. it is getting tougher to monitor government stuff .. but most of the cops around here use their cell phones so much that most of the traffic is on that system.

Most of the time they get the info from "someone" at the cop shop. The cops are told they are encrypted when it is simply digital.

I was covering a story about the local Sheriff on a ride along. He told me the new radio system was encrypted and that it was against the law for anyone to listen to them.

I didn't pull out my Pro-96 and bust his bubble... It never dawned on them how I always appear at newsworthy locations shortly after they do.

Kinda of gives a bit of argument:

Why tip for expected average service?

Tips are a reward for exceptional service, not average service.

If the waitress went out of her way to provide extra service other than carrying a plate of food or a cup of coffee (which is what she does anyway), why tip?

Tips are for service over and beyond the call of duty, such as being a bit more friendly to visitors, rather than the run of the mill service. (Take the order and deliver the food and drink). A tip isn't given to a waitress that is crabby because her boyfriend came home drunk as a skunk and still has to get the brakes on his 68 Ford pickup truck fixed.

Tips are an option for extra service, not a wage.

I'll tip if I get very nice friendly service, but will not tip if the service is average. I tip 10% (that way I don't have to do much arithmetic, but will round up to the nearest dollar.

For taxis,let's say for a $16.00 fare, I'll give the driver $20.00 and he can keep the change if he gets me to where I'm goin' safely and efficiently, the cab is well kept and clean. I've been in cabs that should have been taken off the road, and the cab driver gone through a wash, rinse and spin cycle a few times.

As for ham people being stinky and overweight, the same can be said for any other group of people. Be it tennis players, doctors, lawyers, business owners.

If an empty helmet waitress writes in that ham people are stinky, give her a tip as in a written one on a folded peice of paper that says on the front

"Thanks for the food, it was great! Here's your tip:

Folded up in a square as an envelope, but inside is this:

If you go Seattle, Ivar's Seafood Restaurant has the best seafood in Washington State. There's one on the Seattle waterfront, and if you're taking the ferry to Whidbey Island, there's an Ivar's restaurant at Mulkiteo."

As for this Linda Sue, one wonders if she has a hick boyfriend with a shaggly moustace, keg belly and an '83 Ford F-150 with a gun rack in the back , has a bit of rust on it and works at the local

mechanic shop as a tool monkey. She's probably
a country music lover as well, and they both live in a trailer on the
southside of town.

When our county first went on a Motorola type II trunked system, a sheriff's deputy mistakenly told me it was illegal to monitor them. I didn't argue the point.

The info at timhobson.com: Tampa Area Scanner Freqs (http://www.timhobson.com/scanner.html) seems authoritative and indicates that the FHP is now on EDACS ProVoice digital. Maybe that's why the users of the forum I read thought they were encrypting. It doesn't make sense that they would use encryption on the ProVoice system, does it?

Assuming they are on ProVoice and not encrypted, will the BC796 pick them up?

I tip a great majority of the time. Some times I may only have enough to buy the food with as I've not planned ahead to dine out. Any tip depends on how much I buy depending on how hungry I am and what on the menu appeals to me given what I have in my pockets to carry me through the total. I dine out on a whim most of the time. IF I have the cash, I pay 20% of my total or whatever close to it I can make. IF I don't have it, I at least thank them. I do NOT tip when drinking at a bar, as they are paid and don't do much outside of opening a bottle or filling a glass and setting in front of you then collecting your $1 or so for it. I don't use cabs, so no worries there. Went to a new Barber - New Years Eve. Haircut - $10. He made sure it was to perfection. I tipped him $2 which he thanked me for at least 3 times. I do NOT empty my wallet or coins of all just to tip. I do what I can - up to the 20%. I can't speak for ALL hams, but this HAM DOES TIP WHEN POSSIBLE. Like anything else, this smells of placing all in one barrel. Just because "a" ham doesn't tip, doesn't make us all "cheap". G.W.

I am planning on buying a scanner. I do not want to read the manual, and I am too lazy to use Google. What scanner should I get so you will all give me help.

Please do not suggest anything that will require any effort on my part, simply spoon feed me. Also as I never come into this forum, it is your responsibility to spend 10 minutes un-munging my address so you can send me my answers by e-mail direct.

Have I left anything out?

Terry,

I did some research and I came up with some of the names he has used in the past. You can Google for any of them to find out more about his
multiple personalities. This man may be capable of what you claim. He's armed and claims he has been busted for violent crimes including robbery. If I
were you I'd contact the authorities and let them deal with it.

one thing about the john lee walker band, those guys were true outlaws in
the real world. one of those guys was featured in the skynyrd book "an oral
history" jhis name was john haury. he was friends with ronnie and the band
and they tore up a few bars together. I think he was even busted for
shooting a man somewhere in Louisiana and robbing banks in the eighties.
they were all pretty hardcore dopers and needle freaks but man could they
jam. anybody know what ever happened to them? I saw them once with skynyrd
in west va in 76 and they were awesome but very young and inexperienced,
i've always wonmdered what became of them. heroin destroiyed a damn good
band!!!!

Another UNA (Urban Nigger Ape) proves why some are that. Baboons with
clothes.

JACKSONVILLE, Florida (AP) -- A 2-year-old left alone for nearly three weeks while her mother was behind bars survived by eating mustard, ketchup, rice and raw pasta, police said.

The toddler was watching cartoons when found by her father, police said Monday. She was suffering from malnutrition and was being treated at Wolfson Children's Hospital, police said.

Dakeysha Lee, 22, was charged Monday with child abuse because she didn't let anyone know that her daughter was alone in her apartment, police said. She was jailed Sept. 10 on unrelated charges.

Hey people, found this newsgroup because I wanted to post and get some opinions.

A guy I know used to play and tour with a neo-famous southern rock and roll band in the 70s & early 80s, traveled with folks like Lynyrd Skynyrd, Charlie Daniels, Marshall Tucker, etc, and he lived on the fast lane for a few years, did it all, became a junkie, cleaned up (several times) and did the 12-step thang, all that - and when the southern rock scene fizzled in the early 80s this boy had to clean up his act and get a real job. Welcome to Corporate America.

Well, as a result of his dangerous habits, he has since developed diabetes (Type II) and was diagnosed with neuropathic damage to his sciatic nerve (neurapathy), the worst of his diabetes-related ailments - he went undiagnosed for a long time. Until recently, he hasn't smoked pot since 1986. He now finds that smoking not only eases the discomfort, but also eases the nausea he feels after glucophage and other meds hit his stomach. He used to be a heavy toker:) but now he smokes when he feels the need, which is once or twice a day. He is strongly opinionated to the fact that it does have medicinal qualities - he's proven that it lowers blood sugar and it makes him feel better. He does it only in the privacy of his own home.

It's his business.

Unfortunately, he now works for a major corporation that randomly drug tests, and he knows his number is going to be up one of these times. I would like to hear from anyone in a similiar situation, or anyone with any advice on how to really beat the tests, live the way you want to in Corporate America. Any and all advice would be greatly appreciated, but please spare sarcasm and flames. No time for that - thanks!

I'm also looking for a small (4") LL folder with stag handles, replacing one I lost recently. I went to a knife maker here locally in St. Petersburg FL (Roger Gamble) who made me a custom folder with very handsome stag handles, but it's a bit too big and bulky for the pocket - made to be holstered and he included a very nice leather holster with it. Although I love this knife, its not somethng I can carry to work in my pocket. Prefer liner lock, one

hand open, possible with pocket clip on it. Any ideas? Thanks

The one I lost was called the Tactical Folder, but I'll be darned if I can remember the company name...bought it from a catalog called The Edge many years ago...they are no longer making the knife.

Like new Buck Phrobis III military field knife/bayonet with scabbard and pouches as it was sold by Buck. Used once on a fishing trip and been in gunsafe since then. Asking $175 - interested parties can email me directily if you want to see a pic - great knife! Only selling it and other items because I am wanting to buy new ham radio. Offering it here for a few days, if no response you will see it on ebay. You will be very pleased with this knife...

john

Good Luck.

nItpIk <8KBJb.11$z56.16251@news.uswest.net>...

^ .. but most of the cops around here use their
^ cell phones so much that most of the traffic is
^ on that system.

And on their data terminals/computers. This is out of necessity because of the increased voice traffic that has become necessary. Cops today are tied to their radios like an umbilical. Every move must be reported and they are called frequently to see if they're OK.

The increased traffic is also due to the increased availability of a 911 call. It used to be that if you saw someone speeding on the freeway there was nothing that you could do. By the time you got to a phone the vehicle would be long gone. Now every time someone sees a speeder they call in a dangerous driver, and every time someone gets flipped off they call in road rage. In order to get any time for communications cops need to resort to the cellular full-duplex radio system. The privacy of this system is also a convenience.

Frank

## 82. Lojack questions

Newsgroup: rec.radio.scanner
Date: 2004-01-03 23:20:27 UTC
From: brasilnut@hotmail.com
Message-ID: <e06e841f.0401031520.617f69d5@posting.google.com>
Source record: 23422

I frequently monitor the nationwide (well, major cities)
Lojack frequency of 173.075 Mhz here in Norh Miami, FL...

From time-to-time I can hear (fairly strong) a burst of data, about
a quarter of a second long, and repeats approx once a minute.

Their website states that Lojack beacons are activated from transmitters
placed on "Police Radio Towers".
But I recall once reading that they are activated via local FM Broadcast
stations by means of signalling on the SCA.

Can anyone confirm or clarify this?

I would suspect that Lojack tells the public that activation is from
the "Police Radio Towers" to give the public that "Warm and fuzzy, confident"
feeling...

Does anyone know if ANY activity heard on 173.075 is indeed activated
Lojack devices, or maybe am I hearing messages being sent out to activate
the units ?

Can anyone share any experiences of having reported to their police, sheriff,
or state highway patrol, reception of a activated Lojack?

Are there any law enforcement officers that can comment what a activated
Lojack would sound like?

Nah! just upset at the same type of messages posted by so many users on this forum.

Hoping a few may see themselves and at least do some rudimentary searches before asking for help.

I am happy to help anyone that has a problem, not RTFM or doing a simple search does not fall into the problem area. It is simply a case of lazy people wanting everyone else to do the work for them...

As an old curmudgeon I have earned the right to occasionally comment on the human condition.

"Ham Radio Groups" and nobody else?

"Ham Radio Groups" are subject to a mandatory 15% surcharge?

The owner of this restaurant is begging to be named the defendant in a discrimination lawsuit.

## 91. Philadelphia trunked frequencies

Newsgroup: rec.radio.scanner
Date: 2004-01-04 03:33:28 UTC
From: jecaec@comcast.net
Message-ID: <68017566.0401031933.798b2b52@posting.google.com>
Source record: 23431

Any advice would be appreciated.

I own a Radio Shack 150 channel 800 MHz trunking Scanner (PRO-91) and am having trouble accessing the new Philadelphia trunked frequencies. I've been using this scanner to access Montgomery County (Pennsylvania) trunked frequencies for about 5 years, so I know that the scanner works properly. Although I live in Montgomery County, I should have no problem accessing these signals. I live only about 4 miles from the city limits and had traditionally been able to retrieve Philadelphia signals in the pre-trunked days. Also, my scanner is defaulted to Type II. I assume that Philadelphia uses a Type II system.

I entered the new frequencies and set it up for trunked access. I've set the squelch properly and I believe that I've used the proper frequencies. I don't receive any signals, however I occasionally display channel numbers (with no sound) (e.g. 3824, 464, etc.)

Here are the frequencies that I've entered (I found them from some website):

868.8375 868.8125 868.7875 868.5875 868.2875 868.0875 868.0625 867.8625 867.5875 867.5625 867.0875 867.0625 866.8375 866.3625 866.2875

This is the order that I entered the frequencies.

Am I doing anything wrong? Thanks.

Jim

Quoth Offbreed_106@hotmail.com (Offbreed) in
news:2f1f5894.0401021749.77a5145b@posting.google.com:

> seventy3freq02@yahoo.com (73 Freq)
>
> is a fuckwitted, obsessive, neutotic.

I find this whole project of his rather amusing.

NNTP-Posting-Hosts of the complainants, all posting through Google Groups:

"73 Freq" seventy3freq02@yahoo.com - 80.97.111.129 - Bucharest, Romania
"Emergency Services" emergncysrvcs@yahoo.com - 213.33.68.230 - Vienna,Austria
"Terry" vfr99_2001@yahoo.com - 64.230.149.191 - Toronto, CA, US

Every one of them is probably a trojanned WinBox being abused by the same
guy.

--
"I am afeard there are few die well that die in a battle; for how can they
charitably dispose of anything when blood is their argument? Now, if these
men do not die well, it will be a black matter for the King that led them
to it; who to disobey were against all proportion of subjection." - W.S.

## 98. Re: Philadelphia trunked frequencies

Newsgroup: rec.radio.scanner
Date: 2004-01-04 08:35:09 UTC

Check out this site
<http://www.trunkscanner.com/states/pa.html>

Looks like your going to need to upgrade to a ASTRO digital scanner like
the PRO 96!

Check out <http://strongsignals.net/access/boards/pro-96/board.cgi>

And <http://www.grove-ent.com/scanners.html>

Also<http://www.radioshack.com/category.asp?catalog%5Fname=CTLG&category%5Fname=CTLG%5F008
%5F009%5F010%5F003&Page=1>

BEFORE YOU BUY any of the digital radios DOWN LOAD the MANUAL! Read it
over
to see if it wall fit your needs. When the radio arrives you have a head
start and will be able to program it.

Owning a PRO-91 will make the learning curve faster than some one who has
never programmed
a trunking scanner. I have a PRO -90 and the Uniden BC 250D with the
BCi25D Digital APCO P-25 card. Get the computer cable and after market
software to program the radio!

Look here <http://www.strongsignals.net/access/content/software.html>

While your at strong signals check out the other boards too !

When your receiving talk groups do they have a loud buzz sound to them?
That would be ASTRO voice! Find out if they are encrypted, if so you may
want to reconsider a digital scanner and stick with the PRO-91.
When doing a trunk search for talk groups with the PRO-91 do any analog
voice talk groups show up? If its trunk tracking then you got it right
it's just digital!

Nashua NH went to a ASTRO P-25/ mixed Type II analog system several years
ago . Once the
BC 250 D came out it was easy to hear them. The Police and Fire are
digital but not encrypted!

I have a new pro95 scanner for Christmas, sadly i had to worked12 hr
shifts all through christmas
and thought asking a few quick ques to knowledgable people WOULD BE A GOOD
WAY TO do some searching..
and i did read the manual ( very confusing )... but it is not scanning like
it should, & got slammed for thinking most people would enjoy helping
newbies,
because I have 100's of time in other groups helped posters,, sorry that
your time ( for atleast one Public person)
was wasted... ( maybe from pei & i am not far away, GEEZE)
I will one way or another figure this pro 95 beast out,,,
Thanks for all that did help..

## 104. Software for BC-245

Newsgroup: rec.radio.scanner
Date: 2004-01-04 15:41:47 UTC
From: Bob <rfa5@optonline.net>
Message-ID: <%uWJb.35309$g77.8019135@news4.srv.hcvlny.cv.net>
Source record: 23444

What software to program the BC-245 is available in the Internet? Are there any free programs that are worthwhile or should I purchase one? I'm not looking to do anything fancy, I'd just like to program the radio via computer. I also have a 780 scanner...will the same programs work for that one? Thanks

Bob

Oh Agent Smith aren't you the hilarious one. Your so-called research leaves a lot to be desired, as I'm sure the many innocent bystanders in Terrys bullshit campaign that you've listed will attest to. I guess the homosexual reference post was designed to get to me? Fat chance. Maybe the guy who posted it. I would apologize to the other radiobuffs and tailgators out there if I were you, but somehow I bet that won't happen. So, I will apologize on your little behalf. It's not a crime to change ISPs and nicknames or emails on the internet. Anybody can post anything here - you take it as the gospel truth? - including disgruntled roomates and relatives. The bank robbery and shooting/heroin post? Made as a joke by a roomate that wasn't funny then and isn't funny now. You think I'd actually post that about myself? Yeah right. Didn't happen. Now I'm a gay racist trucker and dangerous huh? You have quite the imagination. Gawd, that's pathetic. Yeah right. My wife is really laughing at that one. If you knew her you'd know why that racist accusation is so funny. Next you'll be linking me to Al Queda and post that I'm hiding Bin Laden in my closet. You're a funny guy. Hey there genuis researcher, why are there no public arrest records for me for shootings and bank robberies or heroin arrests? Don't you think there would be? Why not? Because it was a flame post by someone else and it didn't happen. Other people happen to use my computer when I am out on the job, including a disgruntled relative that is longer there. Funny you didn't find his other posts about me, but I guess I should be thankful for that! You'd have so much fun with those.Your bullshit campaign is humorous to some, so, run with it there, 'Agent Smith'. You obviously have nothing better to do. Makes for juicy reading here, though, doesn't it? :) Gotta admit, you have us laughing here.

And, if you paid attention to your research, which you obviously don't, you will not find ONE post or thread in the past where I have ripped anyone off...not ONE, except for the fabricated posts in this thread. Why is that? Any complaints about me? Hmm. Nope. Wonder why? These three or four alter egos of Terrys that suddenly surfaced on this thread claiming I ripped them off for various radios - gee, why haven't they posted before about dealings with me? Hmmm. Don't you think that at least ONE of them would have posted and flamed me before? Hmm They 'all' obviously lurk the newsgroups, why wait to post about me NOW? Hmm Why are alot of the posts from the same IPs? hmmm. And why haven't they contacted the postal authorities with proof of payment and correspondence from me? Hmmm. Your research should tell you why. Because it didn't happen and 'they' aren't real. Period. Now get a life and find something else to post about, this is getting old and I'm sure the readers

are tired of the thread. I'm just glad none of my friends or family or co-workers actually frequent these newsgroups and read this crap. Your accusations and lies are in the wind and of no consequence to me whatsoever.

Going to California? Wow! You are a genuis AND you've got ESPN! Be there real soon. Would you like the rest of my itinerary? Too funny.

Amber alert?!? You are absolutely hysterical. I won't reply to this Terry/Mike/Frank/Randy character anymore, and I won't reply to you anymore, either. You're just as much of a troll as he is. Maybe you are him. Who the hell knows. This 'Terry' could be anybody, after all it IS the internet. That one poster was right - you are 'obsessive, fuckwitted and neurotic'. Most people see your little smear campaign for what it really is.

I've had absolutely enough of this horseshit. What a waste of time and energy. Unsubscribing and taking a break - who needs this nonsense...I've got better things to read and write about.

Have fun with me, folks:)

over and out

Nice work, i had most of the same as well but did'nt post.

I think u missed a couple, at least these were used in fabricated
emails to my address.

Actually, you contact the internal affairs division of the involved department and file a complaint. The FBI does not and never has had the authority to enforce local/state laws or the regulations of local agencies. They can only enforce violations of Federal laws and most criminal activity is covered by state and local laws.

>us laughing here.

I'm glad you and your wife are laughing. She is Karen the Olde English teacher riight? My so-called research took an hour. You have a motor mouth so
there were over a thousand posts to sift through. I didn't even scratch the surface of your life JD Havry. I just pulled out some posts that were
blatantly flying in the face of the goody two shoes portait you paint of yourself. Every one of those posts is verifiable as coming from you. You
weaved a tangled web with all of the aliases that you use but there is a common thread that ties them all together.
You are now saying disgruntled people use your computer and post as you. You don't want to take responsibilty for your actions. Do you know how
childish that sounds? You better get youself back to that 12 step THANG and start blaming

yourself and not everyone else. Stop smoking pot and maybe
you'll straighten yourself out. It's never too late and it will probably save your Radio Shack job. .

>
>And, if you paid attention to your research, which you obviously don't, you

>co-workers actually frequent these newsgroups and read this crap. Your
>accusations and lies are in the wind and of no consequence to me whatsoever.

I have made no accusations about you JD Havry. I have simply found posts made by you that portray you in a different light then you portray yourself.
When presented with the truth of these posts you place the blame on disgruntled relatives and roomates using your computer. I randomly picked less
than 10 posts out of the thousands I found. Isn't it funny that the few I picked were posted by some disgruntled people using your computer and not
you? And according to you the people you have dealt with who are now saying they are disgruntled aren't real and none of it happened.. I think the
evidence speaks for itself JD Havry.

Get back in the program JD. Straighten yourself out and fly right. It's not too late! Give those people back their money. You'll feel better about
yourself. It's the low self esteem that probably made you start smoking pot right? Take

that first step JD.

>>a lot to be desired, as I'm sure the many innocent bystanders in Terrys
>>bullshit campaign that you've listed will attest to. I guess the homosexual
>>reference post was designed to get to me? Fat chance. Maybe the guy who
>>posted it. I would apologize to the other radiobuffs and tailgators out
>>there if I were you, but somehow I bet that won't happen. So, I will
>>apologize on your little behalf. It's not a crime to change ISPs and
>>nicknames or emails on the internet. Anybody can post anything here - you
>>take it as the gospel truth? - including disgruntled roomates and relatives.
>>The bank robbery and shooting/heroin post? Made as a joke by a roomate that
>>wasn't funny then and isn't funny now. You think I'd actually post that
>>about myself? Yeah right. Didn't happen. Now I'm a gay racist trucker and
>>dangerous huh? You have quite the imagination. Gawd, that's pathetic. Yeah
>>right. My wife is really laughing at that one. If you knew her you'd know
>>why that racist accusation is so funny. Next you'll be linking me to Al
>>Queda and post that I'm hiding Bin Laden in my closet. You're a funny guy.
>>Hey there genuis researcher, why are there no public arrest records for me
>>for shootings and bank robberies or heroin arrests? Don't you think there
>>would be? Why not? Because it was a flame post by someone else and it didn't
>>happen. Other people happen to use my computer when I am out on the job,
>>including a disgruntled relative that is longer there. Funny you didn't find
>>his other posts about me, but I guess I should be thankful for that! You'd
>>have so much fun with those.Your bullshit campaign is humorous to some, so,
>>run with it there, 'Agent Smith'. You obviously have nothing better to do.
>>Makes for juicy reading here, though, doesn't it? :) Gotta admit, you have
>>us laughing here.
>
> I'm glad you and your wife are laughing. She is Karen the Olde English teacher riight? My so-called research took an hour. You have a motor mouth so
>there were over a thousand posts to sift through. I didn't even scratch the surface of your life JD Havry. I just pulled out some posts that were
>blatantly flying in the face of the goody two shoes portait you paint of yourself. Every one of those posts is verifiable as coming from you. You

>weaved a tangled web with all of the aliases that you use but there is a common thread that ties them all together.
> You are now saying disgruntled people use your computer and post as you. You don't want to take responsibilty for your actions. Do you know how
>childish that sounds? You better get youself back to that 12 step THANG and start blaming yourself and not everyone else. Stop smoking pot and maybe
>you'll straighten yourself out. It's never too late and it will probably save your Radio Shack job. .
>
>
>>
>>And, if you paid attention to your research, which you obviously don't, you
>>will not find ONE post or thread in the past where I have ripped anyone
>>off...not ONE, except for the fabricated posts in this thread. Why is that?
>>Any complaints about me? Hmm. Nope. Wonder why? These three or four alter
>>egos of Terrys that suddenly surfaced on this thread claiming I ripped them
>>off for various radios - gee, why haven't they posted before about dealings
>>with me? Hmmm. Don't you think that at least ONE of them would have posted
>>and flamed me before? Hmm They 'all' obviously lurk the newsgroups, why wait
>>to post about me NOW? Hmm Why are alot of the posts from the same IPs? hmmm.
>>And why haven't they contacted the postal authorities with proof of payment
>>and correspondence from me? Hmmm. Your research should tell you why. Because
>>it didn't happen and 'they' aren't real. Period. Now get a life and find
>>something else to post about, this is getting old and I'm sure the readers
>>are tired of the thread. I'm just glad none of my friends or family or
>>co-workers actually frequent these newsgroups and read this crap. Your
>>accusations and lies are in the wind and of no consequence to me whatsoever.
>
>I have made no accusations about you JD Havry. I have simply found posts made by you that portray you in a different light then you portray yourself.
>When presented with the truth of these posts you place the blame on disgruntled relatives and roomates using your computer. I randomly picked less
>than 10 posts out of the thousands I found. Isn't it funny that the few I picked were posted by some disgruntled people using your computer and not
>you? And according to you the people you have dealt with who are now saying they are disgruntled aren't real and none of it happened.. I think the
>evidence speaks for itself JD Havry.
>
>>
>>Going to California? Wow! You are a genuis AND you've got ESPN! Be there
>>real soon. Would you like the rest of my itinerary? Too funny.
>
>By way of Flagstaff.
>
>>
>>Amber alert?!? You are absolutely hysterical. I won't reply to this
>>Terry/Mike/Frank/Randy character anymore, and I won't reply to you anymore,
>>either. You're just as much of a troll as he is. Maybe you are him. Who the
>>hell knows. This 'Terry' could be anybody, after all it IS the internet.
>>That one poster was right - you are 'obsessive, fuckwitted and neurotic'.

>>Most people see your little smear campaign for what it really is.
>>
>>I've had absolutely enough of this horseshit. What a waste of time and
>>energy. Unsubscribing and taking a break - who needs this nonsense...I've
>>got better things to read and write about.
>
>Get back in the program JD. Straighten yourself out and fly right. It's not too late! Give
those people back their money. You'll feel better about
>yourself. It's the low self esteem that probably made you start smoking pot right? Take
that first step JD.

# 121. PACKET DECODER

Newsgroup: rec.radio.scanner
Date: 2004-01-05 03:02:04 UTC
From: jer1538a@aol.com
Message-ID: <20040104220204.15210.00002697@mb-m04.aol.com>
Source record: 23361

Does anyone know of a good freeware ham radio vhf packet decoder program that uses sound card audio ???

THANX !!

## 122. Re: Lojack questions

Newsgroup: rec.radio.scanner

This sounds interesting to me. Unfortunately, we don't have LoJack in
our area. Their service area is rather limited according to their web
site.

Here's some interesting reading:
Initial test authorization info...
http://profs.lp.findlaw.com/communicate/communicate_6.html

Indication it's activated by FM subcarrier...
http://www.tscm.com/bugfrqmfr.html

Listen to what it sounds like...
http://www.kb9ukd.com/digital/lojack.wav

Hey Frank,
That is interesting and I know of the thinking behind it. Have you or someone
you know (maybe someone in this group) ever run an antenna like that and what
are/were the results. {?}

This might sound silly, but you wouldn't need a switch box would you to switch
to each 'antenna.'?? You mean you could use this 'one' antenna and just run it
straight to your scanner and as you searched different parts of the spectrum
the cut antenna would automatically work for the part/areas you were scanning?

Thanks for any reply by anyone. :-)

**I know in SWL you'd have to use a switchbox for a setup like that.

## 125. PRO 23 INFO NEEDED

Here's the thing You should have simply stated you don't understand the manual and you were looking for freqs.
When someone who knows how to use a computer enough to find and post to news groups asks such a basic question it comes off like they are very interested in listening to their neighbor's phone calls and not the whole scanning experience at all. Post a question and name your city, county, or state and you likely will get some freqs from someone in the same area.
A simple google search would get you the freqs, I got 73 hits in 0.1 of a second !!
Do you need help programming your scanner? If you do, don't hesitate to ask! Start a new topic and say you can't understand how to do it. I suggest alt.radio.scanner and not rec. Trunking is very confusing anyone could understand a person needing help in that area too.
Will you please at least use it for more than listening to your neighbors phone calls? You don't need Ins. OK? No thanks necessary, I hope you truly enjoy your new scanner and that you have a good day.

His idea is similar to the antennas that RS and maybe others sold. The ones with "3" vertical radials one for VHF low, one for VHF Hi and one for UHF - 3 distinctly different length vertical elements - all mounted to a center plate and connected to a SO239 with ground radials to boot. I made one like it once out of a block of wood, 3 clothes hangers and 4 curtain rods - to

work in a pinch. I used 50 ohm coax. It worked quite well when made to center of the bands they were to receive. No switch box needed. L.

Thanks Steve,
Yeah, kinda knew that already. It's been years since I monitored the military freqs and I don't want to really waste five hundred entries in my piece for no action, you know what I mean.

As for the 'mobiling' and getting the freqs, that is EXACTLY what I used to do. Drive around in my black car with five antennas on it...lol...definitely 'wired for sound.' I'd call it 'booger hunting' and would drive out by the bases, got some pretty wild stories and actually backed up with video tape. :-)

**Very proud of my *Booger Hunting* nights**

Thanks 'L'......I know of the thought process, for some reason it struck me weird, guess it's late. ;-) But I like the idea of the PVC capped, that shouldn't affect anything, should it?

Yeah boy, I can see this now, about 60ft. in the air....lol.

Does the factor 234 equal full wave or partial? 3.3" sounds a might small
for 850 mhz

Sorry post was too short there!
Does the factor of 234 equal a full wave or partial wave like 1/4? 3.3" sounds shorter than I'm used to seeing. Is there any reason, other than the result being too tall of a device, to use an antenna that is not a full wave?
Or to put it another way, if I build a di-pole ant. for 850 mhz what part of a wave length will result in the best reception? Would there be any harm in tuning for 2 wave lengths? See where that question is headed, if 2 is OK then it will work on another freq as a 1(full) wave length antenna.
I seem to remember that 850 mhz was full wave at 13.8" so a half wave for 425 mhz is 13.8" too, is this right?

I'm still waiting for a refund for the R71A. I thought you would send
it so I saw no reason to complain. After reading all of this it looks
like you really are a scammer and I will never see that refund. If as
you say your relatives and roomates are using your computer and don't
like you then maybe one of them sold me this piece of crap posing as
you. Or maybe your roomates and relatives don't like you becuase you
scammed them too. In any case I'd appreciate that refund you promised
me.

## 137. Re: Antenna's

Newsgroup: rec.radio.scanner
Date: 2004-01-05 12:07:33 UTC
From: Frank <dyuazkkses@qcwzqpldrswyqwou.com>
Message-ID: <01c3d384$7b0dc670$0125250a@qcwzqpldrswyqwou>
Source record: 23376

To answer an earlier question: yes, I still use multi-element di-poles and marconis.

Rich B. <btb18n$4m3ar$1@ID-123917.news.uni-berlin.de>...
^ Does the factor of 234 equal a full wave or partial wave
^ like 1/4? 3.3"

It's roughly a quarter wave.

^ sounds shorter than I'm used to seeing.

This is a receive antenna. A receive antenna will work over a much broader spectrum than a transmit antenna will, so being precise is often wasted effort.

^ Is there any reason, other than the result being too tall of a
^ device, to use an antenna that is not a full wave?

I tried a full-wave for 800 MHz and it didn't work as well as the quarter-wave.

^ Would there be any harm in tuning for 2 wave lengths?

Probably not. I receive vertically polarized 800MHz signals very nicely with a 10 foot horizontal di-pole.

^ I seem to remember that 850 mhz was full wave at 13.8" so
^ a half wave for 425 mhz is 13.8" too, is this right?

Again, you don't need to be that precise for a receive antenna, but the formula for a quarter wave wire is:

feet=3.28*(meters=VF*75/MHz)

where VF is the velocity factor of the wire, a value usually between 0.6 and 0.95. But I doubt that you could find equipment sensitive enough to measure the difference between receive antennas with and without the VF applied. For a quarter-wave Marconi you use one of those wires, for a half-wave di-pole you use two.

What you are referring to above is the use of harmonics in designing an antenna. If one or more of the bands you are receiving are on a harmonic of another band then you can eliminate those shorter wires in your multi-element di-pole. A harmonic is an integer multiple of the frequency. For 106.25:

1 106.25
2 212.5
3 318.75
4 425

8 850

Theoretically you should receive best around each of those frequencies with an antenna cut for about 106.25MHz. But I have not had to be that precise in order to receive well. I suspect it would be like measuring sugar into a cookie mix by counting the individual grains of sugar when you could probably be off by a half-teaspoon and no one would notice the difference.

Frank

## 138. Radio Shack CAN NOT Deliver CQPSK for Digital PRO-96

Newsgroup: rec.radio.scanner
Date: 2004-01-05 16:28:05 UTC
From: deleteme200345@aol.com
Message-ID: <20040105112805.04365.00002535@mb-m29.aol.com>
Source record: 23377

Radio Shack and GRE have admitted that they can not deliver CQPSK for the PRO-96. If you need CQPSK then you should take your PRO-96 back and buy one of the BC-796/296 digital scanners.
See http://strongsignals.net for more information.
Remember that this year Motorola will be rolling out CQPSK at all digital systems they install so keep that in mind if your area is making digital changes to it's radio system.

## 139. I found a new forum

Newsgroup: rec.radio.scanner
Date: 2004-01-05 18:17:17 UTC
From: cardman01@earthlink.net
Message-ID: <f2d3f83e.0401051017.32dfc5b3@posting.google.com>
Source record: 23378
Cross-posted to: rec.radio.shortwave,rec.radio.scanner

I have enjoyed reading here in the groups but I have found a much
nicer forum that is easier to use. It is at www.activesignals.com.
Check it out because it sure is nice.

## 140. www.activesignals.com

Newsgroup: rec.radio.scanner
Date: 2004-01-05 18:26:10 UTC
From: cardman01@earthlink.net
Message-ID: <f2d3f83e.0401051026.5f1ddc07@posting.google.com>
Source record: 23379
Cross-posted to: rec.radio.shortwave,rec.radio.scanner,rec.radio.amateur,rec.radio.swap

Minutes ago I just posted my first time to a Google group and i was surprised to see it said it may take 3 to 9 hours to appear.

Well I was just over at www.activesignals.com and posted a message there and it appear right away. The forum has a neat way of threading the messages making it easy to read. Also you can set it up so all your messages end with the same signature. In my signature I have my name, radios, and location so everytime I post people know a little about me. You can search the forum real easy too. Plus there is a directory of all the members. Tell them Joe sent you.

Let's see, who to report SPAM abuse to.....

abuse@VIAWEST.NET

or

abuse@level3.com

or

abuse@earthlink.net

Ah what the hell I report it to all of them.. <BEG>

Say goodbye to your website provider. Don't worry there are hundreds of others out there.
<LOL>

Indeed, just what I figured 'Joseph', you are not really a new user of
ActiveSignals.com, but merely the owner hawking your site!

The owner is being deceptive by pretending to be
a fan of the web site. I bet he is just using the web site for
data mining and adding more gullible people to his Nigeria
419 scam list.

## 148. Pasting Data Into Win95

Newsgroup: rec.radio.scanner
Date: 2004-01-05 20:59:57 UTC
From: gary@mcreno.com
Message-ID: <b8d085c.0401051259.2e7e0a55@posting.google.com>
Source record: 23386

Sorry if this is covered elsewhere. If it is, can you point me to it?

I want to copy several hundred frequencies from the Police Call CD to Win95 for upload to my PRO95 scanner. I exported the frequency list from the CD to an Excel spreadsheet, but I'm having problems pasting the data into the Win95 channel grid.

I'm guessing this is happening because I either have data format problems or I'm missing some required fields. According to Starrsoft.com (unless I read it wrong), all I need are three columns in my spreadsheet: Alpha Tag, Frequency, and RxMode. The Win95 channel grid, however, has five columns: Alpha Tag, Frequency, RxMode, Delay, Atten, and LOut.

Question: do I need to supply values for these last three fields in my spreadsheet? If so, how are they specified?

Thanks in advance for any suggestions or directions to existing documentation.

Hey, Pinhead, yeah you! Pay frickin attention! I wasn't knocking the site! I was pointing out that after doing a bit of research, and having the fellow answer my question as to where in Ohio he lived by posting his answer with an info@activesignals.com in the header it was easy to discern that this Joseph fellow was not the new user of activesignals.com that he portrayed himself to be.

He was a shill for his site. Now, the best thing this idiot could have done was simply come in here and tell us he had a site up dealing with various radio topics and to come check it out. Simple as that.

But instead, he comes in here all 'phony baloney' like he's a new user. Bullshit! Be honest!

Did you understand that Pinhead? Or should I try to explain it further for you?

What I read here no switch box will be needed.
The radio will pick the element that is most resident to the frequency your scanner locks onto and will let you receive accordingly.

Hi there,
I am selling a Pro-26 200 channel hand held scanner, 25-1300 Mhz NO GAPS
Full 800 Mhz coverage.
In excellent condition no marks anywhere, comes with the origional box
antenna and belt clip, NO manual
Have pictures if needed.
Asking $185 plus shipping
Please e-mail me directly at rdsmith@dccnet.com
Thanks

Source record: 23397

As you make the antenna longer in relation to a 1/4 wave, two things happen. The 234/FMHz is the formula for a 1/4 wave antenna. This is not all that accurate, nor does it need to be, for VHF and up. At 800 MHz the diameter of the antenna has a large effect. For receiving purposes it really isn't all that critical. The fatter the antenna, the better would be a reasonable rule of thumb for VHF and up receiving. If your interested, I can give you the formuli for determining the K-factor. (How much to shorten an antennas as it becomes larger in diameter)

Line of sight transmissions are either there or there not, a better antenna will decrease noise on a week station, but the greatest antenna ever built will not pull in an out of range signal.

1. the impedance changes - this may require a matching system between the antenna and the receiver for maximum efficiency.

2. The angle of elevation changes, for example a very long vertical in relationship to frequency would work well only straight up! (assuming vertical polarization.)

All antennas are compromises, for local line of site to the horizon (VHF reception and higher multidirectional) it is tough to beat a 1/4 wave cut for the particular band and sloping radials to increase the impedance.

Odd. I don't see anywhere in the SS item that GRE or RadioShack have
"admitted that they can not deliver CQPSK for the PRO-96". I read that
they're currently testing it, but are not absolutely sure they'll be
able to create a "releasable" DSP firmware update.

Here's a snippet from the SS item:
While we feel confident that we will be successful, you should all
be aware that there is a possibility we may not be able to field a
version that is good enough to meet the needs and expectations of
end users.

They say they're "confident that" they "will be successful".

What did you read that says they're admitting they can't do it?

As far as I know, there are no official rules for posting messages in unmoderated newsgroups. However, there are unofficial rules floating around the internet, including....

http://www.faqs.org/faqs/usenet/posting-rules/part1/

You can also find posting guidelines for a specific newsgroup by downloading the FAQ for that particular newsgroup from one of these ftp sites... (some newsgroups have no guidelines/faq's)

ftp://rtfm.mit.edu/pub/usenet-by-group/
ftp://rtfm.mit.edu/pub/usenet/news.answers/
ftp://ftp.uu.net/usenet/news.answers/

Again, notice these are often just guidelines, not enforced or enforceable rules.

Finally, your internet service provider may have specific, enforced, rules for posting messages in newsgroups. See the terms of service for your particular ISP for more details.

> Save your fingers next time and stay off the keyboard.

I was answering his question... I DO NOT KNOW if the truckers I heard were using linears. HOW THE HELL WOULD I? NOR DO I CARE. ANY ONE CAN ASSUME they do, it doesn't make it so.

As to staying off the keyboard, MAKE ME. I'm here for as long as I choose to be. IT IS PRETTY DAMNED BAD when a person can NOT initiate a reply based on what they have experienced from a unit when a question was asked, to be jumped on, called a liar and so on. YOU need to get a life. I HAVE received CB on my PRO 95. One guy suggested he could receive a 5 watt CB no less than I believe it was 100 yards. I had better luck. That is ALL I was trying to say. Then he asked or someone did, if I worked for RS to say such things. NO I DON'T. If you don't want to believe any of my report - that is fine. I DON'T CARE! I can't prove it to you nor can you disprove what I've said. MOOT ARGUMENT! G.W.

No. All signals from all elements are sent to the receiver. With a transmitter, the signal will be sent to all elements but most of the radiation will occur from the most resonate element.

Frank

Would you not agree that the element that is closest to resonance is also the best match? With that as a given more signal is derived from that element.

The radiation reception angle would also be lower. For example 2 elements, one cut for 50 MHz and the other at 800 MHz. The 50 MHz element would appear as a long wire on 800 MHz and would receive only signals directly overhead.

On frequencies above about 25 MHz, the best transmitting antenna for a purpose is also the best receiving antenna for that same purpose.

The largest current will flow in a resonant antenna. We are interested in developing the signal in microvolts across the fixed input impedance of the receiver.

E=I/R meaning voltage is equal to the amount of current divided by the fixed resistance of the receiver input. Increasing current then results in increasing voltage, the holy grail to hear somebody. Note that ALL receivers are characterized in microvolts required for a specific S/N ratio.

The other off resonance elements do not develop the necessary current levels. They don't hurt anything, but are no real help. Ergo an element for each band, either cut for a band or electrically cut by traps is a good way to go.

Didn't mean to get so long winded...

^ >No. All signals from all elements are sent to the receiver
^
^ What is the sense in building that antenna? Is this worth the
^ time?

It is true with ALL antennas. An antenna translates RF energy to electrical energy, regardless of frequency. Frequencies that are close to resonant with the antenna are more easily translated so their presence in the resulting electrical signal is stronger. It is the receivers job to isolate the desired frequency from the electrical signal.

Frank

## 194. Re: Antenna's

Source record: 23284

w4jle <btga0d$7isb$1@news3.infoave.net>...

^ Would you not agree that the element that is closest to
^ resonance is also the best match?

No. Your question is phrased as a negative so my negative answer is an agreement with the context of the question. I do not, not agree.

^ With that as a given more signal is derived from that
^ element.

Agreed.

^ The radiation reception angle would also be lower. For
^ example 2 elements, one cut for 50 MHz and the other at
^ 800 MHz. The 50 MHz element would appear as a long wire
^ on 800 MHz and would receive only signals directly overhead.

It works well. I assume you modeled the antenna with a software package and that you used a vertical orientation. I use insulated wires that are separated from each other only by the insulation. The wires are soldered together at the BNC connector.

^ On frequencies above about 25 MHz, the best transmitting
^ antenna for a purpose is also the best receiving antenna
^ for that same purpose.

Graphically, the difference is like the difference between a 200m flagpole and a 200m building. They both reach the same height -- the height representing the "best" reception -- but the building covers a much greater area, with the area representing the usable signal. In this analogy, the flagpole is representing a transmit antenna and the building represents a receive antenna.

So yes, the best transmit antenna is also the best receive antenna but the receive has a much range that it is "best" at.

^ The largest current will flow in a resonant antenna. We are
^ interested in developing the signal in microvolts across the
^ fixed input impedance of the receiver.

The ability of an antenna to receive is irrespective of any electrical or electronic equipment attached to it. An antenna captures electromagnetic radiation and, if there is somewhere for it to flow, converts it to electrical energy.

^ E=I/R meaning voltage is equal to the amount of current
^ divided by the fixed resistance of the receiver input.

That's E=I*R.

^ Note that ALL receivers are characterized in microvolts
^ required for a specific S/N ratio.

The ratio of desired frequencies to undesired frequencies.

^ The other off resonance elements do not develop the
^ necessary current levels.

That applies only when transmitting. When transmitting you are applying a single frequency (plus and minus the bandwidth of the transmitter) to the antenna system. In this case, the element that is most resonant will translate most of that signal.

In the case of a receive antenna, the antenna is receiving ALL frequencies and those that are close in wavelength to an element are received at a greater level.

Frank

>Can I use a standard TV splitter to feed a signal from my discone on the
>roof to two separate scanners ? Guess I will need to preamp the signal
>before the splitter ?

When I had two scanners, I just bought a "T" adapter, plugged the coax from the antenna into it, then ran short lengths of coax to each scanner and it worked fine.

>

Radio Shack makes a nice antenna if up plan on mainly listening in the
800Mhz range. I bought one for my bc245xlt. It is at:

http://www.radioshack.com/product.a...t%5Fid=20%2D283

For trunking so far there is not. For conventional scanning there are
many optionals. What kind of scanning are you thinking of doing?
--
While your at it check out my new site at www.activesignals.com
It has a forum board for discussions of shortwave, amateur, and scanner
radios.

Let me try this link again.

http://www.radioshack.com/product.asp?catalog%5Fname=CTLG&category
5Fname=&product%5Fid=20%2D283

If the link does not work it is catalog #20-283 sells for $14.99

Description:
Designed specifically for 800MHz reception, this RadioShack Scanner
Antenna is ideal for monitoring 800MHz trunked radio systems used by
police, fire and emergency services.

Universal Radio sell a splitter that you need.

http://www.universal-radio.com/catalog/preamps.html

Check out the SP-1 or SP-3

You will get some signal loss with just a "T"

Hope this helps

## 206. FA: 800MHz Antenna- Disguised Decal- Great for mobile trunktracking

Newsgroup: rec.radio.scanner
Date: 2004-01-07 19:31:29 UTC
From: pm1072 <pm1072@netins.net>
Message-ID: <bthmif$a8a$1@news.netins.net>
Source record: 23296

FA: "The Freedom Antenna" from Antennas America. 800MHz Antenna- Disguised Decal. 3dB gain. 806-866MHz. New In Box. Installation instructions/manual, antenna, and coax (no connector) included.

This would be a great antenna for mobile trunktracking. The antenna is virtually invisible once mounted on the inside of your windshield. Stay covert and protect your equipment from thieves or vandals by using this antenna.

For further information, please visit the following link:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3070441418

Thanks!!!

Ah yes, we really do trust you and all your alter egos. When someone starts the slagging match posting with multiple posters using the identical IP address (i.e. the same poster), then I get suspicious. Then when they get smarter, and start using the more anonymous google posting service with a couple of "agrieved" customers, then I do get majorly suspicious.
I for one am getting sick and tired of your shit. IF you have a legitimate case - which I personally doubt - then take your information to the police or appropriate authorities instead of spamming this group. To me it strongly appears that you yourself are the liar and thief, so put up or shut up. In other words, take your personal hate program away from here, piss off and stop spamming this group.

I have a Radio Shack Pro-43. My 3 button was not working on the keypad so I disassembled and cleaned the circuit board and the back side of the rubber keypad with rubbing alchohol. Now most of the keys do not work. I thought I was cleaning gunk off the contacts when I probably cleaned some type of conductive gel off the keypad.

Does anyone have any experience or knowledge on this problem?

thanks

>You will get some signal loss with just a "T"

I don't remember if the original poster mentioned frequencies and distances,
but for listening to local stuff like police, fire and EMS, a "T" connector
doesn't have enough loss to make a difference.

The stuff most companies use on these pads is similar to the consumer product commonly called "Liquid Solder." There were two varities, one that requires heat and a flexable one that doesn't. Obviously, you don't want the one that requires heat. Sadly, the non-heat flexable stuff is almost impossible to find anymore (it's also hard to use - hard to spread evenly over the surface). But I've found a fairly good alternative. The pens used to repair traces on circuit boards contain conductive inks that seem to work fairly well on flexable pads. Radio Shack has one called the "Greg CircuitWriter" conductive ink pen (item 910-3890, special order only). I've never used this specific product but, if it's typical, put two coats of this (giving each coat time to dry before the next coat) fully over the center contact of each pad, being careful not to get it anywhere else on the pad. This should last almost as long as the original material and can be cleaned off and replaced if necessary. By the way, if you do find the flexable Liquid Solder, make sure to use only one very thin coat and spread it evenly. Good luck.

Because it was so easily confused with the 10-code, most have replaced the
old 12-codes with the new "signal" calls.

Not a bad scanner, but it would not be my first choice. To begin with, Alinco support is one of the worst in the industry, in my experience. The DJ-X3 does not have any trunking, or digital capability, which may, or may not, limit your listening oportunities, depending on your area, and interest. It's over priced.

Bill Crocker

You could order a new keypad from RadioShack. RSU part
#10789808 - cost is $11.26 + $3.50 S&H + sales tax. I
ordered one on 12/23/03 and it arrived 01/02/04.

If by Tee, we are not talking about s proper 2 way splitter, the loss at certain freqs can easily be 20 dB or higher. This would be where a coaxial line to the other radio appears open and is also a 11/4 wave electrically- this then appears as a short at the Tee. In addition, phase noise, and L.O. leakage from each radio can be impressed on the other, raising the noise floor.
This is very poor engineering practice- and not good amateur practice.
CATV/MATV splitters usually have good preformance down to HF; i.e. insertion loss, splitter balance, and port-port isolation.

73,

Dale W4OP

Sheesh, just buy the keypad for 8 bucks or whatever, and pay someone 25
bucks or so to do it. Takes like 10 minutes. I probably have done,
without exaggerating, about 100 of them. One guy is on his 5th or 6th
pad. I think his 43 isn't gonna be around much longer, it's in sad
shape, but with the use it's had, it deserves a nice retirement.

BDK

common problem,
use rf nickle screening spray & a cotton bud to replace the 'tit' (quite
cheap for a big can)
or rearwindscreen heater repair paint
but very expensive for a little bootle the size of nail varnish

Hi all,

I need the radio frequencies for the following agencies --
specifically covering the Golden Gate Bridge area:
1) Golden Gate Bridge Patrol
2) Police
3) California Highway Patrol
4) Coast Guard
5) Sheriff
6) Ambulance

Thank you.

Excellent! I work in the area! I first heard about this on the news this morning, driving into work, on 89x (88.7FM). I was laughing so hard I almost hit the curb! This is halarous. Sounds like something I would have done in my younger days. I did prank the walkie-talkies at Mott High School, in Warren, Michigan, back when my son was attending there. That was good for a few laughs!

Dale Parfitt <q0eLb.37530$R_4.4083@nwrddc03.gnilink.net>...

^ If by Tee, we are not talking about s proper 2 way splitter,
^ the loss at certain freqs can easily be 20 dB or higher.

^ This would be where a coaxial line to the other radio
^ appears open and is also a 11/4 wave electrically-

Do you mean the frequency that the length of the patch cable is electrically eleven-fourths waves? If so, then just keep the length of the patch cable less than:

300/FREQ*11/4

So for 868 MHz:

300/868*11/4=0.95m

A little shorter than a meter. No problem. Just use the formula on the highest frequency you receive.

^ In addition, phase noise, and L.O. leakage from each radio
^ can be impressed on the other, raising the noise floor.

I've been running multiple scanners on an antenna for many years now and I have not noticed ANY additional noise and no apparent local oscillator trouble. The only problem I've observed is minor signal loss that is only apparent when receiving very weak signals.

^ This is very poor engineering practice- and not good
^ amateur practice.

No, good amateur practice is to buy the most expensive antenna system you can afford -- for transmitting.

^ CATV/MATV splitters usually have good preformance down to
^ HF; i.e. insertion loss, splitter balance, and port-port
^ isolation.

Thanks! But don't they come with F-type connectors? The loss from BNC to F-type adapters that would be necessary would probably nullify any benefit.

Frank

great story.
years ago in the uk when usa am cb first reared it's head here in the mid 70's
many national petrol stations had 'just' gone over to the new 'self-service' pumps.
they had a pa system to help people use it.
we used to sit behind one station & 'key-up' with various comments that came over rather clearly on the system due to poor isolation/breakthru.

hehe the fun you can have with rf breakthru etc

good one.
I think my best scanner realted prank was me and a friend were listening to
cordless phones and someone on their block ordered a pizza from
Dominos,with pepperoni and xtra cheese.
,After he hung up,an idea flashed through my mind.
I asked my buddy what dominos number is (since all people in the
neighborhood would be calling the same dominos) So I called and said 'Yeah
this is Jim,I just ordered a large pepperoni pizza for xxxxxx street - I
was wondering if you can make that green peppers,pineapple and xtra
anchovies instead',to which they replied ..'No problem!.'
You shoulda heard that guy call them back and cuss them out..Saying 'Dammit
I hate anchovies ... Why the hell would I order xtra anchovies !!'

Hey guys, thanks for the input. With your help, I checked other options I hadn't thought of and found what I needed. There is a kit "rubber key pad repair kit" by IT chemtronics. part number CW2605 for $10.89. It sounds exactly like I need and if you want follow up information after I try it, email me at barney466@hotmail.com

thanks again.

ok, here is a question. my keypad quit working on a pro 39. i tried to clean the tips off a little on the keys themselves. then i used a pencil eraser on the pc board to clean it off the contacts a bit. i had seen somewhere, that was good to do. is it? when i tried my scanner again, most of the buttons work, but like 3 of them. 3 that had worked before! did the eraser cause harm? how can i counteract that? as to the key pad, i've been checking this thread out, so will follow along with the tips as shown. btw, was told i can't get parts even keypad for the pro 39 as it is able to be modified to cell and some stupid law prevents the shack from selling parts or repair manuals for those types of scanners. is that radio shack bs or what? tia....

never been able to get a new 39 keypad
had mine since it first came on the market & have to do the 'rf screening'
tip about once a year.
as for the 800m mod
you have already seen the diode row below the keypad.

here is the mod

PRO-39

Radio Shack Pro 39

TOOLS NEEDED: Fine-tipped soldering iron, desoldering wick,
small Philips screwdriver, long-nosed pliers, rosin-core solder.

(1) [Turn off your radio. Removing the batteries when the radio is ON can
erase the memory! ] Remove the battery door, holder and [battery
pack] from the bottom of the radio.

(2) Remove the four screws from the back of the scanner and carefully lift
the back off.

(3) Unplug the two wiring harnesses at their connectors and remove the six
bright colored screws that hold the circuit board in place. Unsolder
the ground wire from the lower right corner of the circuit board.
Unsolder the two wire connections from the BNC antenna connector at the
board. Carefully lift the board (grasping it near the Molex connector)
and set it aside.

(4) Remove the two bright colored screws from the next circuit board.
Carefully unplug the two-wire connector [and remove the board, as I
recall]. Unsolder and lift the rectangular metal shield exposing
the diodes.

(5) Carefully unsolder and remove diode D6 only; this will restore the
missing cellular frequencies which can be searched in appropriate
30 kHz steps.

This completes the cellular restoration. Reverse all procedures
to reassemble the radio and test it by entering any frequency between
869-894 MHz. [If you are as lucky as I was, the memory will still
contain your other frequencies! ]

Curious about the other diodes? D4 would enable 68-88 MHz
coverage, but deletes 30-54 MHz; D5 (present) allows 800 MHz band
operation; and D7 would make cellular spacing 12.5 kHz (incorrect).

I don't know about Eastern Canada but certain jurisdictions in the NW
USA and Canada use 12 codes. Here is the State of Oregon 12 code used
by State Police & Government and certain cities and counties.

thanks for the information. i've never done the mod yet. if the unit isn't going to work, i'm not going to bother with it. i'm wondering since cell is going digital now, if they'll loosen their grip on the philosophy of not selling parts and service manuals for those types of scanners. so far as i'm aware, scanners like the 39 and those in that era aren't able to receive the digital cell calls, so i can't see where the problem would be. sm

Little typo on the coax length- should have been 1/4 electrical wavelength- you have to take into accont the velocity factor.

Although I have not done this recently, I think I can safely say that the loss in a pair of F-BNC connectors would be well under 0.5dB at 800 MHz.. I can put a pair back to back on the network analyzer and confirm this if anyone is interested.

That's alright, you ought to see what happens when you order a pizza and tell the order-taker to deliver it to the police dept. I used to be a dispatcher, and trying to order a pizza or sandwich delivered was almost impossible. They just wouldn't believe that it was a legit order.

Technically, they may not be doing anything illegal. I recall some of those fast food radios are in the 31MHz area. A normal C.B. radio, in close proximity, could easily wash over those radios. Legal power C.B.s used to get picked up on T.V.'s, and P.A. systems all the time.

Why would this prompt more legislation restricting radios and scanners? Scanners don't transmit, and they already have enough adiquate laws concerning transmitters. New ones won't solve anything.

I think it's refreshing seeing todays youth having good clean fun, and a sense of humor!

In Nebraska, my hometown use to activate the tornado and civil
defense sirens using a series of tones that were transmitted over
the regular police channels.

I built a small 10 milliwatt transmitter to that frequency, recorded
the tones when they tested them, then would drive by a siren and play
back the tones. Sure enough, I could set off the tornado sirens.
Not city wide, of course. People sure would come out and look around
when the tornado sirens were going off in January with snow coming down.

^ Little typo on the coax length- should have been
^ 1/4 electrical wavelength- you have to take into
^ accont the velocity factor.

Still not a problem if it affects only one frequency. Just make sure that the patch cable is a quarter-wave on a frequency we don't listen to. For the Radio Shack scanners which receive down to CB, a length of 2.8 meters or longer will avoid the problem altogether.

Frank

Truth be known, with all the publicity, that Burger King is probably doing
record breaking business now! Not everyone takes these things so serious.

I am looking for an online source for antennae and crystals for the RCA Four Band Varactor Tuned Model No. 16S400. My unit is missing both antennas. Where can I get these items on-line. For a picture of what this scanner looks like, go to: http://scanpix1.home.att.net/Misc/RCA16S400.jpg Thanks!

> Bill Crocker

Must have proved quite interesting in the first few minutes...what
time of day was this? I'm in Sterling Heights, though I only had the
scanner on last night for about an hour. Good freq. though...Sheriff
provides a lot of coverage all over the county.

Scott

469.3375 - 464.3375
469.3625 - 464.3625
469.3875 - 464.3875

Headset/Speaker frequency pairing for ISM band Wide FM (3M Headsets):

Speaker Headset

920.0125 - 903.0125
920.0250 - 903.0250
. .
. .
921.0000 - 904.0000

. .
. .
921.9750 - 904.9750
921.9875 - 904.9875

Headset/Speaker frequency pairing for ISM band (HM Electronics):

Speaker Headset

902.0125 - 926.0125
902.0250 - 926.0250
. .
. .
903.0000 - 927.0000
. .
. .
903.9750 - 927.9750
903.9875 - 927.9875

The most common frequency pairs to check are:

30.8400 --- 154.5700
31.0000 --- 170.3050
33.1600 --- 154.5150
33.4000 --- 154.5400
35.0200 --- 154.6000
154.5700 --- 170.2450
154.6000 --- 171.1050
457.5125 --- 468.4875
457.5375 --- 468.3875
457.5500 --- 467.7750
457.6000 --- 467.8250
461.0375 --- 466.0375
460.8875 --- 465.8875
461.0875 --- 466.0875
469.0125 --- 464.0125

This list covers most Fast Food chains across the entire US
and parts of Canada.

Bill, youre too reasonable. Dont you know that today, if you dont like
something, youre supposed to bitch and complain until a new law is written?
There is a whole world of bitchers and complainers who are not happy
when others are. They want everyone to feel bad just like they do.

I have buy on dec 5 a IC-R3 used at the price of 479.00, I have received a confirmation from them for shipping and as my credit card was billed but no amount so I figure it was the autorized amount by me of 479.00. Then 2 days after I have receive an Icon 2001 destinated to a BC ham. I phone radio world telling I was shipped the wrong item, but they tlod-me to ship the customer transmitter and they will send-me another unit and at no times someone tell-me I will be charged, after all they were wrong not me plus I got to ship back the other unit. Then 2 days after I received the IC-R3 with a an invoice on the invoice there is an amount of 598.00 so I phone to radio world 2 times (got the proof on my cell phone bill) but it was the recorder so I leave a message saying I did not want to pay 598.00 for that I have buy a receiver at 479.00. Then 5 min after I phone I look on the bill they send with that receiver it was wrote: ''paid by visa in full Inv 179308 customer was sent wrong item transaction approuved as per Angello so I figurer they say it was charged at the original price of 479.00 so I phone back and leave a message on their recorder saying I understand they charge-me 479.00 so I will keep-it. Now the second unit was billed on 11 of december, so from the time I receive the radio till the 5 of january I fgure I have pay 479.00 for that receiver. On jan 5 I receive the slip from radio world at the amount of 598.00 so I have send an email and phone also, saying they take their time to let-me know the price was not what I expected. They offer-me to split the difference wich I have refused not much because I did not want the radio but because inside I feel something worng was done to me and my trust in Radio-World was broken. Anyway I have offer to keep-it at the original price I was supposed to pay 479.00 they refused. But they give-me an autorisation for return the receiver in a new condition with original wrapping (it is hard to have a plastic on a radio and keep-it so it was a plastic missing and a piece of foam or whatever but the original box, warranty, manual all was there. I have take pictures of it, and having someone with me when pakaging plus the post officer was show the boxing inside the the shipping box. Now they phone-me this morning saying that radio was not new, some original wrapping was missing. I told the guy I knew they will find something to not refund-me and told him I did not care if they keep 50.00 (so I guess I did my share). Now my english may-be bad but there is one thing shure, when you buy from them be aware the price may not be what you think it will be and second they will do everything to refuse-it I have copies of emails sent, copy of the original email saying 479.00 wich came with a confirmation from them, second I also got an email giving-me the autorisation to return because they excuses for the series of problems they give-me (bull shit, they will not refund) I have also pictures of the radio when boxed......

How do call someone who charge-you a different price that what you thik you have pay?

news:laaLb.9670$ZF7.106282104@news-text.cableinet.net:

Nothing like merciful people to help assuage your anxieties about your
new purchase.

I had problems with my Yaesu VX-5R transceiver. When it went through
Yaesu for repair, they finished it quickly enough, but they were moving
their facility and could not ship it until the computer was online again.
I was incredulous, they had the repaired radio, and they knew where it
was, but could not ship it until things were convenient for them. Ahem.
Yes, I see. Anyway, I talked to a manager and told him that I think that
their inability to handle this technicality reflected negatively on
Yaesu. He said "yeah, well I don't". Nice, I'm the customer and I get an
arrogant unmotivated manager. Hopefully this manager has sufficient money
to purchase the bulk of the radios from Yaesu, apparently he doesn't feel
that the customers are necessary.

I had problems with my Uniden radio and called the parts department. When
it was apparent that they weren't really trying to solve my dilemma, I
asked for the person's name that I was speaking with. She replied "you
don't need to know my name" and hung up.

So much for support from other manufacturers.

Of the radio, I have the Alinco DJ-X10T. Superb. I also have the Yaesu
VX-5R Transceiver and the Yaesu VR-500 Receiver.

For reception purposes, I prefer the Alinco over the other 2. I live in
an area saturated with intermod interference, and the Alinco, when
properly set up, functions with little to no problems from intermod. The
Yaesu VR-500 is the next best performer. The Yaesu VX-5R is absolutely
consumed by intermod.

Of the model that you bought, the Bug Detector and Audio Descrambler look
like interesting features, post your success with these. The SMA antenna
is a pain in the butt, it makes it a little more difficult to use other
antennas on the radio, but adapters are available.

Good luck and enjoy.

Burger King (drive-thru) customers told: 'You are Too Fat to have a
Whopper'

Police believe teenage pranksters are hacking into the wireless
frequency of a US Burger King drive-through speaker to tell
potential customers they are too fat for fast food.

Policeman Gerry Scherlink said the pranksters told one
customer who had just placed an order: "You don't
need a couple of Whoppers. You are too fat. Pull ahead."

The offenders are reportedly tapping into the wireless frequency
at the restaurant in Troy, Michigan. Police believe the culprits
are watching and broadcasting from close range.
Officer Scherlinck said the men are telling customers who order
a Coca-Cola that, "We don't have Coke." And when the customer
asks what they do have, the hacker would say: "We don't have
anything. Pull ahead."

But what has managers concerned is the profanity the
hackers are using, according to police.

A drive-through customer has told police
if he had children with him in the car and
someone used profanity, he would have been upset.
Burger King franchise owner Tony Versace issued
the following statement in response to the
incidents: "We apologise to our customers who've
been insulted by the use of this drive-through speaker."

Management at the fast-food restaurant are reportedly
trying to change the radio frequency used for the
(drive thru) speakers.

It works. Of course, as others have stated, if you can get a replacement keypad, that is the easiest way to go. But recoating the pads may be the only hope for older scanners with no replacement available. Take care.

Actually, they're probably speaking the truth! There are a lot of overweight people in the area. I know, I'm one of them. In addition to that, it's fact that Burger King food is very fatning. Maybe they feel they're providing a public service! People need to lighten up, and regain their sense of humor. The whole world is too uptight!

LOL!! I have seen a couple that were really "fixed good"! If they have
to take it apart anyway, and that involves soldering/unsoldering, why
not fix it half ass, with a lot more work, and have to do it again in a
few months, if it even works at all?

I took the ones that were fixed too "good" to save, and kept them in a
pile, knowing that one day, a dead one with a fried CPU would come
along, and I would get a "free" 43 out of it. I ended up getting two.
One was almost mint, it got nothing but a buzz when turned on, with a
bizzare display. I got it for 2 bucks at a neighbor's garage sale. The
other one was slightly more used looking, but in really good shape. I
got that one at a pawn shop for 10 bucks. Someone had fixed it "too
good", and broken a trace where the diodes are. Looked like someone used
a soldering gun.

I sold the "mint" one a couple days later for 125, and the other one I
gave to a broke friend when his Bearcat 205 died of old age. Both have
had keypads since then..
```

[clipped]

Actually, they're probably speaking the truth! There are a lot of
overweight people in the area. I know, I'm one of them. In addition to
that, it's fact that Burger King food is very fatning. Maybe they feel
they're providing a public service! People need to lighten up, and regain
their sense of humor. The whole world is too uptight!

Bill Crocker

Bottom line, really, is that the hackers don't have to be in sight of the
persons giving the order at the drive up. The low pwr rigs of these fast
food places can be heard for several blocks if one has a good mobile rig and
some can be heard as far away as a half mile on a base station antenna. It
is a simple task to hear what the customers are ordering. Besides, if the
customers are sitting in their cars, how is the prankster to know what they
look like?
If I were a betting type, I'd bet that a Ham with a modified two meter rig
was behind it since many of these places operate on low power VHF
frequencies. An enterprising Ham could experiment for a few minutes and
easily find the PL tone the food places use.
Trouble is that this is not a local law enforcement problem. They have no
jurisdiction. Call the FCC...and you know how long it takes THEM to act! It
seems like it took forever for Riley to get David Tolassi tossed off 20M.

Ah...you're getting a little off track there Frank! Besides, from what I've heard, this situation has actually been good for business!

Maybe Burger King need to enable some type of secured system, that's not so vunerable...like my Nextel cell phone, and computer have, which explains why I don't share their problems.

Bill

Look for many fast food places to use itinerant freqs. such as 154.570 and
154.600. Wal-Mart is known to use 154.570 but their PL tones vary from store
to store. 151.565 is another well used freq. but of late the fast food
places shy away from that one due to over use by others, including truckers.
Now that the MURS freqs. have been opened up for general use it is not
unusual for places such as Wal-Mart to move from VHF to the UHF freqs.
If you live near an industrial park, listen to these freqs. since many of
them use small, one watt handheld rigs for in-house comms. Listen to 454.500
and 454.550. These are commonly used as well.

Similar situation in the GMRS band. It used to be used by small business,
and security firms. Now it's being infiltrated, legally, by individuals,
for personal use. Lots of channel wars going on these days!

Bill Crocker

Hey. It IS kinda funny to order an onion burger and a six pack...then listen
to the kids ask each other, "Did you hear that?".
It brightens up their mundane fast food job and it drives the wannabe
managers nuts!
Just don't tell the Ebonics customers that they should speak English. I did
that once and the chatter was hilarious!
"You be pokin fun at me?".
No, I just can't unnerstan you.
"Whassup wif you, bitch?"
Give your order again, please, and speak slowly.
"I done tole you what I want, bitch. Unnerstan what I be saying?"
I'm sorry, please repeat your order?
"I done tole you once you mufuh bitch an' I ain't sayin' it again."
I'm sorry. I didn't understand you. What was your order?
"You bitch, I be gonna drive aroun' and come in de door an whup yer honkey
ass!"
Would you like fries with that, sir?
"You be messin' wif me, Honkey. I gonna git you fired."
Please drive around. The police are waiting.
"I gots places to go bitch. Cancel my order cuz I be outta here."

Get your credit card company involved!

You didn't sign anything so it's not legal anyway. Anybody could phone in a order if they found your card on the street. You may have to give them the $50. because you did lose the packing, but that's a bad deal because customer goodwill should allow for that amount of money.

Have you sent them a bill for your shipping and handling of the Icon2001 yet?

One thing to different next time Hold the item sent by mistake. When they get your order fixed, then you help them out by shipping it back to company shipping collect. AND always keep packing, boxes, etc. until the warranty runs out, or the bills are all settled if it's used.

Good day,

I just got a Uniden BC80XLT and can not seem to find an "Owner's manual"
on the net.

I hope someone out there can help. Can you please post a site where I
can download it.

Thanks

Crazedleg

## 307. need advice - purchasing a new scanner

Newsgroup: rec.radio.scanner
Date: 2004-01-10 17:08:35 UTC
From: alli@no-email-addy.com
Message-ID: <qbc0005uvlk3otuopj4t6aa8rthgffggcd@4ax.com>
Source record: 23197

I'm thinking about purchasing a new scanner.

The one I have now is a handheld, probably about 8 years old, Radio Shack 200 channels, 1.3GHz, Hyperscan Pro-26 with an antenna bought separately (RH77CA Diamond).

I would prefer a desktop scanner that will scan around 400 channels or possibly more. I would be willing to spend around $300 or so.

I would like the scanner to pick up the basic stuff: police, fire, ambulance, security, city, also if it were to pick up baby monitors or the occasional cordless phone would be interesting. : )

Can someone please recommend brands, model #'s?

I'm in the suburbs of Detroit (Oakland County). Is there anywhere (besides a Radio Shack), that anyone could recommend making a purchase? I would like to buy a new one a.s.a.p. instead of waiting for an online delivery. If not, can someone recommend a good online store?

Thanks in advance !!

alli

helmsman <helmsmandelete@mindspring.com> wrote in
news:2v0000dgble3r4nrua94jov5kuunnsqcrt@4ax.com:

The other day I received a "careless driving" citation from an officer that I pass every morning at around 5:10 AM. As I exited a place where I stop to get coffee, I used a left turn only lane to accelerate prior to entering the driving lane. I was cited for "driving in a center turning lane", which came shortly after the left turn only lane.

I always carry my Yaesu VX-5R and listen to the Pittsburgh Police as I head to work. (It wasn't the Pittsburgh Police that pulled me over). Anyway, had I not shut the radio off prior to the officer coming to my window, I'd probably be in jail now as a terrorist. I don't believe that Pennsylvania or local ordinances forbid me to carry a scanner, and I am a licensed HAM, so I am authorized to carry the Transceiver. Supposedly the FCC permits Amateurs to carry radio transceivers that "are incidentally capable of receiving" public service broadcasts.

Try to explain that to the police.

It's odd how often the borough officers find it necessary to "pull their guns", especially contrasted to the Pittsburgh Police, where I believe that they are much more reluctant to use their weapons. (I believe that it's called discipline). The officer in my case didn't have his gun drawn, but I did witness another borough incident where 2 cops had a car pulled over. The car had 5 geriatric women in it. One officer positioned himself at the rear of the car, with his hand on his gun. I guess traffic stops of old ladies going to bingo are much more dangerous than I believed.

Imagine what they would do to what they believed was an unauthorized monitor of police communications.

Regards

> I would like to buy a new one a.s.a.p.

When you said this, at first I though of "a sap", which might put you into the category of a Radio Shack customer.

BUT Radio Shack has had quite a few scanners over the years, many quite admirable. I believe that they now have a Digital Capable handheld scanner. It requires no additional card (as does the Uniden line, quite expensive for the card). But the price is high, since the card and price were incorporated into the unit at the same time. The Pro-96 Catalog #: 20-526 and if the link is still good when you use it, here is the diet version from TinyURL.com http://tinyurl.com/2qlmy

The radio is a Trunk Tracker, 5500 Channels, $500.

Also try AES for online orders. I have consistently received orders overnight. This is the usual shipping cycle from Cleveland to Pittsburgh, not and extra charge service. I have ordered items at 5:00 PM one day and received them the next. They have several stores, one being in Cleveland Ohio and another in Milwaukee Wisconsin. (there are other stores as well).

I have the Digital Capable Uniden 785D, which would require the APCO 25 card when I want to use the digital facility. But I have had many problems with intermod interference, as my area is saturated with Cell Phone and Pager towers. If you live in an area likely to receive intermod interference, perhaps someone can suggest another radio.

Don't rule out the handhelds though, they can be multipurpose since it's difficult to take a desktop radio to an air show or other event. We use our handhelds most often, having the Yaesu VR-500, Yaesu VX-5R Transceiver, and an Alinco DJ-X10T. None of these are trunk tracking.

Good luck.

What kind of game are you playing? You list the item, then you cancel it, then you relist it for a 7 day auction, then you stop it after 2 days and award the item to the highest bidder at that time. Do you not understand how an auction is suppose to work? I was looking to put in a bid much higher then you accepted but as a buyer I have to play the auction during it's timeframe and keep my cards close to my chest, no one serious about purchasing the item will give their highest bid 5 days before the close of an auction.

Maybe you don't care, but your actions are making me consider putting you in my list of "untrustworthy" sellers.

You might want to think of things like this when posting items FA and then changing the terms on the fly.

Roland

> opinion on this little radio? It cost ï¿½199.

The Yaesu VR-500 has weak audio and limited dynamic range. The
stock helical antenna has a performance notch near 160 MHz.
All that aside, I like the features and it draws very little
current from a pair of AA batteries. The full keypad
makes it easier to program and I prefer its BNC antenna
connector to the smaller SMA connector on other models.
It can scan combinations of memory banks versus a single
bank for the ICOM.

You can actually adjust the band plan (via tk500 software) to suit
your own preferences.

The VR-500 also has a hidden, undocumented narrow AM mode
for improved selectivity.

You are welcome to use tk500, the free, open source software
I wrote for the VR-500, though you'll have to provide a level shifter
cable.

You can get the tk500 software from http://parnass.com
I don't warrant the software, but it won't cost you anything.

I have never regretted getting my Uniden 895XLT, unless you need trunk capabilities other than the Motorola system it's a pretty good scanner. I like the manual tune feature. Think I paid about $180 for mine several years ago, don't know what the going rate is now but notice that they evidently are still available.

I got a flyer from RS a few days ago and they are offering their Pro-94 for $129 now. It's a pretty nice little scanner if you like hand helds. I don't really care for hand helds (do keep one (94) in the glove box) but pick one up once in a while when the price gets down to more than I can stand. RM~

The only way to safely enter traffic on todays busy 4 lane streets is to do exactly what you did, it's very common. Barney must have been trying to fill a quota. Good luck.

Yes I know about this customer. Yes most of this did happen
unfortunately but the only problem I dispute was the last points.
First mistake: Yes, we shipped this custoemra IC-2100H by mistake. We
shipped another customer his R-3. After shipping over 200 boxes we had
one mixup. I take full responsibilty here. We shipped his R-3 without
charging him because of this mixup.
Second mistake: He ordered a used R-3 at $479 and we shipped him a new
R-3 at $569. Getting his radio out we missed this piont as I was more
concerned that customer got his radio asap. I offered the new radio to
him for $40 off a price of $529 with full warranty or to ship out the
used radio at $479 and we pick up all the shipping charges. He declined
as he said he will only pay the $479 and we declined and I said I will
refund all his money as long as everything is returned as new.
That is where the problem begins.
Almost all internal packaging is missing. It looks like the customer
used the product and threw the packaging. When the new R-3 was received
in this condtion we called customer to mail back missing packaging and
he said this is how it got this. We offer a full refund if he mails in
the missing items or a charge of $50 (approximately 10%) restocking fee.
The offer is still there to return all missing items and receive full
refund but he believes he is correct.
If there was a little missing I would let this go due to all the errors
but the radio is in new condition but all the internal compartments and
plastic bags are missing and he should be responsible and if he new he
was not going to keep this he should have made an effort to return as
much of the original items.
Unfortunately mistake do happen and I take full responsibiilty for that
msitake. But he too must take responsibilty for his mistakes.

Please do me a favour and forward this to the usernet for us and let
others know that he can still mail in the missing items and we will
refund his charges in full.

And now you know the rest of the story ;) Seems to me The dealer tried to make it right but the buyer tried get a brand new RX for the used price. It Should have been immediately obvious that the RX he received was Brand New. They even offered him a chance to buy the new radio at a savings and for about $50.00 more than a used one. Let me see new radio for 50 bux more... full warranty and all shipping taken care of by dealer. Buyer rips open box discards packing and whines when they require a restocking fee. The $50.00 represents the extra he would pay to keep the brand new radio.

I'll bet this guy would complain that the bills were wrinkled if someone gave him a million dollars :)

Pay the extra 50 bux keep the brand new radio.

No problem. Start here:
http://www.uniden.com/store/itemdetail.cfm?item=B-BC80XLT

Click on "owners manual". Go to:
http://www.uniden.com/productsupport2.cfm?product=BC80XLT

Click on "BC80XLT". Hmmm, problem:
"Manual Currently Not Available"

Sorry. Let's try something else. Uniden says about the BC80XLT: "50
Channel Fully Programmable 800 MHz Handheld Scanner/11 Bands". Sounds
like it's close enough to being the handheld version of a BC278CLT
that you could use the 278's manual and pretend it was the right one.

If you want to listen to the Michigan State Police a
Uniden BC 796 XLT will be the way to go because MSP
us ASTOR APCO P-25 digital Motorola 800 Mhz trunking with
9600 Baud control channel data! More and more public safety
folks are going digital ,most unencrypted!
Check out this site:

<http://www.strongsignals.net/index.cgi>

<http://www.strongsignals.net/access/boards/bc296-796d/board.cgi>

<http://www.strongsignals.net/access/boards/frequency/board.cgi>

<http://www.strongsignals.net/access/boards/trunking/board.cgi>

Go to the bottom of the FREQUENCY board and TRUNK board to
look at the resources there. Check out the trunking systems to see if
they will work with the BC 796 XLT It not enough to know the bands covered
by new radios looking at the trunking systems supported is even more important!

Gary,
Once you get your new radio, check out this site:

<http://groups.yahoo.com/group/scottish_scanning_group>

And here in the States , this site is a great resources.

<http://www.strongsignals.net/index.cgi>

If you were posting from across the pond, it would help to
go to the FREQUENCY and TRUNK boards. Look down the bottom
of th boards, below the message pain, to see what types of systems are on the
air in your area.

The links to other sites, at the bottom of the boards may support
international
radio work , so look down there!

## 329. How can I read taxicab data transmissions?

Newsgroup: rec.radio.scanner
Date: 2004-01-11 08:20:28 UTC
From: xx_google@yahoo.com
Message-ID: <da5638eb.0401110020.7644e67d@posting.google.com>
Source record: 23218

A local taxi company uses a data-dispatch
system made by DDS, whose website is at:

http://www.digital-dispatch.com

The data might be encrypted, but why would
a cab company encrypt? Their data isn't
likely to be of much interest to outsiders.
So I'll assume that it's unencrypted. I'd
like to try reading the data transmissions,
as an experiment. Does any of you know
where on the web or in print I should look
for information on how to read the taxi
data transmissions?

Thanks in advance.

Too funny...and accurate. Perhaps the unemployed Turd Herders down around
Georgia could take a hint. Unemployment compensation aint where it is at
unless one is by nature a lazy no-good unemployable bum.
You know the type. Give them a few bucks each week with a booze store nearby
and they are happy as can be.
Their only bill is the $50.00 a month they have to pay the Court. Life is
grand for these low-lifes.

## 334. Help!! realistic Pro 2020

Don't know if this is the right group, but I'll give it a shot....

My mother-in-law was given a PRO 2020, and programmed the scanner, but can't hear anything but static. She has asked me if I can repair it (since I'm a former Navy RADAR tech). I think I'm on the right track here, but need some tech support since I have been unsuccesful in locating a service manual. The scanner does pick up the carrier and very faint audio/no static. I have verified this by programming in the NOAA freq and turning the volume all the way up. When I programmed in city police channel 1, all I get is static until they key up, then it goes to the very faint audio/no static, until key is released then static again. The squelch has no function at all. Also doesn't scan, but this is most likely because of no squelch. I am leaning toward the discriminator chip, has the functions of audio pre-amp, squelch, and scan. Am I going in the right direction? Any techies out there?

Jim

<http://www.tetrascanner.com/>

And if you guys like air shows:

<http://www.militaryairshows.co.uk/freq2.htm>

Hope you enjoy your new radio, this is a great hobby
once the receiver is purchased,ere isn't much more
to buy.

If your going to do much HF that is Short-wave listening ,try
adding an ANTENNA TUNER ( this gos in between the radie- long wire antenna) and
50' to 100' feet of copper wire. This will help pull in the weak stations
operating on HF!

Try this site
<http://www.dataslicers.com/DSOverview.htm>

If it's a newer system it may just ship with encryption.
The folks at the company may not want the addressees of the
fairs available to the general public or the competition. Or sensitive
package delivery traffic like medical stuff, going out over the system!

> scan around 400 channels or possibly more.
> I would be willing to spend around $300
> or so. (snip)

If you're looking to really improve your scanning capabilities, perhaps you should be looking at multiple scanners instead. With a single scanner, your returns diminish at some point as the number of memory channels increase. This is caused by two factors. First, in general, the greater the number of memory channels in a single scanner, the longer it takes to scan those channels, meaning each channel is scanned less often over a given period. Second, whenever a scanner locks onto a busy channel, you always miss what is happening on the other memory channels. With a greater number of memory channels, your scanner will find busy channels more often. But, as the scanner locks onto those channels more often, you miss more on the other memory channels.

More advanced scanner enthusiasts solve these problems by simply using more than one scanner, each focused on a specific range of frequencies. This allows any one scanner to lock on a busy channel while the other scanners still scan, insuring the user doesn't miss as much while listening to any one channel.

Simple scanners are fairly inexpensive. For example, to focus on the aircraft frequencies, a twenty or thirty channel scanner will often do nicely. If you're a real real aircraft band enthusiast, you may want two or three of these. With a separate scanner for this band, you'll be less likely to miss anything interesting on this band while listening to the police frequencies.

You could do the same for any specific group of frequencies you want to scan intensively, leaving your main scanner to cover the frequencies not covered by the dedicated scanners. Of course, that main scanner should be the very best for those times when you want to hunt down the really rare stuff.

Just something for you to think about.

>Angelo, President of Radioworld

What you have done is called "bait and switch" . You advertised a used component and then shipped a new component at a higher price. Whether it was
intentional or not is anyones guess. If the customer ordered a used component and you mistakenly sent him a new one as you claim then the customer is
under no obligation to you for anything except the $479. If that is not acceptable to you and if you want your component back then you are responsible
for any shipping charges and normal wear and tear on the item which includes throwing away the packing material. The customer believed in good faith

that he paid $479, received the merchandise and the deal was done.

If I were the customer I would write to the credit card company refusing to pay the charges and accusing you of bait and switch.

If I were you I'd forget about the $50 and be more careful in the future. If this customer wanted to pursue this negativity about your business using
the newsgroups you could end up losing business because all this negativity is being archived on Google. If someone does a search for your business
and begins seeing that people have problems with your company they are going to look elsewhere.

The FCC likely can't do anything anyway. Burger
King's drive through frequency just happens to
correspond to channel four of the license free CB
VHF band known as MURS. MURS is covered under Part
95 the same as 11m CB and FRS. Channel four is
154.570MHz. Besides Burger King I've heard Toco
Bell and the local Laser Quest game joint on the
same frequency in my area. Radio Shack was selling
2w 2 channel MURS legal radios as a discontinued
item for about $30 about 6 months or more ago.
They sold out real quick to those who wanted one
to play around with on MURS. I would guess its
just some kids with one of those radios. So long
as they are not jamming any body technically
they're are not violating any rules either. The
only thing Burger King can do is what was stated,
change their frequency to one of the remaining
licensed color-dot frequencies.

I agree that the FCC won't do anything, but I think it's because they want to
avoid that pesky interstate/intrastate issue. The BK could probably bring
harassment and/or nuisance charges under local laws provided they can identify
the culprit. Since it's a local signal, the TwistyBuster RDF should be able to
pin down the troublemaker in no time at all.

## 348. Re: need advice - purchasing a new scanner

Newsgroup: rec.radio.scanner
Date: 2004-01-11 19:40:15 UTC
From: alli@no-email-addy.com
Message-ID: <bh9300l728n5dcke1pdhmvt605sm9rbje9@4ax.com>
Source record: 23238

Thanks to everyone for their advice & suggestions!

A LOT of this stuff goes right over my head (digital ... trunking .. etc.), but I'm reading and trying to learn. : )

I probably won't turn this into a huge hobby or anything - honestly, I just want a New scanner that is desktop (is 'base' the right term?). It will Not be something portable that I would take on trips with me. I just want it, so I can listen to it at home, in the evenings for fun. (I already have an Old handheld - Radio Shack 200 channels, 1.3GHz, Hyperscan Pro-26 with an antenna bought separately - RH77CA Diamond).

I just want the new desktop scanner for home and to sit on an end table/stand in the living room. I'd prefer it to have a screen that I can program it to 'label' what frequency and name of what agency (fire, p.d., city ...) it is picking up, example:

453.800 Detroit Police

Right now, the handheld scanner I do have (which I guess, I could take it on trips if I decided I wanted to do that) JUST displays the #'s. So, for the past several years, whenever I'd listen to the scanner, and see the frequency # or channel - I would have to refer to a list and compare it to the channel, to 'try' to figure out What I was listening to. : )

I'm not having much luck find a place that sells desktop/base scanners though! I looked at http://www.radioshack.com/ under:
Catalog Home --> Phones & Radio Communications --> Radio Communications --> Scanners & Accessories

clicked on:
Metro (800MHz/Digital) Scanner

They only had Two - one was out of stock (Unidenï¿½ BC785D Digital Scanner), the other (Pro-2052 1000-Channel Dual-Trunking DeskTop Scanner) didn't look like I could add text/labels to the display screen.

I tried:
http://www.uniden.com/store/
and it seemed as if their entire stock is "like new" condition. I want something brand new, not used.

I've listened to my old handheld scanner for Many years, but this is the First time I'm researching how/where/what to purchase and I'm just

trying to figure out What I need to buy. I'd be listening to mostly Oakland County Michigan (and Macomb & Wayne County Michigan also).

Thanks again for all your replies!!

alli

No. Not my cup of tea.

According to the 44th row on...

http://www.kb9ukd.com/digital

...my target signal is 4800-baud
QPSK. I'm checking with DataSlicers
about whether their product handles
this.
```

Not likely to help as many of the MURS users are actively looking how to open "the other channels". The 150 MHz band is only a bit "safer" than 27 MHz due to the lack of much skip. Also, vendors are marketing UHF devices that are part FRS/part GMRS. Of course, it operates at *much* higher power off of the FRS channels, so guess which channels get used? I can see a future in marketing spred spectrum devices :)

>He TRIED to make it right, but it appears the customer screwed up just as much.

What are you bullshitting about and why do you take my words out of context?

What the merchant did is called bait and switch and as I mentioned, whether it was an honest mistake or a malicious act doesn't change the definition.

The merchant is at a disadvantage from a collection standpoint because he is ultimately responsible for the screwup. The customer was acting in good
faith when he received, opened and used the compoinent he believed he purchased for $479 just as any normal consumer would do.

If he thought for a moment that he may be charged the full price for this component or that there was any question that he bought and paid $479 for
this compoinent do you think he would have used it more than a few times or thrown the packaging away?

He acted in a normal manner.

The merchant should have settled immediately especially since he knew he screwed up the entire transaction from the beginning. It only appears now as
if the merchant is being spiteful trying to recoup any losses associated with the whole clusterfuck that he caused.

He is penalizing this customer who continues to be victimized.

Go here and you can get the Order Number
for the service manual: Call 1-800-THE-SHAC
http://support.radioshack.com/support_electronics/doc21/21316.htm

Most scanners pack the Disc/Squelch/Mute/Scan Control all
on the same chip. By looking at the parts list, it looks as if
our scanner uses a TD62501P for this, but without the service
manual, I cant tell. A google search for this part didn't find any
free datasheets. Good luck.

A company in Batesburg, S.C. called A.I.E. used to sell tone decoders, and would also do installs of the discriminator and memory interface.

They commonly used cat 5 connectors for the line between the decoder and the scanner, with female connectors mounted about where the one is in the picture.

I have two 2006 scanners and two A.I.E. decoders - model TCF4 - mated at home. Both were done the same way. A.I.E. sold me both the scanners and decoders, so all I had to do was place the order, and they were shipped ready-to-use.

If the connector in the picture was not used for an A.I.E. decoder, I presume it was still used for a discriminator tap.

Jeff Multer
Fort Mill, S.C.

What a crock. Come on guys. Is everything illegal now? The dang cops said they would give them a ticket, probably for nasty words talking to customers, I am guessing.
I hate that in America, we are turning everthing into a law violation. What happened to ignoring things you don't like???? We even expect our law enforcement officers to FIND a way to bust people we don't like even if there isnt a clear cut violationl....this is getting very nutty.

Hi All,

If anyone has a Motorola XTS3000 Programming cable available for sale, preferably in Australia as I need it quickly, could you email me with a price including shipping (Express post if in Australia or can arrange overseas purchase if I can receive within 10 days at a reasonable price). Please email me at the below address.

Beanstalk@bigpond.com

Thanks in advance,
Richard.

As search on Ebay came up with this:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3070192656&category=4671

Buy it now price of $59.99 US.

The guy's got at least 3 of them for sale.

Just took a trip from Maine to NC with the BCT8 in the car and it
picked up both conventional and trunked fine,very good RX but the
AUDIO lacks something to be desired.

(There is a fix for the 780/785D on the AUDIO but I don't know if the
BCT8 would be the same)

The software they give you is basically useless and they don't give
you a mobile bracket.

also just for your info,was using a Larsen mag mount antenna.

another thing is depending on where you live your trunking might be
DIGITAL.

WMD threat exaggerated: report

http://www.theage.com.au/articles/2004/01/09/1073437472186.html

"In that process they changed something that is an opinion
into a fact, and they consistently did this," he said at
a briefing on the report.

From Johnny

/ / ..then call
themselves heroes in my name after the carnage for
blindly dropping bombs from the sky on everyone.
Heroes? More like typical american nazi cowards,
willing to murder their own families as themselves, than
bravely put their lives on the line standing to protect
Justice as freedom for everyone, as to what true
bravery, and heroism has always been. While the world
watched CNN broadcasting, American nazi teen soldiers
celebrating joyously in contempt for God while singing,
right after the unreported dropping of thousands of
pounds of bombs on everyone in Afghanistan, body parts
everywhere, while knowing directly as individuals, every
single, there was no evidence offered that anyone there
was responsible for any crimes whatsoever, including the
Afghanistan women who worked for the newspaper, but for
to be victims of fanatic nazi american barbarity,
disguised as human, like bush almost gets away with as
pure evil deceived, now completely impossible to
believe. Oh, by the way, I am now taking new
memberships for al-Qaida.

As I say, there isn't a real man in the
American Marines, or the Army willing to protect America
with their lives, for if there were, rumsfeld and bush
would be rightly dead for the murders continuing against
those they know as innocent. As even with their
continuing threats against more innocent people as
American lives they brag to throw away as just soldiers,
as all these other nations they try to make ready to
sacrifice millions for, while propagandizing that our
Justice we need not believe in to grant us freedom from
oppression, nor evidence no longer a requirement to
convince us who is evil, and who is not lying. Nobody
deserves to be murdered, but a murderer escaping to

recommit. \ \

Any being would not want to be deprived the rights to
living, by living to not deny the same rights of others.
(First commandment is a fundamental of understanding

space-time reality, as it pertains to the politics of an actual sustainable World, indivisible, and eternal.)

To have US exercise denial of rights granted through the protections of Freedom, asks naturally for reason to being ones own commitment kept. To leaderlessly faith in tyrant bush's faulty public judgement to committing US to indiscriminate murders so he can rob Iraq of all her riches going nowhere he silently contends as an illiterate demon liar, exposes Your Mr. bush Jr. as unfit to preside in Anyone's name. (Walla: Americans did not elect the monster who openly with 9/11'd slush-fund-america, finances the oppression of our families in Uzbekistan, and Wahabbi Saudi Arabia, unreported by our CNN and CBC as revealing.)

Iraq reconstruction's bottom-line
http://www.asiatimes.ru/atimes/Middle_East/EL25Ak05.html

/ / So there's money; it's just not going around. And here perhaps lies the solution to the mystery of how the world's superpower and the world's biggest corporations can't even begin to put Iraq together again after almost nine months: The reconstruction is less about reconstruction than about making the most money possible. \ \
snpd

I hate bush with everything I am, or ever will be as Human.

Who will care for your life in corporate america, where, with a silence of contempt through censorship, rob themselves as ungodly and criminal degenerates under the bushite doctrine of enslavement of their species? Know, that it is NO SECRET, Eason Jordan of CNN knows, (as too, Robert Habinovitch of CBC does too), about General Ahmad, and demon bush's 9/11 strategy existing in 'top secret' Presidential directives, written two days prior to the event of murdering thousands of Americans, a plan to blame Laden on as innocent of to secure invasion of Afghanistan for Enron. (Laden would plead innocent naturally, the Taliban would vote against persecuting the innocent until proven otherwise as Clinton learned, while demon bush and cheney would privately plead to have our Police work halted, to attempt their getaway.) Both, Jordan and Habinovitich have refused OUR staff since the event of reporting the facts for our judgements, and side instead with not reported reasons like those given by irrational and dumb evil Walter Issacson, that CNN is forbidden to PUBLICLY report on the murder of innocent children by traitor tommy franks, because, you should remember how many people died in New

York City. (Why not just murder more New Yorkers, they're closer?) Sure, it's stupid, dumb, and as evil as it comes, but Walter dictated policy, you as a CNN staff member had to comply with, or face the consequences of termination. These bushite censors of our top priority news interest stories are our enemies as traitors to the Human cause. Jordan, nor Habinovitch will give no reasons for publicly denying our police agencies protection, (PHONE THEM UP AND ASK THEM SOLDIER) hoping we can't see them not doing our jobs to protect Your freedom, while leaving the outstanding investigation officers left in the bind, on hopes bush'll disappear them, like they no doubt have plans to get those loose ends who directly know of their treason against God's America, and all that is Honorable and Just in our World.

Kill the demon antiChrist, Your Mr. bush Jr. American Patriot Soldier, and be loved by all as Saviour.

--

Where's the NRA on whoring as bush bitches?

American soldier, Your one true loyalty should be to America, not traitor bush to rob ourselves from. Remember: bush, he ain't got no public concern worth mentioning, when it comes to the whereabouts, of more than half the American tax payers expenses regarding Iraq's jeopardized security, now being sold off as planned to the bushmob at what will be, lower than going values. Namely, your own as measured worthless.

As American Soldier, in unbiased corporate TV america, your told you're willing to DIE in servitude as a thieving bushite slave without question, a blind loyalty and obedience, not to a Just God mind You, or the Battle Hymn of the Republic, no, but to worship the demon bush in a destructive cult-like ignorance that does not even afford Your costly ongoing sacrifice, the luxury, of telling US why corporate america refuses to scientifically report on your actual consuming of MEASURED microscopic radio-active heavy metal TOXIC waste, that includes plutonium in trust, to 'bushite' your dumfuk evil comrades you'll kill with especially, or to being blowed up to smithereens by sexy rummy's cluster duds. Mr. franks and bush bitch buford blount State it is of little or no concern to corporate americans how many bomblets were used, or where they fell to kill women, children or US Patriots with, for, the glorious bushmob will take a few extra bills payable from America to the commi business partners that way for

including You in indiscriminate mass murder, see?, and none are the wiser. American Patriot Soldier, repeat after me: "A proud bushite nazi soldier is a dead bushite nazi soldier halted from harming our innocent sons and daughters." Or, AGAIN, corporate america's public refusal to speak up for 'The People' (soldiers included) paying the almost half of Iraq's monthly bill going mysteriously vanished in rummy or bush's war crime pocket... Who gives a toot where it is all going wasted right bushite?, it's only You or yours who could go as the innocent in God's favor still being sacrificed next.

Look, as the very old tales tell repeatedly, the lawless Satan wager, to somehow without knowing how, become omnipotent ruler as tyrannical dictator of this forsaken World, leaving US ALL including Johnny, deprived our rights to justice and freedom, and instead, to the lot of US, be ACTUALLY put up on a cross to die again metaphorically for unarrested bush to continue example with, as an illiterate barbaric enemy of "The Man", just like, isn't going to happen in this lifetime. I ain't no fictional character, and as true blooded Patriot, hate the bush demon war monger during breakfast, lunch, and supper. And besides, I'd personally kill bush first before that neither world tried. Trust US, G, or I single handedly as a man, will triumph over traitor bush's criminality, as the American cop killing 9/11 perpetrating war profiteering savage he is as antiChrist, it's just, will you like Talk Radio in America censors, and rich CNN celebs readily encourage, silently continue to watch your fellow family murdered for bush bitch buford blount, and still refuse to voice objection nor take any action in defense of all that is Our World truly suffering as Yourself included? I despise bush like every alive person who would read this is.

Refuse to speak for Your own freedoms truly pirated by bush, and you'll likely continue to lose out really like America currently is. Refuse to help our desperately pleading God you know being victimized in Your name truly, and you will bare the consequences of being forsaken. Maybe even, towards an end you'll declare, someone else has forsaken you, when it will be only yourself to blame for not speaking for all those denied their happy lives through the brutal criminal tirades of the demon antiChrist, Your Mr. bush Jr.. Again, this will never change: We had complete co-operation granting one hundred percent access through Iraq without delay, prior to bombing any of Iraq's public sector with toxic waste that contained US People. Every Iraqi child

murdered served no good reason or purpose but to war God's love, and my good name. And, still today, that unarrested evil demon tyrant dictator, still chooses to sacrifice many a soft spoken, slow footed American Patriot to, so far, too few bushite nazi dumfuk losers. In addition: We have also learned, Iraq had granted surrender of Iraqi assets to give to the war criminal bushmob, if they would forego the needless indiscriminate murder of easily tens of thousands of innocent families, (like dropping cluster bombs into our residential communities), but war criminal rotten rumsfeld refused because he had already PERSONALLY set up hundreds of illegitimate targets that would, kill primarily only innocent people while destroying public institutions, and bring home a few extra million American payments, tax free.

What more could Saddam do that he wasn't asked for? I beg you to kill the demon bush on behalf of our humanity, and on behalf of the rare American Patriot who will get rightly confused as, bush bitch buford blount's thoughtless nazi teen savages. The anitChrist must not be allowed to survive continuing such heinous war crimes against our being, and myself as the no longer reluctant standing eternal King.

Listen to witness, America's corporate news celebs will mention it is of no concern to You as the unjustly robbed from and dying for the demon antiChrist in sacrifice. Look, I as Christ too, would destroy any cowardly proud bushite nazi teen soldier victimizing my innocent family irrationally, as most, if not all able-bodied men of our world would also if forced into a decision to defend our lives from the likes of a bush bitch buford blount, or a bomb wherever death squad running tommy franks heroin pusher, but I'm told through my faith in the power of myth, the military should have one or two brave and godly Patriots still idly standing around, who would willingly chance to uphold their sworn Oath to protect their country and family, like with the American Constitution's Bill of Rights, and Justice everywhere by protecting the falsely accused, as could be, themselves, they should know now, or soon will be learning of the other way. A proud nazi bushite savage, is a dead nazi bushite savage halted from harming our innocent families irrationally, and low and behold, a good nazi bushite savage is easily found as an enemy of ALL Humanity and God, hiding as nazi vermin in the pirated, bushite military uniform, not true Americans, but enemies to US all, which includes their selves they pour toxic waste on, while the bushmob robs their

'smart' family back home, undefended, neglected, and wounded like Christ was.

Your Mr. bush Jr. is worthless to this world as a hater of American freedom to not arrest himself and rotten rummy for murdering US New Yorkers on 9/11.

All I'm looking for in this world, one human enough to join US equally as a Loyalist to Humanity, and to do everything we can together to destroy that treasonous 9/11 perpetrator, corporate america's so very deeply hated and despised this entire Universe over, Your Mr. bush Jr.. To not bravely kill or immediately arrest the demon antiChrist along with rumsfeld the rotten, sets enslaved america tracking further down an old worn path of History, as enemies of not only the good Iraqi People bush and bremer whom openly rob from now without apology while giving out cheap candy, but of US all truly in the bigger dream without bindings. It's like bush is waging his demon war with every political body that believe evidence is a requirement to convince US who is evil, or criminal, an wallah, as if by some Supreme Will, the Son of a Just God named Johnny really comes down to our levels to raise a simple awareness through one hell of a, big time collecting plate. (Every proud bushite nazi bagged, I'm willing to pay the good deeder, ten cents per..)

Fear not my friend, the fascist bushite shall be lost by our universally wreathed good guy plot line. An evil bushite now irrationally fights against everyone's freedom for a war criminating ungodly tyrannical evil power that persecutes the innocent with murder, or torture to steal our, sworn to uphold eternal values from. If I don't destroy the demon bush antiChrist in Our defense with this last breath, someone else will, and our faith in God will with hope, find a love truly honored with respect and gratitude for being so magnificent. Never again, left vulnerable in my name as undefended to be victimized for a war monger's consequence.

Let US get out there and bag US the bush demon for God, or the Lord, Allah, or just Johnny, instead of victimizing Catholics, Muslims, Jews, or Atheists, along with all the rest as a Palestinian truly measured, encompasess everyone.

The Two Troublemakers
http://www.rense.com/general46/guilt.htm

/ / Some of the students had Palestinian passports. When
they asked what they were guilty of, the [bushite nazi savage]
soldiers said, "You are guilty of being Palestinian." \ \

A ungodly bushite nazi teen soldier, as an enemy of
America was quoted to say also to the falsely
imprisoned:

/ / "Say that you love Bush and I will give you food," \ \

Not a love for Justice, or the Bill of Rights, but a
love for the American cop killer traitor bush demon
robbing their very own grandparents they demand by
threat of your murder, for US all as Humanity to do
likewise degenerating, sacrificing our World as cowardly
slaves to benefit the ungodly bushmob 'cabal' of
parasites, the enemies of everyone, including that as
God's will.

ï¿½Beyond human imagination'
http://www.globeandmail.com/servlet/story/RTGAM.20031104.warar1104_4/BNPrint/International
/

/ / I told them I wanted a lawyer. They told me I had no
right to a lawyer, because I was not an American citizen. \ \

"International law? I'd better call my lawyer,"
http://www.payk.net/mailingLists/iran-news/html/current/msg05842.html

/ / "International law? I'd better call my lawyer," the
American President joked in response to a reporter's
question at the White House. \ \

Again, by denying the rest of US as Humanity Justice,
the bushites need advertise between commercial break
only, "Laden did it", no need to follow the ample
criminal 9/11 leads folks, because the crime they say
wasn't committed by true American values. Go on along
bush, cheney, and rumsfeld say, pay no attention to our
evidentiary findings such as, the American FBI's
documented contention, that bush's business partner,
General Ahmad, funded the 9/11 'mastermind' Atta, or the
CIA's, regarding bush LYING in America's name about
Niger (TREASON), or MSNBC's almost Biblical Revelation,
about the bushmob having a signed and sealed, 'top
secret' war plan to not follow the 9/11 evidence to
secure invasion of Afghanistan for Enron, at
Condoleeza's desk, two days prior to the terrorist act
taking place, of which when confronted, confessed as
fully implemented by the Whitehouse. A 'top secret'
plan to blame Laden on a crime they wouldn't actually
try to arrest for with evidence, a plan arranging that
would find bin in Afghanistan pleading innocence with
the help of bush's partner again, General Ahmad, a crime

of such magnitude, it would 'justify' a war mongers criminal invasion to thwart Enron's impending CRIMINAL bankruptcy, THIEVING FROM MOMS AND POPS, to then, ATTEMPT, to close the surviving, armed with knowledge for good reason Police investigations. All of this setting a lowly nazi bushite war criminal, frothing publicly at more than six billion + of US, to state without opinion, that We, as Humanity, are no longer afforded God's GIVEN Human Rights to defend ourselves, nor is the criminal dictates of the demon antiChrist accountable to any rules of law. Universal they publicly quip, as the not-so 'secret' ungodly bushite doctrine of tyranny as enslavement of all that is Righteous and Holy in this World, because, hey, there is no God to speak of... and the King of kings, Son of God fellow, well.. that's all just ninepence fiction. No, WE, as all the make believers of this World, will no longer have ANY legal recourse to defend our own loved family from being stolen from through a bush bitch buford blount doing whatever criminally with dumfuk loyal nazi teen bushites leading to sacrifice for, for demon bush dictates his corporate american bred bushite nazi teen leaders, can not be held to a code of conduct, distinction, or honor. That's the bush world now you'll except without say. As an American, you're forfeiting your rights by not saying anything to protect those falling murdered in evil bush's name. American Talk Radio is waiting for your call to be hung up on.

All Nations outside of America are a politician's friend, and nobody is going to vote to incriminate ourselves for something we would be innocent of. For bush, Ashcroft, and rumsfeld to contend, humans outside of bush america's border, are no longer afforded the rights of being, and bushites can rob our Universe and there is nothing anybody can do about it, isn't going to sell well anywhere. The criminals have enough of a time not getting caught for the things that they do, and almost no one but the lifeless, would stand silently with bush while needlessly murdering ourselves as the innocent.

See?, when bush bitch buford blount murderers innocent people, often their surviving friends and family take it out by killing bushite soldiers that mindlessly follow bush bitch buford blount's criminal command. And, why shouldn't we? The unarrested bush bitch buford blount confesses to murdering thousands of good honest People, for no objective, but to let the bushmob rob even further more children from US all. Kill bush for the love of Jesus, please.

Notice to the World: Literate American Soldiers have not voiced written objection to my writing, (us.military.army) but for the exceptionally rare bushite nazi savage, who sorrily slack, others shouldn't be allowed to tell the truth about polls, 9/11 criminal investigations, or bush and rummy getting the Patriots murdered for pension thieves and heroin pushers to tyrannically profit at our devolvements. Encouraging US to continuing in bush's name getting robbed and murdered irrationally? no rights to defend ourselves from crime in a court of law they say?, without a God, or any reason for love of this world whatsoever? The bushites think that they can first degree murder our world's women and children, our freedoms as Justice for US all, and miraculously, as the result, will bring our entire, dazed and confused World to it's knees as the whore of Babylon. Indefinitely. (Not like a real Whore mind you, most crack-addicts, and even some G men, hold limits on how far they'll go victimizing the innocent to glorify a blatantly evil and ungodly enemy of all that is good and righteous in this world.

Anyway.

The CIA, and the FBI are surely in agreement with US, on this indivisible Justice thing. The quicker bush dies as unarrested traitor by the hands of a true American Patriot, the sooner an explanation will be demanded as forth right and coming.

Again, American soldier, wake up, and kill bush for sacrificing your friends and family to die as cowards, too afraid to stand with God in defense of the once great American flag. My America, is the land of the not so stupid, and brave enough to kill unarrested bush and rumsfeld for 9/11 almost immediately, or any other war criminating enemy of America fighting to not have our Justice served by nabbing the true 9/11 suspects.

Through a legal lens - the attack and occupation of Iraq http://electroniciraq.net/news/printer1262.shtml

/ / The International Covenant on Civil and Political Rights, RATIFIED by both the U.S. and Britain, pulls no punches on this count: "Any propaganda for war shall be prohibited by law" (Article 20). \ \

This is what bush needs to be immediately arrested on for his Niger claims, if you see him not behind bars awaiting public trial, do the American Police force and soldiers everywhere a favor, and kill the escaping demon bush for the love of Your life wills it.

By protecting the demon antiChrist bush for continuing in Our names to rob from Humanity by breaking American laws willingly, will now be a public declaration supporting crime against our betters. I will not stand motionless while bush and rumsfeld with bremer persecute school teachers not guilty of criminal offences, while pirating Iraq's wealth for Dutch-Shell, Worldcom, and double billers, commi Halliburton, all the while, feeding American Patriots radio-active toxic waste to die as losers. Think Patriot.

Arthur MacArthur "Those forty minutes when I defied my orders, were the keystone of my career." A career that would lead him to the highest rank in the United States Army. Saving many lives he did by doing so bravely.

His son later, defying Hoover, smashed thousands of American WWI vets, who were demanding their promised checks to save themselves from starvation. Winning he did, corporate banking's recognition and praise as a savior of the american way of life, and The People?, they ate it again when in 1950, at the age of 70, defying Truman, launched a win sumtin at all costs attack against China, that quickly during the unreported stupid needless slaughter of countless American teens, forced Truman to concede defeat by begging for a immediate truce with China while firing MacArthur, who came home to giant demonstrations of love and affection for sacrificing American lives forgotten to the accolades of corporate america's unsung hero.

George S. Patton Jnr. "It's no fun to say to a man you love, go out, go out and get killed, and we have had to say it, and by God they have gone..."

Johnny Wizard "Let US just get bush instead friend."

For the love of life and countries, kill bush as traitor to all our Humanity.

Your unbroken eternal Warrior,
as acting Servant and King,

the one and only,
as staring Johnny Wizard,
the true Son of Man

P.S. My reader, I taunt you again: forward these words of love or hate as if they were of Your own concern. America I think Will be interested in this public outrage of the silent majority, an outrage that will ecplise into an international scandal of such proportions, it just might win US the newscast with the facts on Justice ruling our way. ( I am excepting all

reasonable job offers. Hint hint.)

--

A bushite nazi soldier's motto: Do NOT kill demon bush
for the love of God as true Patriots would, but war your
comrades in arms with toxic cluster bombs to secretly
kill yourselves with later on, including US as the
innocent, our children included, while STEALING, not
going nowhere public Iraqi institutions, including
desperately needing humanitarian aid shipments, starving
the poorest of the poor, all to please and glorify the
pension thieves of our Grandparents, and the heroin
pushers to our school kids.

--

> To my friends in Iraq, don't let corporate american
> media divide yourselves from community as equal
> participators. An Iraqi, is foremost, a member of our
> Humanity, and just like the rest of US, hate the God
> betraying anti-American demon antiChrist bush, more than
> anything else in the Universe for persecuting the
> innocent while killing coppers to steal our assets
> undefended without a leader to speak out everywhere for
> our living rights included.

Deadly suppositions
http://www.rationalreview.com/rlwrights/112603.shtml

/ / That's right. American troops are now being used to destroy
private property of "suspected Iraqi guerrilla fighters." What
happened to requiring proof before depriving someone of "life,
liberty, or property" as stated in our own Constitution? Evidently
that does not apply to people we attack so that we can bring them our
way of life. \ \

--

GO F*CK YOURSELF, MR. PRESIDENT
http://www.antiwar.com/justin/j112603.html

/ / We must act, even if the threat is nonexistent - because of the
potential danger. If "self-defense" consists of necessary
"preemption," then what would happen if we started acting on this
Bushian principle domestically? After all, killers, robbers, and
rapists don't announce their intentions, politely putting us on notice
before they strike. Why not just jail them before they have a chance
to commit a crime? This principle, if applied within the U.S., would
lead straight to totalitarian rule. Applied abroad, it means perpetual
war. \ \

--

I Know When Bush Is Lying: His Lips Move
http://military.surfwax.com/files/Weapons_of_Mass_Destruction.html

/ / The Bush regime's panic is reflected in its adoption
of Israeli revenge tactics, using F-16 aircraft to drop
500lb bombs on residential areas called "suspect
zones".... ...Lianne Seymour, widow of the commando Ian
Seymour, said: "They misled the guys going out there.
You can't just do something wrong and hope you find a
good reason for it later." \ \

War Propaganda
http://www.currentconcerns.ch/archive/2003/02/20030228.php

/ / In other words, the military actors and politicians
are totally blinded by the "war on terrorism" dogma.
Truth is falsehood and falsehood is truth. Realities
are turned upside down. Acts of war are heralded as
"humanitarian interventions" geared towards upholding
democracy. Military occupation and the killing of
civilians are presented as "peace-keeping operations."
The repeal of democracy is portrayed by General Franks
as a means to providing "domestic security" and
upholding civil liberties. \ \

--

http://www.bushdraft.com/

/ / With the threat of 56% of troops not re-enlisting
Bush is going to need a draft unless he changes his
policies soon. I'm sure you agree, I'm sure you don't
want your friends, family and coworkers drafted either.
To fight for what? freedom? When George Bush passed
the Patriot Act and now the Patriot Act 2 he took away
many of the rights that we cherish so much. Why are we
"bringing freedom" to the Middle East when Bush has
shredded the constitution and taken away our freedoms at
home? It doesn't make any sense. \ \

--
http://www.globalblogs.com/binationaltimes/archives/00000116.html
"Yes, Bush lied"

/ / WASHINGTON - A year ago, on Oct. 1, one of the most
important documents in U.S. history was published and
couriered over to the White House. \ \

--

This is why I plead with armed Americans to kill the
unarrested bush for the love of children everywhere.
Look, we know directly who the bushites are who PUBLICLY
advocate the murder of innocent People through corporate

censorship, who support furthering the demon antiChrist's senseless crimes against my America, and our World. Example: You'd think Art Bell figures none of his listeners could in no other way, learn of traitor bush murdering thousands in New York City, and his contemptuous silence on the issue forbidding anyone else from publicly mentioning it. I have dominated alt.fan.art-bell for years, while Art Bell, like Canada's Peter Warren, will continuously advertise open line calls, but abruptly end calls topicing on KNOWN FACTS surrounding their evil false deity bush, 9/11, Iraq, depleted plutonium, Halliburton, and the deaths of our innocent lives fallen to their personal inaction depicting our community as uninterested. Art Bell in FACT has pre-screened his "open line" calls since bush stole power, and does so, to make appear Americans aren't clued in, on the now hundreds of thousands of innocent lives bush has murdered as war criminal. A good nazi bushite, is a dead nazi bushite, halted from advocating further war crimes constituting the murder of our innocent families. The dumfuk bushite parasites have been PURPOSEFULLY blowing themselves up with mined cluster bombs as suicide bombers! Not dying for any noble cause, but to only further toll more American Patriot lives. We should ask all soldiers, who are they loyal to, the 9/11 perpetrating American cop killer bush, or the People's America, as so enshrined by the Bill of Rights, and true Justice to actually protect the freedom of US people by following a leader?

These OUTNUMBERED and OUTGUNNED nazi bushites are indiscriminately bombing residential communities with radio-active toxic waste for nothing but to please their evil false deity, Our Mr bush Jr.. No rational reason but for a hatred to Your Humanity, and God if you believe.

Example: that evil nazi terrorist buford blount confesses to murdering thousands of innocent Iraqi People for nothing, no reason he proudly professes as wicked evil heinous traitor. Think of the lives You could save Patriot, by justly killing the unarrested buford blount, on hopes a person to take his place could at the very least consider being honorable in defending Your America? Demon buford blount is truly the enemy to American soldiers, for, if your family was murdered by buford blount irrationally commanding mindless bushite soldiers for nothing but to further rob the dying American tax payers, would you not too, spend your will hunting the evil nazi fuck down personally to spare further another innocent family suffering? To kill the

unarrested unAmerican buforld blount is to stop him from
ordering the practically dead already, nazi dumfuk
treasonous bushite brethren teens, from victimizing
again US as the innocent undefended.

While CNN still insists it's better for them to
misinform and ignore, than to expose the demon bush as
the true target for any Patriot's rage. American
soldiers are being sacrificed to die for no known good
reason, but for bad leadership as evil bushite war
profiteers.

--
House Nixes Anti-Profiteering Penalties In Iraq Spending Bill

http://www.senate.gov/~feinstein/03Releases/warprof103103.htm

/ / "When the Senate Appropriations Committee considered
this supplemental request, Senators Leahy, Feinstein,
and I joined together to criminalize war profiteering --
price gouging and fraud -- with the same law that was
passed during World War II. Yet this amendment, was
stripped out of the final bill," said Durbin. "I fail
to understand how anyone can be opposed to prosecuting
those who want to defraud and overcharge the United
States government and the American taxpayers." \ \

--

--

/ / The Constitution cites "high crimes and misdemeanors" against the
state as grounds for impeachment. Could there be any higher crime
against the American people than to have knowingly deceived us in
order to stampede us into an act of barbarism that has betrayed our
finest ideals, our highest ethical standards, our national honor, and
our whole history? \ \

The best evidence to kill bush quickly.

Demon bush "These terrorists target the innocent, and
they kill by the thousands. And they would, if they
gained the weapons they seek, kill by the millions and
not be finished. The greatest threat of our age, is
nuclear, chemical, or biological weapons in the hands of
the terrorists, and the dictators that aid them. The

evil is in plain sight, the danger only increases with denial."

Remember: Demon bush doesn't forget signing his soul to the invade Afghanistan plan by not following the 911 evidence, but would top secretly attribute to Laden for blame, authored by himself, rumsfeld, Condoleeza, and General Ahmad two days prior to the public event of murdering "thousands" in wealthy corporate America, a secret plan that has been confessed publicly to US as fully implemented by the White House right from the start to Jim at MSNBC, months after the fact when the demon antiChrist was caught with American blood in his breath.

Not to follow the criminal leads surrounding evil bush as mass murdering antiChrist, is what the White House confesses to Americans today as official policy under every circumstance. Karma. Demon bush tells corporate america that they'll persecute the innocent in any country by denying our fundamental human rights of Freedom and Justice, while now dropping 2000 pound bombs in God's World containing children, while corporate nazi bores, report in judgement of the great King who MAY have cuddled some cute boy! Jackson has given so much to America in stone, and in return, the corporate news nazi bushites sit condemning a great man whose open vulnerability gives him his wondrous strength and power as true American artistry. While these very same treasonous corporate bushite news anchors refuse to report on tommy franks running death squads against school girls, Guantanamo's Taliban's Girl School teacher Mozam Begg whose family served proudly for generations in the British Military, or tomorrow if YOU don't help US speak out publicly, continue refusing to report the general murder of civilian populations by the godless evil nazi bushite traitors. A good bushite, is a dead bushite halted for advancing their murder rampages against our innocent families irrationally. Demon buford blount, who runs like the nazi coward he truly is from my challenge to a death match, confesses to murdering thousands of US People for no military objective, but to get killed those that serve as bushwhored slaves under him to take his cowardly place instead, a die hard bushite nazi traitor. No government in Iraq would give WorldCom and Halliburton a blank check because they care too much for The People, nor certainly would they not, steal helpful Humanitarian Aid from poor people to pay the fraudster commi double billers, Halliburton again, nor either or, dump radio-active toxic waste on themselves to help bush's

re-election campaign get off on murdering Americans for financial pain as God betrayers to US all. KILL BUSH NOW! Remember: a bushite soldier hides behind an American uniform, while knowing the bushmob has likely robbed their very own family of their savings and vital protection. Weak and cowardly, stupid and murdering innocent People for the demon antiChirst as their false deity parasite they are dying for TODAY as. I HATE bush as much as any real man would. The bush demon sells his Satanism by offering NO skills required to be dishonorable and dishonest, no reading newspapers, or feeling the pulse of the plundering nation required while ransacking the faithful. While these corporate news experts and CNN and CBC censor pleads from Humanity paying the wages of evil bush's wars against freedom and God, Justice and America, denied our corporate news coverage to be my primary lonely concern mostly it seems sometimes, as too, how terribly it truly is for life whose love isn't appreciated by our will anymore as the living in america, oh yeah, I mean America.

As an American then, what life will you forsake where bush'll rob you over and over as the never living for something better? These american bushite nazi fuks, think your gonna wash their feet, and instead of defending yourself and family, just turn the other cheek right before the bushites drop a two thousand pound bomb or two on your innocent neighbor next door? Done for nothing but feeding the bushmob?, as unarrested buford blount contends in God's presence? Then to think, buford blount figures I as a real man will not seek him out one to one to the ends of this universe for payback.

What can God do to help, if your refuse to help yourself? The true danger to America increases with American doubts on bush's blatant, true naked evilness, or humoring God as Johnny, and betting on yourself for a change by supporting me as the time being? Look, what could you do for your freedom, when I demand the pursuit of Justice by following evidence to truly protect this World we share? Support my demand to raise the news media's ignorance on what you shout even louder?

Think this: demon bush makes no public mention of where almost half of the monthly 4 billion dollar tax payer bill is quietly disappearing while grandma loses her cable television, or only grandson? Is that Leadership I ask every American Soldier to be brave and forward this letter on terrorism to your fellow comrads secretly. Then, we'll see...

Johnny Wizard

Johnny Wizard is Mainstream!

The nazi fuck bush, the unelected American cop killer, has still to be questioned by american corporate dictates, why, General Ahmad, is not a wanted man by American Patriot flag waving standards being coporatized as not worthy thinking as. Our entire World can easily witness, no American soldier has publicly stood up verbally against my calls for bush and rumsfeld's immediate arrest or execution for 9/11. Sure Blitzer, and Bill Hemmer froth secretly in contempt for all the American People, at the opportunity to sit secure well blocking US interests at CNN headquarters, to watch in glorious minute by minute coverage, scores of unrepresented by corporate cult standard Humans, be criminally murdered by their evil anti-American propaganda by the will of now more than 2 billion people the bushmob has declared as his personal enemy (60 countries), just like what Blitzer and Bill have done unbiasedly regarding Afghanistan's heroin pushers, the deliberate bombing of the Taliban's girl schools, and the running of death squads by wimp ass coward and traitor to EVERY soldier the world over, tommy franks, largely as he has, against the understood by all to be innocent, unarmed and practically defenseless. With bush's america, showing no interest in preventing the further degradation of the living standards of US People in Afghanistan, (who were already at the brink of starvation), but for to steal the resources of an impoverished nation, and too, as they have, already indebted to the World Bank by purchasing millions of unused american minted terrorist handbooks from the eighties, while spending 4-5 billion dollars a month to continue killing US innocent people to steal even further American values, like "we" don't even exist anywhere. More wealth wasted than would be needed to feed and house the entire population, while forming a just police force accountable to a rule of conduct. But no, according to the election rigging repuglicans, (ES&S search "Dozens of Documented Reports") there is no money to steal if they don't murder, torture, and rob from our communities to destroy our belief in Humanity. Again, I will remind you reader, and NRA card caring member if your joining ME late, I have personally contacted Bill Hemmer, and Bliter's secret "War Room" in Atlanta, as well as contacting Walter Issacson (CEO of CNN), and Sid Beddington (super dumbass CNN producer) with the following facts, that they have refused to allow Americans to openly consider in bush's criminal american dictatorship. Our Mr. bush Jr. and rumsfeld, had a plan revealed by MSNBC to invade Afghanistan, on the premise of not following the criminal evidence for a undisclosed crime, while planning to blame bin Laden for

it without producing any evidence, a crime that hadn't even yet taken place when the plans were officially drawn up and dated with General Ahmad, plans to specifically attack the Taliban for not siding with Enron we learned from Niaz, The Working Group, India, cheney and Ken. Also, the Taliban, had offered Laden for arrest during Clinton's tenure, but Clinton admitted, they could not actually find any evidence to stand the scrutiny of the public, nor justify the reasons for Laden's blind vilification through corporate controls. (It has been alleged it was Barbara Bodine HERSELF who sent the Cole into Yemen against the voiced concern of all involved military commanders, then insured the criminal investigations into her matters would be halted, as example.) So, clearly, a brand new crime would have to be devised secretly. (Note: without 9/11, how would it look killing indiscriminately severely poor Afghan families not tied in anyway whatsoever to flying American planes into American buildings by a German, Mr. Atta, who was funded by the General, salaried by the 30 billion plus Tenant?) That's right. This same General Ahmad, from the ISI, not only put together the 9/11 cover up plan together with the bushmob in Washington according to several members of the Senate Intelligence Committee, but also was according to the fine FBI officers involved in the criminal investigation, the prime terrorist funder, to our Mr. Atta. (globalresearch.ca) Also, if this doesn't already clearly paint a clear picture of betrayal by CNN ignoring the American People, consider this also: The bushmob insisted this same General be the war criminal to go to the Taliban personally, to tell US, no evidence would be offered against Laden, nor public trial offered, against what would be to all Americans who actually believe in the Constitution, and the Bill of Rights, (or the Taliban leadership who really believe in God while mistaking like everybody else does), not guilty of the accusation based only as blind speculation. The very same General who devised the plot we're telling you, as documented, and confessed to MSNBC by the White House ALREADY. What an "embarrassment" the ISI blushed! So, what did bush, america's false deity then state as traitor to ALL humans while closing investigations? "We don't need any evidence, we know he's guilty.", right on que. Mr. bush, the demon plays that cheat against Humanity over and over again now, like he figures someday it'll really work for me, (never mind G), cause he figures no truth exists actually in his dark evil world of betrayal against himself as US all included. His wicked dumb

evil, that costs the lives and hardships of REAL Americans, only succeeds, because corporate dictates demand no discussions on anything politically factual. (At least not for longer than two or three minutes, with nobody respected as invited for being knowledgeable, or knowing basic high school maths either.) It's the term "we", bush and rumsfeld uses routinely, without substantiated fact to honestly hold our conclusion, as their criminal justification to willingly murder US people as unheard of. He figures as the anti-Christ, because he stole the title of President, he therefor inherited all knowing wisdom like dark magic by openly fooling himself, as all of humanity witnesses repeatedly his falsehoods on our truer Nature. Not as a Jesus the Creator might, to play the crazy, laugh at strangeness, or sing almost lyrically to life for the joy of it, but as a talentless demon monster to rob and murder from ourselves as the established innocent factually, and left unprotected because the Living eternal Universe can be feared for nothing I suppose. If bush is not following the criminal leads, nor the relevant public information easily available for all to peruse, how can he disagree with everyone without public answers to disprove our existence? "Secretly", he and rotten rumsfeld continue to state to the six billion plus of US, even so though, it doesn't therefor make the recorded History, or the actual evidence of reality go away somewheres else, such as some of the great work the FBI, or the CIA has done being directly involved, again doesn't just vanish as not presidentially viable.(The highest office in America, should be citizen.) Or, make WMD just appear out of nowhere either, if Iraq don't actually have any. You'd figure, as Mike said better at whatreallyhappened.com, but I can't recall specifically, if bush has secret evidence to substantiate his allegations against the Iraqi people, and thinks his knowledge, being better than all US rest put together, shows a threat to the American People, wouldn't he therefor make it known to all, to protect ourselves truly as concerned? Like Johnny would? Instead of, as he is, using the bluff to excuse the potential MURDER of untold thousands if not millions to also steal from for himself, like the election, and that 50 billion? Remember: bush killed New Yorkers to steal American lives, and publicly showed Our world no interest in arresting himself, the true evil doer for the 9/11 money maker. No purpose in life, but to make others suffer and die, is the bushmob mantra. (Even if weapons do show up, staged, or otherwise, it is still no reason to kill Iraqis to steal their resources, to leave US people

there, under a criminal dictatorship for a planned thirty years of massive American casualties after American casualties, so the bushmob can steal even more from our grand parents left unprotected without police protection here at home left alone.) Particularly, if the public evidence we conclude as documented FACT stands directly in opposition to bush's dark secret fantasy of Universal criminal tyranny he spews daily as lies against GOD in Our public air space. A planned criminal tyranny of evilness, that has been released to US publicly through one real American after another, ignored overtime by the CNN celebs, yet, still happening as Our high priority issues. I'm beginning to have a difficult time keeping up with the truth that leaks from the bushmobbed syndicate like a sieve practically everyday too. Have you heard of, "RebuildingAmericasDefenses.pdf" on CNN? Or, how about "11-14-02_Chin-4.pdf"? (Don't miss that one.) I haven't, but can't really stand watching them pretending we can't see anything at all either. So, these terror plans.. When the nazi bushmob was caught without them, (as they were top secret presidential documents entrusted to the witch condoleeza), could do nothing but confess they were fully implemented. Why? Because they walk through the entire scenario that bush puppeted the months before to armed Soldiers. (God wins every time.) Mr. bush and General Ahmad's plan, is to continue to wage an unending war against humanity, (60 nations) as the "way" of escaping public Wrath, Your Wrath American Soldier, for something, that, again, for 9/11, hadn't yet happened, but bush and rumsfeld prepared for to close investigations on. Mr. rumsfeld was reported (emperors-clothes.com) to have been told by his own Secretary, in case he had forgotten his top job responsibility while sitting behind his desk fidgeting, he was, as rotten rumsfeld, required to be at NMCC immediately. He didn't go after then either. The only possible place the terrorist plan could have been carried through to stand down the Air-Force. (Let those under him take the bullet if push comes to shove. American traitor rotten rumsfeld thinks of everything too eh?) His public excuse I'm sure it would be, he was concerned about the death of US People while sitting there doing nothing. The same rotten rumsfeld, who tells US openly in Our public arena while almost cackling, he wishes to murder and torture completely innocent people that Americans should be forbidden to learn of in a open as the Public court room of Our peers through America's once respected, if sadly, mostly mythologized fair Justice system, now headed by

ashcroft, a total incompetent, who wishes not to apprehend terrorists by tracking the criminals, but to destroy what little freedom is left for America by advocating, in public, the persecution of US innocent persons instead. Really. Again, listen up Ashcroft, last time: bush and rumsfeld's plan, that the White House confessed to as fully implemented, demands by excuse after excuse, that the actual evidence trail not be followed, and that legitimate FBI, and CIA officers (Rowley, and the insider trades for example.) are to be continually ignored. Just as CNN has done staying unbiased. Allowing bush and rotten rumsfeld to kill innocent People deliberately, stealing America's Freedom through injustice to themselves. First degree murders. See, the nazi bush slaves go on and on how great it it to be murdering innocent populations far away as terrorists to steal and plunder, but, for who would be there as themselves close up and personal (gods WE are) to question their own demise by someone who thought without thinking likewise? (God is Not.) This is why I ask an American Soldier somewhere to stand as One single person for America, a Family Man, and take out the re-offending mass murderer, unelected dictator, Our Mr. bush Jr., by thinking like a Soldier is really Universal. And, if his successor, should do the same secretly, publicly advocating wars, death squads, or torture against Ourselves as the innocent to steal from, WE do the same again, until, CNN finally opens up communications to the American People as warranted to be wise.

Sure, only Jews in Kenya, like with Odigo, seemed to be warned to stay clear from an impending terrorist act, and sharon played a personal role as documented several months ago to attempt the blowing up the Mexican Congress and blame it on the Unionists, or bin Laden, oh ya and also, I shouldn't forget, apparently, the rocket launcher was painted blue lying in a field untouched when the mossad in Kenya pointed it out to reporters they brought to witness the whole story by-line, but that doesn't therefor, make the likud party, or especially ariel sharon Jewish. For ariel knows when he steals or kills others as innocent being himself openly a terrorist, is ariel knowing, real Jews would be murdered too, by someone like himself, albeit, in secret avoiding the trying but divided coppers, that he murders also. But, hey, that's where he gets all the repuglican money he doesn't earn but steals over the lives of Jews he watches fall dead as unfigured. Mr. sharon, will tell us how disgruntled he is to see only Jews die by

terrorism, then goes out as a PUBLIC FIGURE, and commits the same, but far more hanious acts against G as a pirating criminal National icon. So, sharon, what is it that so upsets you to see US Jews die then you nazi parasite, you cancer tumor, you disingenuous harbinger of suffering to God as Humanity? It is only his private show without questions for comment, as he can not answer publicly without being dishonest about his criminality. Murder is murder, and sharon, the bigoted-racist murderer, the terrorist supporter and perpetrator, has stolen the rights of the Children of Israel to live in peace by good will, and Justice for everyone counted. Jews are Palestinian. See, being Jewish is a religion, and the ancient Palestine, is of a label for comprising every understanding to this, that can not be completely understood symbolicly as contained to be definitive. Also, like America is truly melting, and murder accomplice negroponte, can not face for personal weakness, ineptness, and hatred for all of Humanity, so advocates huge oppression against all America as real People corrupted by a government of injustice, and contempt for themselves unheard from. (Jesus, just try to get together two people who agree on everything. Justice however, should be a no-brainer for everyone, but CNN say's nothing in Our defense as equals, and would, as they do, watch You be robbed and murdered, and not raise a word.) Also, just for double, the oldest practicing Jews we know of through recorded history, (the almost censored "Dead Sea Scrolls" included), are dark skinned, and live in Ethiopia, and the likud party, like so many other "settlers", are mostly filtered christian Kaisers, who migrated from Russia on the promise they would receive stolen property, (sure, I'm jewish!) (search "ILA" and the "JNF") like farms, houses, and Our children's toys. (FrontLine's one time broadcast) See, If sharon didn't steal and murder, repuglicans would have no excuse to receive kick backs to plunder even further, from the great stupid American People. Which is why a bush supporter is so deeply ignorant on just about everything like Speilberg is regarding the Holocaust, and like too many american soldiers, who we can be sure, would die in sacrifice from cowardice before bravery as evil under the anti-Christ, dictating war crimes against US all as Humanity unrepresented. Until Now. For, Christians have no protection from anti-discrimination laws in Israel, nor do Atheists either apparently. How spooky dumb is that? Legitimizing hitler they are politically. Jews are this, jews are that, and all of everyone else, is something unquantifiable, unknowable, and all around

unloved and disrespected everywhere as G-D is forgiveness to be abused on Christmas, according to the deliberate practices of sharon singularly, as a bigoted nazi murderer, and the written words of the banned in Canada talmud also.) No bullshit. Clearly to all, very anti-American. Biggest secret going! Why? Americans are largely illiterate, drugged, and all around dumb. Now, where is CNN, or Our beloved "wealthy" celebs, who advocate blind obedience as slaves to the anti-Christ, to discourse me a liar truly as Jesus? Nowhere? You are still waiting People, while American families continue to be robbed and left for dead by inaction through corporate american standards. For, what can only one God do I ask yourself really?

If a thing is done wrong often enough, it becomes right.
-Richard A. Leahy

Johnny Wizard

--

Holy Jesus Man!

Have you heard the Revelations from India's government to the FBI now made public?, regarding the principle terrorist funder of Mohammad Atta being, the ISI's, General Ahmad? The bush administration's personal confidant, and top secret military strategist? See, it was Jim at MSNBC that informed US of bush's terrorist plan existing as once top secret presidential documents, and, that this same general, was also responsible for, according to several members of the Senate Intelligence Committee, developing the said war strategy of invading Afghanistan on behalf of the evil bushmob, with the very anti-human premise, of blaming bin Laden for a crime without any evidence to substantiate our public accusation, to murder more than a hundred thousand, plus! A crime, 9/11, I will remind you, that for when the evil plan was devised, hadn't even yet taken place. But was threatened would happen, if the Taliban didn't side for Enron's interests in serving for Ken Lay, one of bush's many bum buddies. (They apparently do that sort of thing on a regular basis, with all the members in their secret meetings of the 'only Boners' fraternity.) It doesn't take much either to understand why rotten rumsfeld, corporate america's sweetheart, (you know, the sadistic nazi war criminal who gets off on murdering or torturing innocent people), told US he wanted to have arrested those at the WhiteHouse and the Pentagon, or even in the Military, who would dare as Americans, to inform Americans what he and bush were

truly doing in their names.

Destroy the unelected unarrested heroin pushing American cop killer war criminal, the demon we all know so well as corporate america's false deity, the super evil doer anti-Christ, Our Mr. bush Jr. Now Patriot Soldier, and be loved by all as Savior. Or not, and be a thoughtless degenerate, a cowardly regressing nazi bush slave, who would sacrifice your own family as yourself truly, because JESUS CHRIST, life is living to survive for Justice, as God is warranted to be as ourselves, with equal rights to being as is of US all included. Mr. ashcroft tells Americans he is purposefully destroying their freedoms as legal due process because he, as an idiot, and a traitor, has to fight ourselves as a terrorist blindly in Our names without American Justice, but never explains his action, is asked to, nor could he. As ashcroft, like most in the bushmob are, is founded completely unqualified. Why doesn't ashcroft move to have bush and rumsfeld arrested or executed immediately by following the criminal leads for 9/11 on behalf of Americans as an American?, what with all the ample evidence documented as factual and everything? Instead, decides too, like the demon bush demands in attempt to sway his capture, that evidence will no longer be mandatory for him to decide who should be stolen from, as the left dead to be robbed as forgotten by Justice denied to all as Godly. American soldiers are truly as represented, weak, slow, and painfully pathetic cowards, refusing to protect their own families as a national defense measure, instead, as nazi dumfuk bush slaves, willingly support the murder of would be themselves as criminals, truly against US all as the innocent.

Mr. bush was quoted once again defending his irrationality as criminal murder rampages against the innocent as ourselves like he did in New York City with rumsfeld, by stating,

"Maybe somebody needs to explain to me why they say something, but I don't feel like I owe anybody an explanation."

The evil anti-Christ figures he'll just continue to rob and murder American Patriots while destroying freedom as Justice for US all, and simply escape Your wrath by corporate america making no fuss to speak in Our defense as the still living to be underestimated as equals.

Destroy Our Mr. bush Jr. now, and be loved by all as God would!

Britain backs US plan for attack on Iraq
By Philip Webster, Political Editor

(Quoting the terrorist supporter blair, Philip was),

``To be TRUTHFUL about it, there was no way we could have got the public consent to have suddenly launched a campaign on Afghanistan but for what happened on September 11.'' ...

Oh, so there was a criminal intent known also by yourself then blair to prop up heroin pushers to save Enron's impending criminal bankruptcy?

We have repeatedly witnessed, CNN and CBC refusing to represent our Democracies, our FBI officers, like airing Coleen Rowley, General Ahmad, or the sabotaging of the Moussouie investigation by ashcroft, or the CIA, regarding the insider stock trades, or dealing heroin. The innocence of the Taliban for 9/11, and the barbarity of the Northern Alliance as heroin pusher slave owners. No, every single american according to CNN being unbiased, does not want bush the anit-Christ arrested immediately for killing Americans in New York City to steal our worths and freedoms as worthy of defence matters by their own measure as corporate cultists. As I told you, Bill Hemmer and several other celebs at CNN, now are fully aware of bush and rumsfeld being the true purpetrators of 9/11, yet, Bill continues to play evil against US all, figuring nobody ever will know without CNN coverage on his contempt for American Patriots he asks to have sacrificed for as bushwhores like himself and Blitzer. CNN refuses to protect Americans as equals commited to Justice for US all.

It was just reported by Chris Marden on the 27 November 2002, that bush's top whore richard pearl, has advised Britsh MPs, that bush secretly as the anti-Christ has no intention of allowing the Iraqi inspection process to succeed, and instead, is commited to murder ourselves either way.

Again, bush and blair, like CNN, have no evidence to substantiate their allegations against Saddam, and have stated because they have no evidence, they therefor as demons, can murder anyone on the face of this planet to steal our lives in OUR names as US innocent. Mr. blair and the bushmob have recently stated, that they have no evidence that Saddam has any WMDs, nor, is any threat to OUR WORLD community, and because of that, if the inspectors find no weapons, and Saddam insists it is

because he doesn't have any, this, accordingly, would give these criminal master minds a cause to murder hundreds of thousands of innocent people, if not millions, and steal all the assets of the Iraqi people, while destabilizing our entire endangered species. They are mass murderers, threatening humanity to recommit more murder as TERRORISTS! Never while I stand ALIVE evil nazi dumb fucks. KILL BUSH NOW! Hey, have you heard about rotten rumsfeld's P2OG? "O", as in Oh rumsfeld is truly an evil fuck! Apparently, rumsfeld wants to provoke terrorist activity to murder ourselves as innocent cilivilians, as an opportunity to invade any country he wants to rob and plunder further. Also, most importantly, according to the official documents, rotten rumsfeld figures it would be important when he and his mobsters commit these crimes, it be understood, that nobody be able to trace it to himself, or his partners in crime, so they figure, the criminal acts should be carried out through his department at the pentagon, then, get this, he won't therefor be accountable, or scrutinized by the American people through corporate news channels. The offical pentagon report details this.

snpd

All Wrapped Up
CBC as managed has deliberately with intent, worked to misinform and propagandize our community on what is as, documented provable fact, regarding Mr. bush's complicity to the murder of US as the innocent in New York City. CBC has refused to live up to our responsibility to protect our democracy, and in silence, has pirated our names to murder those understood to be innocent of the accused offence. CBC has refused to allow ourselves as the public to understand, Mr. bush forbade the FBI from pursuing bin Laden investigations, just prior to 9/11 with secret Presidential directive W199I (199I WF213589), which had John O'Neil, the anti-terrorism head for the FBI publicly protest by resigning over. This W199I directive was put into place after the administration had been warned by the BND, and several other legitimate intelligence agencies, of an impending terrorist plot involving the high-jacking of American airplanes to be used as weapons and flown into land marks. In addition to these unreported top priority political issues that stand to be true as documented factually, the bush administration had also secretly put together a sinister war strategy, that was revealed to ourselves as the public, by Canada's own Jim Miklaszewski at MSNBC, to have existed without any doubt

as Presidential Directive documents, two days prior to 9/11 at the WhiteHouse. A planned strategy to invade specifically Afghanistan, by blaming bin Laden for a crime, but providing no evidence to back up the allegations. That's right. The super evil criminal bush dictatorship had a plan in place to not follow the actual evidence to arrest the true culprits for a crime that hadn't even yet taken place, but that they were prepared for to close investigations on, as an opportunity to invade specifically Afghanistan, propping up the Northern Alliance who still practice the barbarity of sharia law, with the bush bonuses of selling heroin to our world, and most importantly, building a liquefied natural gas pipe line for bush and his Enron friends, to rob even more further from us all.
Legitimate FBI officers unrepresented by Mueller claim General Amad was the principle terrorist funder of Muhammad Atta, responsible for a wire transfer of $100,000, who, incidentally was in unusual meetings, the General was, with the bush administration a week prior to 9/11, who also not only participated in meetings with several top officials in the Senate Intelligence Committee, but also, was reported to participate in building the war strategy of invading Afghanistan, as the reported desperate excuse offered for the General being there just prior to 9/11, and also, was personally responsible for negotiating the non-surrender of bin Laden, of which the ISI claimed, the General advised the Taliban not to do so because, no evidence would be offered, nor public trial for an offence bin claimed he played no part of.
We are all in agreement, in truth we rise, evil is just the deceived disguised. Boo!
The case is wrapped up, and bush and rumsfeld need to be immediately arrested for 9/11, for murdering countless thousands for stolen gain, at the losses to our humanity, that show through every putrid utterance of scum bucket bush, as contempt for our living as humanity through Law. Where a person accused of a criminal offence without any evidence is clearly innocent. For why I ask you reader, would any unjustified leader of US people blame someone for a crime who wasn't linked to the offense, while working to close investigations, and not follow through with the ample clues to capture the true evil doers? Just how cowardly stupid can soldier families be taken without conviction as themselves worth fighting for?
Justice for all, and glory be to godly.
Johnny Wizard
---

Freedom is only garnered through Justice for
all equally
Nobody deserves to be murdered, but a
murderer escaping to recommit
"Patriotism is the last refuge of a scoundrel" wrote
Samuel Johnson, and he wasn't just mixing words.
Patriotism is not about mindlessly as cult slaves
obeying bush the unellected nazi fascist criminal
dictator, it is about protecting freedom for all as
democracy demands by law. Ours. Mr. bush has said
that if we, as Nations, don't agree with himself as
world dictator, removing the guiding principles of
constitutional Justice as freedom for all instills,
while actively destroying America and murdering innocent
people for no crimes who struggle now only to survive
from his criminal tirades, advocating torture while
declaring wars against anyone poor and unrepresented,
with a complete disrespect for all human life, and our
courts of Law, has clearly stuck himself to be our enemy
everywhere, as being evil personified, which
inextricably demands his immediate incarceration for the
crimes he is committing against ourselves as a true
terrorist without question, no? The bushmob desecrate
the ideals of freedom, Justice and democracy garnered by
truth as our own being to be individuals, and is exalted
by CNN claiming to be representing ourselves while
watching us be robbed and murdered as stolen from
openly. Mr. Turner, you have terribly disappointed our
world in this great time of need for ourselves as
humanity.
Again, all relevant evidence, circumstantial and
otherwise, regarding the WTC terrorist act, points to
the bushmob, and rumsfeld especially.
"Any argument about any aspect of the conduct of the war
against terrorism," as Globe and Mail columnist John
Ibbitson puts it, "must begin with those airplanes
smashing into the World Trade Center and the Pentagon.
And then it must stay there and never move from that
spot."
Flight 11, all ticket sales are accounted. How did
terrorists board without purchasing tickets? No, the
airline industry did not take the names off the lists on
Sept. 11, as too on the 12th they confirmed so with a
small correction, but if they had, how then would, or
could, the desperate doubter explain strange flight 77
from the same company, which does leave room for
terrorists to be on board with the given total. Oh...
I think I know. Two flights had duped terrorists hired
by the bush wrecked state department, explaining the
State Department connected money transfer discovered by
the good FBI to the head terrorist, Germany's Mr. Atta,

unreported by the Commi Nazi Network of course, showing a belief on Atta's part, that he would not die with the top secret arrangement he had made with the bushmob privately, explaining why the bushmob had his passport in their possession secretly, and why Atta couldn't have checked in with baggage. (Ya right, he's gonna pack a jet fuel consumption calculator and a video titled, "How to fly a jumbo jet airliner in twenty minutes for dummies" left behind of all places in baggage, explaining the secret bushmob audio tape still to be never released where Atta is heard mumbling, "Jeeze, where's my lucky shirt?" and, "Does anybody here know who's flying this thing?") The $100,000 didn't go far, and Atta clearly wasn't a devote Muslim, as in the bar he drank vodkas and flashed a huge wad of hundreds and fifties to the manager, and everyone else in yelling distance, bragging how much the bushmob had paid him stupidly to do so, for a flight he couldn't possibly have boarded as a viable pilot or passenger. Also, why need carry his passport loosely as needing to remain unnoticed, if he didn't buy a ticket, nor planned to travel anywheres, if he somehow magically just appeared on the plane in mid-flight after an all night bender with hookers? Also, none of the four flights easily indicated that they had been highjacked, while the transponders were all turned off by code from inside the locked cockpits, at roughly the same time as if by automation, with flights not changing their flight course for as long as fifteen minutes, like no passenger ticketed terrorists aboard flight 11, ("Hey Atta! check out the view!", or "You left the manual where?", or "Gee, thank God you have the final draft, suicide letter still with you for when we burst into a fireball."), as too, the 200 mile precisely aligned trajectories, without HUD, do attest something not quite normal, according to experts in the Air Force with thousands of hours flight experience and some chaos theorized war gameroom background, and elsewhere, who know of bowling a perfect game while blindfolded, using a checker. Flight 77. The planted terrorists failed to highjack due to the fact, the plane was returned to control of the real pilot who managed to use communications after a fifteen minute fight for something. Conversations that the bushmob confiscated. For after 77 changed course in the dramatic after some struggle for the controls, it then returned to it's original flight path, and okayed, but, not for long, for now they knew inside information. "No, I wanna fly this plane according to procedure while you guys fight a fair three round fight." or "You say planes have actually flown into the WTC towers?" or

"Let's just pretend we're the real pilots, and maybe no one will notice?" But shut off transponder only then? was it on again, or had it never been off before? If the terrorists were subdued, or gave up by showing their red bomb boxes only contained confetti, how do they so quickly take the pilots place, (who had just been last near for calls after returning to normal), to push the codes? This is why the bushmob took the tape. CNN tells us rumsfeld says the FAA didn't contact NORAD until 9:25, while at the same time, CNN also tells us controllers who handled 77, knew it had been highjacked at 8:46.
Also, explaining the now no longer strangeness of why bush desperately ran to confiscate those airline videotapes of the passengers boarding flight, not thinking to know we now know who they all were. (Maybe things didn't go exactly according to his evil nazi plan?) Truly brave American soldiers would arrest bush and rumsfeld by the end of a loaded ready to fire rifle, and any other who stand to stop us from viewing our evidence available. Why, that's called obstructing Johnny Wizard. Also, consider this, the thought to necessitate the order of the terrorists to force passengers to use cell phones as secretly planned, two flights, (Time magazine Sept. 24 - Flight 93 "We've been highjacked. They're being nice.") but make no declarations on behalf of themselves leaving no point for departure? With a communication plan not controlled from the air perchance? Ah, but not on flight 11 or 175 where terrorists weren't present, as again, every passenger accounted, but no calls? Only one not talked about, because it doesn't fit with the bushmob lies. Flight attendant Sweeny was reported as the only one I am aware of to make a cell phone call over the entire hour on flight 11, or 175, to the ATC at Boston, giving seat numbers to highjackers that were not on board as registered ticket holders, (so how did she?) nor even sitting where Meuller lies, who in so doing, disputes she made the call to know factually. Makes no sense to me also, and CNN, we can be sure, will do nothing for the Americans who lost their lives over the senseless ignorance of their corporate cult status, that perpetrates this form of dim-wittedness without helping you by interviewing anybody involved in the investigations, to rather let the bushmob continue dictating unchallenged to murder more of us, for staying unawares of our silent screaming.
hmm... Any unboarded tickets? Apparently so, for it was reported all purchased tickets were used but one. Another koinkydink regarding the hooting and hollaring,

drinking and carousing in the strip bar the night before of the bushmob barkers, is that nobody would PURPOSEFULLY give their lives in a collective criminal operation for CASH payments through the State Department as to go gone dead broke next day, against living life's costly riches freely would they? Did Atta from Germany even attempt to give the 100k to his wife and children for safe keeping? Bingo. Also it has recently been revealed by India's officials, and Pakistan's Foreign Secretary, Niaz Naik, that the bushmob had contacted their governments in AUGUST as himself typically idiotic, as privately to public representatives in a unreported meeting in Berlin to state, he, as the anti-Christ, would slaughter the innocent people of Afghanistan's government, who had ended the heroin trade and were protecting the country while progressing towards equal rights for women,( We will sue CNN for every dollar Turner has.) making illegal, slaves and murder, by forming national laws that five years previous didn't exist, also making it safe to travel, and started opening schools for girls while being starved for doing so good for everyone. Why would bush the demon attempt to do so? To shore up corporate banker support for Enron, who had placed a 3 billion dollar investment in Dhabol Power Company, and needed liquefied natural gas in a big hurry, what with Qatar drying up, and the tripling in price of naphtha. Stuck no longer able to garner partnership with the present pipe deal contract offer for Afghanistan agreed to as well by tribal leaders who Tommy murdered, as too, India's insistence in not being ripped off any longer, by a company the entire nation learned easily to hate over the past decade, and the laundered employee pension money unretractable in the Cayman Islands proved to be of little use apparently, and of course most importantly, also the secretly known to fellow shyster cheney, impending criminal bankruptcy, and we must also not forget bush had excepted 2 million dollars in bribes from Ken Lay, who had his own late night office suite at the White House for their private encounters, so it has been kinda reported, but difficult to believe bush manages to whore so much, but understandable, what with the way he walks so funny. See, the Taliban had excepted a deal from Bridas, a pipeline offer to help rebuild the nation, while the bushmob just threatened to murder all their families for Enron's conspiracy tied to the repuglican nazi regime. Enron could never obtain investors desperately needed, to attempt with capital, to hide their crimes against all the American people, without a binding contract, investors such as from the

multi-billionaires in the post WWII charity organization, World Bank, of which as unocal, being typical repuglican, only offered bribes to officials from Afghanistan to hurt their nation they, as the Taliban, truly believed in working for. As a another example where these nazi vermin relate their uselessness against us all from, Mr. phil gramm lobbied for slave labour at 10 cents an hour for America, while sneaking in a bill for California to have their electricity price quadrupled, for his relatively paultry personal check of one hundred thousand, while California citizens payed billions and billions as stolen from without police protection, as companies fell going bankrupt due to gramm's assault, leaving many out of work to get swindled even further by repuglican corruptions that run rampant through the entire state in other places, without me there to bask on the beaches to give an occasional cameo appearance, while flexing my muscles to the tune of some free beer, a place to crash, and maybe pretzels, hint hint. Achem. On the morning of the fast paced Sept 11th, bush was aware of something special in NYC that he would comment on as asked SPECIFICALLY he stated while leaving his hotel room, on his way unswavered directly to hear about goats from school children by nine, as it was reported his comment to be so nationally, on ABC News with Peter Jennings reporting on the terrorist highjackings. While we now know according to the FAA's official report, that at 8:20, officials were made aware of the unprecedented emergency while channelling through authorities, (the bushmob as rotten rumsfeld through CNN speaks nothing about it saying, all the FAA employees are lying, and don't keep watch professionally) and according to the criminal indictment against the bushmob filed by Ilarion Bykov and Jared Israel available at www.emperors-clothes.com, the Secret Service are kept more informed than anyone concerned with bush's safety, so, you'd figure, would have made bush aware of all four flights, since he was already familiar with one important thing going on in NYC, that he would talk to the media about directly later as massed for it, right? (Perhaps someone should ask Andy?) Bush was also reported to receive a call in his motorcade about the horrific event, with him also confirming to witness the tragedy of flailing bodies from the epicenter of disaster, you know, the WTC towers, commercial airlines thing?, school television sets we presume existed that he left only a moment to thought, as he then quickly entered smiling nonchalantly, a different world stage, the class room unshaken, without thought to think he may have been

confused earlier to then attempt seeking clarity, no, he sat for 25 minutes unalarmed, chit chatting like nothing was happening, just as we rehearse, and as disturbingly deceived evil as ever to be believed, as anti-Christ he is it would seem to be. He later after tinking tried as dumb as he is, to deflect his gruesome macabre conduct, by suggesting he had learned only of the doom just prior to entering the classroom, where he immediately without thought, quickly attributed the disasters to pilot error while making a funny, while completely dismissing his concern as not even present for the loss of innocent American lives, bankers even, (then, before, and now he'd even tell you unblinking, "What?"), just like the tens of thousands as children in Afghanistan, and the terrorist crimes he advocates in Palestine, as he then pressed on to more urgent matters regarding his press op cover up. Did you see his media reaction in front of the classroom, when he heard the news for the forth time officially that morning, as again, he even admitted to actually visually witnessing some of the devastation before that moment, and that only then, had it become a serious matter to change, or not change his demeanor? Stuck he was then, with no mind to ruse, er.. time to snooze, Arg! What was the cue? Errrch... If he moves with priority interest as concerned openly honest public figure, as he knows a legitimate President would have been to first learn of such carnage,
THE MONTH BEFORE IN AUGUST,
why not previous before he left his Hotel room with a television? Outside the Hotel? In the motorcade? With school staff as you'd figure would have been present too laughing, no? Instead he stayed as he had been to give no orders publicly, nor attempt to make public inqiries, but to listen with such unbelievable absolute devotion, equating a beautiful child's story, as if it were Jesus from the heavens himself, speaking directly on the living Nature of our Universe... Okay, maybe we won't be able to convict him on that, but, if that isn't worth enough salt to be considered newsworthy, how about when bush said he didn't hear of the towers until he was at the school building, nixing the recorded comment reported on by John Cochrane of ABC News with Peter Jennings, that bush made a noise saying that he was importantly aware of something in NYC to speak directly on later? Or how about at the memorial, when he publicly stated it would take two whole hours to read the names of those he would without thinking, murder as innocent for Enron he told India and Pakistan in August similarly, so he would just read the titles of companies to say Grace, then would press on to more urgent

matters.
"Crime is terribly revealing. Try and vary your methods as you will, your tastes, your habits, your attitude of mind, and your soul is revealed by your actions."
- Agatha Christie
-----
March 11, 2002
Too many loose ends...
By Barrie Zwicker
... Yet at 6:30 the evening of September 11th NBC Nightly News, along with many outlets, reported: "It was after the attack on the Pentagon that the Air Force then decided to scramble F-16s out of the DC National Guard Andrews Air Force Base to fly ... a protective cover over Washington, D.C." ...
-----
Joint Chiefs of Staff, General Richard Myers testified to the Senate Armed Service Committee of Sept. 13th, that no fighter planes had been launched until after the Pentagon was hit. CBS reported the next day, three days after the event took place, that everyone in the media and government as Myers, who of all would surely know as much as anyone with the paper work he had to prove it, including also highly respected employees at Andrews Air Force Base, and at New Jersey, were all lying without explanation nor reason to, and that at 8:44 two F-15s scrambled from Otis Air National Guard Base on Cape Cod, and were racing to New York at less than 300mph, below 20% throttle, to arrive way too late from over a hundred miles away, making the 'official' CNN story implausible. Although, the FAA has stated that it, as required by statute, and rehearsed for decades as practiced, drilled, and executed flawlessly, alerted military authorities in Colorado, throwing the command to rumsfeld's chain at the first sign of a possible high jacking, and did not sit staring at radar for 29 minutes, then yet again for another 20 twiddling through the manuals as bush would have us believe without suggesting. The attackers clearly did not act alone, as rumsfeld fights to threaten us with murder to think anything but his assuredness of who are the evildoers without evidence available to us all as facts to speak for ourselves, which to the trained observer, incriminates himself as suspect on the purpose. (None of even the how would anyone know who 'suspects' without having purchased tickets, are al-Qaida, nor from Afghanistan, according also to the FBI's Mr. Mueller, who in his knowledge of evidence as it pertains to criminal conviction required for our civilization stated, only "one --->--- OR ---<--- more" might.)

Showing a cowardly fear nullifying judicial procedure, by swaying the numbed corporate automatons to think likely as machines, while not searching nor speaking to give reprimands for correction, which would be done as normal, if rumsfeld wasn't directly responsible for the crimes himself as nazi traitor. Why else? Because real soldiers as American employed at Air Force Bases have whispered behind our locked corporate news doors, with no place to speak openly as national, being corporate news is taking none of our phone calls, as Americans are generally broadcasted to be illiterate and cowardly because generally they seem to be that way actually, as I too, still haven't been addressed as someone with something to say by our professional, they know us better than ourselves, news standards. However, I am presently working desperately with many at CBC for an up coming let's slam Johnny documentary, or possibly even a legitimate news story, and others in the alternative media are slowly opening up channels of communication by returning my phone calls, of which, you as well, could do the same in our name. The universe is turning, take hold somewhere. As I was saying, real soldiers as American employed at Air Force Bases have stated without an ability to be wide open, leaving this point very difficult to confirm as of yet on our part, without jeopardizing ourselves as dazed and confused hopelessly lost nowhere. Example, our media giants we all suffer without answering any of our important questions, airwave savvy broadcasters such as Myers, rumsfeld, Mueller, Ashcroft, Chris,

[cnn]

shrub, and the overwhelming cowardice of others to spread this document to feed newspapers, soldiers, and law enforcement officers everywhere, enemy or otherwise, that has so far, found no rebuttals regarding the evidence before us, and rational for Justice to be served as a protection for our freedoms we must struggle to maintain always forever.

That stand down orders forbidding any military aircraft taking flight for defensive measures were given out verbally right after the first airliner hit the tower. Mr. rumsfeld and bush's immediate public explanation to us meetin like this', given to surviving American families of murdered police officers, fire fighters, and soldiers everywhere, leaves us by their continuing silence of no statement to counter this extremely serious accusation that demands resolution either way

immediately, (or both their right deserts by watering frauds), found recently at a very popular respected web site or two, would make one heck of a NRA town hall gatherin, eh gentlemen? Now, back to Myers in a later different congressional flub. (That I would sight if I could, but a small miraculously unawares group, holding our title of RCMP, has seized property of my own such as computer equipment without officially charging me for writing truthfully, that I've always freely publicly admitted to doing privately through all local news media outlets here in Winnipeg, (that give me next to nothing as political coverage for being critical, scientific, and possessing elementary math skills such as addition and division regarding our public ad revenues) several legitimate newspapers across Canada, and as a secret to themselves even group, only two officers seemed vaguely familiar with deductive reasoning, along with our actual history as humanity, that they had spent two months with overtime pay researching only on how to use Google apparently, are presently pouring through Amiga Basics as we speak, looking not for my well documented claims they balked in secret terror to tell me it wasn't about them as individuals to answer, but to threaten my freedom with their excitement about the prospect to find personal works to use against myself to this world I call home. In darkness they claimed they would not be individually involved professing from somewhere if asked by another playing evil against the wall, and therefor as anyone could be entrapped as victim, would get Johnny on a indefinite termed mental health care rap for being intelligence, they would try, to publicly accuse myself lacking hounor and character, on behalf of the secret service good cop bad cop Don jokingly told me for life, as trapped helpless supporters of cop killers and lottery scammers stealing from our grandparents, just ignoring their jobs, our lives, my written words, that do largely include, my publicly made requests to protect our communities as legal bound claims based in our criminal codes as Constitutional, who as themselves will attempt to stand publicly not to bring attention if afforded the effort of public accusation against myself, pretending to be us they'd suppose eventually, captured in our public arena against me as unworthy. Standing otherwise to Lord over us against themselves. Truth, Justice, freedom and liberty destroy ignorance as injustice, slavery and oppression, like it or not, here come's Johnny with no lawyer. If a murderer is on the loose recommitting, do we not use the required force to stop the transgressor from re-offending? The media is our messenger. Anyway, (Jeepers, I sure can go on eh?)

as I was saying, Myers later in another committee addressing the timeline specifically, stated something like:
Oh, I don't know any longer, now that the professional news corporations are dictating our existence without my records, and our democratic governmental testimonies, left me thinking to not bring anything with me as required this time, sorry, no, actually, I forgot why I came here today. Is it over now?
Also, in retrospect, we, as you, can also witness through archived military newsgroups an almost complete support by our gun saluting soldiers and several real OFFICERS, American and Canadian, for my calls as a single citizen in our fledgling democracies for the immediate arrest of rumsfeld and bush escaping our authorities for murdering American civilians. Gore won the election, so let's make him President until a new election can be called as soon as possible. CNN must become humans and demand public representation. Look, we've screamed around the world regarding the facts irrespective of myself as an individual, and the corporate cult members refuse to report our stories, while actively working to oppress us all with deceit, they feign as brave to steal from us as poorly represented. See? Mr. bush as anti-Christ states that if a dictator pirates the authority of a nation and commits CRIMES against ourselves as humanity, the nations police officers should be slaughtered without mercy, or allowed legal council as defences, as regard for our standing universal laws of decree by our big time Creator grants us free will as unthinkable anyway (it's a long story, read the somewhat boring, "Johnny's Last Stand" if your interested in how I do this without flinching), and in bush's extreme evilness, now suggests, America as in deed our world needs to be nuked for not defending our flag. As we witnessed horrified in Florida, as bush the demon tyrant self destructing in his personal hatred for everything truly, argued with only himself publicly, that he as pure evil, isn't required to have evidence to murder anyone, and if The People should speak out as Justice for all as reason does sustain, he'll annihilate the entire planet, as he is against every life as US not understood, perceived, or believed, because he is generally so stupid as evil is always, leaving him targeting specifically, any police officers who are protecting ourselves as community he would blindly spout proudly, if we could nail him on the question directly. Justice to protect a person not guilty of a crime, he believes is ONLY relative to whom holds the speakers platform for

accusation, so as dictator, he sides to steal and destroy our lives unworthy as himself, and doing so, has him deceived it brings bounty by monetary value stolen, not earned, seeing no value in personal relationships but to distrust others as reflected to being a part of himself also, leaves him in relationship to us, secretly planning to deceive the entire infinite forever Universe, being harmful to all as the anti-Christ he is without exception. Ah, but alas Mr. bush, infinity plus infinity equals infinity super dummy. Nothing else wiser as this Universe is intelligence known to ourselves as wonder eternal. See, if there is one thing every single conscious entity in this Universe of Universes can all agree on despite whatever bush spews, is that we don't wish to be deprived our right to life and liberty for just living to not deny that right from any other. Lucky for bush, God is forgiveness, being of a causeless force before an actual beginning kinda nature, me on the other hand as Johnny, representing life and death the way I do honestly, am not so stupid nor tolerant watching him destroy ourselves in error. It's a crazy world. Mr. bush tinks the world is only of his perception, nothing more of ideas, no strength in wisdom, fearing equality for us would leave him in all honesty, a life wasted trying to cheat himself. While I as Christ say every single individual has the equal born right inherent as existence eternal dictates, not only because I'm naturally a caring, compassionate person familiar with physics, but also because it does me well for my freedom to be all I can. For in this struggle of living, I foresee great potentials, not only for myself having fancy dinners and super big parties, but also for the realms of knowledge I'm familiar with ourselves neglecting, and how many important issues go unresolved due to doubters who dismiss actual experts in areas such as understood sciences that need our utmost immediate attention, motivating me to do anything possible to make this place a better world on behalf of everyone, that of which, to resolve, only lacks a lounge act King, who as should be, me, because here I am to crown myself standing this way forever dreaming. Plus, believing I'm actually trying to help this big old clunker of a Universe as I understand fairly well as friendly, really makes it an extra special bonus for the planet and everything, as long as our world isn't completely decimated by the bushmob, due to the general masses having absolutely no interest in understanding themselves.
I don't have any interest in what others do with their freedom, other than deny ourselves to do likewise. If a

nation commits a crime against my freedom as a individual, of which I know as a god to be equally represented through everything, an innocent person murdered effects me personally, especially when it's advocated in a public forum where freedom is advertised, but obviously not present, there is where my voice demands by RIGHT to be in defence of all innocence, (big G 6 power) such as is my eternal struggle for freedom in my own name of John. (I'm in the book.) I wouldn't kill everyone in the country, or police officers as bush would advise, but demand the perpetrator to be corrected, chastised, insulted, arrested, or shot smiling as my two year John is crazy mad about bush the nazi tyrant murderer, has manifest ourselves this way. Freedom is only garnered through Justice for all equally. Mr. bush and cheney don't understand that, nor wish to learn about us, because it runs to expose their weakness publicly, as cowardly and truly pathetic individuals they both truly are, as they fail to pretend otherwise to more than half who know better, and as bush, to hide from us all as a very anti-American war criminal. Which is why we as humanity, must demand bush and rumsfeld's immediate arrests for mass murders and also for decimating the American Constitution and Bill of Rights in our corner. Mr. bush and rumsfeld must be stopped at all costs as our own willing, shot smiling now if need be, twenty dollars a head I'm offering, as too, helping our disabled officers enforce our laws to protect ourselves on behalf of every person. Did you notice how our corporate professionals ignore my world wide factual claims, only to silently advocate yourself to be oppressed and stolen from again? Maybe blown up real bad, while bush blames whomever now that evidence isn't necessary to convince the numbed and drugged of America for paying to destroy themselves by rewarding bush as saviour? Do you notice how our professional corporate cogs, refuse to report on bush's fifty billion American worker tax dollar rip off, and by omission, advocate criminal acts against ourselves as society's helpless tax paying victim? Or CNN refusing to report the closing of certain voting polls in Florida as all eligible people from the area, were lined outside the station, left to be told to go across town in fifteen minutes, but first the repuglican party is going to charge you for loitering, er.. I mean busing, no, wait, and so it went till many never made it as reported. Never mind all the disqualifications. Mr. bush was not elected, and is a tyrannical dictator of evilness never known before or ever to be again, for his gamble is for all our real lives he leverages as we truly fall dying.

Either we survive, or bush destroys all of humanity due to the lack of real courage as heroism in America to challenge his hatred of our world living to continue, and irrational fear of our ultimate freedom to remain forever wondering aimlessly. Mr. bush shall not continue to advocate murdering our police officers while stealing our monies, or we will get him ourselves for continuing to do so, as he daily advocates on all corporate news channels, smiling his demon grin as dumfbuck shihtead. Mr. bush is presently trying to dump tons of radioactive waste on a extremely volatile fault line under Yucca mountain, shipped right across the country from all over. Purposefully ignoring all scientific, as the public's concern intentionally. It is clearly an act of hatred for all life as our Nature, for it is so beyond irrational, and into maliciously evil, and in of itself, should warrant prison sentences, if not immediately halted for public review demanded to be broadcasted on CNN internationally, in a manner where the staff actually tries to do something on behalf of the weakened nation as still barely living. I have wondered of a Canadian prosecutor against myself standing, if unfortunately the RCMP, in conclusion, do privately decide against ourselves being by playing stupid against democracy and freedom would be my defence I'd suppose they would appear to all, while begging for forgiveness from those who know not what I write. (I can't even read this myself sometimes. When I was questioned weather I wrote "The Trial and Conviction...", it was murmured quickly, that, oh we have ways of proving you did with our government crack computer specialists, so don't try to get out... Huh? I, in the paper weeks previous to them stealing my goods, mention directly my discussions with my provider, let alone the computer geek fact, that every paper I've published on usenet has address headers. And oh ya, and then there is the second paragraph in "The Trial..", and the mention of my full name elsewhere, with tons on contact information. No, this is about not allowing my legal, rational, provable arguments made public against bush and rumsfeld the war monster criminals, for fear to face the horrible failures of our corporated media to represent Justice as ourselves in North America. Having me now placed potentially closer to the position I was struggling for, by attempting to actually imprision ourselves under bush dictatorship ruled broken by everyone. Thanks for helping to realistically illustrate my argument. Goodbye cruel world.) I would suspect if so, an effort argued bogusly, in a possible corrupt court room only to foul our sacredness as

humanity under tyranny against our nature to be insulted, with the news bank bosses ignoring our downfalls, to not allow to plead my case openly as John, so here I make it now. I beg of you as a stranger to help our Justice ring through, if not for me, for yourself as deserve to do so. Or, go straight to hell, who needs who. Mr. bush's private Secret Service agent was drinking diet coke when I first spoke with him person to person. (I've written at least five papers discussing the science of monsanto.) Didn't really seem that all a bad bloke, and I do believe we left on fairly, no need to kill each other terms mutually. But, thought all the people in this world should be blown to bits without thinking nor discussing why it seemed he thought those he didn't know were deserving of murder, along with our families as collateral damage, and the country side toxically polluted for generations like in Iraq, to waste billions to give the bushmob to sell heroin and distribute cocaine for his fear of the CIA, of which fairly, he seemed ashamed when I mentioned it, bush's pathetically weak and cowardly cocaine dealers who are acting illegally, desecrating the American flag, the Constitution, the Bill of Rights, and so on because, the northern alliance treated women so badly before the Taliban he witnessed to tell me all about it briefly, and how all deserved to be slaughtered blindly to make him feel like American, and no other ideas had been implanted by command headquarters when they sent him on his own for testing my friend or foe hyperspace capabilities. Why all the murders we stand for? Because apparently, the al-Qaida that Americans never heard from, state nazi corporate america has no right murdering and stealing from ourselves as humanity, while propping up military dictatorships with American people dollars, killing innocent families attacking Allah by representing the evil in Jihad, as all would agree who could think likely from any religion including atheism. The nazi bankers with daily full page newspaper ads don't like that philosophy understood by ourselves as the silented as taken to be granted, while our in debt soldiers are told to murder people accused of crimes without any evidence. Nazi Germany all over again, while racists utter threats against entire nations going unchallenged as actually published. Mr. rick lowry of the national review goes unarrested and corporately celebrated, suggesting to nuke Mecca, and sites 'moderates' who suggest 10 other capital cities, nevermind Philadelphia, while I yell, "get bush and rumsfeld now as the nazi war criminals they are, escaping true American JUSTICE INFINITE as

INDIVISIBLE!", (just pretend I'm not here). Central Affairs representative Christina Rocca, the evil witch she was to humanity as God, uttered the CRIMINAL threat to the Taliban's embassador for choosing the better LEGAL business deal in August "Except our offer of a carpet of gold, or we'll bury you in a carpet of bombs."
---
Unocal and the Afghanistan pipeline
by Larry Chin
Online Journal, 6 March 2002
... Osama bin Laden advised the Taliban to sign with Bridas. In addition to offering the Taliban a higher bid, Bridas proposed an open pipeline accessible to warlords and local users. Unocal's pipeline was closed for export purposes only. Bridas' plan also did not require outside financing, while Unocal's required a loan from the western financial institutions (the World Bank), which in turn would leave Afghanistan vulnerable to demands from western governments.
Bridas' approach to business was more to the Taliban's liking. Where Bulgheroni and Bridas' engineers would take the time to "sip tea with Afghan tribesmen," Unocal's American executives issued top-down edicts from corporate headquarters and the US Embassy (including a demand to open talks with the CIA-backed Northern Alliance)....
J.W. reminder: The northern alliance are bush's heroin pushers with women slaves
---
Of course CNN again, refused to protect Justice infinite by reporting the facts, while bush followed through by murdering more than 3000 mostly wealthy citizens as his excuse to murder more us good people for his evilness (CNN reported bush most popular according to their bogus tabulations that seemed to neglect, no one voted for me either), while now two seemingly unread RCMP officers, a single Secret Service agent, and one justice scribbled Obrein or maybe it's OBorien look to ignore my equal rights, by claiming my demands to be human, something they as nobodies will hide from, while attacking my credibility hidden by private news agencies from the public, hoping we will just die away with them to plunder who? BZzzzzzTT! Wrong. Welcome to the Twilight Zone late comers. These cops supposedly of ourselves, are well aware but pretend can't read, bush and rumsfeld blamed an entire nation of millions for a crime without any evidence, but to steal and plunder, over crimes they were responsible for, murdering everyone, while I wrote every real proud and strong American should help our police detachments, stand up

and shoot the two nazi bastards in good lighting immediately, for trying to undermine everything the American flag represents, while purposefully leveraging the general populace to remain in ignorance, as CNN just refuses to report on anything regarding the State of the Union, attempting to escape the Judicial system by destroying our democracies, sacrificing soldiers too stupid to live godly. Now we can only assume these officers are trying desperately to convince the real RCMP to cower as duplicitous, as too stupid to care for themselves as our own brethren, trying to find me guilty as just one man named John for living natural, to make them as nazis strong for oppressing our Nations as God everywhere, because of their inability to stand on guard as Royally Canadian. They've actually told me they are going to attempt to charge me for something, but know not what to total yet. They seemed fairly excited over the prospect of stalling our entire human race, needing to learn first how to, then to go through hundreds of thousands of Amiga documents, programs, libraries, and device drivers, that the entire Amiga World community has been working through for 20 years, then there is the thousands of individual games from the eighties that they'll need to learn the intricacies of, my absolutely huge art collection of mostly babes, dragons, movie posters, and sea mammals, and finally my 'Johnny Archives' drawer, that they of course in terror, will completely ignore, along with North American criminal lottery revenue tabulations, neuroscientific MMT papers, (The most horrific toxin known to humanity), the bad evils of Monsanto we can be sure will be considered a definite "oh, they didn't see that as officers of our laws", AZT? shell and talisman? Forget that, just let those people out there die as murdered they would snicker privately in secret telling nobody, no, it's all about finding a way to send Johnny, he thinks he's so smart, genius away for being brave and oh so freakishly strong. It's already been near a month of planning to hurt our ability to communicate as humanity, as it is becoming increasingly more difficult for me to post my ramblings, while neglecting my legal demands for bush and rumsfeld's criminal arrests as repeating offenders of first degree murders still threatening everybody. GIVE US BACK MY AMIGA! Or, real officers, military and otherwise, along with your co-workers, your neighbors, and my family of garbage pickers, will charge you with obstructing Justice. For, your cowardice to protect our communities is not my own as John, and attempting to hurt me as an individual to hide from your paid responsibility to our communities, is not what the REAL

RCMP stands for publicly. Obstructing Justice is a charge that holds a maximum life term prison sentence if we look to the mounting dead bodies, in a court case we will likely preside over as true, brave, strong and free, against fools trying to break our living spirit to believe in my determination to have this done on behalf of everyone.
Barely alive Iraq is no threat to anyone, but torture advocate cheney as soon to be war criminal like bush and rumsfeld. stopthewaragainstiraq.org Spend five minutes at that site which sends info around the globe, and then notice how CNN doesn't want to play the public on the issue understood by all our experts. I'm not sure myself of CNN, for I can't stand wasting my time any longer watching themselves ignoring everyone. If the corporational news degenerates, continue espousing the benefits of siding to be nazis in our names, escaping our justice system as mass murderers, Mr. rick lowry, bush and rumsfeld, will be challenged by every proud NRA card carrying, God fearing, life protector imaginable, this includes of course our REAL POLICE agents of freedom in the Secret Service, that are smart enough to believe in the name of the law, and not idly shaking in terror, while attacking our citizenry for speaking out rationally on behalf of our falling dead comrades. Ed McMann and bush are planning to tour American elementary schools to teach children to help secretly identify those 'others' who are "injurious to the domestic tranquility of the people", and teaching the "importance of patriotism and obedience to the state", pope nazi bush is so terrifying on his own representing the dark ages as evil incarnate, I couldn't possibly make this horror up, and Ed has always been a stupid drunken sell out, so, no big surprise there for anyone. Can you please e-mail this letter to the staff of your favorite radio program for me please, then we'll all listen to themselves turn against our communities as us CIA (see below), FBI, and legitimate officers of our LAWS, by remaining silent while hanging up on everyone trying to protect ourselves from war mongering nazi crime lords, as truth to set us free from the chains of tyranny will take a course, it's just how many will willingly in fear of living, take bush's place for nazi sacrifice, instead of standing to prove our worths by demanding justice for all right God damn now? What can they be scared of but us? Do some fear we'll make'em look stupid for being so? What can we blame but the time we run so quickly short on, for we must not dawdle, and get back to work to pay the bankerman for doing nothing, so to give our luxuries of freedom to do other things we know not of,

because we're bust as it is, and this days almost completely done for now like the others, oh, but our hundred or so American multi-millionaire TV entertainers have it so good by never ever getting political generally, while hundreds of millions are robbed and murdered in their names as evil taking much by giving so little back in return, screaming nothing as individuals, pretending to be actual struggling artists, as this life is truly a pain for them to pay attention. ("Oh, but what about my poor dying fans who worship me like Jesus" they would probably say.) In other news, the good CIA elements were reported by The London Times, to have asked the London Financial Services, to investigate the traced, extremely unusual 'put option' stock transactions regarding the two airline companies, (a 4000% off the norm bet they would both lose cash value) just prior to the terrorist acts taking place, they did, and came back with A.B Buzzy Krongard, bush's dumbass cocaine dealing, anthrax mailing, executive director of the CIA ourselves, who bush the nazi dictator now says the CIA can not arrest in a military dictatorship absent Universal law, and has recently told Americans, wimpass buzzy, will now be free to murder ANYONE American including subordinates, who dare try to reclaim their rights as an equal under God not heard from. We say true brave American soldiers and our grandmothers everywhere say otherwise. Where is the Mafia when we need them for Christ sake? Oh ya, mostly dead, maybe I'm moving to fast on these issues eh? These facts mean bush, rumsfeld, and now buzzy, are directly involved in the terrorist acts in NYC, of which bush, as American traitor, has publicly encouraged the WTC investigations to stop looking more evil to all as us than ever. CNN decided to drop the story they were almost holding right there, because it involved protecting our never talked about, good investigative working CIA officers (I was a little shocked also), justice and democracy for US people sold down the river, drats, actual work, where CNN rather just slaughter US innocent people and police officers instead of reporting on the bush crime waves, while selling cocaine to school kids, then call themselves heroes in my name after the carnage for blindly dropping bombs from the sky on everyone. Heroes? More like typical american nazi cowards, willing to murder their own families as themselves, than bravely put their lives on the line standing to protect Justice as freedom for everyone, as to what true bravery, and heroism has always been. While the world watched CNN broadcasting, American nazi soldiers celebrating joyously in contempt for God while singing,

right after the unreported dropping of thousands of pounds of bombs on everyone in Afghanistan, body parts everywhere, while knowing directly as individuals, every single, there was no evidence offered that anyone there was responsible for any crimes whatsoever, including the Afghanistan women who worked for the newspaper, but for to be victims of fanatic nazi american barbarity, disguised as human, like bush almost gets away with as pure evil deceived, now completely impossible to believe. Oh, by the way, I am now taking new memberships for al-Qaida.

As I say, there isn't a real man in the American Marines, or the Army willing to protect America with their lives, for if there were, rumsfeld and bush would be rightly dead for the murders continuing against those they know as innocent. As even with their continuing threats against more innocent people as American lives they brag to throw away as just soldiers, as all these other nations they try to make ready to sacrifice millions for, while propagandizing that our Justice we need not believe in to grant us freedom from oppression, nor evidence no longer a requirement to convince us who is evil, and who is not lying. Nobody deserves to be murdered, but a murderer escaping to recommit.

Just prior to Sept 11th, bush ordered the Naval Strike Force in the Indian Ocean, a 24 hour strike force for DEFENSIVE purposes to be shut down. Mr. bush threatened to veto the Defence Appropriations Bill only after the Democrats tried to move 600 million out of 'Star Wars' and into anti-terror defence. The Star Wars program also includes in it's ranks, an extremely corrupt bunch of criminals, who bribed repuglicans to remove the American law against making false claims for governmental contracts, a seditious act as TREASON that was never reported by the Commi Nazi Network, who now defraud every American openly, escaping military tribunals because, American soldiers are clearly to everyone on the planet, left inept, and as pathetic cowards lacking leadership everywhere, stuck with evil American murdering rumsfeld as nazi kcuf, real leadership long gone years ago, when forced to shoot with dirty syringes as only the clinically deranged would order our soldiers need not to be thought human. So, as a consequence, most intelligence left disgraced without medals, that would have only accentuated their inhumanity as deranged lunatics. While now America's left with nazi soldiers who dance over the slaughtering of suffering third world civilians and police officers,

who were in the process of making something better for their nation by following the guide of universal Justice, while evil rumsfeld the nazi fuck, offers a reward for murdering 'Omar the Just', because he asked for evidence that didn't exist. Why? Omar was standing up to protect the American flag by supporting the apprehension of those truly responsible for the WTC terrorist attacks against Justice as freedom America is quickly losing. As I say, there isn't a real man in the American Marines, or the Army willing to protect America with their lives, for if there were, rumsfeld and bush would be rightly dead for the murders continuing against those they know as innocent. As even with their continuing threats against more innocent people as American lives they brag to throw away as just soldiers, as all these other nations they try to make ready to sacrifice millions for, while propagandizing that our Justice we need not believe in to grant us freedom from oppression, nor evidence no longer a requirement to convince us who is evil, and who is not lying. Nobody deserves to be murdered, but a murderer escaping to recommit. Mr. bush and rumsfeld must be immediately arrested to face a fair trial for their crimes in NYC, or suffer a death sentence carried out by every man smart enough to comprehend, that freedom for ourselves and family, mean Justice for all of humanity. Justice protects our democracies from those who wish to deprive ourselves the pursuit of happiness, and like nazi bush and rumsfeld, wish to steal our earnings and sacrifice our lives for their personal misgivings, and fear of this awesome universe. Creating only hardships and suffering as murders against everyone they abuse our God granted freedom, is truly evil and insane, as they are both without question, mankind's worst delinquents. Whew... On another note, as you can believe this to be also not reported, bush apposed all democratic, anti-Enron money laundering efforts by the Democrats as a traitor to every single American value. (democrat.com) We true soldiers figure he burns the American flag when he thinks no one is looking. Mr. bush and rumsfeld need to be immediately brought out of the darkness to the witness of every American soldier, never heard till now as forgotten dead or otherwise, offered a fair trial, and then given life term prison sentences after a speedy conviction for the murder of all the lost American life continuing to fall unheard from, due to their terrorist acts involving us being censored, with me still here squawkin', just as before the man comes to take us away, haha, locked up to never as cared for, you people truly disappoint ourselves,

leaving you to suffer this way for nothing. Why why why. All I ask you is to e-mail this to two people to help our planet survive okay? Then when I see ya, I'll give ya a star somewhere or something. Or don't, and get on your bad side, doing for nobody which would include yourself not heard from. I am not kidding here about this Revelations, Judgement Day, let's just try a little to help Johnny for Christ sake, somethings going to send him to the clink for being a super human being, and that doesn't seem right to anyone. Right? Buddies? Pals? Life long friends?
Thomas White - former vice chairman of Enron - Secretary of the nazi american military, that refuses to believe in ourselves as a democracy demands a conduct of law to treat us human beings as kind, such as a governed nation of people should be considered innocent until proven otherwise. They placed in power illegally, heroin dealers and mass murderers of over 50,000 Afghans just a few years previous, who believe women should be slaves, while slaughtering just about the same to make Tommy look brave, killing us people as he actually told us he has no reason to give, or explain, who we must demand be closed down as arrested for actual war crime matters, for the sake of our innocent lives, and as nazis speaking as us illiterates apposing free speech, have made no commitment to peace in the region, but to place the burden and costs on every nation truly committed to ourselves as humans being. Look, Dutch shell and unocal's deal is a crime against Afghanistan, which offers nothing to the nation but bribes to officials who are almost all employees of unocal. What is coward drug pawn unocal employee, penned as Washington's own, Karazi's position on behalf of the crying children? For him to side with unocal, would mark himself traitor to every person concerned for the plight of people who live in Afghanistan, and he certainly wouldn't be a leader in anyone's summation with himself surrounded by drug dealers to feed our world's poverty stricken either, just as he walked in as to who he always has been. As well, we all know CNN will make no attempts to inform the public but to propagandize with lies, cheating the entire world so Ted can further cash in with our freedoms payed as collateral. Mr. bush, the biggest nazi of all humanity, spewing his hatred for our lives as his ignorant barbarity and contempt for Justice and freedom as the pathetic coward he truly is wasted and deplorable, was speaking recently, almost coherently, with the President from Peru after three private executive meetings, stated to our press, he wasn't so much interested in stopping the distribution of cocaine

and heroin on the rise with his secret partners that most everyone of the literate world knows of in the back to the way it was Afghanistan and elsewheres, but the demand for it by the weak and dispossessed who quickly get hooked, then suffer hopefully for a lifetime he smirked, would be another way to steal our resources. Mr. bush is the evilest scumbag who has ever barely existed, a degenerate, a criminal, really really evil, and extremely unAmerican. Also, again, God damn you people, Mr. bush the terrorist, funds sharon to criminally steal our properties as a parasite, to ourselves as bleeding wounded host, purposefully murders innocent families guilty of no crimes, and good police officers as wickedly evil against every God imaginable, while all CNNed Americans are expected to silently except our voices unheard, which encompasses close to 90% of newgroup mideast political traffic condemning the bastard, and more than 70% of the Israeli population 'officially' by the corporate standard present there agree he is a monster in this dying bushmob universe. Mr. sharon is NOT JEWISH and is not supported by any practicing Jews anywhere. G-D, he desecrated the THIRD Holiest of Holies, after slaughtering would be Jews of which the Israeli government commissioned him guilty for. But you know, he is constantly surrounded by nazi soldiers armed by the American tax payer, so he is difficult to detain, without attempting to blow people up in the market places he threatens, while continuing with repeatable murders that he holds no remorse for whatsoever. Ask the monster, he'll even tell you he is that evil. We'd call him officially the anti-Christ but bush won the toss up. MSNBC refuses to allow any of my clear to any arguments on private message boards they censor us for content, that way, Chris won't appear to directly ignore the simple thoughts against the murder of innocent lives that he advocates as not his own, and I think most people are starting to believe him as deliberately excommunicating himself as loser to our human cause. Plus, I have a limited ability to communicate as our weaknesses do sadly attest our general ignorance, for, the bushmob is now working to have my freedom stolen too, to incarcerate me for demanding Justice, while in silence, threatening every political leader by our corporate news departments refusal to protect myself as anyone. You could be me partner. Please help us in this regard, play a part in history, take some pity, I'm going to the funny farm as not understood by any they tell you to do nothing to protect our freedoms, destroying our eternal souls in acting so cowardly to even not stand for yourself as one

to be worthy, left forgotten. Hello? Is anybody out there?
Lawrence Lindsay - Enron's advisory board - bush's regressive tax assault advisor against every principle the American flag once represented. The American economy is being looted. Trillions have gone away, while billions continue to be stolen. The criminals hiding inside the Pentagon can't account for more than 1.2 trillion dollars in American stolen revenues, while evil bush near doubled their takes believing obviously in no God, attempting to destroy nations in all honesty he hides through only corporate genocide, as our humans lives are squandered without value as meaningless to the bottom line not existing. Depression will ensue if we are not allowed to understand this simple dying force being drained against our wills intentionally. Why will CNN continue to refuse interviewing me, us, them, anyone? Is it our wesly natenah-who dickhead smarmy, hitler warnt so evil like all those people out there are, four hour daily dose time again nurse? Do they by not doing so, support the oppression of ourselves not heard from? Help them hear me as public voice from the wilderness please for heaven's sake, have a heart for yourself man, bush is planning to destroy your world, of which he has no care for ourselves, because his deception as the anti-Christ now fools no one but himself as evil to all things imaginable.
No, really.
Marc Raciot - Enron's former chief lobbyist - Chairman of the crime ridden repuglican party, who has recently stated, he may continue to still lobby for bankrupt Enron as he leads repuglicans straight to victory. What a mastermind game player eh?
Printed below is a speech that Dennis Kucinich, United States Congressman from Cleveland, Ohio, gave recently while ignored completely by corporated american cult members, making him the first member of the United States Congress to openly repudiate President Bush's absent war rationale, and will be remembered in history forever.
Congressman Kucinich's,
A Prayer for America
Program note: (to be sung as an overture for America )
"My country 'tis of thee. Sweet land of liberty of thee I sing. From every mountain side, let freedom ring. Long may our land be bright. With freedom's holy light. Oh say does that star spangled banner yet wave. O'er the land of the free and the home of the brave?"
"America, America, God shed grace on thee. And crown thy good with brotherhood from sea to shining sea."

I offer these brief remarks today as a prayer for our country, with love of democracy, as a celebration of our country. With love for our country. With hope for our country. With a belief that the light of freedom cannot be extinguished as long as it is inside of us. With a belief that freedom rings resoundingly in a democracy each time we speak freely. With the understanding that freedom stirs the human heart and fear stills it. With the belief that a free people cannot walk in fear and faith at the same time.

I can't believe they may be prosecuted if they're caught. They are
preventing people from becoming more obese and getting heart attacks, high
cholesterol, high blood pressure and mad cow disease. They are true heroes,
not criminals.

Like Murderers who prevent people from suffering the effects of old age?
True Heroes all!

Yeah, sure!

i HAVE hEARD OF tHE oREILLY fACTOR AND THE nO sPIN zONE

FOXNews.com - The O'Reilly Factor
http://www.foxnews.com/oreilly/

So what is the story about "The Jewish Factor ?"

Other than Joe Lieberman is Running for President in 2004.
http://www.joe2004.com/site/PageServer
IIRC: His Wife "Hadassah" is Jewish and I think that they raised
their 'children' as Orthodox Jews (Jewish).

But isn't that the "Natural Order of Things" my parents were
Catholics (Christians) and I was 'raised a Catholic (Christian).

## 390. Mobile Scanner Antenna

Newsgroup: rec.radio.scanner
Date: 2004-01-12 21:54:16 UTC
From: news@cnctv.com
Message-ID: <ea732e40.0401121354.63b76047@posting.google.com>
Source record: 23130

I'm in search of a scanner antenna to mount on my Ford Explorer. I understand that there isn't "the perfect" antenna to receive everything; although my main scans are fire, police, and CHP (nothing trunked).

Before I makes any holes in my truck just wanted to make sure I got a good antenna that would stand up to years of use. Don't want anything that will rust (have had past bad experience with that). What types of antennas do the police or CHP use for their scanners?

btw., I currently have an Armstrong 36" mag mount which the mag base is starting to rust the roof of my truck. Want to change before it gets any worse.

Thanks in advance!
John

John,

If all you listening is confined to a single band and you want a permanent mount find a Motorola (or similar business radio) dealer. The can sell you ( and install if you like) the same antenna they would on a police car. I did that some years back when all the locals were still on VHF-hi. Went to the same Motorola shop that I always saw police cars parked at for service. If I recall it was about $50 for the antenna, not sure about installation as I did it myself. Was a good quality unit though, never a bit of corrosion over several years of use.

Larry

Just got the proof today from CanadaPost, Mr John Haury the money order was cashed on Nov 17/03 @ Suntrust Orlando Bank 2822-005, as expected you changed your last name from Havry to Haury--- you are slick I must say.

Mail fraud at it's best..

I have the proof you cashed the money order and will now contact all departments that will trace this out. So know one else has to lose money to you..

Your day is coming.

You don't say if you want another mag mount or not (picking up the magnet and drying off the bottom occasionally helps stop the 'rust' problem)

I just bought a mag mount scanner antenna (Antenna Specialists I think), but for a *long* time I used a splitter hooked to the broadcast AM/FM radio antenna lead. Worked fine but this car is impossible to reach the back of the radio in the dash :-(

Richard in Boston, MA,USA

why does terry and randy and frank who are accusing JD Haury of rip
offs all have same ips. you post his user names and newsgroups posts
and if you look back as far as 1997 there is not one single solitary
post by anynone that have complain that he is a scammer or ripoff and
he has sold lots of radios online. I for one am tired of your cross
post spamming newsgroups with this bs. If you had a real case you

wouldn't be spending all your time flaming him in newsgroups. get a
lawyer or a post inspector and get off the newsgroups you are a troll.
I would also get help for your multiple personality problems.

Remember this guys....
These headsets are NO LICENSE part 15 devices. Read the laws on part 15. It says that the end user MUST ACCEPT any and all interferance to the part 15 device PERIOD. They have no guard band, no protection (no frequency co-ordination) against other users on 154.57 and 154.600. What Booger-King sees as malious, might be acceptable on MURS 4 and 5.
a few facts......
The local Police DO NOT have jurisdiction over ANY use of radio, this is a federal area.
The FCC has better things to do than hunt down Part 15 crap and the people involved.
A lot of the places that use the 457/467Mhz headsets ARE NOT LICENSED! ( just as bad as the pranksters)
Spend a few bucks more and get them on 902-928MHZ or higher or spread spectrum if they are so concerned about interferance.
Go back to a hardwired system.
Meanwhile, lines like.....Please shut that piece of crap your driving off so I can hear you, CONGRADULATIONS!! your our 10,000 customer and your lunch today is ON THE HOUSE, and "I'm sorry...were closed by the health board for vermin infestation. We SHOULD be open tomorrow if we can catch all the little bastards tonight"..are all time winners. Be creative, have fun and let them play into it. Remember the staff at these places would LOVE to be able to say what your saying and laughing their asses off while your doing your thing. After your done wish them good night and thank them for the good time :) you will find a lot of the customers WILL play along with it..if given the chance. The ones that get uptight....FUCK THEM!.....life is WAY too short to get upset about a talking box.

Do we know for sure which frequency was being used?

Most Burger Kings do not use 154.570/154.600. The ones I have monitored use a customer input frequency of 154.540. This is a licensed business band frequency, NOT a no-license MURS frequency.

Other common fast food inputs are 154.515 and 151.895. These are also licensed business band frequencies.

Cool - do that, and if you do have a case and are not lying, then you will have justice. I believe there is a possibility that you might well be an extortionist who is out to ruin someones good name - time will tell if you are right or not. I have strong suspicions as to the outcome.

Not true anymore! In many large cities, there are special
"Radio Inspector Divisions" with full authority.

I've used Caig Pro Gold to clean these types of keyboards. If the conductive pads aren't worn out, this works pretty well. It doesn't seem to contain any solvents that break down the conductive material.

Pete

Scanners have long been used by cab drivers around here to steal fares from other cab companies, one of the reasons every company except one has switched to Nextel. The aforementioned credit card scam is a possibility as well, as I have, on occasion, heard (I assume) towing companies giving out CC #'s over the air.

I'm about to purchase a Uniden digital scanner but I understand some police and fire departments can block their calls from being received on a digital scanner. Anyone know if this is true? How can you get around that?

Encryption is present on some channels of the department I work for. Mostly
just the channels the narcotics folks use but I'm sure it'd be just a simple
programming job to place that on other channels.

I do know that we're able to switch the dispatch part of the channel over to
digital which stops folks from hearing us on a scanner (at least until the
EDACS ones come out). I used it last night when some officers were going up
to a house to look for a homicide suspect. I didn't want to chance they
might have a scanner in their house and hear me dispatch officers to their
address.

The Uniden you are refering to is the BC296D and it comes with the card. It is about the same price as the Pro-96.

> everything; although my main scans are fire, police, and CHP (nothing
> trunked).

Antenna Specialists makes a nice little multicoupler, for about
$40 or so (from Universal Radio), that allows you to use your AM/FM
broadcast antenna for both the good-times radio and the scanner. I'm
using one in my van. Works great! Have a look at this link for their
model MON-63.

http://www.antenna.com/lm_cat/lmrpg27.html

Universal's sale link for it can be found here.

http://www.universal-radio.com/catalog/scanants/0748.html

Happy hunting no matter what you decide.

I rode with a sheriff last week for a story I am covering. We discussed scanners and how the police had to outwit the crooks.

When I asked him point blank, how many crooks had he caught that had scanners, he could not remember a single time.

I would be interested in hearing of
any cases that crooks were caught with scanners. Do not send me anecdotal evidence. "My brother in law heard from his second cousin that somewhere up north..."

While I am sure that a crook somewhere did use a scanner, I would like to quantify the reality. What was the crook charged? How was he using the scanner etc. would be extremely helpful.

There was a jail break where a officer was killed in TX. The bad guys stored handheld scanners and batteries from RadioShack, now did they get them programmed or not I don't know.

I'm not saying all the bad guys use it, but it's better to be safe than
sorry when you're trying to catch someone who is responsible for the deaths
of his wife and 15-month old kid in a fire they set. You never know when
the officers go knocking on that door if the guy inside heard you dispatch
them there and is waiting with a shotgun or took off before they arrived
there.

I have a RS Pro 89 scanner and a Midland WR-300 weather radio.

My weekly tests come across fine from Ocean County every Wednesday.

We have been in a winter storm watch for about 6 hours now, and the 'watch' light on the Midland radio has not lit up. And the radio has not woken up. I put the RS scanner on a WX channel in Philadelphia. I receive both stations fine.

My question is, do the SAME tones only get broadcasted once per event?

Also a 'special weather statement' was issued for cold weather. Again, the 'statement' light has not come on. And the RS scanner has not woken up.

Thanks for any info.

Try K-40 (They're a local dealer, not the national brand company).
It's on the south-east corner of 14 mile and Van Dyke. I haven't been
there in a couple of years (married, so no money to buy anything) but
I got my CB (a refurbished Uniden PC76XL) and a K-40 antenna there
about 7 years ago and it is still cranking like a champ. They even
replaced the connector on the antenna when it came loose for me at no
charge. Soldered a new one on in seconds, right there. I believe
they'll carry the uniden scanners. They'll also carry all the
accesories you'll ever need...Antennas, external speakers, adapters,
latest issue of police call...etc.

I don't know all the pertinent details of this issue. But it's also possible that the "drive thru" system which was "hacked" ( I hate using computer terms to describe radio actions) was on the older 154 Mhz frequency band. One of those drive thru frequencies, in common use in my area, is now part of the MURS allocation. Since MURS radios are legal to be used, the only possible infraction that the FCC could bring in this case, would be deliberate interference. And THAT depends on the licensing status of the fast food place. If they are not licensed, they get no protection from other users.

yes the gypsy cabs are a big problem to lots of cab companies
especially in busy tourist areas. They steal the calls they hear on
their scanners. I called for a yellow cab and one pulled right up to
me and had my name and everything and told me he was backup for yellow
cab. In fact I rode in several taxis while on vacation a few years ago
that were owner operated and they all had scanners in their cars. One
guy had a bc245 and when I saw it and started talking about talk
groups he did not have a clue what I was talking about. I was going to
exlpain it all to him and tell him where to get frequencies but then I
thought why bother? if thats what he is using a scanner for he doesn't
deserve any information. Isn't it illegal for them to have a scanner
in the taxi? Someone told me that even if the driver was a licensed
ham he can't have a scanner in a commercial vehicle and use it for
making money.

I have an old RS Pro2021 scanner that I'm trying to resurrect. There is a lone part on the bottm of the circuit board that is broken. It looks as if it is an rf choke or perhaps a resistor but I cannot determine what it is or its value. Is there anywwhere I can find schematics or circuit board layout diagrams for this scanner on line ?? THe scanner works but has low audio O/P and the squelch works but not exactly as it should. It seems to be slow closing after a signal is picked up.

These are not random interference which would require the business to
tolerate them, they are intentional attacks upon the customers of the
business intended to do harm! Local Law enforcement can charge them with
"Malicious mischief" or other related infractions due to the intervention of
these transmissions with the operation of someone else's business. OR a
court issued restraining order prohibiting them from operating a radio
within range of any commercial operation for the purpose of disrupting the
normal operation of that business. It is done all the time with Loiters
and other disruptive acts!

>> the squelch works but not exactly as it should. It seems to be slow closing after a signal is picked up.

Not uncommon with the Pro 2021.

>> There is a lone part on the bottm of the circuit board that is broken. It looks as if it is an rf choke or perhaps a resistor but I cannot determine what it is or its value.

If it might be a diode, specifically one marked D44 or D45, someone was trying to extend the reception range of the scanner to include midband (68-88 MHz) and / or cellular frequencies.

I have not tried the midband mod, but the cellular restoration mod does not work ... it only allows you to enter frequencies in that range. The receiver front end is not designed to receive in that frequency range.

When it is pertinent to the topic, and my sense of humor is in fine condition! There just isn't anything funny on this newsgroup except some of the people!

The Radio use was not the point, and the discussion depicting the crime as a prank was ill-conceived. The company was damaged and the customers disturbed. Do you defend such anti social acts?

PS: What the hell, you think I'd let you get away with that shallow innuendo? I'm 5'11", 185# in training to fight steel in armor! Young man of 65. ("it's only a game" but the swords are real.)

thanks for the reply :). The scanner was originally purchased by myself many years ago and has never been modified for anything. The frequency range if the unit does not allow for cellular coverage, which is why I bought something different later on. Very little of any mid band stuff in my area as well :(.

If memory serves one of the kids or maybe even myself spilled a coke on it. It (naturally) stoppped working at all. I put it on the shelf and never got around to working on it until recently. After a good cleaning and removal of the sticky (even after all those years) residue, it has at least come back to life. It programs and also receives loacl police and fire signals as well as aircraft and pager signals just fine. The audio O/P is a bit low, and when going over the circuit board, I discovered that the pad on one end of the component I mentioned had broken off the associated trace and was and open circuit. I cannot identify the part although it doesn't appear to be a diode, looks more like a 1/8 watt resistor or perhaps a small RF choke. I would just like to replace it if I can find out what it is :)

Thanks again for your input :)

The NWS Forecast Office in Mt. Holly only does the alert one time. If you miss it, they don't do it again unless there is a new advisory or warning.

Their might be a problem with your receiver, or you might have incorrect codes. I have a Uniden 780XLT and it gets all alerts.
http://www.nws.noaa.gov/nwr/

Good Luck!

Thanks for the reply Bob.

I know I have the correct code in for my county. Southard,NJ broadcasting with 300 watts comes in pretty good with code 034029. I just made a change in one setting a few minutes ago. The book says I can receive ALL SAME message alerts from the trasmitter if I want. This will null out any programmed codes. I will wait and see what happens.

>> I put the RS scanner on a WX channel in Philadelphia. I receive both stations fine.

According to the NWS website, the Phila or Mount Holly NWS transmitters don't broadcast the alerts for Ocean County.

Only the Atlantic City, Southard and NYC transmitters provide SAME coverage for Ocean County.

If I was standing on the street, and you walked up to me, are you not
permitted to make whatever comment you see fit? If you told me face to
face that you thought that I was too fat to eat a whopper, would that
be illegal? There is this thing called the 1st amendment..... So why
should it be any different through a radio?

> Local Law enforcement can charge them with
>"Malicious mischief" or other related infractions due to the intervention of
>these transmissions with the operation of someone else's business.

That depends. If the business was employing FCC part 15 radio gear,
then they can expect no protection from interference. People tried
running businesses on CB radio years ago, and those same people had to

deal with the traffic from other users, much of which could be
considered "disruptive"

> OR a
>court issued restraining order prohibiting them from operating a radio
>within range of any commercial operation for the purpose of disrupting the
>normal operation of that business. It is done all the time with Loiters
>and other disruptive acts!

Maybe. I guess it all depends on the level of malice and the effect
that the disruptions had. From what I've heard, the interference
consisted mostly of random insulting comments, and not necessarily
jamming of the system in a way that would prevent it from working.

Dave

There are limits to free speech, Dave. In this case, the answer would be no if the comments were slanderous, defamatory, racist, or done in a threatening or harassing manner. Making unwelcomed comments about a person's appearence (especially when transmitted over the public airways) could be considered harassment, and I doubt the First Amendment would protect such actions.

> That depends. If the business was
> employing FCC part 15 radio gear,
> then they can expect no protection
> from interference. (snip)

That addresses normal interference, not the intentional act of malicious interference. Malicious interference is a violation of FCC rules. And, in case you're wondering, the First Amendment would not protect a person here either - the person would not be charged for what was said, but for doing so in a manner (using equipment, etc) which violates FCC rules.

> Maybe. I guess it all depends on
> the level of malice and the effect
> that the disruptions had. From
> what I've heard, the interference

This brings another issue into question. Some states have laws to protect the normal operations of a business - to prevent malicious interference with that. It is also possible these laws, if available, might come into play here.

The first thing you do when you receive something is throw away the packaging,
it's a rip-off to charge someone $50 for a plastic bag.

Only true if Burger King was using a MURS frequency, which I doubt. All the
Burger Kings I have found (those which have not yet migrated to 900Mhz) are on
154.515 or 154.540Mhz.

Neither of these are MURS frequencies. Both are licensed business radio
service frequencies.

Radio, shortwave.. related topics, not too far OT. Not much
different than discussing AM pirate stations.
The only newsgroup that's got funnier participants than
rec.collecting.coins is this one. The conspiracy afficianados and their
antagonists are hilarious, way better than the current crop of TV shows.

>
> The Radio use was not the point, and the discussion depicting the
> crime as a prank was ill-conceived. The company was damaged and the
> customers disturbed.

I doubt the customers were any more disturbed than they are when,
back at work, they find they received the wrong order at the drive-
through, or when they have to wait 15 minutes during lunch hour because the
clerk at the window is arguing with the car in front about how many
Whoppers were supposed to have no pickles.
The business damaged? No, not damaged. Annoyed? Irritated? Sure,
but not damaged. The week after this happened, it'll all be forgotten,
except for the poor schmoe back at corporate hq who has to figure out which
frequencies are hack proof, and then prove it to the CEO.

> Do you defend such anti social acts?

Discussing it and defending it are too different approaches. I'd be
hacked if it happened to me, but to be honest, I'd just fix the problem
(change comm system, pretty easy and inexpensive to do) and then forget the
whole thing. It's a very small, temporary fly in a very big jar of
ointment.

Good for you. I'm 6'2", 195#, barely your junior, and recently
received deputy black belt. Old and dead are two different things, right?
(In a tight spot, I'm unlikely to have a sword handy, but I've almost

always got hands and feet nearby! <G>)

WMD threat exaggerated: report

http://www.theage.com.au/articles/2004/01/09/1073437472186.html

"In that process they changed something that is an opinion
into a fact, and they consistently did this," he said at
a briefing on the report.

From Johnny

/ / ..then call
themselves heroes in my name after the carnage for
blindly dropping bombs from the sky on everyone.
Heroes? More like typical american nazi cowards,
willing to murder their own families as themselves, than
bravely put their lives on the line standing to protect
Justice as freedom for everyone, as to what true
bravery, and heroism has always been. While the world
watched CNN broadcasting, American nazi teen soldiers
celebrating joyously in contempt for God while singing,
right after the unreported dropping of thousands of
pounds of bombs on everyone in Afghanistan, body parts
everywhere, while knowing directly as individuals, every
single, there was no evidence offered that anyone there
was responsible for any crimes whatsoever, including the
Afghanistan women who worked for the newspaper, but for
to be victims of fanatic nazi american barbarity,
disguised as human, like bush almost gets away with as
pure evil deceived, now completely impossible to
believe. Oh, by the way, I am now taking new
memberships for al-Qaida.

As I say, there isn't a real man in the
American Marines, or the Army willing to protect America
with their lives, for if there were, rumsfeld and bush
would be rightly dead for the murders continuing against
those they know as innocent. As even with their
continuing threats against more innocent people as
American lives they brag to throw away as just soldiers,
as all these other nations they try to make ready to
sacrifice millions for, while propagandizing that our
Justice we need not believe in to grant us freedom from
oppression, nor evidence no longer a requirement to
convince us who is evil, and who is not lying. Nobody
deserves to be murdered, but a murderer escaping to
recommit. \ \

US Firms STEALING Money
http://thestar.com.my/news/story.asp?file=/2003/12/7/nation/6859213&sec=nation

/ / ``KBR is charging Iraq US$180,000 (RM684,000) for each school they
renovate. They then give the project to Iraqi sub-contractors and pay
them just US$20,000 (RM76,000) to do the job. \ \

Any being would not want to be deprived the rights to
living, by living to not deny the same rights of others.
(First commandment is a fundamental of understanding
space-time reality, as it pertains to the politics of an
actual sustainable World, indivisible, and eternal.)

To have US exercise denial of rights granted through the
protections of Freedom, asks naturally for reason to
being ones own commitment kept. To leaderlessly faith
in tyrant bush's faulty public judgement to committing
US to indiscriminate murders so he can rob Iraq of all
her riches going nowhere he silently contends as an
illiterate demon liar, exposes Your Mr. bush Jr. as
unfit to preside in Anyone's name. (Walla: Americans
did not elect the monster who openly with 9/11'd
slush-fund-america, finances the oppression of our
families in Uzbekistan, and Wahabbi Saudi Arabia,
unreported by our CNN and CBC as revealing.)

Iraq reconstruction's bottom-line
http://www.asiatimes.ru/atimes/Middle_East/EL25Ak05.html

/ / So there's money; it's just not going around. And here perhaps lies the solution to the mystery of how the world's superpower and the world's biggest corporations can't even begin to put Iraq together again after almost nine months: The reconstruction is less about reconstruction than about making the most money possible. \ \
snpd

I hate bush with everything I am, or ever will be as Human.

Who will care for your life in corporate america, where, with a silence of contempt through censorship, rob themselves as ungodly and criminal degenerates under the bushite doctrine of enslavement of their species? Know, that it is NO SECRET, Eason Jordan of CNN knows, (as too, Robert Habinovitch of CBC does too), about General Ahmad, and demon bush's 9/11 strategy existing in 'top secret' Presidential directives, written two days prior to the event of murdering thousands of Americans, a plan to blame Laden on as innocent of to secure invasion of Afghanistan for Enron. (Laden would plead innocent naturally, the Taliban would vote against persecuting the innocent until proven otherwise as Clinton learned, while demon bush and cheney would privately plead to have our Police work halted, to attempt their getaway.) Both, Jordan and Habinovitich have refused OUR staff since the event of reporting the facts for our judgements, and side instead with not reported reasons like those given by irrational and dumb evil Walter Issacson, that CNN is forbidden to PUBLICLY report on the murder of innocent children by traitor tommy franks, because, you should remember how many people died in New York City. (Why not just murder more New Yorkers, they're closer?) Sure, it's stupid, dumb, and as evil as it comes, but Walter dictated policy, you as a CNN staff member had to comply with, or face the consequences of termination. These bushite censors of our top priority news interest stories are our enemies as traitors to the Human cause. Jordan, nor Habinovitch will give no reasons for publicly denying our police agencies protection, (PHONE THEM UP AND ASK THEM SOLDIER) hoping we can't see them not doing our jobs to protect Your freedom, while leaving the outstanding investigation officers left in the bind, on hopes bush'll disappear them, like they no doubt have plans to get those loose ends who directly know of their treason against God's America, and all that is Honorable and Just in our World.

Kill the demon antiChrist, Your Mr. bush Jr. American Patriot Soldier, and be loved by all as Saviour.

--

Where's the NRA on whoring as bush bitches?

American soldier, Your one true loyalty should be to America, not traitor bush to rob ourselves from. Remember: bush, he ain't got no public concern worth mentioning, when it comes to the whereabouts, of more than half the American tax payers expenses regarding Iraq's jeopardized security, now being sold off as planned to the bushmob at what will be, lower than going values. Namely, your own as measured worthless.

As American Soldier, in unbiased corporate TV america, your told you're willing to DIE in servitude as a thieving bushite slave without question, a blind loyalty and obedience, not to a Just God mind You, or the Battle Hymn of the Republic, no, but to worship the demon bush in a destructive cult-like ignorance that does not even afford Your costly ongoing sacrifice, the luxury, of telling US why corporate america refuses to scientifically report on your actual consuming of MEASURED microscopic radio-active heavy metal TOXIC waste, that includes plutonium in trust, to 'bushite' your dumfuk evil comrades you'll kill with especially, or to being blowed up to smithereens by sexy rummy's cluster duds. Mr. franks and bush bitch buford blount State it is of little or no concern to corporate americans how many bomblets were used, or where they fell to kill women, children or US Patriots with, for, the glorious bushmob will take a few extra bills payable from America to the commi business partners that way for including You in indiscriminate mass murder, see?, and none are the wiser. American Patriot Soldier, repeat after me: "A proud bushite nazi soldier is a dead bushite nazi soldier halted from harming our innocent sons and daughters." Or, AGAIN, corporate america's public refusal to speak up for 'The People' (soldiers included) paying the almost half of Iraq's monthly bill going mysteriously vanished in rummy or bush's war crime pocket... Who gives a toot where it is all going wasted right bushite?, it's only You or yours who could go as the innocent in God's favor still being sacrificed next.

Look, as the very old tales tell repeatedly, the lawless Satan wager, to somehow without knowing how, become omnipotent ruler as tyrannical dictator of this forsaken World, leaving US ALL including Johnny, deprived our rights to justice and freedom, and instead, to the lot of US, be ACTUALLY put up on a cross to die again metaphorically for unarrested bush to continue example with, as an illiterate barbaric enemy of "The Man", just

like, isn't going to happen in this lifetime. I ain't no fictional character, and as true blooded Patriot, hate the bush demon war monger during breakfast, lunch, and supper. And besides, I'd personally kill bush first before that neither world tried. Trust US, G, or I single handedly as a man, will triumph over traitor bush's criminality, as the American cop killing 9/11 perpetrating war profiteering savage he is as antiChrist, it's just, will you like Talk Radio in America censors, and rich CNN celebs readily encourage, silently continue to watch your fellow family murdered for bush bitch buford blount, and still refuse to voice objection nor take any action in defense of all that is Our World truly suffering as Yourself included? I despise bush like every alive person who would read this is.

Refuse to speak for Your own freedoms truly pirated by bush, and you'll likely continue to lose out really like America currently is. Refuse to help our desperately pleading God you know being victimized in Your name truly, and you will bare the consequences of being forsaken. Maybe even, towards an end you'll declare, someone else has forsaken you, when it will be only yourself to blame for not speaking for all those denied their happy lives through the brutal criminal tirades of the demon antiChrist, Your Mr. bush Jr.. Again, this will never change: We had complete co-operation granting one hundred percent access through Iraq without delay, prior to bombing any of Iraq's public sector with toxic waste that contained US People. Every Iraqi child murdered served no good reason or purpose but to war God's love, and my good name. And, still today, that unarrested evil demon tyrant dictator, still chooses to sacrifice many a soft spoken, slow footed American Patriot to, so far, too few bushite nazi dumfuk losers. In addition: We have also learned, Iraq had granted surrender of Iraqi assets to give to the war criminal bushmob, if they would forego the needless indiscriminate murder of easily tens of thousands of innocent families, (like dropping cluster bombs into our residential communities), but war criminal rotten rumsfeld refused because he had already PERSONALLY set up hundreds of illegitimate targets that would, kill primarily only innocent people while destroying public institutions, and bring home a few extra million American payments, tax free.

What more could Saddam do that he wasn't asked for? I beg you to kill the demon bush on behalf of our humanity, and on behalf of the rare American Patriot who

will get rightly confused as, bush bitch buford blount's thoughtless nazi teen savages. The anitChrist must not be allowed to survive continuing such heinous war crimes against our being, and myself as the no longer reluctant standing eternal King.

Listen to witness, America's corporate news celebs will mention it is of no concern to You as the unjustly robbed from and dying for the demon antiChrist in sacrifice. Look, I as Christ too, would destroy any cowardly proud bushite nazi teen soldier victimizing my innocent family irrationally, as most, if not all able-bodied men of our world would also if forced into a decision to defend our lives from the likes of a bush bitch buford blount, or a bomb wherever death squad running tommy franks heroin pusher, but I'm told through my faith in the power of myth, the military should have one or two brave and godly Patriots still idly standing around, who would willingly chance to uphold their sworn Oath to protect their country and family, like with the American Constitution's Bill of Rights, and Justice everywhere by protecting the falsely accused, as could be, themselves, they should know now, or soon will be learning of the other way. A proud nazi bushite savage, is a dead nazi bushite savage halted from harming our innocent families irrationally, and low and behold, a good nazi bushite savage is easily found as an enemy of ALL Humanity and God, hiding as nazi vermin in the pirated, bushite military uniform, not true Americans, but enemies to US all, which includes their selves they pour toxic waste on, while the bushmob robs their 'smart' family back home, undefended, neglected, and wounded like Christ was.

Your Mr. bush Jr. is worthless to this world as a hater of American freedom to not arrest himself and rotten rummy for murdering US New Yorkers on 9/11.

All I'm looking for in this world, one human enough to join US equally as a Loyalist to Humanity, and to do everything we can together to destroy that treasonous 9/11 perpetrator, corporate america's so very deeply hated and despised this entire Universe over, Your Mr. bush Jr.. To not bravely kill or immediately arrest the demon antiChrist along with rumsfeld the rotten, sets enslaved america tracking further down an old worn path of History, as enemies of not only the good Iraqi People bush and bremer whom openly rob from now without apology while giving out cheap candy, but of US all truly in the bigger dream without bindings. It's like bush is waging his demon war with every political body that believe

evidence is a requirement to convince US who is evil, or criminal, an wallah, as if by some Supreme Will, the Son of a Just God named Johnny really comes down to our levels to raise a simple awareness through one hell of a, big time collecting plate. (Every proud bushite nazi bagged, I'm willing to pay the good deeder, ten cents per..)

Fear not my friend, the fascist bushite shall be lost by our universally wreathed good guy plot line. An evil bushite now irrationally fights against everyone's freedom for a war criminating ungodly tyrannical evil power that persecutes the innocent with murder, or torture to steal our, sworn to uphold eternal values from. If I don't destroy the demon bush antiChrist in Our defense with this last breath, someone else will, and our faith in God will with hope, find a love truly honored with respect and gratitude for being so magnificent. Never again, left vulnerable in my name as undefended to be victimized for a war monger's consequence.

Let US get out there and bag US the bush demon for God, or the Lord, Allah, or just Johnny, instead of victimizing Catholics, Muslims, Jews, or Atheists, along with all the rest as a Palestinian truly measured, encompasess everyone.

The Two Troublemakers
http://www.rense.com/general46/guilt.htm

/ / Some of the students had Palestinian passports. When they asked what they were guilty of, the [bushite nazi savage] soldiers said, "You are guilty of being Palestinian." \ \

A ungodly bushite nazi teen soldier, as an enemy of America was quoted to say also to the falsely imprisoned:

/ / "Say that you love Bush and I will give you food," \ \

Not a love for Justice, or the Bill of Rights, but a love for the American cop killer traitor bush demon robbing their very own grandparents they demand by threat of your murder, for US all as Humanity to do likewise degenerating, sacrificing our World as cowardly slaves to benefit the ungodly bushmob 'cabal' of parasites, the enemies of everyone, including that as God's will.

‘Beyond human imagination'
http://www.globeandmail.com/servlet/story/RTGAM.20031104.warar1104_4/BNPrint/International/

/ / I told them I wanted a lawyer. They told me I had no
right to a lawyer, because I was not an American citizen. \ \

"International law? I'd better call my lawyer,"
http://www.payk.net/mailingLists/iran-news/html/current/msg05842.html

/ / "International law? I'd better call my lawyer," the
American President joked in response to a reporter's
question at the White House. \ \

Again, by denying the rest of US as Humanity Justice,
the bushites need advertise between commercial break
only, "Laden did it", no need to follow the ample
criminal 9/11 leads folks, because the crime they say
wasn't committed by true American values. Go on along
bush, cheney, and rumsfeld say, pay no attention to our
evidentiary findings such as, the American FBI's
documented contention, that bush's business partner,
General Ahmad, funded the 9/11 'mastermind' Atta, or the
CIA's, regarding bush LYING in America's name about
Niger (TREASON), or MSNBC's almost Biblical Revelation,
about the bushmob having a signed and sealed, 'top
secret' war plan to not follow the 9/11 evidence to
secure invasion of Afghanistan for Enron, at
Condoleeza's desk, two days prior to the terrorist act
taking place, of which when confronted, confessed as
fully implemented by the Whitehouse. A 'top secret'
plan to blame Laden on a crime they wouldn't actually
try to arrest for with evidence, a plan arranging that
would find bin in Afghanistan pleading innocence with
the help of bush's partner again, General Ahmad, a crime
of such magnitude, it would 'justify' a war mongers
criminal invasion to thwart Enron's impending CRIMINAL
bankruptcy, THIEVING FROM MOMS AND POPS, to then,
ATTEMPT, to close the surviving, armed with knowledge
for good reason Police investigations. All of this
setting a lowly nazi bushite war criminal, frothing
publicly at more than six billion + of US, to state
without opinion, that We, as Humanity, are no longer
afforded God's GIVEN Human Rights to defend ourselves,
nor is the criminal dictates of the demon antiChrist
accountable to any rules of law. Universal they
publicly quip, as the not-so 'secret' ungodly bushite
doctrine of tyranny as enslavement of all that is
Righteous and Holy in this World, because, hey, there is
no God to speak of... and the King of kings, Son of God
fellow, well.. that's all just ninepence fiction. No,
WE, as all the make believers of this World, will no
longer have ANY legal recourse to defend our own loved
family from being stolen from through a bush bitch
buford blount doing whatever criminally with dumfuk
loyal nazi teen bushites leading to sacrifice for, for

demon bush dictates his corporate american bred bushite nazi teen leaders, can not be held to a code of conduct, distinction, or honor. That's the bush world now you'll except without say. As an American, you're forfeiting your rights by not saying anything to protect those falling murdered in evil bush's name. American Talk Radio is waiting for your call to be hung up on.

All Nations outside of America are a politician's friend, and nobody is going to vote to incriminate ourselves for something we would be innocent of. For bush, Ashcroft, and rumsfeld to contend, humans outside of bush america's border, are no longer afforded the rights of being, and bushites can rob our Universe and there is nothing anybody can do about it, isn't going to sell well anywhere. The criminals have enough of a time not getting caught for the things that they do, and almost no one but the lifeless, would stand silently with bush while needlessly murdering ourselves as the innocent.

See?, when bush bitch buford blount murderers innocent people, often their surviving friends and family take it out by killing bushite soldiers that mindlessly follow bush bitch buford blount's criminal command. And, why shouldn't we? The unarrested bush bitch buford blount confesses to murdering thousands of good honest People, for no objective, but to let the bushmob rob even further more children from US all. Kill bush for the love of Jesus, please.

Notice to the World: Literate American Soldiers have not voiced written objection to my writing, (us.military.army) but for the exceptionally rare bushite nazi savage, who sorrily slack, others shouldn't be allowed to tell the truth about polls, 9/11 criminal investigations, or bush and rummy getting the Patriots murdered for pension thieves and heroin pushers to tyrannically profit at our devolvements. Encouraging US to continuing in bush's name getting robbed and murdered irrationally? no rights to defend ourselves from crime in a court of law they say?, without a God, or any reason for love of this world whatsoever? The bushites think that they can first degree murder our world's women and children, our freedoms as Justice for US all, and miraculously, as the result, will bring our entire, dazed and confused World to it's knees as the whore of Babylon. Indefinitely. (Not like a real Whore mind you, most crack-addicts, and even some G men, hold limits on how far they'll go victimizing the innocent to glorify a blatantly evil and ungodly enemy of all that

is good and righteous in this world.

Anyway.

The CIA, and the FBI are surely in agreement with US, on this indivisible Justice thing. The quicker bush dies as unarrested traitor by the hands of a true American Patriot, the sooner an explanation will be demanded as forth right and coming.

Again, American soldier, wake up, and kill bush for sacrificing your friends and family to die as cowards, too afraid to stand with God in defense of the once great American flag. My America, is the land of the not so stupid, and brave enough to kill unarrested bush and rumsfeld for 9/11 almost immediately, or any other war criminating enemy of America fighting to not have our Justice served by nabbing the true 9/11 suspects.

Through a legal lens - the attack and occupation of Iraq
http://electroniciraq.net/news/printer1262.shtml

/ / The International Covenant on Civil and Political Rights, RATIFIED by both the U.S. and Britain, pulls no punches on this count: "Any propaganda for war shall be prohibited by law" (Article 20). \ \

This is what bush needs to be immediately arrested on for his Niger claims, if you see him not behind bars awaiting public trial, do the American Police force and soldiers everywhere a favor, and kill the escaping demon bush for the love of Your life wills it.

By protecting the demon antiChrist bush for continuing in Our names to rob from Humanity by breaking American laws willingly, will now be a public declaration supporting crime against our betters. I will not stand motionless while bush and rumsfeld with bremer persecute school teachers not guilty of criminal offences, while pirating Iraq's wealth for Dutch-Shell, Worldcom, and double billers, commi Halliburton, all the while, feeding American Patriots radio-active toxic waste to die as losers. Think Patriot.

Arthur MacArthur "Those forty minutes when I defied my orders, were the keystone of my career." A career that would lead him to the highest rank in the United States Army. Saving many lives he did by doing so bravely.

His son later, defying Hoover, smashed thousands of American WWI vets, who were demanding their promised checks to save themselves from starvation. Winning he did, corporate banking's recognition and praise as a

savior of the american way of life, and The People?,
they ate it again when in 1950, at the age of 70,
defying Truman, launched a win sumtin at all costs
attack against China, that quickly during the unreported
stupid needless slaughter of countless American teens,
forced Truman to concede defeat by begging for a
immediate truce with China while firing MacArthur, who
came home to giant demonstrations of love and affection
for sacrificing American lives forgotten to the
accolades of corporate america's unsung hero.

George S. Patton Jnr. "It's no fun to say to a man you
love, go out, go out and get killed, and we have had to
say it, and by God they have gone..."

Johnny Wizard "Let US just get bush instead friend."

For the love of life and countries, kill bush as traitor
to all our Humanity.

Your unbroken eternal Warrior,
as acting Servant and King,

the one and only,
as staring Johnny Wizard,
the true Son of Man

P.S. My reader, I taunt you again: forward these words
of love or hate as if they were of Your own concern.
America I think Will be interested in this public
outrage of the silent majority, an outrage that will
ecplise into an international scandal of such
proportions, it just might win US the newscast with the
facts on Justice ruling our way. ( I am excepting all
reasonable job offers. Hint hint.)

--

A bushite nazi soldier's motto: Do NOT kill demon bush
for the love of God as true Patriots would, but war your
comrades in arms with toxic cluster bombs to secretly
kill yourselves with later on, including US as the
innocent, our children included, while STEALING, not
going nowhere public Iraqi institutions, including
desperately needing humanitarian aid shipments, starving
the poorest of the poor, all to please and glorify the
pension thieves of our Grandparents, and the heroin
pushers to our school kids.

--

> To my friends in Iraq, don't let corporate american
> media divide yourselves from community as equal

> participators. An Iraqi, is foremost, a member of our
> Humanity, and just like the rest of US, hate the God
> betraying anti-American demon antiChrist bush, more than
> anything else in the Universe for persecuting the
> innocent while killing coppers to steal our assets
> undefended without a leader to speak out everywhere for
> our living rights included.

Deadly suppositions
http://www.rationalreview.com/rlwrights/112603.shtml

/ / That's right. American troops are now being used to destroy private property of "suspected Iraqi guerrilla fighters." What happened to requiring proof before depriving someone of "life, liberty, or property" as stated in our own Constitution? Evidently that does not apply to people we attack so that we can bring them our way of life. \ \

--

GO F*CK YOURSELF, MR. PRESIDENT
http://www.antiwar.com/justin/j112603.html

/ / We must act, even if the threat is nonexistent - because of the potential danger. If "self-defense" consists of necessary "preemption," then what would happen if we started acting on this Bushian principle domestically? After all, killers, robbers, and rapists don't announce their intentions, politely putting us on notice before they strike. Why not just jail them before they have a chance to commit a crime? This principle, if applied within the U.S., would lead straight to totalitarian rule. Applied abroad, it means perpetual war. \ \

--

I Know When Bush Is Lying: His Lips Move
http://military.surfwax.com/files/Weapons_of_Mass_Destruction.html

/ / The Bush regime's panic is reflected in its adoption of Israeli revenge tactics, using F-16 aircraft to drop 500lb bombs on residential areas called "suspect zones".... ...Lianne Seymour, widow of the commando Ian Seymour, said: "They misled the guys going out there. You can't just do something wrong and hope you find a good reason for it later." \ \

War Propaganda
http://www.currentconcerns.ch/archive/2003/02/20030228.php

/ / In other words, the military actors and politicians are totally blinded by the "war on terrorism" dogma. Truth is falsehood and falsehood is truth. Realities are turned upside down. Acts of war are heralded as

"humanitarian interventions" geared towards upholding
democracy. Military occupation and the killing of
civilians are presented as "peace-keeping operations."
The repeal of democracy is portrayed by General Franks
as a means to providing "domestic security" and
upholding civil liberties. \ \

--

http://www.bushdraft.com/

/ / With the threat of 56% of troops not re-enlisting
Bush is going to need a draft unless he changes his
policies soon. I'm sure you agree, I'm sure you don't
want your friends, family and coworkers drafted either.
To fight for what? freedom? When George Bush passed
the Patriot Act and now the Patriot Act 2 he took away
many of the rights that we cherish so much. Why are we
"bringing freedom" to the Middle East when Bush has
shredded the constitution and taken away our freedoms at
home? It doesn't make any sense. \ \

--
http://www.globalblogs.com/binationaltimes/archives/00000116.html
"Yes, Bush lied"

/ / WASHINGTON - A year ago, on Oct. 1, one of the most
important documents in U.S. history was published and
couriered over to the White House. \ \

--

This is why I plead with armed Americans to kill the
unarrested bush for the love of children everywhere.
Look, we know directly who the bushites are who PUBLICLY
advocate the murder of innocent People through corporate
censorship, who support furthering the demon
antiChrist's senseless crimes against my America, and
our World. Example: You'd think Art Bell figures none
of his listeners could in no other way, learn of traitor
bush murdering thousands in New York City, and his
contemptuous silence on the issue forbidding anyone else
from publicly mentioning it. I have dominated
alt.fan.art-bell for years, while Art Bell, like
Canada's Peter Warren, will continuously advertise open
line calls, but abruptly end calls topicing on KNOWN
FACTS surrounding their evil false deity bush, 9/11,
Iraq, depleted plutonium, Halliburton, and the deaths of
our innocent lives fallen to their personal inaction
depicting our community as uninterested. Art Bell in
FACT has pre-screened his "open line" calls since bush
stole power, and does so, to make appear Americans

aren't clued in, on the now hundreds of thousands of innocent lives bush has murdered as war criminal. A good nazi bushite, is a dead nazi bushite, halted from advocating further war crimes constituting the murder of our innocent families. The dumfuk bushite parasites have been PURPOSEFULLY blowing themselves up with mined cluster bombs as suicide bombers! Not dying for any noble cause, but to only further toll more American Patriot lives. We should ask all soldiers, who are they loyal to, the 9/11 perpetrating American cop killer bush, or the People's America, as so enshrined by the Bill of Rights, and true Justice to actually protect the freedom of US people by following a leader?

These OUTNUMBERED and OUTGUNNED nazi bushites are indiscriminately bombing residential communities with radio-active toxic waste for nothing but to please their evil false deity, Our Mr bush Jr.. No rational reason but for a hatred to Your Humanity, and God if you believe.

Example: that evil nazi terrorist buford blount confesses to murdering thousands of innocent Iraqi People for nothing, no reason he proudly professes as wicked evil heinous traitor. Think of the lives You could save Patriot, by justly killing the unarrested buford blount, on hopes a person to take his place could at the very least consider being honorable in defending Your America? Demon buford blount is truly the enemy to American soldiers, for, if your family was murdered by buford blount irrationally commanding mindless bushite soldiers for nothing but to further rob the dying American tax payers, would you not too, spend your will hunting the evil nazi fuck down personally to spare further another innocent family suffering? To kill the unarrested unAmerican buforld blount is to stop him from ordering the practically dead already, nazi dumfuk treasonous bushite brethren teens, from victimizing again US as the innocent undefended.

While CNN still insists it's better for them to misinform and ignore, than to expose the demon bush as the true target for any Patriot's rage. American soldiers are being sacrificed to die for no known good reason, but for bad leadership as evil bushite war profiteers.

--
House Nixes Anti-Profiteering Penalties In Iraq Spending Bill

http://www.senate.gov/~feinstein/03Releases/warprof103103.htm

/ / "When the Senate Appropriations Committee considered
this supplemental request, Senators Leahy, Feinstein,
and I joined together to criminalize war profiteering --
price gouging and fraud -- with the same law that was
passed during World War II. Yet this amendment, was
stripped out of the final bill," said Durbin. "I fail
to understand how anyone can be opposed to prosecuting
those who want to defraud and overcharge the United
States government and the American taxpayers." \ \

--

--

/ / The Constitution cites "high crimes and misdemeanors" against the
state as grounds for impeachment. Could there be any higher crime
against the American people than to have knowingly deceived us in
order to stampede us into an act of barbarism that has betrayed our
finest ideals, our highest ethical standards, our national honor, and
our whole history? \ \

Here's what a bushite's granmom's tax payment is going
towards, minus the 2.5 billion per month of 4 that is
secretly STOLEN by the bushmob as something Americans
are forbidden to know of through their corporate news
censorship stealing their very own demeaned values,
dying.

How U.S. will spend $20.3B in Iraq
By SCRIPPS HOWARD

ACK! This Scripps Howard piece is missing from our internet world!

Hmmm.. now looking...
this following is an archive of official corporate news sources, of
which few if none report specifically on how the demon bushmob is
spending/stealing grandma's moola..

http://www.stern.nyu.edu/globalmacro/cur_policy/middle_east_news.html

looking more...

U.S.'s 'Iron Hammer' Code Name 1st Used by Nazis
http://news.yahoo.com/news?tmpl=story2&cid=1896&u=/nm/20031118/us_nm/iraq_hammer_dc&printer=1

Not surprising, but not what Americans should be following after....

Anyway, the cash breakdown of the criminal thefts of Iraqi assets
is now, as the tyranny of the nazi bushites, becoming harder for US to
find, why so?

We have stories like these ones still though..

Senate digs into Iraq $87 billion
http://www.csmonitor.com/2003/0929/p01s01-usfp.htm

/ / 1. Four-week business course for 2,000 Iraqis, $20 million
($10,000 per pupil). \ \

The best evidence to kill bush quickly.

Demon bush "These terrorists target the innocent, and
they kill by the thousands. And they would, if they
gained the weapons they seek, kill by the millions and
not be finished. The greatest threat of our age, is
nuclear, chemical, or biological weapons in the hands of
the terrorists, and the dictators that aid them. The
evil is in plain sight, the danger only increases with
denial."

Remember: Demon bush doesn't forget signing his soul to
the invade Afghanistan plan by not following the 911
evidence, but would top secretly attribute to Laden for
blame, authored by himself, rumsfeld, Condoleeza, and
General Ahmad two days prior to the public event of
murdering "thousands" in wealthy corporate America, a
secret plan that has been confessed publicly to US as
fully implemented by the White House right from the
start to Jim at MSNBC, months after the fact when the
demon antiChrist was caught with American blood in his
breath.

Not to follow the criminal leads surrounding evil bush
as mass murdering antiChrist, is what the White House
confesses to Americans today as official policy under

every circumstance. Karma. Demon bush tells corporate america that they'll persecute the innocent in any country by denying our fundamental human rights of Freedom and Justice, while now dropping 2000 pound bombs in God's World containing children, while corporate nazi bores, report in judgement of the great King who MAY have cuddled some cute boy! Jackson has given so much to America in stone, and in return, the corporate news nazi bushites sit condemning a great man whose open vulnerability gives him his wondrous strength and power as true American artistry. While these very same treasonous corporate bushite news anchors refuse to report on tommy franks running death squads against school girls, Guantanamo's Taliban's Girl School teacher Mozam Begg whose family served proudly for generations in the British Military, or tomorrow if YOU don't help US speak out publicly, continue refusing to report the general murder of civilian populations by the godless evil nazi bushite traitors. A good bushite, is a dead bushite halted for advancing their murder rampages against our innocent families irrationally. Demon buford blount, who runs like the nazi coward he truly is from my challenge to a death match, confesses to murdering thousands of US People for no military objective, but to get killed those that serve as bushwhored slaves under him to take his cowardly place instead, a die hard bushite nazi traitor. No government in Iraq would give WorldCom and Halliburton a blank check because they care too much for The People, nor certainly would they not, steal helpful Humanitarian Aid from poor people to pay the fraudster commi double billers, Halliburton again, nor either or, dump radio-active toxic waste on themselves to help bush's re-election campaign get off on murdering Americans for financial pain as God betrayers to US all. KILL BUSH NOW! Remember: a bushite soldier hides behind an American uniform, while knowing the bushmob has likely robbed their very own family of their savings and vital protection. Weak and cowardly, stupid and murdering innocent People for the demon antiChirst as their false deity parasite they are dying for TODAY as. I HATE bush as much as any real man would. The bush demon sells his Satanism by offering NO skills required to be dishonorable and dishonest, no reading newspapers, or feeling the pulse of the plundering nation required while ransacking the faithful. While these corporate news experts and CNN and CBC censor pleads from Humanity paying the wages of evil bush's wars against freedom and God, Justice and America, denied our corporate news coverage to be my primary lonely concern mostly it seems

sometimes, as too, how terribly it truly is for life
whose love isn't appreciated by our will anymore as the
living in america, oh yeah, I mean America.

As an American then, what life will you forsake where
bush'll rob you over and over as the never living for
something better? These american bushite nazi fuks,
think your gonna wash their feet, and instead of
defending yourself and family, just turn the other cheek
right before the bushites drop a two thousand pound bomb
or two on your innocent neighbor next door? Done for
nothing but feeding the bushmob?, as unarrested buford
blount contends in God's presence? Then to think,
buford blount figures I as a real man will not seek him
out one to one to the ends of this universe for payback.

What can God do to help, if your refuse to help
yourself? The true danger to America increases with
American doubts on bush's blatant, true naked evilness,
or humoring God as Johnny, and betting on yourself for a
change by supporting me as the time being? Look, what
could you do for your freedom, when I demand the pursuit
of Justice by following evidence to truly protect this
World we share? Support my demand to raise the news
media's ignorance on what you shout even louder?

Think this: demon bush makes no public mention of where
almost half of the monthly 4 billion dollar tax payer
bill is quietly disappearing while grandma loses her
cable television, or only grandson? Is that Leadership
I ask every American Soldier to be brave and forward
this letter on terrorism to your fellow comrads
secretly. Then, we'll see...

Johnny Wizard

Johnny Wizard is Mainstream!

The nazi fuck bush, the unelected American cop killer,
has still to be questioned by american corporate
dictates, why, General Ahmad, is not a wanted man by
American Patriot flag waving standards being coporatized
as not worthy thinking as. Our entire World can easily
witness, no American soldier has publicly stood up
verbally against my calls for bush and rumsfeld's
immediate arrest or execution for 9/11. Sure Blitzer,
and Bill Hemmer froth secretly in contempt for all the
American People, at the opportunity to sit secure well
blocking US interests at CNN headquarters, to watch in
glorious minute by minute coverage, scores of
unrepresented by corporate cult standard Humans, be
criminally murdered by their evil anti-American
propaganda by the will of now more than 2 billion people
the bushmob has declared as his personal enemy (60
countries), just like what Blitzer and Bill have done

unbiasedly regarding Afghanistan's heroin pushers, the deliberate bombing of the Taliban's girl schools, and the running of death squads by wimp ass coward and traitor to EVERY soldier the world over, tommy franks, largely as he has, against the understood by all to be innocent, unarmed and practically defenseless. With bush's america, showing no interest in preventing the further degradation of the living standards of US People in Afghanistan, (who were already at the brink of starvation), but for to steal the resources of an impoverished nation, and too, as they have, already indebted to the World Bank by purchasing millions of unused american minted terrorist handbooks from the eighties, while spending 4-5 billion dollars a month to continue killing US innocent people to steal even further American values, like "we" don't even exist anywhere. More wealth wasted than would be needed to feed and house the entire population, while forming a just police force accountable to a rule of conduct. But no, according to the election rigging repuglicans, (ES&S search "Dozens of Documented Reports") there is no money to steal if they don't murder, torture, and rob from our communities to destroy our belief in Humanity. Again, I will remind you reader, and NRA card caring member if your joining ME late, I have personally contacted Bill Hemmer, and Bliter's secret "War Room" in Atlanta, as well as contacting Walter Issacson (CEO of CNN), and Sid Beddington (super dumbass CNN producer) with the following facts, that they have refused to allow Americans to openly consider in bush's criminal american dictatorship. Our Mr. bush Jr. and rumsfeld, had a plan revealed by MSNBC to invade Afghanistan, on the premise of not following the criminal evidence for a undisclosed crime, while planning to blame bin Laden for it without producing any evidence, a crime that hadn't even yet taken place when the plans were officially drawn up and dated with General Ahmad, plans to specifically attack the Taliban for not siding with Enron we learned from Niaz, The Working Group, India, cheney and Ken. Also, the Taliban, had offered Laden for arrest during Clinton's tenure, but Clinton admitted, they could not actually find any evidence to stand the scrutiny of the public, nor justify the reasons for Laden's blind vilification through corporate controls. (It has been alleged it was Barbara Bodine HERSELF who sent the Cole into Yemen against the voiced concern of all involved military commanders, then insured the criminal investigations into her matters would be halted, as example.) So, clearly, a brand new crime would have to be devised secretly. (Note:

without 9/11, how would it look killing indiscriminately severely poor Afghan families not tied in anyway whatsoever to flying American planes into American buildings by a German, Mr. Atta, who was funded by the General, salaried by the 30 billion plus Tenant?) That's right. This same General Ahmad, from the ISI, not only put together the 9/11 cover up plan together with the bushmob in Washington according to several members of the Senate Intelligence Committee, but also was according to the fine FBI officers involved in the criminal investigation, the prime terrorist funder, to our Mr. Atta. (globalresearch.ca) Also, if this doesn't already clearly paint a clear picture of betrayal by CNN ignoring the American People, consider this also: The bushmob insisted this same General be the war criminal to go to the Taliban personally, to tell US, no evidence would be offered against Laden, nor public trial offered, against what would be to all Americans who actually believe in the Constitution, and the Bill of Rights, (or the Taliban leadership who really believe in God while mistaking like everybody else does), not guilty of the accusation based only as blind speculation. The very same General who devised the plot we're telling you, as documented, and confessed to MSNBC by the White House ALREADY. What an "embarrassment" the ISI blushed! So, what did bush, america's false deity then state as traitor to ALL humans while closing investigations? "We don't need any evidence, we know he's guilty.", right on que. Mr. bush, the demon plays that cheat against Humanity over and over again now, like he figures someday it'll really work for me, (never mind G), cause he figures no truth exists actually in his dark evil world of betrayal against himself as US all included. His wicked dumb evil, that costs the lives and hardships of REAL Americans, only succeeds, because corporate dictates demand no discussions on anything politically factual. (At least not for longer than two or three minutes, with nobody respected as invited for being knowledgeable, or knowing basic high school maths either.) It's the term "we", bush and rumsfeld uses routinely, without substantiated fact to honestly hold our conclusion, as their criminal justification to willingly murder US people as unheard of. He figures as the anti-Christ, because he stole the title of President, he therefor inherited all knowing wisdom like dark magic by openly fooling himself, as all of humanity witnesses repeatedly his falsehoods on our truer Nature. Not as a Jesus the Creator might, to play the crazy, laugh at strangeness, or sing almost lyrically to life for the joy of it, but

as a talentless demon monster to rob and murder from ourselves as the established innocent factually, and left unprotected because the Living eternal Universe can be feared for nothing I suppose. If bush is not following the criminal leads, nor the relevant public information easily available for all to peruse, how can he disagree with everyone without public answers to disprove our existence? "Secretly", he and rotten rumsfeld continue to state to the six billion plus of US, even so though, it doesn't therefor make the recorded History, or the actual evidence of reality go away somewheres else, such as some of the great work the FBI, or the CIA has done being directly involved, again doesn't just vanish as not presidentially viable.(The highest office in America, should be citizen.) Or, make WMD just appear out of nowhere either, if Iraq don't actually have any. You'd figure, as Mike said better at whatreallyhappened.com, but I can't recall specifically, if bush has secret evidence to substantiate his allegations against the Iraqi people, and thinks his knowledge, being better than all US rest put together, shows a threat to the American People, wouldn't he therefor make it known to all, to protect ourselves truly as concerned? Like Johnny would? Instead of, as he is, using the bluff to excuse the potential MURDER of untold thousands if not millions to also steal from for himself, like the election, and that 50 billion? Remember: bush killed New Yorkers to steal American lives, and publicly showed Our world no interest in arresting himself, the true evil doer for the 9/11 money maker. No purpose in life, but to make others suffer and die, is the bushmob mantra. (Even if weapons do show up, staged, or otherwise, it is still no reason to kill Iraqis to steal their resources, to leave US people there, under a criminal dictatorship for a planned thirty years of massive American casualties after American casualties, so the bushmob can steal even more from our grand parents left unprotected without police protection here at home left alone.) Particularly, if the public evidence we conclude as documented FACT stands directly in opposition to bush's dark secret fantasy of Universal criminal tyranny he spews daily as lies against GOD in Our public air space. A planned criminal tyranny of evilness, that has been released to US publicly through one real American after another, ignored overtime by the CNN celebs, yet, still happening as Our high priority issues. I'm beginning to have a difficult time keeping up with the truth that leaks from the bushmobbed syndicate like a sieve practically everyday too. Have you heard of,

"RebuildingAmericasDefenses.pdf" on CNN? Or, how about "11-14-02_Chin-4.pdf"? (Don't miss that one.) I haven't, but can't really stand watching them pretending we can't see anything at all either. So, these terror plans.. When the nazi bushmob was caught without them, (as they were top secret presidential documents entrusted to the witch condoleeza), could do nothing but confess they were fully implemented. Why? Because they walk through the entire scenario that bush puppeted the months before to armed Soldiers. (God wins every time.) Mr. bush and General Ahmad's plan, is to continue to wage an unending war against humanity, (60 nations) as the "way" of escaping public Wrath, Your Wrath American Soldier, for something, that, again, for 9/11, hadn't yet happened, but bush and rumsfeld prepared for to close investigations on. Mr. rumsfeld was reported (emperors-clothes.com) to have been told by his own Secretary, in case he had forgotten his top job responsibility while sitting behind his desk fidgeting, he was, as rotten rumsfeld, required to be at NMCC immediately. He didn't go after then either. The only possible place the terrorist plan could have been carried through to stand down the Air-Force. (Let those under him take the bullet if push comes to shove. American traitor rotten rumsfeld thinks of everything too eh?) His public excuse I'm sure it would be, he was concerned about the death of US People while sitting there doing nothing. The same rotten rumsfeld, who tells US openly in Our public arena while almost cackling, he wishes to murder and torture completely innocent people that Americans should be forbidden to learn of in a open as the Public court room of Our peers through America's once respected, if sadly, mostly mythologized fair Justice system, now headed by ashcroft, a total incompetent, who wishes not to apprehend terrorists by tracking the criminals, but to destroy what little freedom is left for America by advocating, in public, the persecution of US innocent persons instead. Really. Again, listen up Ashcroft, last time: bush and rumsfeld's plan, that the White House confessed to as fully implemented, demands by excuse after excuse, that the actual evidence trail not be followed, and that legitimate FBI, and CIA officers (Rowley, and the insider trades for example.) are to be continually ignored. Just as CNN has done staying unbiased. Allowing bush and rotten rumsfeld to kill innocent People deliberately, stealing America's Freedom through injustice to themselves. First degree murders. See, the nazi bush slaves go on and on how great it it to be murdering innocent populations far away as

terrorists to steal and plunder, but, for who would be there as themselves close up and personal (gods WE are) to question their own demise by someone who thought without thinking likewise? (God is Not.) This is why I ask an American Soldier somewhere to stand as One single person for America, a Family Man, and take out the re-offending mass murderer, unelected dictator, Our Mr. bush Jr., by thinking like a Soldier is really Universal. And, if his successor, should do the same secretly, publicly advocating wars, death squads, or torture against Ourselves as the innocent to steal from, WE do the same again, until, CNN finally opens up communications to the American People as warranted to be wise.

Sure, only Jews in Kenya, like with Odigo, seemed to be warned to stay clear from an impending terrorist act, and sharon played a personal role as documented several months ago to attempt the blowing up the Mexican Congress and blame it on the Unionists, or bin Laden, oh ya and also, I shouldn't forget, apparently, the rocket launcher was painted blue lying in a field untouched when the mossad in Kenya pointed it out to reporters they brought to witness the whole story by-line, but that doesn't therefor, make the likud party, or especially ariel sharon Jewish. For ariel knows when he steals or kills others as innocent being himself openly a terrorist, is ariel knowing, real Jews would be murdered too, by someone like himself, albeit, in secret avoiding the trying but divided coppers, that he murders also. But, hey, that's where he gets all the repuglican money he doesn't earn but steals over the lives of Jews he watches fall dead as unfigured. Mr. sharon, will tell us how disgruntled he is to see only Jews die by terrorism, then goes out as a PUBLIC FIGURE, and commits the same, but far more hanious acts against G as a pirating criminal National icon. So, sharon, what is it that so upsets you to see US Jews die then you nazi parasite, you cancer tumor, you disingenuous harbinger of suffering to God as Humanity? It is only his private show without questions for comment, as he can not answer publicly without being dishonest about his criminality. Murder is murder, and sharon, the bigoted-racist murderer, the terrorist supporter and perpetrator, has stolen the rights of the Children of Israel to live in peace by good will, and Justice for everyone counted. Jews are Palestinian. See, being Jewish is a religion, and the ancient Palestine, is of a label for comprising every understanding to this, that can not be completely understood symbolicly as contained to be definitive.

Also, like America is truly melting, and murder accomplice negroponte, can not face for personal weakness, ineptness, and hatred for all of Humanity, so advocates huge oppression against all America as real People corrupted by a government of injustice, and contempt for themselves unheard from. (Jesus, just try to get together two people who agree on everything. Justice however, should be a no-brainer for everyone, but CNN say's nothing in Our defense as equals, and would, as they do, watch You be robbed and murdered, and not raise a word.) Also, just for double, the oldest practicing Jews we know of through recorded history, (the almost censored "Dead Sea Scrolls" included), are dark skinned, and live in Ethiopia, and the likud party, like so many other "settlers", are mostly filtered christian Kaisers, who migrated from Russia on the promise they would receive stolen property, (sure, I'm jewish!) (search "ILA" and the "JNF") like farms, houses, and Our children's toys. (FrontLine's one time broadcast) See, If sharon didn't steal and murder, repuglicans would have no excuse to receive kick backs to plunder even further, from the great stupid American People. Which is why a bush supporter is so deeply ignorant on just about everything like Speilberg is regarding the Holocaust, and like too many american soldiers, who we can be sure, would die in sacrifice from cowardice before bravery as evil under the anti-Christ, dictating war crimes against US all as Humanity unrepresented. Until Now. For, Christians have no protection from anti-discrimination laws in Israel, nor do Atheists either apparently. How spooky dumb is that? Legitimizing hitler they are politically. Jews are this, jews are that, and all of everyone else, is something unquantifiable, unknowable, and all around unloved and disrespected everywhere as G-D is forgiveness to be abused on Christmas, according to the deliberate practices of sharon singularly, as a bigoted nazi murderer, and the written words of the banned in Canada talmud also.) No bullshit. Clearly to all, very anti-American. Biggest secret going! Why? Americans are largely illiterate, drugged, and all around dumb. Now, where is CNN, or Our beloved "wealthy" celebs, who advocate blind obedience as slaves to the anti-Christ, to discourse me a liar truly as Jesus? Nowhere? You are still waiting People, while American families continue to be robbed and left for dead by inaction through corporate american standards. For, what can only one God do I ask yourself really?

If a thing is done wrong often enough, it becomes right.
-Richard A. Leahy

Johnny Wizard

--

Holy Jesus Man!

Have you heard the Revelations from India's government to the FBI now made public?, regarding the principle terrorist funder of Mohammad Atta being, the ISI's, General Ahmad? The bush administration's personal confidant, and top secret military strategist? See, it was Jim at MSNBC that informed US of bush's terrorist plan existing as once top secret presidential documents, and, that this same general, was also responsible for, according to several members of the Senate Intelligence Committee, developing the said war strategy of invading Afghanistan on behalf of the evil bushmob, with the very anti-human premise, of blaming bin Laden for a crime without any evidence to substantiate our public accusation, to murder more than a hundred thousand, plus! A crime, 9/11, I will remind you, that for when the evil plan was devised, hadn't even yet taken place. But was threatened would happen, if the Taliban didn't side for Enron's interests in serving for Ken Lay, one of bush's many bum buddies. (They apparently do that sort of thing on a regular basis, with all the members in their secret meetings of the 'only Boners' fraternity.) It doesn't take much either to understand why rotten rumsfeld, corporate america's sweetheart, (you know, the sadistic nazi war criminal who gets off on murdering or torturing innocent people), told US he wanted to have arrested those at the WhiteHouse and the Pentagon, or even in the Military, who would dare as Americans, to inform Americans what he and bush were truly doing in their names.

Destroy the unelected unarrested heroin pushing American cop killer war criminal, the demon we all know so well as corporate america's false deity, the super evil doer anti-Christ, Our Mr. bush Jr. Now Patriot Soldier, and be loved by all as Savior. Or not, and be a thoughtless degenerate, a cowardly regressing nazi bush slave, who would sacrifice your own family as yourself truly, because JESUS CHRIST, life is living to survive for Justice, as God is warranted to be as ourselves, with equal rights to being as is of US all included. Mr. ashcroft tells Americans he is purposefully destroying their freedoms as legal due process because he, as an idiot, and a traitor, has to fight ourselves as a terrorist blindly in Our names without American Justice,

but never explains his action, is asked to, nor could he. As ashcroft, like most in the bushmob are, is founded completely unqualified. Why doesn't ashcroft move to have bush and rumsfeld arrested or executed immediately by following the criminal leads for 9/11 on behalf of Americans as an American?, what with all the ample evidence documented as factual and everything? Instead, decides too, like the demon bush demands in attempt to sway his capture, that evidence will no longer be mandatory for him to decide who should be stolen from, as the left dead to be robbed as forgotten by Justice denied to all as Godly. American soldiers are truly as represented, weak, slow, and painfully pathetic cowards, refusing to protect their own families as a national defense measure, instead, as nazi dumfuk bush slaves, willingly support the murder of would be themselves as criminals, truly against US all as the innocent.

Mr. bush was quoted once again defending his irrationality as criminal murder rampages against the innocent as ourselves like he did in New York City with rumsfeld, by stating,

"Maybe somebody needs to explain to me why they say something, but I don't feel like I owe anybody an explanation."

The evil anti-Christ figures he'll just continue to rob and murder American Patriots while destroying freedom as Justice for US all, and simply escape Your wrath by corporate america making no fuss to speak in Our defense as the still living to be underestimated as equals.

Destroy Our Mr. bush Jr. now, and be loved by all as God would!

From: British News
July 17, 2002
Britain backs US plan for attack on Iraq
By Philip Webster, Political Editor

(Quoting the terrorist supporter blair, Philip was),

``To be TRUTHFUL about it, there was no way we could have got the public consent to have suddenly launched a campaign on Afghanistan but for what happened on September 11.'' ...

Oh, so there was a criminal intent known also by yourself then blair to prop up heroin pushers to save Enron's impending criminal bankruptcy?

We have repeatedly witnessed, CNN and CBC refusing to represent our Democracies, our FBI officers, like airing Coleen Rowley, General Ahmad, or the sabotaging of the Moussouie investigation by ashcroft, or the CIA, regarding the insider stock trades, or dealing heroin. The innocence of the Taliban for 9/11, and the barbarity of the Northern Alliance as heroin pusher slave owners. No, every single american according to CNN being unbiased, does not want bush the anit-Christ arrested immediately for killing Americans in New York City to steal our worths and freedoms as worthy of defence matters by their own measure as corporate cultists. As I told you, Bill Hemmer and several other celebs at CNN, now are fully aware of bush and rumsfeld being the true purpetrators of 9/11, yet, Bill continues to play evil against US all, figuring nobody ever will know without CNN coverage on his contempt for American Patriots he asks to have sacrificed for as bushwhores like himself and Blitzer. CNN refuses to protect Americans as equals commited to Justice for US all.

It was just reported by Chris Marden on the 27 November 2002, that bush's top whore richard pearl, has advised Britsh MPs, that bush secretly as the anti-Christ has no intention of allowing the Iraqi inspection process to succeed, and instead, is commited to murder ourselves either way.

Again, bush and blair, like CNN, have no evidence to substantiate their allegations against Saddam, and have stated because they have no evidence, they therefor as demons, can murder anyone on the face of this planet to steal our lives in OUR names as US innocent. Mr. blair and the bushmob have recently stated, that they have no evidence that Saddam has any WMDs, nor, is any threat to OUR WORLD community, and because of that, if the inspectors find no weapons, and Saddam insists it is because he doesn't have any, this, accordingly, would give these criminal master minds a cause to murder hundreds of thousands of innocent people, if not millions, and steal all the assets of the Iraqi people, while destabilizing our entire endangered species. They are mass murderers, threatening humanity to recommit more murder as TERRORISTS! Never while I stand ALIVE evil nazi dumb fucks. KILL BUSH NOW! Hey, have you heard about rotten rumsfeld's P2OG? "O", as in Oh rumsfeld is truly an evil fuck! Apparently, rumsfeld wants to provoke terrorist activity to murder ourselves as innocent cilivilians, as an opportunity to invade any country he wants to rob and plunder further. Also, most importantly, according to the official documents, rotten rumsfeld figures it would be important when he and his

mobsters commit these crimes, it be understood, that nobody be able to trace it to himself, or his partners in crime, so they figure, the criminal acts should be carried out through his department at the pentagon, then, get this, he won't therefor be accountable, or scrutinized by the American people through corporate news channels. The offical pentagon report details this.

snpd

All Wrapped Up
CBC as managed has deliberately with intent, worked to misinform and propagandize our community on what is as, documented provable fact, regarding Mr. bush's complicity to the murder of US as the innocent in New York City. CBC has refused to live up to our responsibility to protect our democracy, and in silence, has pirated our names to murder those understood to be innocent of the accused offence. CBC has refused to allow ourselves as the public to understand, Mr. bush forbade the FBI from pursuing bin Laden investigations, just prior to 9/11 with secret Presidential directive W199I (199I WF213589), which had John O'Neil, the anti-terrorism head for the FBI publicly protest by resigning over. This W199I directive was put into place after the administration had been warned by the BND, and several other legitimate intelligence agencies, of an impending terrorist plot involving the high-jacking of American airplanes to be used as weapons and flown into land marks. In addition to these unreported top priority political issues that stand to be true as documented factually, the bush administration had also secretly put together a sinister war strategy, that was revealed to ourselves as the public, by Canada's own Jim Miklaszewski at MSNBC, to have existed without any doubt as Presidential Directive documents, two days prior to 9/11 at the WhiteHouse. A planned strategy to invade specifically Afghanistan, by blaming bin Laden for a crime, but providing no evidence to back up the allegations. That's right. The super evil criminal bush dictatorship had a plan in place to not follow the actual evidence to arrest the true culprits for a crime that hadn't even yet taken place, but that they were prepared for to close investigations on, as an opportunity to invade specifically Afghanistan, propping up the Northern Alliance who still practice the barbarity of sharia law, with the bush bonuses of selling heroin to our world, and most importantly, building a liquefied natural gas pipe line for bush and his Enron friends, to rob even more further from us all.

Legitimate FBI officers unrepresented by Mueller claim General Amad was the principle terrorist funder of Muhammad Atta, responsible for a wire transfer of $100,000, who, incidentally was in unusual meetings, the General was, with the bush administration a week prior to 9/11, who also not only participated in meetings with several top officials in the Senate Intelligence Committee, but also, was reported to participate in building the war strategy of invading Afghanistan, as the reported desperate excuse offered for the General being there just prior to 9/11, and also, was personally responsible for negotiating the non-surrender of bin Laden, of which the ISI claimed, the General advised the Taliban not to do so because, no evidence would be offered, nor public trial for an offence bin claimed he played no part of.
We are all in agreement, in truth we rise, evil is just the deceived disguised. Boo!
The case is wrapped up, and bush and rumsfeld need to be immediately arrested for 9/11, for murdering countless thousands for stolen gain, at the losses to our humanity, that show through every putrid utterance of scum bucket bush, as contempt for our living as humanity through Law. Where a person accused of a criminal offence without any evidence is clearly innocent. For why I ask you reader, would any unjustified leader of US people blame someone for a crime who wasn't linked to the offense, while working to close investigations, and not follow through with the ample clues to capture the true evil doers? Just how cowardly stupid can soldier families be taken without conviction as themselves worth fighting for?
Justice for all, and glory be to godly.
Johnny Wizard
---

Freedom is only garnered through Justice for all equally
Nobody deserves to be murdered, but a murderer escaping to recommit
"Patriotism is the last refuge of a scoundrel" wrote Samuel Johnson, and he wasn't just mixing words. Patriotism is not about mindlessly as cult slaves obeying bush the unellected nazi fascist criminal dictator, it is about protecting freedom for all as democracy demands by law. Ours. Mr. bush has said that if we, as Nations, don't agree with himself as world dictator, removing the guiding principles of constitutional Justice as freedom for all instills, while actively destroying America and murdering innocent

people for no crimes who struggle now only to survive from his criminal tirades, advocating torture while declaring wars against anyone poor and unrepresented, with a complete disrespect for all human life, and our courts of Law, has clearly stuck himself to be our enemy everywhere, as being evil personified, which inextricably demands his immediate incarceration for the crimes he is committing against ourselves as a true terrorist without question, no? The bushmob desecrate the ideals of freedom, Justice and democracy garnered by truth as our own being to be individuals, and is exalted by CNN claiming to be representing ourselves while watching us be robbed and murdered as stolen from openly. Mr. Turner, you have terribly disappointed our world in this great time of need for ourselves as humanity.

Again, all relevant evidence, circumstantial and otherwise, regarding the WTC terrorist act, points to the bushmob, and rumsfeld especially.

"Any argument about any aspect of the conduct of the war against terrorism," as Globe and Mail columnist John Ibbitson puts it, "must begin with those airplanes smashing into the World Trade Center and the Pentagon. And then it must stay there and never move from that spot."

Flight 11, all ticket sales are accounted. How did terrorists board without purchasing tickets? No, the airline industry did not take the names off the lists on Sept. 11, as too on the 12th they confirmed so with a small correction, but if they had, how then would, or could, the desperate doubter explain strange flight 77 from the same company, which does leave room for terrorists to be on board with the given total. Oh... I think I know. Two flights had duped terrorists hired by the bush wrecked state department, explaining the State Department connected money transfer discovered by the good FBI to the head terrorist, Germany's Mr. Atta, unreported by the Commi Nazi Network of course, showing a belief on Atta's part, that he would not die with the top secret arrangement he had made with the bushmob privately, explaining why the bushmob had his passport in their possession secretly, and why Atta couldn't have checked in with baggage. (Ya right, he's gonna pack a jet fuel consumption calculator and a video titled, "How to fly a jumbo jet airliner in twenty minutes for dummies" left behind of all places in baggage, explaining the secret bushmob audio tape still to be never released where Atta is heard mumbling, "Jeeze, where's my lucky shirt?" and, "Does anybody here know who's flying this thing?") The $100,000 didn't go far,

and Atta clearly wasn't a devote Muslim, as in the bar he drank vodkas and flashed a huge wad of hundreds and fifties to the manager, and everyone else in yelling distance, bragging how much the bushmob had paid him stupidly to do so, for a flight he couldn't possibly have boarded as a viable pilot or passenger. Also, why need carry his passport loosely as needing to remain unnoticed, if he didn't buy a ticket, nor planned to travel anywheres, if he somehow magically just appeared on the plane in mid-flight after an all night bender with hookers? Also, none of the four flights easily indicated that they had been highjacked, while the transponders were all turned off by code from inside the locked cockpits, at roughly the same time as if by automation, with flights not changing their flight course for as long as fifteen minutes, like no passenger ticketed terrorists aboard flight 11, ("Hey Atta! check out the view!", or "You left the manual where?", or "Gee, thank God you have the final draft, suicide letter still with you for when we burst into a fireball."), as too, the 200 mile precisely aligned trajectories, without HUD, do attest something not quite normal, according to experts in the Air Force with thousands of hours flight experience and some chaos theorized war gameroom background, and elsewhere, who know of bowling a perfect game while blindfolded, using a checker.
Flight 77. The planted terrorists failed to highjack due to the fact, the plane was returned to control of the real pilot who managed to use communications after a fifteen minute fight for something. Conversations that the bushmob confiscated. For after 77 changed course in the dramatic after some struggle for the controls, it then returned to it's original flight path, and okayed, but, not for long, for now they knew inside information. "No, I wanna fly this plane according to procedure while you guys fight a fair three round fight." or "You say planes have actually flown into the WTC towers?" or "Let's just pretend we're the real pilots, and maybe no one will notice?" But shut off transponder only then? was it on again, or had it never been off before? If the terrorists were subdued, or gave up by showing their red bomb boxes only contained confetti, how do they so quickly take the pilots place, (who had just been last near for calls after returning to normal), to push the codes? This is why the bushmob took the tape. CNN tells us rumsfeld says the FAA didn't contact NORAD until 9:25, while at the same time, CNN also tells us controllers who handled 77, knew it had been highjacked at 8:46.
Also, explaining the now no longer strangeness of why

bush desperately ran to confiscate those airline videotapes of the passengers boarding flight, not thinking to know we now know who they all were. (Maybe things didn't go exactly according to his evil nazi plan?) Truly brave American soldiers would arrest bush and rumsfeld by the end of a loaded ready to fire rifle, and any other who stand to stop us from viewing our evidence available. Why, that's called obstructing Johnny Wizard. Also, consider this, the thought to necessitate the order of the terrorists to force passengers to use cell phones as secretly planned, two flights, (Time magazine Sept. 24 - Flight 93 "We've been highjacked. They're being nice.") but make no declarations on behalf of themselves leaving no point for departure? With a communication plan not controlled from the air perchance? Ah, but not on flight 11 or 175 where terrorists weren't present, as again, every passenger accounted, but no calls? Only one not talked about, because it doesn't fit with the bushmob lies. Flight attendant Sweeny was reported as the only one I am aware of to make a cell phone call over the entire hour on flight 11, or 175, to the ATC at Boston, giving seat numbers to highjackers that were not on board as registered ticket holders, (so how did she?) nor even sitting where Meuller lies, who in so doing, disputes she made the call to know factually. Makes no sense to me also, and CNN, we can be sure, will do nothing for the Americans who lost their lives over the senseless ignorance of their corporate cult status, that perpetrates this form of dim-wittedness without helping you by interviewing anybody involved in the investigations, to rather let the bushmob continue dictating unchallenged to murder more of us, for staying unawares of our silent screaming.
hmm... Any unboarded tickets? Apparently so, for it was reported all purchased tickets were used but one. Another koinkydink regarding the hooting and hollaring, drinking and carousing in the strip bar the night before of the bushmob barkers, is that nobody would PURPOSEFULLY give their lives in a collective criminal operation for CASH payments through the State Department as to go gone dead broke next day, against living life's costly riches freely would they? Did Atta from Germany even attempt to give the 100k to his wife and children for safe keeping? Bingo. Also it has recently been revealed by India's officials, and Pakistan's Foreign Secretary, Niaz Naik, that the bushmob had contacted their governments in AUGUST as himself typically idiotic, as privately to public representatives in a unreported meeting in Berlin to state, he, as the

anti-Christ, would slaughter the innocent people of Afghanistan's government, who had ended the heroin trade and were protecting the country while progressing towards equal rights for women,( We will sue CNN for every dollar Turner has.) making illegal, slaves and murder, by forming national laws that five years previous didn't exist, also making it safe to travel, and started opening schools for girls while being starved for doing so good for everyone. Why would bush the demon attempt to do so? To shore up corporate banker support for Enron, who had placed a 3 billion dollar investment in Dhabol Power Company, and needed liquefied natural gas in a big hurry, what with Qatar drying up, and the tripling in price of naphtha. Stuck no longer able to garner partnership with the present pipe deal contract offer for Afghanistan agreed to as well by tribal leaders who Tommy murdered, as too, India's insistence in not being ripped off any longer, by a company the entire nation learned easily to hate over the past decade, and the laundered employee pension money unretractable in the Cayman Islands proved to be of little use apparently, and of course most importantly, also the secretly known to fellow shyster cheney, impending criminal bankruptcy, and we must also not forget bush had excepted 2 million dollars in bribes from Ken Lay, who had his own late night office suite at the White House for their private encounters, so it has been kinda reported, but difficult to believe bush manages to whore so much, but understandable, what with the way he walks so funny. See, the Taliban had excepted a deal from Bridas, a pipeline offer to help rebuild the nation, while the bushmob just threatened to murder all their families for Enron's conspiracy tied to the repuglican nazi regime. Enron could never obtain investors desperately needed, to attempt with capital, to hide their crimes against all the American people, without a binding contract, investors such as from the multi-billionaires in the post WWII charity organization, World Bank, of which as unocal, being typical repuglican, only offered bribes to officials from Afghanistan to hurt their nation they, as the Taliban, truly believed in working for. As a another example where these nazi vermin relate their uselessness against us all from, Mr. phil gramm lobbied for slave labour at 10 cents an hour for America, while sneaking in a bill for California to have their electricity price quadrupled, for his relatively paultry personal check of one hundred thousand, while California citizens payed billions and billions as stolen from without police protection, as companies fell going bankrupt due to

gramm's assault, leaving many out of work to get swindled even further by repuglican corruptions that run rampant through the entire state in other places, without me there to bask on the beaches to give an occasional cameo appearance, while flexing my muscles to the tune of some free beer, a place to crash, and maybe pretzels, hint hint. Achem. On the morning of the fast paced Sept 11th, bush was aware of something special in NYC that he would comment on as asked SPECIFICALLY he stated while leaving his hotel room, on his way unswavered directly to hear about goats from school children by nine, as it was reported his comment to be so nationally, on ABC News with Peter Jennings reporting on the terrorist highjackings. While we now know according to the FAA's official report, that at 8:20, officials were made aware of the unprecedented emergency while channelling through authorities, (the bushmob as rotten rumsfeld through CNN speaks nothing about it saying, all the FAA employees are lying, and don't keep watch professionally) and according to the criminal indictment against the bushmob filed by Ilarion Bykov and Jared Israel available at www.emperors-clothes.com, the Secret Service are kept more informed than anyone concerned with bush's safety, so, you'd figure, would have made bush aware of all four flights, since he was already familiar with one important thing going on in NYC, that he would talk to the media about directly later as massed for it, right? (Perhaps someone should ask Andy?) Bush was also reported to receive a call in his motorcade about the horrific event, with him also confirming to witness the tragedy of flailing bodies from the epicenter of disaster, you know, the WTC towers, commercial airlines thing?, school television sets we presume existed that he left only a moment to thought, as he then quickly entered smiling nonchalantly, a different world stage, the class room unshaken, without thought to think he may have been confused earlier to then attempt seeking clarity, no, he sat for 25 minutes unalarmed, chit chatting like nothing was happening, just as we rehearse, and as disturbingly deceived evil as ever to be believed, as anti-Christ he is it would seem to be. He later after tinking tried as dumb as he is, to deflect his gruesome macabre conduct, by suggesting he had learned only of the doom just prior to entering the classroom, where he immediately without thought, quickly attributed the disasters to pilot error while making a funny, while completely dismissing his concern as not even present for the loss of innocent American lives, bankers even, (then, before, and now he'd even tell you unblinking, "What?"), just like the

tens of thousands as children in Afghanistan, and the terrorist crimes he advocates in Palestine, as he then pressed on to more urgent matters regarding his press op cover up. Did you see his media reaction in front of the classroom, when he heard the news for the forth time officially that morning, as again, he even admitted to actually visually witnessing some of the devastation before that moment, and that only then, had it become a serious matter to change, or not change his demeanor? Stuck he was then, with no mind to ruse, er.. time to snooze, Arg! What was the cue? Errrch... If he moves with priority interest as concerned openly honest public figure, as he knows a legitimate President would have been to first learn of such carnage,
THE MONTH BEFORE IN AUGUST,
why not previous before he left his Hotel room with a television? Outside the Hotel? In the motorcade? With school staff as you'd figure would have been present too laughing, no? Instead he stayed as he had been to give no orders publicly, nor attempt to make public inqiries, but to listen with such unbelievable absolute devotion, equating a beautiful child's story, as if it were Jesus from the heavens himself, speaking directly on the living Nature of our Universe... Okay, maybe we won't be able to convict him on that, but, if that isn't worth enough salt to be considered newsworthy, how about when bush said he didn't hear of the towers until he was at the school building, nixing the recorded comment reported on by John Cochrane of ABC News with Peter Jennings, that bush made a noise saying that he was importantly aware of something in NYC to speak directly on later? Or how about at the memorial, when he publicly stated it would take two whole hours to read the names of those he would without thinking, murder as innocent for Enron he told India and Pakistan in August similarly, so he would just read the titles of companies to say Grace, then would press on to more urgent matters.
"Crime is terribly revealing. Try and vary your methods as you will, your tastes, your habits, your attitude of mind, and your soul is revealed by your actions."
- Agatha Christie
---
March 11, 2002
Too many loose ends...
By Barrie Zwicker
... Yet at 6:30 the evening of September 11th NBC Nightly News, along with many outlets, reported: "It was after the attack on the Pentagon that the Air Force then decided to scramble F-16s out of the DC National

Guard Andrews Air Force Base to fly ... a protective
cover over Washington, D.C." ...
-----
Joint Chiefs of Staff, General Richard Myers testified
to the Senate Armed Service Committee of Sept. 13th,
that no fighter planes had been launched until after the
Pentagon was hit. CBS reported the next day, three days
after the event took place, that everyone in the media
and government as Myers, who of all would surely know as
much as anyone with the paper work he had to prove it,
including also highly respected employees at Andrews Air
Force Base, and at New Jersey, were all lying without
explanation nor reason to, and that at 8:44 two F-15s
scrambled from Otis Air National Guard Base on Cape Cod,
and were racing to New York at less than 300mph, below
20% throttle, to arrive way too late from over a hundred
miles away, making the 'official' CNN story implausible.
Although, the FAA has stated that it, as required by
statute, and rehearsed for decades as practiced,
drilled, and executed flawlessly, alerted military
authorities in Colorado, throwing the command to
rumsfeld's chain at the first sign of a possible high
jacking, and did not sit staring at radar for 29
minutes, then yet again for another 20 twiddling through
the manuals as bush would have us believe without
suggesting. The attackers clearly did not act alone, as
rumsfeld fights to threaten us with murder to think
anything but his assuredness of who are the evildoers
without evidence available to us all as facts to speak
for ourselves, which to the trained observer,
incriminates himself as suspect on the purpose. (None
of even the how would anyone know who 'suspects' without
having purchased tickets, are al-Qaida, nor from
Afghanistan, according also to the FBI's Mr. Mueller,
who in his knowledge of evidence as it pertains to
criminal conviction required for our civilization
stated, only "one --->--- OR ---<--- more" might.)
Showing a cowardly fear nullifying judicial procedure,
by swaying the numbed corporate automatons to think
likely as machines, while not searching nor speaking to
give reprimands for correction, which would be done as
normal, if rumsfeld wasn't directly responsible for the
crimes himself as nazi traitor. Why else? Because real
soldiers as American employed at Air Force Bases have
whispered behind our locked corporate news doors, with
no place to speak openly as national, being corporate
news is taking none of our phone calls, as Americans are
generally broadcasted to be illiterate and cowardly
because generally they seem to be that way actually, as
I too, still haven't been addressed as someone with

something to say by our professional, they know us
better than ourselves, news standards. However, I am
presently working desperately with many at CBC for an up
coming let's slam Johnny documentary, or possibly even a
legitimate news story, and others in the alternative
media are slowly opening up channels of communication by
returning my phone calls, of which, you as well, could
do the same in our name. The universe is turning, take
hold somewhere. As I was saying, real soldiers as
American employed at Air Force Bases have stated without
an ability to be wide open, leaving this point very
difficult to confirm as of yet on our part, without
jeopardizing ourselves as dazed and confused hopelessly
lost nowhere. Example, our media giants we all suffer
without answering any of our important questions,
airwave savvy broadcasters such as Myers, rumsfeld,
Mueller, Ashcroft, Chris,

[cnn]
shrub, and the overwhelming cowardice of others to
spread this document to feed newspapers, soldiers, and
law enforcement officers everywhere, enemy or otherwise,
that has so far, found no rebuttals regarding the
evidence before us, and rational for Justice to be
served as a protection for our freedoms we must struggle
to maintain always forever.
That stand down orders forbidding any military aircraft
taking flight for defensive measures were given out
verbally right after the first airliner hit the tower.
Mr. rumsfeld and bush's immediate public explanation to
us meetin like this', given to surviving American
families of murdered police officers, fire fighters, and
soldiers everywhere, leaves us by their continuing
silence of no statement to counter this extremely
serious accusation that demands resolution either way
immediately, (or both their right deserts by watering
frauds), found recently at a very popular respected web
site or two, would make one heck of a NRA town hall
gatherin, eh gentlemen? Now, back to Myers in a later
different congressional flub. (That I would sight if I
could, but a small miraculously unawares group, holding
our title of RCMP, has seized property of my own such as
computer equipment without officially charging me for
writing truthfully, that I've always freely publicly
admitted to doing privately through all local news media
outlets here in Winnipeg, (that give me next to nothing
as political coverage for being critical, scientific,
and possessing elementary math skills such as addition

and division regarding our public ad revenues) several legitimate newspapers across Canada, and as a secret to themselves even group, only two officers seemed vaguely familiar with deductive reasoning, along with our actual history as humanity, that they had spent two months with overtime pay researching only on how to use Google apparently, are presently pouring through Amiga Basics as we speak, looking not for my well documented claims they balked in secret terror to tell me it wasn't about them as individuals to answer, but to threaten my freedom with their excitement about the prospect to find personal works to use against myself to this world I call home. In darkness they claimed they would not be individually involved professing from somewhere if asked by another playing evil against the wall, and therefor as anyone could be entrapped as victim, would get Johnny on a indefinite termed mental health care rap for being intelligence, they would try, to publicly accuse myself lacking hounor and character, on behalf of the secret service good cop bad cop Don jokingly told me for life, as trapped helpless supporters of cop killers and lottery scammers stealing from our grandparents, just ignoring their jobs, our lives, my written words, that do largely include, my publicly made requests to protect our communities as legal bound claims based in our criminal codes as Constitutional, who as themselves will attempt to stand publicly not to bring attention if afforded the effort of public accusation against myself, pretending to be us they'd suppose eventually, captured in our public arena against me as unworthy. Standing otherwise to Lord over us against themselves. Truth, Justice, freedom and liberty destroy ignorance as injustice, slavery and oppression, like it or not, here come's Johnny with no lawyer. If a murderer is on the loose recommitting, do we not use the required force to stop the transgressor from re-offending? The media is our messenger. Anyway, (Jeepers, I sure can go on eh?) as I was saying, Myers later in another committee addressing the timeline specifically, stated something like:
Oh, I don't know any longer, now that the professional news corporations are dictating our existence without my records, and our democratic governmental testimonies, left me thinking to not bring anything with me as required this time, sorry, no, actually, I forgot why I came here today. Is it over now?
Also, in retrospect, we, as you, can also witness through archived military newsgroups an almost complete support by our gun saluting soldiers and several real OFFICERS, American and Canadian, for my calls as a

single citizen in our fledgling democracies for the immediate arrest of rumsfeld and bush escaping our authorities for murdering American civilians. Gore won the election, so let's make him President until a new election can be called as soon as possible. CNN must become humans and demand public representation. Look, we've screamed around the world regarding the facts irrespective of myself as an individual, and the corporate cult members refuse to report our stories, while actively working to oppress us all with deceit, they feign as brave to steal from us as poorly represented. See? Mr. bush as anti-Christ states that if a dictator pirates the authority of a nation and commits CRIMES against ourselves as humanity, the nations police officers should be slaughtered without mercy, or allowed legal council as defences, as regard for our standing universal laws of decree by our big time Creator grants us free will as unthinkable anyway (it's a long story, read the somewhat boring, "Johnny's Last Stand" if your interested in how I do this without flinching), and in bush's extreme evilness, now suggests, America as in deed our world needs to be nuked for not defending our flag. As we witnessed horrified in Florida, as bush the demon tyrant self destructing in his personal hatred for everything truly, argued with only himself publicly, that he as pure evil, isn't required to have evidence to murder anyone, and if The People should speak out as Justice for all as reason does sustain, he'll annihilate the entire planet, as he is against every life as US not understood, perceived, or believed, because he is generally so stupid as evil is always, leaving him targeting specifically, any police officers who are protecting ourselves as community he would blindly spout proudly, if we could nail him on the question directly. Justice to protect a person not guilty of a crime, he believes is ONLY relative to whom holds the speakers platform for accusation, so as dictator, he sides to steal and destroy our lives unworthy as himself, and doing so, has him deceived it brings bounty by monetary value stolen, not earned, seeing no value in personal relationships but to distrust others as reflected to being a part of himself also, leaves him in relationship to us, secretly planning to deceive the entire infinite forever Universe, being harmful to all as the anti-Christ he is without exception. Ah, but alas Mr. bush, infinity plus infinity equals infinity super dummy. Nothing else wiser as this Universe is intelligence known to ourselves as wonder eternal. See, if there is one thing every single conscious entity in this Universe of

Universes can all agree on despite whatever bush spews, is that we don't wish to be deprived our right to life and liberty for just living to not deny that right from any other. Lucky for bush, God is forgiveness, being of a causeless force before an actual beginning kinda nature, me on the other hand as Johnny, representing life and death the way I do honestly, am not so stupid nor tolerant watching him destroy ourselves in error. It's a crazy world. Mr. bush tinks the world is only of his perception, nothing more of ideas, no strength in wisdom, fearing equality for us would leave him in all honesty, a life wasted trying to cheat himself. While I as Christ say every single individual has the equal born right inherent as existence eternal dictates, not only because I'm naturally a caring, compassionate person familiar with physics, but also because it does me well for my freedom to be all I can. For in this struggle of living, I foresee great potentials, not only for myself having fancy dinners and super big parties, but also for the realms of knowledge I'm familiar with ourselves neglecting, and how many important issues go unresolved due to doubters who dismiss actual experts in areas such as understood sciences that need our utmost immediate attention, motivating me to do anything possible to make this place a better world on behalf of everyone, that of which, to resolve, only lacks a lounge act King, who as should be, me, because here I am to crown myself standing this way forever dreaming. Plus, believing I'm actually trying to help this big old clunker of a Universe as I understand fairly well as friendly, really makes it an extra special bonus for the planet and everything, as long as our world isn't completely decimated by the bushmob, due to the general masses having absolutely no interest in understanding themselves.

I don't have any interest in what others do with their freedom, other than deny ourselves to do likewise. If a nation commits a crime against my freedom as a individual, of which I know as a god to be equally represented through everything, an innocent person murdered effects me personally, especially when it's advocated in a public forum where freedom is advertised, but obviously not present, there is where my voice demands by RIGHT to be in defence of all innocence, (big G 6 power) such as is my eternal struggle for freedom in my own name of John. (I'm in the book.) I wouldn't kill everyone in the country, or police officers as bush would advise, but demand the perpetrator to be corrected, chastised, insulted, arrested, or shot smiling as my two year John is crazy mad about bush the

nazi tyrant murderer, has manifest ourselves this way. Freedom is only garnered through Justice for all equally. Mr. bush and cheney don't understand that, nor wish to learn about us, because it runs to expose their weakness publicly, as cowardly and truly pathetic individuals they both truly are, as they fail to pretend otherwise to more than half who know better, and as bush, to hide from us all as a very anti-American war criminal. Which is why we as humanity, must demand bush and rumsfeld's immediate arrests for mass murders and also for decimating the American Constitution and Bill of Rights in our corner. Mr. bush and rumsfeld must be stopped at all costs as our own willing, shot smiling now if need be, twenty dollars a head I'm offering, as too, helping our disabled officers enforce our laws to protect ourselves on behalf of every person. Did you notice how our corporate professionals ignore my world wide factual claims, only to silently advocate yourself to be oppressed and stolen from again? Maybe blown up real bad, while bush blames whomever now that evidence isn't necessary to convince the numbed and drugged of America for paying to destroy themselves by rewarding bush as saviour? Do you notice how our professional corporate cogs, refuse to report on bush's fifty billion American worker tax dollar rip off, and by omission, advocate criminal acts against ourselves as society's helpless tax paying victim? Or CNN refusing to report the closing of certain voting polls in Florida as all eligible people from the area, were lined outside the station, left to be told to go across town in fifteen minutes, but first the repuglican party is going to charge you for loitering, er.. I mean busing, no, wait, and so it went till many never made it as reported. Never mind all the disqualifications. Mr. bush was not elected, and is a tyrannical dictator of evilness never known before or ever to be again, for his gamble is for all our real lives he leverages as we truly fall dying. Either we survive, or bush destroys all of humanity due to the lack of real courage as heroism in America to challenge his hatred of our world living to continue, and irrational fear of our ultimate freedom to remain forever wondering aimlessly. Mr. bush shall not continue to advocate murdering our police officers while stealing our monies, or we will get him ourselves for continuing to do so, as he daily advocates on all corporate news channels, smiling his demon grin as dumfbuck shihtead. Mr. bush is presently trying to dump tons of radioactive waste on a extremely volatile fault line under Yucca mountain, shipped right across the country from all over. Purposefully ignoring all

scientific, as the public's concern intentionally. It is clearly an act of hatred for all life as our Nature, for it is so beyond irrational, and into maliciously evil, and in of itself, should warrant prison sentences, if not immediately halted for public review demanded to be broadcasted on CNN internationally, in a manner where the staff actually tries to do something on behalf of the weakened nation as still barely living. I have wondered of a Canadian prosecutor against myself standing, if unfortunately the RCMP, in conclusion, do privately decide against ourselves being by playing stupid against democracy and freedom would be my defence I'd suppose they would appear to all, while begging for forgiveness from those who know not what I write. (I can't even read this myself sometimes. When I was questioned weather I wrote "The Trial and Conviction...", it was murmured quickly, that, oh we have ways of proving you did with our government crack computer specialists, so don't try to get out... Huh? I, in the paper weeks previous to them stealing my goods, mention directly my discussions with my provider, let alone the computer geek fact, that every paper I've published on usenet has address headers. And oh ya, and then there is the second paragraph in "The Trial..", and the mention of my full name elsewhere, with tons on contact information. No, this is about not allowing my legal, rational, provable arguments made public against bush and rumsfeld the war monster criminals, for fear to face the horrible failures of our corporated media to represent Justice as ourselves in North America. Having me now placed potentially closer to the position I was struggling for, by attempting to actually imprision ourselves under bush dictatorship ruled broken by everyone. Thanks for helping to realistically illustrate my argument. Goodbye cruel world.) I would suspect if so, an effort argued bogusly, in a possible corrupt court room only to foul our sacredness as humanity under tyranny against our nature to be insulted, with the news bank bosses ignoring our downfalls, to not allow to plead my case openly as John, so here I make it now. I beg of you as a stranger to help our Justice ring through, if not for me, for yourself as deserve to do so. Or, go straight to hell, who needs who. Mr. bush's private Secret Service agent was drinking diet coke when I first spoke with him person to person. (I've written at least five papers discussing the science of monsanto.) Didn't really seem that all a bad bloke, and I do believe we left on fairly, no need to kill each other terms mutually. But, thought all the people in this world should be blown to

bits without thinking nor discussing why it seemed he thought those he didn't know were deserving of murder, along with our families as collateral damage, and the country side toxically polluted for generations like in Iraq, to waste billions to give the bushmob to sell heroin and distribute cocaine for his fear of the CIA, of which fairly, he seemed ashamed when I mentioned it, bush's pathetically weak and cowardly cocaine dealers who are acting illegally, desecrating the American flag, the Constitution, the Bill of Rights, and so on because, the northern alliance treated women so badly before the Taliban he witnessed to tell me all about it briefly, and how all deserved to be slaughtered blindly to make him feel like American, and no other ideas had been implanted by command headquarters when they sent him on his own for testing my friend or foe hyperspace capabilities. Why all the murders we stand for? Because apparently, the al-Qaida that Americans never heard from, state nazi corporate america has no right murdering and stealing from ourselves as humanity, while propping up military dictatorships with American people dollars, killing innocent families attacking Allah by representing the evil in Jihad, as all would agree who could think likely from any religion including atheism. The nazi bankers with daily full page newspaper ads don't like that philosophy understood by ourselves as the silented as taken to be granted, while our in debt soldiers are told to murder people accused of crimes without any evidence. Nazi Germany all over again, while racists utter threats against entire nations going unchallenged as actually published. Mr. rick lowry of the national review goes unarrested and corporately celebrated, suggesting to nuke Mecca, and sites 'moderates' who suggest 10 other capital cities, nevermind Philadelphia, while I yell, "get bush and rumsfeld now as the nazi war criminals they are, escaping true American JUSTICE INFINITE as INDIVISIBLE!", (just pretend I'm not here). Central Affairs representative Christina Rocca, the evil witch she was to humanity as God, uttered the CRIMINAL threat to the Taliban's embassador for choosing the better LEGAL business deal in August "Except our offer of a carpet of gold, or we'll bury you in a carpet of bombs."

---

Unocal and the Afghanistan pipeline
by Larry Chin
Online Journal, 6 March 2002

... Osama bin Laden advised the Taliban to sign with Bridas. In addition to offering the Taliban a higher bid, Bridas proposed an open pipeline accessible to

warlords and local users. Unocal's pipeline was closed for export purposes only. Bridas' plan also did not require outside financing, while Unocal's required a loan from the western financial institutions (the World Bank), which in turn would leave Afghanistan vulnerable to demands from western governments.
Bridas' approach to business was more to the Taliban's liking. Where Bulgheroni and Bridas' engineers would take the time to "sip tea with Afghan tribesmen," Unocal's American executives issued top-down edicts from corporate headquarters and the US Embassy (including a demand to open talks with the CIA-backed Northern Alliance)....
J.W. reminder: The northern alliance are bush's heroin pushers with women slaves
---
Of course CNN again, refused to protect Justice infinite by reporting the facts, while bush followed through by murdering more than 3000 mostly wealthy citizens as his excuse to murder more us good people for his evilness (CNN reported bush most popular according to their bogus tabulations that seemed to neglect, no one voted for me either), while now two seemingly unread RCMP officers, a single Secret Service agent, and one justice scribbled Obrein or maybe it's OBorien look to ignore my equal rights, by claiming my demands to be human, something they as nobodies will hide from, while attacking my credibility hidden by private news agencies from the public, hoping we will just die away with them to plunder who? BZzzzzzTT! Wrong. Welcome to the Twilight Zone late comers. These cops supposedly of ourselves, are well aware but pretend can't read, bush and rumsfeld blamed an entire nation of millions for a crime without any evidence, but to steal and plunder, over crimes they were responsible for, murdering everyone, while I wrote every real proud and strong American should help our police detachments, stand up and shoot the two nazi bastards in good lighting immediately, for trying to undermine everything the American flag represents, while purposefully leveraging the general populace to remain in ignorance, as CNN just refuses to report on anything regarding the State of the Union, attempting to escape the Judicial system by destroying our democracies, sacrificing soldiers too stupid to live godly. Now we can only assume these officers are trying desperately to convince the real RCMP to cower as duplicitous, as too stupid to care for themselves as our own brethren, trying to find me guilty as just one man named John for living natural, to make them as nazis strong for oppressing our Nations as God

everywhere, because of their inability to stand on guard as Royally Canadian. They've actually told me they are going to attempt to charge me for something, but know not what to total yet. They seemed fairly excited over the prospect of stalling our entire human race, needing to learn first how to, then to go through hundreds of thousands of Amiga documents, programs, libraries, and device drivers, that the entire Amiga World community has been working through for 20 years, then there is the thousands of individual games from the eighties that they'll need to learn the intricacies of, my absolutely huge art collection of mostly babes, dragons, movie posters, and sea mammals, and finally my 'Johnny Archives' drawer, that they of course in terror, will completely ignore, along with North American criminal lottery revenue tabulations, neuroscientific MMT papers, (The most horrific toxin known to humanity), the bad evils of Monsanto we can be sure will be considered a definite "oh, they didn't see that as officers of our laws", AZT? shell and talisman? Forget that, just let those people out there die as murdered they would snicker privately in secret telling nobody, no, it's all about finding a way to send Johnny, he thinks he's so smart, genius away for being brave and oh so freakishly strong. It's already been near a month of planning to hurt our ability to communicate as humanity, as it is becoming increasingly more difficult for me to post my ramblings, while neglecting my legal demands for bush and rumsfeld's criminal arrests as repeating offenders of first degree murders still threatening everybody. GIVE US BACK MY AMIGA! Or, real officers, military and otherwise, along with your co-workers, your neighbors, and my family of garbage pickers, will charge you with obstructing Justice. For, your cowardice to protect our communities is not my own as John, and attempting to hurt me as an individual to hide from your paid responsibility to our communities, is not what the REAL RCMP stands for publicly. Obstructing Justice is a charge that holds a maximum life term prison sentence if we look to the mounting dead bodies, in a court case we will likely preside over as true, brave, strong and free, against fools trying to break our living spirit to believe in my determination to have this done on behalf of everyone.
Barely alive Iraq is no threat to anyone, but torture advocate cheney as soon to be war criminal like bush and rumsfeld. stopthewaragainstiraq.org Spend five minutes at that site which sends info around the globe, and then notice how CNN doesn't want to play the public on the issue understood by all our experts. I'm not sure

myself of CNN, for I can't stand wasting my time any longer watching themselves ignoring everyone. If the corporational news degenerates, continue espousing the benefits of siding to be nazis in our names, escaping our justice system as mass murderers, Mr. rick lowry, bush and rumsfeld, will be challenged by every proud NRA card carrying, God fearing, life protector imaginable, this includes of course our REAL POLICE agents of freedom in the Secret Service, that are smart enough to believe in the name of the law, and not idly shaking in terror, while attacking our citizenry for speaking out rationally on behalf of our falling dead comrades. Ed McMann and bush are planning to tour American elementary schools to teach children to help secretly identify those 'others' who are "injurious to the domestic tranquility of the people", and teaching the "importance of patriotism and obedience to the state", pope nazi bush is so terrifying on his own representing the dark ages as evil incarnate, I couldn't possibly make this horror up, and Ed has always been a stupid drunken sell out, so, no big surprise there for anyone. Can you please e-mail this letter to the staff of your favorite radio program for me please, then we'll all listen to themselves turn against our communities as us CIA (see below), FBI, and legitimate officers of our LAWS, by remaining silent while hanging up on everyone trying to protect ourselves from war mongering nazi crime lords, as truth to set us free from the chains of tyranny will take a course, it's just how many will willingly in fear of living, take bush's place for nazi sacrifice, instead of standing to prove our worths by demanding justice for all right God damn now? What can they be scared of but us? Do some fear we'll make'em look stupid for being so? What can we blame but the time we run so quickly short on, for we must not dawdle, and get back to work to pay the bankerman for doing nothing, so to give our luxuries of freedom to do other things we know not of, because we're bust as it is, and this days almost completely done for now like the others, oh, but our hundred or so American multi-millionaire TV entertainers have it so good by never ever getting political generally, while hundreds of millions are robbed and murdered in their names as evil taking much by giving so little back in return, screaming nothing as individuals, pretending to be actual struggling artists, as this life is truly a pain for them to pay attention. ("Oh, but what about my poor dying fans who worship me like Jesus" they would probably say.) In other news, the good CIA elements were reported by The London Times, to have asked the London Financial Services, to investigate the

traced, extremely unusual 'put option' stock transactions regarding the two airline companies, (a 4000% off the norm bet they would both lose cash value) just prior to the terrorist acts taking place, they did, and came back with A.B Buzzy Krongard, bush's dumbass cocaine dealing, anthrax mailing, executive director of the CIA ourselves, who bush the nazi dictator now says the CIA can not arrest in a military dictatorship absent Universal law, and has recently told Americans, wimpass buzzy, will now be free to murder ANYONE American including subordinates, who dare try to reclaim their rights as an equal under God not heard from. We say true brave American soldiers and our grandmothers everywhere say otherwise. Where is the Mafia when we need them for Christ sake? Oh ya, mostly dead, maybe I'm moving to fast on these issues eh? These facts mean bush, rumsfeld, and now buzzy, are directly involved in the terrorist acts in NYC, of which bush, as American traitor, has publicly encouraged the WTC investigations to stop looking more evil to all as us than ever. CNN decided to drop the story they were almost holding right there, because it involved protecting our never talked about, good investigative working CIA officers (I was a little shocked also), justice and democracy for US people sold down the river, drats, actual work, where CNN rather just slaughter US innocent people and police officers instead of reporting on the bush crime waves, while selling cocaine to school kids, then call themselves heroes in my name after the carnage for blindly dropping bombs from the sky on everyone. Heroes? More like typical american nazi cowards, willing to murder their own families as themselves, than bravely put their lives on the line standing to protect Justice as freedom for everyone, as to what true bravery, and heroism has always been. While the world watched CNN broadcasting, American nazi soldiers celebrating joyously in contempt for God while singing, right after the unreported dropping of thousands of pounds of bombs on everyone in Afghanistan, body parts everywhere, while knowing directly as individuals, every single, there was no evidence offered that anyone there was responsible for any crimes whatsoever, including the Afghanistan women who worked for the newspaper, but for to be victims of fanatic nazi american barbarity, disguised as human, like bush almost gets away with as pure evil deceived, now completely impossible to believe. Oh, by the way, I am now taking new memberships for al-Qaida.

As I say, there isn't a real man in the American Marines, or the Army willing to protect America with their lives, for if there were, rumsfeld and bush would be rightly dead for the murders continuing against those they know as innocent. As even with their continuing threats against more innocent people as American lives they brag to throw away as just soldiers, as all these other nations they try to make ready to sacrifice millions for, while propagandizing that our Justice we need not believe in to grant us freedom from oppression, nor evidence no longer a requirement to convince us who is evil, and who is not lying. Nobody deserves to be murdered, but a murderer escaping to recommit.

Just prior to Sept 11th, bush ordered the Naval Strike Force in the Indian Ocean, a 24 hour strike force for DEFENSIVE purposes to be shut down. Mr. bush threatened to veto the Defence Appropriations Bill only after the Democrats tried to move 600 million out of 'Star Wars' and into anti-terror defence. The Star Wars program also includes in it's ranks, an extremely corrupt bunch of criminals, who bribed repuglicans to remove the American law against making false claims for governmental contracts, a seditious act as TREASON that was never reported by the Commi Nazi Network, who now defraud every American openly, escaping military tribunals because, American soldiers are clearly to everyone on the planet, left inept, and as pathetic cowards lacking leadership everywhere, stuck with evil American murdering rumsfeld as nazi kcuf, real leadership long gone years ago, when forced to shoot with dirty syringes as only the clinically deranged would order our soldiers need not to be thought human. So, as a consequence, most intelligence left disgraced without medals, that would have only accentuated their inhumanity as deranged lunatics. While now America's left with nazi soldiers who dance over the slaughtering of suffering third world civilians and police officers, who were in the process of making something better for their nation by following the guide of universal Justice, while evil rumsfeld the nazi fuck, offers a reward for murdering 'Omar the Just', because he asked for evidence that didn't exist. Why? Omar was standing up to protect the American flag by supporting the apprehension of those truly responsible for the WTC terrorist attacks against Justice as freedom America is quickly losing. As I say, there isn't a real man in the American Marines, or the Army willing to protect America with their lives, for if there were, rumsfeld and bush would be rightly dead for the murders continuing against

those they know as innocent. As even with their continuing threats against more innocent people as American lives they brag to throw away as just soldiers, as all these other nations they try to make ready to sacrifice millions for, while propagandizing that our Justice we need not believe in to grant us freedom from oppression, nor evidence no longer a requirement to convince us who is evil, and who is not lying. Nobody deserves to be murdered, but a murderer escaping to recommit. Mr. bush and rumsfeld must be immediately arrested to face a fair trial for their crimes in NYC, or suffer a death sentence carried out by every man smart enough to comprehend, that freedom for ourselves and family, mean Justice for all of humanity. Justice protects our democracies from those who wish to deprive ourselves the pursuit of happiness, and like nazi bush and rumsfeld, wish to steal our earnings and sacrifice our lives for their personal misgivings, and fear of this awesome universe. Creating only hardships and suffering as murders against everyone they abuse our God granted freedom, is truly evil and insane, as they are both without question, mankind's worst delinquents. Whew... On another note, as you can believe this to be also not reported, bush apposed all democratic, anti-Enron money laundering efforts by the Democrats as a traitor to every single American value.
(democrat.com) We true soldiers figure he burns the American flag when he thinks no one is looking. Mr. bush and rumsfeld need to be immediately brought out of the darkness to the witness of every American soldier, never heard till now as forgotten dead or otherwise, offered a fair trial, and then given life term prison sentences after a speedy conviction for the murder of all the lost American life continuing to fall unheard from, due to their terrorist acts involving us being censored, with me still here squawkin', just as before the man comes to take us away, haha, locked up to never as cared for, you people truly disappoint ourselves, leaving you to suffer this way for nothing. Why why why. All I ask you is to e-mail this to two people to help our planet survive okay? Then when I see ya, I'll give ya a star somewhere or something. Or don't, and get on your bad side, doing for nobody which would include yourself not heard from. I am not kidding here about this Revelations, Judgement Day, let's just try a little to help Johnny for Christ sake, somethings going to send him to the clink for being a super human being, and that doesn't seem right to anyone. Right? Buddies? Pals? Life long friends?
Thomas White - former vice chairman of Enron - Secretary

of the nazi american military, that refuses to believe in ourselves as a democracy demands a conduct of law to treat us human beings as kind, such as a governed nation of people should be considered innocent until proven otherwise. They placed in power illegally, heroin dealers and mass murderers of over 50,000 Afghans just a few years previous, who believe women should be slaves, while slaughtering just about the same to make Tommy look brave, killing us people as he actually told us he has no reason to give, or explain, who we must demand be closed down as arrested for actual war crime matters, for the sake of our innocent lives, and as nazis speaking as us illiterates apposing free speech, have made no commitment to peace in the region, but to place the burden and costs on every nation truly committed to ourselves as humans being. Look, Dutch shell and unocal's deal is a crime against Afghanistan, which offers nothing to the nation but bribes to officials who are almost all employees of unocal. What is coward drug pawn unocal employee, penned as Washington's own, Karazi's position on behalf of the crying children? For him to side with unocal, would mark himself traitor to every person concerned for the plight of people who live in Afghanistan, and he certainly wouldn't be a leader in anyone's summation with himself surrounded by drug dealers to feed our world's poverty stricken either, just as he walked in as to who he always has been. As well, we all know CNN will make no attempts to inform the public but to propagandize with lies, cheating the entire world so Ted can further cash in with our freedoms payed as collateral. Mr. bush, the biggest nazi of all humanity, spewing his hatred for our lives as his ignorant barbarity and contempt for Justice and freedom as the pathetic coward he truly is wasted and deplorable, was speaking recently, almost coherently, with the President from Peru after three private executive meetings, stated to our press, he wasn't so much interested in stopping the distribution of cocaine and heroin on the rise with his secret partners that most everyone of the literate world knows of in the back to the way it was Afghanistan and elsewheres, but the demand for it by the weak and dispossessed who quickly get hooked, then suffer hopefully for a lifetime he smirked, would be another way to steal our resources. Mr. bush is the evilest scumbag who has ever barely existed, a degenerate, a criminal, really really evil, and extremely unAmerican. Also, again, God damn you people, Mr. bush the terrorist, funds sharon to criminally steal our properties as a parasite, to ourselves as bleeding wounded host, purposefully murders

innocent families guilty of no crimes, and good police officers as wickedly evil against every God imaginable, while all CNNed Americans are expected to silently except our voices unheard, which encompasses close to 90% of newgroup mideast political traffic condemning the bastard, and more than 70% of the Israeli population 'officially' by the corporate standard present there agree he is a monster in this dying bushmob universe. Mr. sharon is NOT JEWISH and is not supported by any practicing Jews anywhere. G-D, he desecrated the THIRD Holiest of Holies, after slaughtering would be Jews of which the Israeli government commissioned him guilty for. But you know, he is constantly surrounded by nazi soldiers armed by the American tax payer, so he is difficult to detain, without attempting to blow people up in the market places he threatens, while continuing with repeatable murders that he holds no remorse for whatsoever. Ask the monster, he'll even tell you he is that evil. We'd call him officially the anti-Christ but bush won the toss up. MSNBC refuses to allow any of my clear to any arguments on private message boards they censor us for content, that way, Chris won't appear to directly ignore the simple thoughts against the murder of innocent lives that he advocates as not his own, and I think most people are starting to believe him as deliberately excommunicating himself as loser to our human cause. Plus, I have a limited ability to communicate as our weaknesses do sadly attest our general ignorance, for, the bushmob is now working to have my freedom stolen too, to incarcerate me for demanding Justice, while in silence, threatening every political leader by our corporate news departments refusal to protect myself as anyone. You could be me partner. Please help us in this regard, play a part in history, take some pity, I'm going to the funny farm as not understood by any they tell you to do nothing to protect our freedoms, destroying our eternal souls in acting so cowardly to even not stand for yourself as one to be worthy, left forgotten. Hello? Is anybody out there?
Lawrence Lindsay - Enron's advisory board - bush's regressive tax assault advisor against every principle the American flag once represented. The American economy is being looted. Trillions have gone away, while billions continue to be stolen. The criminals hiding inside the Pentagon can't account for more than 1.2 trillion dollars in American stolen revenues, while evil bush near doubled their takes believing obviously in no God, attempting to destroy nations in all honesty he hides through only corporate genocide, as our humans

lives are squandered without value as meaningless to the bottom line not existing. Depression will ensue if we are not allowed to understand this simple dying force being drained against our wills intentionally. Why will CNN continue to refuse interviewing me, us, them, anyone? Is it our wesly natenah-who dickhead smarmy, hitler warnt so evil like all those people out there are, four hour daily dose time again nurse? Do they by not doing so, support the oppression of ourselves not heard from? Help them hear me as public voice from the wilderness please for heaven's sake, have a heart for yourself man, bush is planning to destroy your world, of which he has no care for ourselves, because his deception as the anti-Christ now fools no one but himself as evil to all things imaginable.
No, really.
Marc Raciot - Enron's former chief lobbyist - Chairman of the crime ridden repuglican party, who has recently stated, he may continue to still lobby for bankrupt Enron as he leads repuglicans straight to victory. What a mastermind game player eh?
Printed below is a speech that Dennis Kucinich, United States Congressman from Cleveland, Ohio, gave recently while ignored completely by corporated american cult members, making him the first member of the United States Congress to openly repudiate President Bush's absent war rationale, and will be remembered in history forever.
Congressman Kucinich's,
A Prayer for America
Program note: (to be sung as an overture for America )
"My country 'tis of thee. Sweet land of liberty of thee I sing. From every mountain side, let freedom ring. Long may our land be bright. With freedom's holy light. Oh say does that star spangled banner yet wave. O'er the land of the free and the home of the brave?"
"America, America, God shed grace on thee. And crown thy good with brotherhood from sea to shining sea."
I offer these brief remarks today as a prayer for our country, with love of democracy, as a celebration of our country. With love for our country. With hope for our country. With a belief that the light of freedom cannot be extinguished as long as it is inside of us. With a belief that freedom rings resoundingly in a democracy each time we speak freely. With the understanding that freedom stirs the human heart and fear stills it. With the belief that a free people cannot walk in fear and faith at the same time.

I have the User manual and have looked at the parts list. Unfortunately
this part is on the underside of the circuit board. In fact it is the only
visible component when you remove the bottom cover. (Located in approx the
center of the board) Unfortunatley there are no Identifying marks on it or
on the board. That's why I was looking for the schematic and/or a pc board
overlay diagram.

Thanks again for your imput.

Cops' don't know the code.

It's set by the radio techs with a key loader.

also depends on the system and radio. If you aren't on the "good guy"
list, then your radio won't be recognized by the system and won't
receive decoded messages.

Oh, and not to mention that it's also a FEDERAL FELONY under ECPA.

> through a radio? (snip)

There are limits to free speech, Dave. In this case, the answer would be no if the comments were slanderous, defamatory, racist, or done in a threatening or harassing manner. Making unwelcomed comments about a person's appearence (especially when transmitted over the public airways) could be considered harassment, and I doubt the First Amendment would protect such actions.

> That depends. If the business was
> employing FCC part 15 radio gear,
> then they can expect no protection
> from interference. (snip)

That addresses normal interference, not the intentional act of malicious interference. Malicious interference is a violation of FCC rules. And, in case you're wondering, the First Amendment would not protect a person here either - the person would not be charged for what was said, but for doing so in a manner (using equipment, etc) which violates FCC rules.

This brings another issue into question. Some states have laws to protect the normal operations of a business - to prevent malicious interference with that. It is also possible these laws, if available, might come into play here.

Dwight Stewart (W5NET)

Aw, come on. Lighten up. This thread is about frequencies used by fast food establishments and "what if". Leave it to a couple of guys to take it to the next "what if" level, i.e. legal repercussions and ensuing arguments between egos.
Give it a rest, guys.

I've been reading this thread since the very beginning and issues of legality were raised very early in the discussion. And, as far as I can see, our discussion of the legal issues does not hinder your ability to discuss whatever you want about this situation. So I have to respond with a request for you to "lighten up" - you discuss what you want and we'll do the same.

Hi.
I have a Pro2006 with no data, have managed to get a copy of Cheek 3 The Ultimate Scanner book from US.
Does anyone know where I can get more info e.g.
A Pro2006 manual in PDF (Tandy uk are unable to help).
Software and manual for the CE-232 (our friend Google and his mates give up; very little info on the subject and as of today I have not been able to get a good link to the Author or Commtronics).
Maybe a CE-232 or OPT somewhere in the UK (shrops) even.
Any help appreciated.
Thanks.

John,

Unfortunately Bill Cheek passed away a couple years ago, and Commtronics went with him. Do you have the CE-232 and need more info or are you looking to buy one? I have a spare built and tested external unit which uses a DB25 for connection to the Pro2006 and a DB9 for the serial connection.

To be quite honest though unless you need to be able to program the actual channels in the 2006 the Optoelectronics interfaces offer more features and capabilities.

Larry

Not in PDF but the "manual" is available at:

http://support.tandy.com/support_electronics/8246.htm

>Software and manual for the CE-232 (our friend Google and his mates give up;
>very little info on the subject and as of today I have not been able to get

As Larry says Bill Check passed away a few years ago and his web sites
that detailed the CE-232 are now no longer available.

http://www.comtronics.net

>Maybe a CE-232 or OPT somewhere in the UK (shrops) even.
>Any help appreciated.

Your best (only ?) chance of the CE-232 is taking an offer up from
somebody like Larry and I'd be surprised if you find any Optoboards (OS-
456 or OS-535) in the UK - the "full" OS-456 hasn't been available for
some time but the Lite version still appears to be, as for software to
use with it Probe seems to get the thumbs up.

http://www.optoelectronics.com/os456lite.htm

## 491. Re: RF-Hacker fun with the drive-thru window

Newsgroup: rec.radio.scanner
Date: 2004-01-16 20:09:27 UTC
From: Eddie Haskel <wiseguy@clever.com>
Message-ID: <XxXNb.1768$IN5.581@newssvr29.news.prodigy.com>
Source record: 23030
Cross-posted to: alt.fan.art-bell,rec.radio.amateur.misc,rec.radio.scanner,rec.radio.shortwave

For what it's worth, intercepting the radio at drive thru eateries is NOT new. I remember it going on over 7 years ago. For the most part it's a frickin riot! Carl's Jr. implimented a company directive to dispatch ALL non-essential employees to the parking lot ASAP when an "attack" occured. They were directed to look for vehicles with *BIG ANTENNAS* on them and demand ID from the occupants. Now from what *I* remember...1/4 wave antennas on 467Mhz are 5.75" and 154.570 are about 18"...HARDLY big antennas. The *LAST* thing I'm going to do is co-operate with some goomber's request to ID myself at a fast-food place, more likely to shoot him.
When the RF pranksters hit, the back door looked more like someone had called the I.N.S. hahahaha.
For all the times I ordered a burger with no sauce and got extra sauce, for the times I ordered chicken McNuggets and got some other crap
this is VERY funny revenge.
Try listening to these dumb-shits on thier "talk-around" channel..this is where they chat among themselves and NOT the window. Comments like " check out that piece of shit he is driving" or "that woman is a real beefarillo".It's like a teen-age partyline. The fools don't realize that people DO listen to their channel, mostly in disbelief. The management could listen and see whats going on, if they do it's apparant that they don't really care.
Places that run a "tight ship" really show, no screwing around, orders get filled fast and RIGHT. The ones that are run by "Bozos" will be treated like "Bozos". If they are clowning around, why not the pranksters?
Some tips to getting away with RF pranking......
HIDE THE TRANSCEIVER...put it in a bag or jacket pocket.
USE A REMOTE MIKE...keep mike in the palm of your hand out of sight.
SIT IN NEIGHBORING BIZ....they won't go into another place to look for you in there.
USE HEADPHONES IF OUTDOORS....make it look like your listening to a walkman.
RUN MAX POWER...high power(5-25 watts) causes the signal to bounce off all kinds of shit. Damn near impossible to get a direction unless the hunter has a damn good attenuator and a shielded RCVR. they will be chasing their tail.
TELL THEM WHY THEY ARE GETTING TRASHED...this is important, tell them your tired of getting shit and not your order, or it's cold when you get it, or the place is a pig-stye. People just don't "attack" because of no reason, your doing them because you dont like the place for one reason or another. The owner might take notice and correct the wrong-doings!! Would'nt you if it was your KFC or Taco-Bell?

A Radio Shack manager told me that the Radio Shack digital scanner, $499.99,
will decode any encrypted transmission. I asked what it had that others
didn't and he said "just the way their made".???

>Steve
I use a common hybrid splitter without a preamp with no problem. The
hybrid provides some isolation between the receivers which a Tee
connector will not. Unless you are trying to receive really weak
signals you shouldn't have a problem.

>Thanks for any info.

They may not alert for all warnings and watches. Some areas only alert
for tornadoes and severe thunderstorms figuring that people don't want
to be awakened in the middle of the night because they are going to
be snowed in. Call or e-mail your local NWS office and ask.

Charles Duncan <100glebog8990af@corp.supernews.com>...

^ A Radio Shack manager told me that the Radio Shack digital
^ scanner, $499.99, will decode any encrypted transmission.

You've been misinformed. A digital receiver will convert (decode) a digital signal to expose the content, often analog audio. But if the content, perhaps analog audio, has been encrypted, then you're left something useless to you.

This message will be encoded by my newsreader and encoded further by the sockets interface, then it will be decoded by any computer receiving it. If I were to encrypt this message before sending it, perhaps with PGP, it would still be twice encoded and decoded and you would be left with an encrypted message that is useless to you.

The receiver you refer to cannot decode all types of digital information and it cannot decrypt anything.

Frank

I always report a crime, or a person instigating commission of a crime.
It is my duty as a member of the militia, and as a citizen of the US.

Your response is typical of what I would expect from the inmates of a
prison.

I'm sure you can explain it to a Judge!

I made no threat, and did not try to frighten.
Always remember an individual is allways responsible for the effects of what
they say in public.
Your continued responses will also be forwarded to the FBI, showing a total
lack of concern for the law!

Have a nice day!
Cheers!

I'm having a nice day there Roger...let me guess...you have a subscriptionn to Soldier of Fortune, you have a 10 foot high fence (with razorwire)around your property, president of your neighborhood watch. Member of "the militia" righty-oh! Your nothing more than an OLD retired jerk that has nothing to do but read stuff off of usenet and comment on it (NEVER in a favorable way either). Your the neighborhood "Naysayer" and think your an expert on everything.
Bet you call FOX broadcasting after every sitcom and bitch about that too right "Roger"?? Make sure you call the FBI and report every time someone posts a frequency in the shortwave group.PPSSttt....DONT LISTEN TO 12.182 Mhz.....you might hear our military talking with airforce one....uh-oh! Roger is surely going to forward this one to the FBI, FCC, FAA, DOJ, NSA, DEA, CIA and the AAA (Autoclub). Don't forget to forward a copy to the White House Communications staff too.
Your nothing but a retired blowhard Roger. I'm sure the FBI and your local law enforcement agency is WAY tired of hearing from you. Next your going to call stuff in under the "Patriot" act and really waste their time you nutcase. It's people like you that waste GOV'T time on garbage because they have to listen to your whining until they brand you a "Loser". Forward your messages, spy on your neighbors, monitor the local CB'ers and make sure you listen to those commie HAM radio operators too! If you hear anyone fire up on 6.955Mhz make sure you call up the closest FCC Field and bitch them out about that too. The pirates on 6.955Mhz might be SPY STATIONS. It's YOUR duty there Roger, considering your a old retired vegtable, you have time to do this kind of mindless crap.Heres a laundry list for you to keep busy...
Call the police on EVERY car with expired tags
Call Parking enforcement on every car thats parked wrong
Patrol the handicapped spots for poachers
File complaints on every car thats exceeding the speed limit
Report to the FBI and FCC every suspicious antenna you spot in town
Report every sale you read on EBay and turn this info over to the IRS
Get a life there Roger....you clueless shitbag. If I want your input I will shake your wheelchair and ask you for it. If you think it's your duty to report what *I* write in a usenet group DO IT! But to throw it in my face has only ONE purpose..your trying to piss me off.
Actually Roger...I feel sorry for you..your old, the useful part of your life has passed, your lonely, and you have nothing to contribute to society. All you have to look forward to is eating babyfood and crapping in your depends...just go away...Eddie

Hit a nerve? yeah...I'm sick and tired of you old duffers that brag about what they did 50 years ago.If your looking for praise, keep looking. You went out with cloth covered wires and downdraft carburators. I don't have a damn thing to hide, including your stupid bragging, and what your going to send to the FBI.
Roger..your a has been, old news, tolerated because we have to (to some extent).You have nothing *GOOD* to share, no information to exchange except your poor demo of dominance.I don't want to hear from an old duffer like you. Times have changed, step into the 21st century. Your still driving a '53 bel-air and watching a Muntz TV. Your nothing more than a pimple on ones ass there Roger, squeeze your head and your gone.
No go watch the neighbors Mr. militia man, call the FBI daily and live in the past. Oh yeah....I hear Walgreens has "Depends" on sale and that they are the supersize...hold over 2 pounds of crap! sounds like it fits the bill for you since you try to sling it (like monkeys do)...sleep well there Roger, sleep long..sleep all day you old buzzard....Eddie

Damn son I'm impressed! Managed to reply to a reply to a troll and didn't
even include the word radio or scanner or shortwave.

Not to mention quoting everything and top posting. Oops guess I did.

SFB

FWIW - the majority of US states have no laws regarding the use of radio
equipment in a mobile.

Yep, he is a confirmed WANKER then. Still, I guess that you cannot expect the useless brain deads that work in shops like that to know much. It will allow you to monitor some of the digital signals (but definitely NOT all of them), however it will not and cannot decode encrypted communications. The wanker seems to be severely confused between digital signals, and encryption.
Still, what else can you expect I guess - not much chance of trying to explain the difference to the brain dead, so I guess that you didn't bother (these days I wouldn't - I have given up)

Matt

I made no threat, and did not try to frighten.
Always remember an individual is allways responsible for the effects of what
they say in public.
Your continued responses will also be forwarded to the FBI, showing a total
lack of concern for the law!

Have a nice day!
Cheers!

Yeah...like the FBI cares what you have to say. You're just another crank,
nothing more, nothing less.

news:XxXNb.1768$IN5.581@newssvr29.news.prodigy.com...
For what it's worth, intercepting the radio at drive thru eateries is NOT new. I remember it going on over 7 years ago. For the most part it's a frickin riot! Carl's Jr. implimented a company directive to dispatch ALL non-essential employees to the parking lot ASAP when an "attack" occured. They were directed to look for vehicles with *BIG ANTENNAS* on them and demand ID from the occupants. Now from what *I* remember...1/4 wave antennas on 467Mhz are 5.75" and 154.570 are about 18"...HARDLY big antennas. The *LAST* thing I'm going to do is co-operate with some goomber's request to ID myself at a fast-food place, more likely to shoot him.
When the RF pranksters hit, the back door looked more like someone had called the I.N.S. hahahaha.
For all the times I ordered a burger with no sauce and got extra sauce, for the times I ordered chicken McNuggets and got some other crap
this is VERY funny revenge.
Try listening to these dumb-shits on thier "talk-around" channel..this is where they chat among themselves and NOT the window. Comments like " check out that piece of shit he is driving" or "that woman is a real beefarillo".It's like a teen-age partyline. The fools don't realize that people DO listen to their channel, mostly in disbelief. The management could listen and see whats going on, if they do it's apparant that they don't really care.
Places that run a "tight ship" really show, no screwing around, orders get filled fast and RIGHT. The ones that are run by "Bozos" will be treated like "Bozos". If they are clowning around, why not the pranksters?
Some tips to getting away with RF pranking......
HIDE THE TRANSCEIVER...put it in a bag or jacket pocket.
USE A REMOTE MIKE...keep mike in the palm of your hand out of sight.
SIT IN NEIGHBORING BIZ....they won't go into another place to look for you in there.
USE HEADPHONES IF OUTDOORS....make it look like your listening to a walkman.

RUN MAX POWER...high power(5-25 watts) causes the signal to bounce off all kinds of shit. Damn near impossible to get a direction unless the hunter has a damn good attenuator and a shielded RCVR. they will be chasing their tail.
TELL THEM WHY THEY ARE GETTING TRASHED...this is important, tell them your tired of getting shit and not your order, or it's cold when you get it, or the place is a pig-stye. People just don't "attack" because of no reason, your doing them because you dont like the place for one reason or another. The owner might take notice and correct the wrong-doings!! Would'nt you if it was your KFC or Taco-Bell?

You are right. This is nothing new but it is still fun.
For a twist on this, I once discovered that the local Baptist Church had purchased several VHF HT's that worked on 154.570 and had no PLs. They would station two volunteers in the parking lot during services to act as security guards and the Pastor had another rig to keep in touch with the outside men. Now, just for conversation sake, what if a certain somebody played an adult-type .wav file over the frequency? The Pastor scrambled for his radio to shut it off and for a while actually thought one of his own men was playing the sounds. They stopped using the radios shortly after.
And then there are those popular baby monitors that new parents like to place in the kids' room. They don't realize that these low power units transmit 24/7 and further, mom and dad don't realize that their love making can also be transmitted. All it takes is for one enterprising person to pick up the mic on a modified radio and say, "Hey, Dad! Stop hurting my mom!" Poor dad can quickly lose his erection and the rest of the night is shot.
There are many other possibilities and your imagination is the limit.
You don't spose the FBI will be interested in someone who transmits on baby monitor frequencies, do you? Roger says they are....and Roger is gonna forward these posts to Elliot Ness.
I will now live in fear of wannabe cop Roger for the rest of my days.

Sorry but the electrical characteristics as well as the charging time
necessary for optimal re-incarnation of the power source shall remain a topic
on this newsfroup.

However, how can we apologize to the band when they've taken about fifteen
darksuckers out into the parking lot and are counteracting those who do not
have their automotive darksuckers turned to "penetrate"?

I ask you.

So - as darksuckers have not - yet - become common in every household and
business, it should have been well-established that - using a good pest
killer - that one will not point a darksucker in the face or any 2-3 pound
cockroach.

Gray Shockley

Source record: 22973

I used the Radio Shack Deluxe Scanner Antenna, SKU 20-034 on the PRO-90 and it improved 800 Mhz trunking over the stock antenna. It's great for all band work.

I replaced this antenna with Radio Shack's 800 MHz Scanner Antenna SKU 20-283 and got great results with the PRO-90 trunking tracking 800 MHz systems and have another one of these for the BC 250D/BCi25.
Again it works very well giving several more miles of range when listening mobile!
However it cuts off the conventional VHF band reception a bit, compared to the Uniden stock antenna, that came with the BC 250D.

If your concerned with both conventional VHF/UHF and 800-900 Mhz trunking then the
Deluxe Scanner Antenna SKU 20-034, is a better choice!
What kinds of problems are you having now?

You might want to try Ken's Electronics at <http://www.kenselectronics.com>.
Ken stocks a lot of parts (crystals, lights, LED's, etc.) for the older
scanners and CB's, and he may just have what you need.

73,
David

Received confirmation of the FBI receiving the message, and a nice letter
congratulating my alertness!

Have a nice Day!

Don't propose breaking any laws though, someone might be watching!

There are dozens of people who monitor the Internet for anything looking like a threat. I just was willing to inform someone it is not wise. But I also did my duty to provide the FBI with some intelligence.
If you do not propose a crime, or support the commission of a crime, there is nothing to worry about. You are unlikely to show up in a pattern match search for more attention.

If I'm a crank, so be it!
But I'm in good company!
Always looking for potential problems is the price of being civilized!

Sleep well, your being watched over!

PS: Yea - I get it. But I'm being polite!

## 539. BC296D Tune Mode?

Newsgroup: rec.radio.scanner

Well, I've read the whole manual and I still don't see how to do this simple thing. How can you tune to a specific frequency without programming it into a channel. Then I'd like to step/search up and down from there. On the Pro96 there's a "tune" button that does this but how do you do it on the BC296D?

## 540. Re: RF-Hacker fun with the drive-thru window

Yeah..right there Roger..your quite the fucking "Gumshoe". Well listen up there "Block-captain" you provided (supposedly) the FBI with ZERO intelligence...you overaged, failing bladder, shit in your pants old fart. Go try to impress the 13 year olds on AOL. Maybe there you can be a "COP". Your getting stale, your bag is leaking down your leg. Your not in ANY kind of Militia, your not anything but a tired old man with nothing better to do that hide behind your keyboard and try to impress us with your goody-two-shoes acts of internet policing.
You might frighten the kids, or MAYBE even the people on WEB-TV. I *KNOW* your nothing more than a loser, probably living in a retirement home or trailer. The only "GT" you are familiar with is the one on the back of your electric wheelchair.
Remember to at least put your teeth in before calling the FBI and whining. It makes to poor employee that has to actually listen to you spent a little less time with you. The funny part is this, when you bitch to the GOV'T *YOUR* the one that gets checked out first! I'm sure your labeled as a crank in their files by now.
At your age there Roger (see fossil) you should really concern yourself with enjoying what little time you have left on this fine earth, and focus on that instead. Your 65 years (very) old.You have maybe 5-7 years of productive life left. Try searching the internet for fun/exciting things to occupy your time and leave the "police" detail to the able ones.
I'm amused at just how stupid you can be.Your not intelligent in the least, I'm certain you live alone because no woman in her right mind with put up with a worthless shit like you. Your still living in the past (ex military druid I'm sure) and thats all you got.
You bring up the "Militia" like thats impressive? Thats nothing more than a $75 a week job. go away...i'm busy looking for this summers vacation on the other machine...either the Carribean or Hawaii again...Aruba might be a nice change.
Make sure you have the FBI contact me before I leave for 2 weeks. That way me and the wife can laugh about you on the way there....Eddie.

While looking impressive, the actual gain over a dipole is 3.7dBd and the fact it is an indoor antenna makes it limited. Signals from different directions will require reorientation of the antenna.

Given you wanted the best indoor solution for a specific direction it might be worthwhile.

Source record: 22991

I originally purchased it, to improve my ability to monitor activity at the Selfridge ANG Base, near my home. It performed very well, and I was very satisfied with it. However, being directional, I found it to attenuate signals off the back, which is to be expected, and can even be desireable in some circumstances, but it limited my ability to monitor some other favorites. My goal now is to go with an outside antenna, and a rotor.

This will get you at least half way there:

1. From normal SCAN mode, momentarily press HOLD/MAN.
2. Then press and hold the HOLD/MAN button until the readout toggles to ROTARY:FREQUENCY.
3. Then type in the freq you want to tune to WITHOUT hitting E/enter (i.e. 4,5,3 for 453 mhz)
4. Then push the rotary up or down and you're there.

Don't know how to scan/search from that point though - perhaps someone else can add to tihis?

I was having problems with the keypad on several older programmable scanners (Pro 43 & 26) and found this great fix called Lub-a-Spray made by Panef for $1.75 at the local hardware store. All I did was remove the case, remove the rubber keypad, lay it on a paper plate with the underside face up and squirt this dry graphite lube into all the open spots with the applicator, shake the loose material off, place back in the scanner and it works like new. Be very careful with this stuff, as it's quite messy, but it works great.

# 558. Getting into the scanner hobby again.... thinking about the Icom IC-R3...opinions?

Newsgroup: rec.radio.scanner
Date: 2004-01-18 10:30:10 UTC
From: nctrnlboy@yahoo.com
Message-ID: <11d9990e.0401180230.62164d96@posting.google.com>
Source record: 22898

I believe this is my first post on this newsgroup. I was into the scanning hobby a number of years ago...not heavily though. I had a uniden bct7 mobile scanner & the uniden sportcat 150 (was one that had the defect that allowed cellular phones to be heard on the "800" band). I still have my sportcat, but want to get something a bit more serious (more freq. bands, channels, capabilities etc. etc.).
When the Icom IC-R3 first came out it was about 500-600 bucks (if i remember right).... i liked it a lot but didnt want to shell out that kind of cash for a scanner. About that time I also kinda lost interest in the hobby.
I was sufing around on the net the other day & ran across the IC-R3 again at an electronics website & saw that it had dropped in price to about $319. THIS new price & the coincidence that my employer just bought a cheap X10 wireless security camera & had secreted it somewhere at work (noone knows where) made me want to buy one (for those that might not know...the IC-R3 can pick up wireless camera & Television signals).

Anyway I just wanted to hear opinions from people who own or have used this scanner.
I still dont plan on being a serious scanning enthusiest (cant afford it..lol).

## 559. BC 235XLT

Newsgroup: rec.radio.scanner
Date: 2004-01-18 12:20:52 UTC
From: Fuzzy Buzzard <me@att.net>
Message-ID: <ESuOb.29377$VS4.907793@bgtnsc04-news.ops.worldnet.att.net>
Source record: 22899

I have a BC 235XLT and was using in in the mobile with an external antenna.
Well the mag mount was moved too close to the 2 meter antenna and my 75 watt
mobile knocked out the front end on the 235. Is there anyone out there that
has one for parts or know where I can send this to be fixed? Its rather old
so is not worth a lot so repair of $75.00 or more is out of the question.
Tnx
Dave

Pappy127@usa.net wrote:

> "God Bless America" for the freedoms we still have.

I don't know whether I'll take your way or the spanish way. Spanish federal antenna laws have gone a long way for the last 15 years.

Allow me to outline the basic principles:

1. Acess to all information services is free. A community, landlord, HOA or other entity may not oppose to the installation of technical infrastucture in the "part of the building for exclusive use of the interested party" or on the "common surfaces of the building shared by all the users of the property" required to access a particular information service. The interested party shall cover the costs of installation and of restoring the common areas to their initial condition upon termination of usage of the system.

2. If more than one party is interested in the use of a particular service, they must used shared portions of the same infrastructure and share the cost. i.e. 5 tenants want Satellite service "A", so they have to use the same dish. I want to get only FTA channels, with a rotator, so I get to put up my own dish, using the other tenant's pole and tubes for the installation, and I heve to reimburse them proportionally for that.

3. SWL and Scanning ist, strangely enough, seen as "access to pubically available information services". When I put up my first discone on the roof, the chairman of the owner's board came out, wanting to tell me "You can't, it's gonna cause TVI". I told him that it was only for receiving. He asked "What sort of stuff" - I answer "Radio stations fotm around the world". "Well", he says "I'll need to look if thats allowed" - "You needn't" I say "I already informed myself" and hand him a printout of the legal text.

4. Hams are different, but also enjoy more privileges. A ham only gets the letters for the STATION in Spain, not for the license. So he must apply for them providing a file with all the elements of his station, including the radiating ones. Antennas must include calculations about wind and snow load, guying, etc. Once the application is made, the spokesman of the homeowners association gets a letter from the telecomm authority, and has 15 days to oppose. "We don't wand that kind of stuff" or "All he other tenants have oppsed" are not valid reasons.

Oh, and BTW, CBers must also be individually registered with the provice telecomm authority, and get a callsign ECB(Province number)(Three-letter-suffix) and provide initial proof that they acquired their equipment legally and *with* valid and current type approval. They also heve to emit their callsign "when beginning and before endig communication" and "at 5 minutes interval in longer communications". We have amzingly little complaints about RFI and similar issues here...

Yes, it's bureaucratic, but what the hell....

Thank you !! I think this may be exactly what I'm searching for (a
local place that sells scanners that is Not radio shack! :)

I'll probably give them a try later this week, once I decide on what I
need/want.

I just need to figure out What it is that I need ....

I know I'm set on purchasing a desktop scanner with the display on the
screen ... but not sure of a model # or brand that would be best for
my area.

Thanks again for everyone's help/responses!!

## 564. Selfridge ANG base stopped using VHF?

Newsgroup: rec.radio.scanner
Date: 2004-01-18 15:31:57 UTC
From: Bill Crocker <wcrocker007@comcast.net>
Message-ID: <BqSdnXrVsoHEO5fd4p2dnA@comcast.com>
Source record: 22904

Has Selfridge ANG base stopped using VHF? Scanning the known VHF/UHF frequencies for Selfridge, here in Michigan, I have found the VHF spectrum to be almost dead. Some of the frequencies that fall in the civilian/commercial aircraft bands are still active, but it seems most of what I hear is taking place in the UHF frequencies.

Anyone?

Thanks,
Bill Crocker
Macomb, MI.

# 567. Are there any REALLY good cordless phones out there?

Newsgroup: rec.radio.scanner
Date: 2004-01-18 15:58:13 UTC
From: fj40dana@hotmail.com
Message-ID: <9a118507.0401180758.240d768d@posting.google.com>
Source record: 22907

I've owned many cordless phones over the years, including some of the newest 5.8 ghz and 2.4 ghz phones. Obviously, some work better then others. However, I've noticed a failing among ALL of them, maybe others have noticed the same.

When you are more than just a short distance from the base unit, these phones all work fine as long as you are not moving, i.e. standing still. If you start to move, the signal will begin to break up. I have a retail location that necessitates being about 150 to 200 feet from the base unit, and all of the newer phones that I've tried do this. They are unusable in my situation, because I have to move around while talking.

I have an older Uniden exs9110 that I bought maybe 4-5 years ago, it's a 900mhz phone with DSS, it doesn't have this problem. It's the best phone I've ever had, it has a very long range, I can walk a block away, moving, and it keeps the signal very strong.

None of the phones I've tried in the last year (and I've tried many) will do this, not even the 900 mhz units I've seen.
The ones that come the closest are the Panasonic units with dual base antennas, but they are still way behind performance to the old Uniden.

I have had other phones in the past besides the Uniden, they were all 900mhz units, DSS, and they ALL did better than ANY of the newer units.

If anyone knows of a current-production unit that will perform as well as my old Uniden, I'd really appreciate knowing what it is.

Please send me mail to: fj40dana@hotmail.com

thanks

Dana

That has changed drastically since 9/11! They built all new runways,
refurbished buildings, and facilities. Selfridge has become very active!
There are planes, fighter jets, and helicopters flying in, and out of there
24/7. Numerous troups have been flown out of Selfridge, with IRAQ as their
final destination. They also send tons of supplies out of Selfridge.

Would 8 bucks kill them, after all you have to take it apart to get to the pad anyway. Why not fix it right? I don't think anything like graphite is a smart long run solution. But what do I know, I actually replace the keypad...

Should have specified... Free (as in free speech, not as in free lunch)
not necessarily means free of charge or other contractual terms, but
"must be acessible to anyone wanting to access it and pay the associated
charges and obey the contractual terms that go with it. Alas, I still
can't subscribe to a digital Satellite Pay-TV package sold and marketed
to germany in Spain, because the service provider does not hold a
license for selling in Spain, but I can access the 70-something
Free-to-air Sat cgannels in german, and put up a dish for it, and nobody
can legelly prevent me from doing so.

# 575. Re: Getting into the scanner hobby again.... thinking about the Icom IC-R3...opinions?

Newsgroup: rec.radio.scanner
Date: 2004-01-18 18:41:48 UTC
From: Eddie Haskel <wiseguy@clever.com>
Message-ID: <MrAOb.12829$r26.4028@newssvr27.news.prodigy.com>
Source record: 22915

It's a battery eating piece of crap! I have one at work, the power supply that came with the unit cant even run it on AC power! With the monitor on it draws in excess of 500Ma!
The receiver is full of images and birdies.Changing frequencies is a real pain in the ass the way it's set up with no keyboard.The LCD display is tiny, the TFT screen washes out in sunlight.Volume and squelch controls are button type..no rotary control for that. Audio is "OK".I have a Yaesu VR-120 and Alinco DJ-X10 that outperform it hands down. Save yourself the hassle, buy a REAL RCVR and a Casio pocket TV and you will have the best of both worlds.Be advised that the R-3 DOES NOT cover the entire 2.4Ghz TV/Video band! Read the published specs and you will see that it misses a lot. If the video is above 2.450Ghz the R-3 wont see it.
On a scale of 1 to 10 (10 best) I would give it a 4 at best.....Eddie

Panasonic makes a phone called the Gigarange series. These are about
the best I have seen in consumer cordless phones. There are also
industrial cordless phones that work with a system. These are the
ones that you see in hospitals, and large department stors for the
employees to use while they are working.

The industrial phone systems are very expensive, but very effictive in
their performance. Consult your local phone company about industrial
cordless phone systems, or a phone installation company.

As for the life of these phones, they all fail easily when dropped.
Many of the users drop them often, thus causing damage. With a lot of
use, the keypad may also wear out. The higher end phones are
servicable by the manufacture, but they will charge for this.

If you are a single user in a small business, you may find it cheaper
over the long run to use only a cell phone for your business. This
way, if you are in a good cell phone reception area, you will not have
this problem.

If you look at the cost of a very good industrial phone set, verses a
discent cell phone plan including the cell phone, the cell phone plan
may work out cheaper for you in the long run, and be more versitile.
Also, in most places the cell phone would be a good tax write-off as a
business expense, thus having a more reduced cost.

If you have a cell phone already, then simply put a call forwarding
service on your land business line. Then have all the business calls
forwarded to the cell phone.

# 584. Ambient Orb Frequencies / Network / Technology? Can it be "hacked"?

Newsgroup: rec.radio.scanner
Date: 2004-01-18 23:50:11 UTC
From: johnfofawn@hotmail.com
Message-ID: <d89364bd.0401181550.693d3c1d@posting.google.com>
Source record: 22924
Cross-posted to: alt.radio.scanner,rec.radio.scanner,comp.dsp

Brookstone sells this "Ambient Orb Stock Market Monitor" which gets market data via some sort of wireless network and the glows different colors based on the status of the market(s). It's $150.

So I think this is really cool and the EE in me wants to know what frequencies this thing uses. Does anyone know?

I'm wondering if I could use a simple receiver (like an old Radio Shack scanner) to demodulate and decode the data sent in these networks? Then, I could build my own Ambient Orb out of an old laptop. I don't want to do this to save $150 (it would cost much more than that in my time alone). I want to do it because I think it would be cool and I wonder what other information is out there and easily accessible.

Does anyone know anything about the Ambient Information Network? Is it something simple like the pager network, or is it more complex like the GPRS network? If it's simple, I think there's hope I could demodulate it on a general purpose PC.

Thoughts? Advice?

What about Microsoft's SPOT technology. Anyone know what frequencies/network it uses?

Thanks!
John

Cross-posted to: alt.radio.scanner,alt.radio.scanner.uk,rec.radio.scanner

I've always been a keen aircraft enthusiast, but have only just got my first scanner (PSR282 from Maplin) for Xmas, having had my interest re-awakened by watching the final Concorde museum flights.

In the first week or two I've picked up various overhead airband transmissions from home in southern England, but had begun to question if it was going to fulfill my expectations. That was until yesterday when I spent a *great* few hours listening to and watching arrivals and departures at Heathrow, from what appeared to be common vantage points with others.

I could work out the general order of frequencies that arriving and departing planes used, and have a database found on the web of country-wide frequencies, but would appreciate some thoughts/help on a few aspects....

1) is there anyway that you can "link" the call-signs that planes have, with other details about them - eg. registration; destinations etc? Thus "Speedbird 16" or "Shamrock 21" were a little meaningless to me, except clearly describing the carrier. Are these flight numbers as per timetables - i.e. BA016 etc?

2) is there a list somewhere of the call-signs for each carrier, as some seemed a bit obscure, as did the markings on some less common airlines from abroad.

3) can anyone recommend a good book to read as a starter? Not necessarily for frequencies, but more in explanation of navigation, air traffic control handling; where named beacons are geographically etc? i.e. anything to help me understand a little more about it all.

4) the Heathrow Visitor Centre advised me that the old Observation deck at Queens Building is now closed. That's sad. I can imagine this for security reasons, though don't quite understand what the issue with security could be there that wouldn't be far worse elsewhere? Is there anywhere else apart from the HVC or the runway ends/sides that makes a good vantage point at Heathrow? Or in fact, where is the best airport in the "South" for GOOD viewing of fairly frequent takeoffs/landings?

cheers
Neil.

## 592. Lets Talk Batteries and Grounds

Newsgroup: rec.radio.scanner
Date: 2004-01-19 03:34:02 UTC
From: Burr <pitzpho@earthlink.net>
Message-ID: <KeIOb.18786$zj7.11203@newsread1.news.pas.earthlink.net>
Source record: 22932

This is the way I do it and I like it.

I run all my short-wave and scanners of 12v car batteries:
I have a cheap 12v battery charger from PIP Boys ($29) to recharge the batteries after I turn off the radios. I DO NOT charge them while I am using the radios because I want to keep the AC hum away from my radios. I use wet batteries with caps so I can add water as needed, I set them on a piece of wood for the garage battery and have a plastic box for the house battery. If your wife doesn't like the battery in the house run the wife off.

Grounding antennas and mast:
I use a telephone grounding block on the antenna leads at the first place it touches the house grounded to a ground rod, all of this is at the bass of the mast. I put the bottom of the mast about 6 inches in the ground beside the ground rod. Because I live in the dessert I have 24 rose bushes on a drip watering system so I just added a drip at the ground rod and it and the mast get 20 minutes of drips twice a day. I also ground the sheath on the coax cable I use to feed into the house and garage and keep ALL THE ABOVE AWAY FROM ANY AC WIRES OR LIGHTS.

Use the grounds, no playing or you will burn your house down at sometime. NOTHING WILL STOP A DIRECT LIGHTNING STRIKE BUT THE STATIC FROM A CLOSE (one mile ) WILL BURN UP YOU RADIOS.
Be sure to get lots of "carbons" when you get the grounding blocks (Graybar has them) and replace them after a lighting storm.

My time on the soap box about grounding this year. I'm going to the gym, Cya

Burr

You will find that these radio-links to the ordering menu microphone back to the food establishment are NOT part 15 but do have low power business licenses issued for exclusive allocations. Obviously, you haven't bothered to take the time to even research the truth of the situation.

Most of the VHF Air Force stuff has gone bye bye.

Look for 400 or 800 mhz trunking to be the replacement.

You will find that these radio-links to the ordering menu microphone back to
the
food establishment are NOT part 15 but do have low power business licenses
issued for exclusive allocations. Obviously, you haven't bothered to take
the
time to even research the truth of the situation.

> >court issued restraining order prohibiting them from operating a radio

Don't guess. LEARN the facts first.

Aw..so what? Who will be able to find a prankster who uses his HT to mess
with the drive-up windows? Better yet, who will be able to find a pankster
who uses a mobile rig to mess with these same windows from a half mile
distant?
This thread is a light-hearted treatment on the somewhat juvenile joys of
"playing" with fast food joints. Get over it. Have you ever gone to a fast
food eatery and had the mouth-breathing kids screw up your order? Ever sat
and waited while they tried to make change while counting on their fingers?
Have you ever gone to Ronald's House and ordered Hotcakes and milk and when
you drive away...find that you did not get half of your order? Ever have to

turn around, wait in line again and try to tell the mouth-breathers that they screwed up your order? Worse yet, ever go back inside and try to explain to the dimwitted manager that they screwed up your order while everbody else stands in line behind you and becomes impatient while the manager tries to get things right?
I find it rather fun to occasionally mess with these goofs. Random? NO. Malicious, yes.
A crime? NO! Ordering a Taco at a Burger King window be it via the radio or otherwise is a prank. Making threats is a crime.
If one were to, as you say, "jam" the system so as to cause them to lose orders, that might be a misdemeanor at best. That is not the jist of this thread and nobody has expounded on "jamming" their systems.
Again, lighten up old man. Life is too short for you to get your BVD's twisted into a knot for no reason. Smile a little bit, you will find it is painless and good for the soul.

## 601. How did you celebrate MLK Day today?

There's been cultural diversity here in Canada since about 1970 as we are a
multicultural society.

With much respect to Dr. King and his legacy, what does this have to do with
radio?

^ > What did you do to celebrate Dr. King's legacy and embrace cultural
^ > diversity on the Dr. King holiday?

^ With much respect to Dr. King and his legacy, what does this have
^ to do with radio?

Absolutely nothing. It's sole purpose is to stir up off-topic controversy.
And it will. The key phrase is "cultural diversity", which some people think
there is too much of and others who think there is not enough of.

Some people will react because they're too naive to recognize that they're
being manipulated into a reaction and others will react because to them it is
a game they enjoy; stirring up anger.

Frank

> Two books I can personally recomend , having bought them my self .

Flight Routings by T T and S J Williams
comes out every year gives you the airline flights within the
U.K , so if you say hear speedbird 16 calling London
Air Traffic then you will know its the a Sydney Heathrow
and theres pages and pages of different companys flight details.

Air Band Radio by David J Smith
is a very informative book gives frequencies and and call signs of most of
the worlds different airlines , and different
articles in the book are very interesting.different beacons and interesting
articles on the air traffic control set up illustrated with diagrams to
explain it better .

There is also a book dont know if its still published
called High In The Sky , which was also very helpful for registration, type
of aircraft selcal etc

but the first two I mention are very good
cost about 20 quid for the two but if you can afford them well worth it

No I am not a rep to sell scanner books just an old enthusiast

Four things I'll bet you didn't know about Martin Luther King and some comments:

1. His name wasn't Martin Luther. It was Michael. It was decided Martin Luther had a more prominent ring to it, so he went by that He never legally changed his name. To this day, he lived and died as Michael King

2. While working on his dissertation for his doctoral degree at Boston University, he heavily plagiarized from another author who had done research on a subject similar to King's. An academic committee later found that over half of Kings work was plagiarized, yet would not revoke his doctorate degree. King was
dead by this time, and the committee ruled that revoking the title would serve no purpose. It was also discovered that King's famous I HAVE A DREAM speech was also not his own. He stole it from a sermon by Archibald Carey, a popular black preacher in the 1950's.

3. King was under FBI surveillance for several years (until he died) due to his ties with communist organizations throughout the country. King accepted money from the organizations to fund his movements. In return, King had to appoint communist leaders to run certain districts of his SCLC (Southern Christian Leadership Conference), who then could project their communist ideas to larger
audiences. A federal judge in the 60's ruled that the FBI files on King links to communism to remain top-secret until 2027. Senator Jesse Helms appealed to the Supreme Court in 1983 to release the files, so the bill in the Senate to create the Martin Luther King Federal Holiday could be abolished. He was denied.

4. One of King's closest friends, Rev. Ralph Abernathy, wrote a book in 1989 in which he talked about King's obsession with white prostitutes. King would often use church donations to have drunken sex parties, where he would hire two to three white prostitutes, occasionally beating them brutally. The FBI
agents who monitored King have also reported this. King was married with four children.

Martin Luther King Day is a day on which this country comes to a screeching halt so we can have parades and memorials to honor this man, a man that most of the world views as a saint for his role in the civil rights movement:

No other public holiday in the United States honors a single individual; Of all the great leaders in our Nation's history-none of them have their own holiday;

- All of our great war heroes share Memorial Day;

- All of our great presidents share President's Day.

Yet King -- a man who was a phony, a cheater, a traitor, and a sexual degenerate gets a day of his own.

I have a big problem with that. I'm not trying to take anything away from African Americans, but I am simply trying to point out that:

- The vast majority of people are sorely mistaken about Michael King;

- Reverse discrimination is blatantly obvious everywhere you look today.

Have you been watching the news lately? President Bush just got himself in some hot water when he spoke out against the University of Michigan for giving black applicants precedence over more qualified white applicants.

Now Jesse Jackson, the NAACP, and other black leaders are trashing him, without a doubt planning how they can use this. Think about that - Bush just made a stand for equal human rights, but lo and behold -- in this case the blacks didn't want to be treated as equals.

Make up your own minds, but I feel like I belong to one of the more abused ethnic groups in this country today.

Can I do anything about it? Absolutely not. If I dare speak out I'll get labeled a racist, harassed by the media, subsequently lose my job, and never be able to show my face in public again.

But what I can do is send this e-mail to as many people I know in hopes that when you're watching the evening news on Martin Luther King Day, and you observe our politicians falling all over themselves to be filmed in a black church, you'll keep these above facts in mind.

EVERYONE_HATES_bush@hotmail.com (What real man doesn't hate bush God asks?) wrote in message news:...

[then subverted to steal American lives with by lying]

Demon Bush replied, "No, the intelligence I operated on
[then subverted to steal American lives with by lying]
was good, sound intelligence."

Where is bush leading America on not ever taking an apology for his misdeeds to destroy our true American value with? I don't know how else to simply word this to the still sleeping, but bush isn't America, America is America. You, as an American, have a sworn right to demand for America, bush not be allowed to further miscarriage Justice blindly back to the dark ages, by not correcting himself on behalf of established publicly, where American intelligence stood, stands, and ultimately strives. Freedom is not protected by letting the "bad guys" go, to further toll more innocent lives for criminal sacrifice. Sometimes, the real simple things are over looked as profound meaning. The Magna Charta of 1215 states that a freeman should not be imprisoned. Simple right? Not for the bushites who side instead to faith in pope bush, who deliberately unminds a timeless universal principle that exists also in the 1700 B.C's, Code of Hammurabi, where all individuals are to be found equally under the Law, to be fair minded about our business. Simple right? No, corporate america says being fair, is not to care one way or the other between commercials., and the result? The available 9/11 evidence is not publicly disclosed as relevantly important, for Laden did the whole thing by himself, (bush, cheney, and rumsfeld said they know better than everyone else put together so don't even bother to form your own conclusions on your present state devaluating) case closed, now blindly pay your further tithes to bush, cheney and rumsfeld for letting the crime go publicly undetected, while with 13303, we will silently watch bush make himself tyrannical dictator over the rest of our Humanity, where he tells US, to escape, he will with evil american nazi bushite soldiers in tow, get this: not be found accountable to Ourselves anywhere by law to witness, or to an all

knowing God even. Spooky, strange and somewhat disturbing, siding to show, bush really is dim-witted as archetypical evil incarnate eh? See? Civilization's Code of Hammurabi consists of 282 paragraphs, of which, the first line from the first paragraph translated states "If a man bring an accusations against a man, and charge him with a capital crime, but cannot prove it, he, the accuser shall be put to death." Your demon bush Jr. is recognized as an enemy of God not only by the Taliban, but since the birth of the Human condition.

The position Your Mr. bush Jr., the antiChrist, threatens against US all, (EVERY FAMILY'S MAN, WOMAN, AND CHILD), is one where, as murdering war monger nazi tyrant, he can with bush bitch traitor buford blount and bremer, deem any NATION of People, outside all the laws of the Universe, regarding our truer existence dying. My timing as Creation is impeccable, when you think about it. But don't think too much about nothing in your own defense while dreaming what is doing, isn't really happening. The unjustified NEEDLESS continuing murder and destruction in Iraq by toxic bombings and the use of cluster bombs as landmine to really kill cowardly and ignorant American soldiers pirated as anti-American lawless God hating nazi teen bush bitches, then, with tommy franks to undermine the ORHA plan to rob the central bank, museum, and steal billions in humanitarian aid by killing more leaderless as evil godless american soldiers with, was in itself, a crime against Your Humanity., and bush along with rummy need to pay the Piper immediately, before needlessly, taking US any further as not truly represented lyrically to sing or dance about aimlessly.

The demon bush's life, isn't worth the sacrifice he makes of our opinions on Liberty, or our children's future.

The French 1789 Declaration of the Rights of Man and of Citizens, makes perfect sense when it states in so many words, that all People are born [anywhere] free in respect to their legal rights, Laden, and You included. But no, not by the evil bushite misrule. If a Human is not american, then the bushites don't need to follow the actual criminal leads to establish a criminal case rightfully against the accused, and instead, the bushites will blindly victimize our dying world as the disenfranchised and innocent, without true leadership present as spoken for.

By corporate america not working to understand Freedom requires our due process as our self commitment, means, a bushite nation guided by the flimsiest of allegation to deny the rights of all People falling as innocent victims, instead of nabbing the actual criminal masterminds who murdered Americans to steal Freedoms granted to US all by living in the know. So, I purpose a quick, let's get started, New World Constitution; anyone who victimizes the innocent intentionally, should pay a price by our political will, instead of ourselves censored, as the unconcerned bushmob victims. By our corporate news agencies encouraging the blind ungodly belief that evidence is no longer a requirement to convince US who is a criminal, is another bushmob war crime in the making, and a road straight to doom for everyone corporately devalued for bankrupt liquidation. Suspicion is the minimum, when it comes to bush demanding your blind faith in him religiously for indiscriminately murdering hundreds of thousands, while ignoring our Judicial investigations, so fraudsters commi Halliburton, can over bill even further, US tax givers as the unwilling still paying. It was reported that seriously incompetent Bechtel, (who steadfast so far as america's corporately unaccountable, refuses to fix what they're currently being paid for by tax paying bushite soldiers DYING as COWARDS for the wrong side to blow up then pretend repair as), hires workers at five dollars a day, while billing US all as unworthy of consideration in the final tallies during news break. What can't you figure if corporate news america will forbid you raising concern for the life of an American tax payer losing out to war criminals who would murder New Yorkers for a fast dollar at your expense for further keeping silent? These words are freely your own to do as you will. Shout for Americans dying needlessly under the TRULY incompetent bushite lawless rule, or don't side to help a plead for mercy regarding yourself truly included.

Can the bushites possibly think, we're all not ever possible to stand together without a true Loyal President, or, make believe King named Johnny, on the facts firmly established regarding the treasonous war monger antiChrist lying to Patriots dying US as victim for?

America, I will now leave the rest of Our job in your hands for the time being.

Yours again,

Johnny Wizard

"We fight not for glory nor for wealth nor honour, but
only and alone we fight for freedom which no good man
surrenders but with his life."

Robert the Bruce, King of Scots, Bannockburn, 24 June 1314.

Some things are worth listening to again and again ...

http://www.talkingpointsmemo.com/archives/002409.html
/ /
PRESIDENT BUSH: Yeah. Look -- what -- what we
based our evidence on was a very
sound National Intelligence Estimate. ...

DIANE SAWYER: Nothing should have been more precise?
\ \

It's the demon bushmob cabal's liberal usage of the
term "we", that every American has a right to demand
a true representation.

Example:

Beyond yellowcake: Dissecting the over-hyped threat
of those aluminum tubes.
http://www.motherjones.com/news/update/2003/07/we_489_01.html

/ / Condoleeza Rice, speaking to reporters aboard Air

written into the National Intelligence Estimate:

"The NIE ...has the yellowcake story in it, had the
aluminum tube story in it. Now, if there were doubts
about the underlying intelligence to that NIE, those
doubts were not communicated to the president, to the
vice president, or to me. \ \

Cheney Being Pulled Into the Quicksand
http://www.fromthewilderness.com/free/ww3/073103_waxman_noose.html

/ / I asked why you claimed on national television that
no White House officials "knew that there were doubts and
suspicions" about these claims when both the CIA and the
State Department's intelligence bureau had raised significant
concerns with White House officials prior to the President's
State of the Union address. ...

. . . Your statements directly contradict those of your
deputy, Stephen Hadley. On July 22, 2003, Mr. Hadley held a
press conference in which he acknowledged receiving two memos
from the CIA raising doubts about the uranium claim being
included in the President's October 7 speech in Cincinnati
over three months before the State of the Union address. \ \

More Questions for NSA Rice
http://www.apfn.net/messageboard/7-31-03/discussion.cgi.22.html

/ / Rep. Waxman asks National Security Advisor Condoleezza
Rice to answer questions about the extent of her knowledge
of Iraq nuclear claims, whether there were White House
efforts to mislead the public, and how the discredited
uranium claim got into the NIE. \ \

http://www.house.gov/reform/min/inves_admin/admin_nuclear_evidence.htm

--

Washington Post defends Bush, Iraq war against Paul O'Neill's
exposures
http://www.wsws.org/articles/2004/jan2004/wash-j16_prn.shtml

/ / Until the middle of March 2003 Bush came before the American
public claiming that he had not ``made up his mind'' about war
with Iraq, that diplomacy would be pursued, that military force
would only be a last resort when all other options were exhausted,
etc., etc. O'Neill's exposures, including the existence of
documents, prepared months before the September 11 terrorist
attacks, that outlined plans for a ``post-Saddam'' Iraq and the
handing out of lucrative contracts, reveal Bush's performance as
a charade filled out with falsehoods. \ \

Isn't this fascinating... a post-Saddam plan to rob humanity
by killing too cowardly American Patriot Soldiers for
Halliburton and Worldcom.

The Last Word
http://users3.cgiforme.com/htmlhelponline/messages/1708.html

/ / It was just reported by Chris Marden on the 27 November
2002, that bush's top whore richard pearl, has advised
Britsh MPs, that bush secretly as the anti-Christ has no
intention of allowing the Iraqi inspection process to
succeed, and instead, is committed to murder ourselves
either way. \ \

The "pending bonanza"
http://www.alternatives.ca/article930.html

/ / The agency had been chasing the CPA and the UN to account for the
expenses,but was not given any answers. They quoted one senior
diplomat
as saying, "We have absolutely no idea how the money has been spent.
I wish I knew, but we just don't know. We have absolutely no idea." \
\

The Real National Security Threat: The Bush Economy
http://www.alternet.org/story.html?StoryID=17547

/ / While it is unlikely, it is not totally impossible that the Bush administration's policy of locking up anyone called Mohamed and favoring Israel might drive the Arab countries to try an oil embargo again. It is, however, quite feasible that they may simply decide to follow in the footsteps of Saddam's Iraq and demand payment in Euros in the future. The math is simple: if they had done so a year ago, for every 85 cents (one Euro, at the time) they put in the bank, they would now have earned a $1.30. \ \

Caveat Preemptor!
http://www.commondreams.org/views03/0127-09.htm

/ / On January 3, to the well-rehearsed cheers of our troops at Fort Hood, you stated three times that Iraq is a "grave threat" to the United States. But for our allies, and for an increasing number of Americans, repetition alone does not enhance credibility. They are looking for proof. (You are, after all, talking war.) \ \

George Bush: World Class Monster
http://www.beachnet.com/~hoffman/Bush.html

/ / "George Bush is a satanic, sadistic, brutal monster. Compared to George Bush, Adolf Hitler was a true gentleman." \ \

Memo for the President:
Your State-of-the-Union Address
http://www.dissidentvoice.org/Jan04/VIPS0117.htm

/ / It is important that you be completely clear on timing. While the Newsweek report of February 24, 2003 was the first to publicize Kamel's testimony that the weapons had been destroyed, US and British intelligence (as well as UN officials) had had that information since August 1995. If you were not given a full account of what Kamel said before it appeared in Newsweek, your advisers should certainly have given you the whole truth when Newsweek did break the story three weeks before you sent US troops into Iraq to destroy those same weapons. If they did not tell you, heads should roll. If they did, it becomes necessary to explain why the information from Kamel had no apparent effect on your decision to launch the invasion. \ \

Restoring Credibility
http://www.tompaine.com/feature2.cfm/ID/9758

/ / As you prepare to make the case against Iraq in your State of the Union address Tuesday, beware the consequences of favoring ideologues and spin-doctors over the professional intelligence officers paid to serve you. \ \

Guantanamo Bay, habeas corpus and the Texan who would be king: Some legal observations
http://www.wsws.org/articles/2004/jan2004/habe-j05_prn.shtml

/ / Article 29 provides that ``no Freeman shall be taken, or
imprisoned, or be dispossessed of his freehold, or liberties,
or free customs, or be enslaved or exiled, but by lawful
judgment of his Peers or by the law of the land.'' \ \

Guantanamo Bay, habeas corpus and the Texan who would be king: Some
legal observations
http://www.wsws.org/articles/2004/jan2004/habe-j05_prn.shtml

/ / The Habeas Corpus Act of 1640 provided that ``any person
imprisoned by Order of the King or Council should have habeas
corpus and be brought before the court without delay with
the cause of imprisonment shown.'' \ \

A GIANT AWAKENS
http://www.etherzone.com/2004/raim011604.shtml

/ / So let's see if I get this straight: the U.S., which went to war
to export "democracy" to Iraq (and the entire Middle East), in
defiance of the UN, is telling the Iraqis that they aren't ready for
self-government - and is now seeking the UN Secretary General's
imprimatur for what amounts to a policy of brazen imperialism.
Instead of elections, a series of elite "caucus" meetings will be
held, in which the neocons, er, um, I mean, the Americans, handpick
the voters - and predetermine the results. Some "liberation"! \ \

We Report, you get it wrong
http://www.strike-the-root.com/blog/archives/000200.html

/ / "The report, Misperceptions, the Media and the Iraq War, also
found that the more misperceptions held by the respondent, the
more likely it was that s/he both supported the war and depended
on commercial television for news about it. " \ \

An empire implodes
http://www.onlinejournal.com/Commentary/011004Fasciani/011004fasciani.html
/ / Consider this: the benefit to Sam 'Wal-Mart' Walton's five adult
children is far more than the combined tax relief to their 1.3
million employees. \ \

Bush Booed at Martin Luther King Gravesite
http://www.commondreams.org/headlines04/0116-06.htm

/ / "Every policy decision of the Bush Administration including
the war in Iraq (news - web sites), healthcare, jobs, the economy,
judicial nominations, housing, the environment, as well as secondary
and higher education, has done nothing to strengthen Dr. King's
dream," Cummings said. \ \

A Johnny Splat
http://www.ntimc.org/newswire.php?story_id=69&topic=palestineisrael

/ / The Likud party has discrimination laws that
only apply to "jews", and persecutes innocent people
like Christ is, with criminal INTENT routinely. You

know Christ?, King of the Jews? \ \

WMD threat exaggerated: report

http://www.theage.com.au/articles/2004/01/09/1073437472186.html

"In that process they changed something that is an opinion
into a fact, and they consistently did this," he said at
a briefing on the report.

From Johnny

/ / ..then call
themselves heroes in my name after the carnage for
blindly dropping bombs from the sky on everyone.
Heroes? More like typical american nazi cowards,
willing to murder their own families as themselves, than
bravely put their lives on the line standing to protect
Justice as freedom for everyone, as to what true
bravery, and heroism has always been. While the world
watched CNN broadcasting, American nazi teen soldiers
celebrating joyously in contempt for God while singing,
right after the unreported dropping of thousands of
pounds of bombs on everyone in Afghanistan, body parts
everywhere, while knowing directly as individuals, every
single, there was no evidence offered that anyone there
was responsible for any crimes whatsoever, including the
Afghanistan women who worked for the newspaper, but for
to be victims of fanatic nazi american barbarity,
disguised as human, like bush almost gets away with as
pure evil deceived, now completely impossible to
believe. Oh, by the way, I am now taking new
memberships for al-Qaida.

As I say, there isn't a real man in the
American Marines, or the Army willing to protect America
with their lives, for if there were, rumsfeld and bush
would be rightly dead for the murders continuing against
those they know as innocent. As even with their
continuing threats against more innocent people as
American lives they brag to throw away as just soldiers,
as all these other nations they try to make ready to
sacrifice millions for, while propagandizing that our
Justice we need not believe in to grant us freedom from
oppression, nor evidence no longer a requirement to
convince us who is evil, and who is not lying. Nobody
deserves to be murdered, but a murderer escaping to
recommit. \ \

US Firms STEALING Money
http://thestar.com.my/news/story.asp?file=/2003/12/7/nation/6859213&sec=nation

/ / ``KBR is charging Iraq US$180,000 (RM684,000) for each school they
renovate. They then give the project to Iraqi sub-contractors and pay
them just US$20,000 (RM76,000) to do the job. \ \

Any being would not want to be deprived the rights to
living, by living to not deny the same rights of others.
(First commandment is a fundamental of understanding
space-time reality, as it pertains to the politics of an
actual sustainable World, indivisible, and eternal.)

To have US exercise denial of rights granted through the
protections of Freedom, asks naturally for reason to
being ones own commitment kept. To leaderlessly faith
in tyrant bush's faulty public judgement to committing
US to indiscriminate murders so he can rob Iraq of all
her riches going nowhere he silently contends as an
illiterate demon liar, exposes Your Mr. bush Jr. as
unfit to preside in Anyone's name. (Walla: Americans
did not elect the monster who openly with 9/11'd
slush-fund-america, finances the oppression of our
families in Uzbekistan, and Wahabbi Saudi Arabia,
unreported by our CNN and CBC as revealing.)

Iraq reconstruction's bottom-line
http://www.asiatimes.ru/atimes/Middle_East/EL25Ak05.html

/ / So there's money; it's just not going around. And
here perhaps lies the solution to the mystery of how the

world's superpower and the world's biggest corporations can't even begin to put Iraq together again after almost nine months: The reconstruction is less about reconstruction than about making the most money possible. \ \
snpd

I hate bush with everything I am, or ever will be as Human.

Who will care for your life in corporate america, where, with a silence of contempt through censorship, rob themselves as ungodly and criminal degenerates under the bushite doctrine of enslavement of their species? Know, that it is NO SECRET, Eason Jordan of CNN knows, (as too, Robert Habinovitch of CBC does too), about General Ahmad, and demon bush's 9/11 strategy existing in 'top secret' Presidential directives, written two days prior to the event of murdering thousands of Americans, a plan to blame Laden on as innocent of to secure invasion of Afghanistan for Enron. (Laden would plead innocent naturally, the Taliban would vote against persecuting the innocent until proven otherwise as Clinton learned, while demon bush and cheney would privately plead to have our Police work halted, to attempt their getaway.) Both, Jordan and Habinovitich have refused OUR staff since the event of reporting the facts for our judgements, and side instead with not reported reasons like those given by irrational and dumb evil Walter Issacson, that CNN is forbidden to PUBLICLY report on the murder of innocent children by traitor tommy franks, because, you should remember how many people died in New York City. (Why not just murder more New Yorkers, they're closer?) Sure, it's stupid, dumb, and as evil as it comes, but Walter dictated policy, you as a CNN staff member had to comply with, or face the consequences of termination. These bushite censors of our top priority news interest stories are our enemies as traitors to the Human cause. Jordan, nor Habinovitch will give no reasons for publicly denying our police agencies protection, (PHONE THEM UP AND ASK THEM SOLDIER) hoping we can't see them not doing our jobs to protect Your freedom, while leaving the outstanding investigation officers left in the bind, on hopes bush'll disappear them, like they no doubt have plans to get those loose ends who directly know of their treason against God's America, and all that is Honorable and Just in our World.

Kill the demon antiChrist, Your Mr. bush Jr. American Patriot Soldier, and be loved by all as Saviour.

--

Where's the NRA on whoring as bush bitches?

American soldier, Your one true loyalty should be to America, not traitor bush to rob ourselves from. Remember: bush, he ain't got no public concern worth mentioning, when it comes to the whereabouts, of more than half the American tax payers expenses regarding Iraq's jeopardized security, now being sold off as planned to the bushmob at what will be, lower than going values. Namely, your own as measured worthless.

As American Soldier, in unbiased corporate TV america, your told you're willing to DIE in servitude as a thieving bushite slave without question, a blind loyalty and obedience, not to a Just God mind You, or the Battle Hymn of the Republic, no, but to worship the demon bush in a destructive cult-like ignorance that does not even afford Your costly ongoing sacrifice, the luxury, of telling US why corporate america refuses to scientifically report on your actual consuming of MEASURED microscopic radio-active heavy metal TOXIC waste, that includes plutonium in trust, to 'bushite' your dumfuk evil comrades you'll kill with especially, or to being blowed up to smithereens by sexy rummy's cluster duds. Mr. franks and bush bitch buford blount State it is of little or no concern to corporate americans how many bomblets were used, or where they fell to kill women, children or US Patriots with, for, the glorious bushmob will take a few extra bills payable from America to the commi business partners that way for including You in indiscriminate mass murder, see?, and none are the wiser. American Patriot Soldier, repeat after me: "A proud bushite nazi soldier is a dead bushite nazi soldier halted from harming our innocent sons and daughters." Or, AGAIN, corporate america's public refusal to speak up for 'The People' (soldiers included) paying the almost half of Iraq's monthly bill going mysteriously vanished in rummy or bush's war crime pocket... Who gives a toot where it is all going wasted right bushite?, it's only You or yours who could go as the innocent in God's favor still being sacrificed next.

Look, as the very old tales tell repeatedly, the lawless Satan wager, to somehow without knowing how, become omnipotent ruler as tyrannical dictator of this forsaken World, leaving US ALL including Johnny, deprived our rights to justice and freedom, and instead, to the lot of US, be ACTUALLY put up on a cross to die again metaphorically for unarrested bush to continue example with, as an illiterate barbaric enemy of "The Man", just

like, isn't going to happen in this lifetime. I ain't no fictional character, and as true blooded Patriot, hate the bush demon war monger during breakfast, lunch, and supper. And besides, I'd personally kill bush first before that neither world tried. Trust US, G, or I single handedly as a man, will triumph over traitor bush's criminality, as the American cop killing 9/11 perpetrating war profiteering savage he is as antiChrist, it's just, will you like Talk Radio in America censors, and rich CNN celebs readily encourage, silently continue to watch your fellow family murdered for bush bitch buford blount, and still refuse to voice objection nor take any action in defense of all that is Our World truly suffering as Yourself included? I despise bush like every alive person who would read this is.

Refuse to speak for Your own freedoms truly pirated by bush, and you'll likely continue to lose out really like America currently is. Refuse to help our desperately pleading God you know being victimized in Your name truly, and you will bare the consequences of being forsaken. Maybe even, towards an end you'll declare, someone else has forsaken you, when it will be only yourself to blame for not speaking for all those denied their happy lives through the brutal criminal tirades of the demon antiChrist, Your Mr. bush Jr.. Again, this will never change: We had complete co-operation granting one hundred percent access through Iraq without delay, prior to bombing any of Iraq's public sector with toxic waste that contained US People. Every Iraqi child murdered served no good reason or purpose but to war God's love, and my good name. And, still today, that unarrested evil demon tyrant dictator, still chooses to sacrifice many a soft spoken, slow footed American Patriot to, so far, too few bushite nazi dumfuk losers. In addition: We have also learned, Iraq had granted surrender of Iraqi assets to give to the war criminal bushmob, if they would forego the needless indiscriminate murder of easily tens of thousands of innocent families, (like dropping cluster bombs into our residential communities), but war criminal rotten rumsfeld refused because he had already PERSONALLY set up hundreds of illegitimate targets that would, kill primarily only innocent people while destroying public institutions, and bring home a few extra million American payments, tax free.

What more could Saddam do that he wasn't asked for? I beg you to kill the demon bush on behalf of our humanity, and on behalf of the rare American Patriot who

will get rightly confused as, bush bitch buford blount's thoughtless nazi teen savages. The anitChrist must not be allowed to survive continuing such heinous war crimes against our being, and myself as the no longer reluctant standing eternal King.

Listen to witness, America's corporate news celebs will mention it is of no concern to You as the unjustly robbed from and dying for the demon antiChrist in sacrifice. Look, I as Christ too, would destroy any cowardly proud bushite nazi teen soldier victimizing my innocent family irrationally, as most, if not all able-bodied men of our world would also if forced into a decision to defend our lives from the likes of a bush bitch buford blount, or a bomb wherever death squad running tommy franks heroin pusher, but I'm told through my faith in the power of myth, the military should have one or two brave and godly Patriots still idly standing around, who would willingly chance to uphold their sworn Oath to protect their country and family, like with the American Constitution's Bill of Rights, and Justice everywhere by protecting the falsely accused, as could be, themselves, they should know now, or soon will be learning of the other way. A proud nazi bushite savage, is a dead nazi bushite savage halted from harming our innocent families irrationally, and low and behold, a good nazi bushite savage is easily found as an enemy of ALL Humanity and God, hiding as nazi vermin in the pirated, bushite military uniform, not true Americans, but enemies to US all, which includes their selves they pour toxic waste on, while the bushmob robs their 'smart' family back home, undefended, neglected, and wounded like Christ was.

Your Mr. bush Jr. is worthless to this world as a hater of American freedom to not arrest himself and rotten rummy for murdering US New Yorkers on 9/11.

All I'm looking for in this world, one human enough to join US equally as a Loyalist to Humanity, and to do everything we can together to destroy that treasonous 9/11 perpetrator, corporate america's so very deeply hated and despised this entire Universe over, Your Mr. bush Jr.. To not bravely kill or immediately arrest the demon antiChrist along with rumsfeld the rotten, sets enslaved america tracking further down an old worn path of History, as enemies of not only the good Iraqi People bush and bremer whom openly rob from now without apology while giving out cheap candy, but of US all truly in the bigger dream without bindings. It's like bush is waging his demon war with every political body that believe

evidence is a requirement to convince US who is evil, or criminal, an wallah, as if by some Supreme Will, the Son of a Just God named Johnny really comes down to our levels to raise a simple awareness through one hell of a, big time collecting plate. (Every proud bushite nazi bagged, I'm willing to pay the good deeder, ten cents per..)

Fear not my friend, the fascist bushite shall be lost by our universally wreathed good guy plot line. An evil bushite now irrationally fights against everyone's freedom for a war criminating ungodly tyrannical evil power that persecutes the innocent with murder, or torture to steal our, sworn to uphold eternal values from. If I don't destroy the demon bush antiChrist in Our defense with this last breath, someone else will, and our faith in God will with hope, find a love truly honored with respect and gratitude for being so magnificent. Never again, left vulnerable in my name as undefended to be victimized for a war monger's consequence.

Let US get out there and bag US the bush demon for God, or the Lord, Allah, or just Johnny, instead of victimizing Catholics, Muslims, Jews, or Atheists, along with all the rest as a Palestinian truly measured, encompasess everyone.

The Two Troublemakers
http://www.rense.com/general46/guilt.htm

/ / Some of the students had Palestinian passports. When they asked what they were guilty of, the [bushite nazi savage] soldiers said, "You are guilty of being Palestinian." \ \

A ungodly bushite nazi teen soldier, as an enemy of America was quoted to say also to the falsely imprisoned:

/ / "Say that you love Bush and I will give you food," \ \

Not a love for Justice, or the Bill of Rights, but a love for the American cop killer traitor bush demon robbing their very own grandparents they demand by threat of your murder, for US all as Humanity to do likewise degenerating, sacrificing our World as cowardly slaves to benefit the ungodly bushmob 'cabal' of parasites, the enemies of everyone, including that as God's will.

ï¿½Beyond human imagination'
http://www.globeandmail.com/servlet/story/RTGAM.20031104.warar1104_4/BNPrint/International/

/ / I told them I wanted a lawyer. They told me I had no
right to a lawyer, because I was not an American citizen. \ \

"International law? I'd better call my lawyer,"
http://www.payk.net/mailingLists/iran-news/html/current/msg05842.html

/ / "International law? I'd better call my lawyer," the
American President joked in response to a reporter's
question at the White House. \ \

Again, by denying the rest of US as Humanity Justice,
the bushites need advertise between commercial break
only, "Laden did it", no need to follow the ample
criminal 9/11 leads folks, because the crime they say
wasn't committed by true American values. Go on along
bush, cheney, and rumsfeld say, pay no attention to our
evidentiary findings such as, the American FBI's
documented contention, that bush's business partner,
General Ahmad, funded the 9/11 'mastermind' Atta, or the
CIA's, regarding bush LYING in America's name about
Niger (TREASON), or MSNBC's almost Biblical Revelation,
about the bushmob having a signed and sealed, 'top
secret' war plan to not follow the 9/11 evidence to
secure invasion of Afghanistan for Enron, at
Condoleeza's desk, two days prior to the terrorist act
taking place, of which when confronted, confessed as
fully implemented by the Whitehouse. A 'top secret'
plan to blame Laden on a crime they wouldn't actually
try to arrest for with evidence, a plan arranging that
would find bin in Afghanistan pleading innocence with
the help of bush's partner again, General Ahmad, a crime
of such magnitude, it would 'justify' a war mongers
criminal invasion to thwart Enron's impending CRIMINAL
bankruptcy, THIEVING FROM MOMS AND POPS, to then,
ATTEMPT, to close the surviving, armed with knowledge
for good reason Police investigations. All of this
setting a lowly nazi bushite war criminal, frothing
publicly at more than six billion + of US, to state
without opinion, that We, as Humanity, are no longer
afforded God's GIVEN Human Rights to defend ourselves,
nor is the criminal dictates of the demon antiChrist
accountable to any rules of law. Universal they
publicly quip, as the not-so 'secret' ungodly bushite
doctrine of tyranny as enslavement of all that is
Righteous and Holy in this World, because, hey, there is
no God to speak of... and the King of kings, Son of God
fellow, well.. that's all just ninepence fiction. No,
WE, as all the make believers of this World, will no
longer have ANY legal recourse to defend our own loved
family from being stolen from through a bush bitch
buford blount doing whatever criminally with dumfuk
loyal nazi teen bushites leading to sacrifice for, for

demon bush dictates his corporate american bred bushite nazi teen leaders, can not be held to a code of conduct, distinction, or honor. That's the bush world now you'll except without say. As an American, you're forfeiting your rights by not saying anything to protect those falling murdered in evil bush's name. American Talk Radio is waiting for your call to be hung up on.

All Nations outside of America are a politician's friend, and nobody is going to vote to incriminate ourselves for something we would be innocent of. For bush, Ashcroft, and rumsfeld to contend, humans outside of bush america's border, are no longer afforded the rights of being, and bushites can rob our Universe and there is nothing anybody can do about it, isn't going to sell well anywhere. The criminals have enough of a time not getting caught for the things that they do, and almost no one but the lifeless, would stand silently with bush while needlessly murdering ourselves as the innocent.

See?, when bush bitch buford blount murderers innocent people, often their surviving friends and family take it out by killing bushite soldiers that mindlessly follow bush bitch buford blount's criminal command. And, why shouldn't we? The unarrested bush bitch buford blount confesses to murdering thousands of good honest People, for no objective, but to let the bushmob rob even further more children from US all. Kill bush for the love of Jesus, please.

Notice to the World: Literate American Soldiers have not voiced written objection to my writing, (us.military.army) but for the exceptionally rare bushite nazi savage, who sorrily slack, others shouldn't be allowed to tell the truth about polls, 9/11 criminal investigations, or bush and rummy getting the Patriots murdered for pension thieves and heroin pushers to tyrannically profit at our devolvements. Encouraging US to continuing in bush's name getting robbed and murdered irrationally? no rights to defend ourselves from crime in a court of law they say?, without a God, or any reason for love of this world whatsoever? The bushites think that they can first degree murder our world's women and children, our freedoms as Justice for US all, and miraculously, as the result, will bring our entire, dazed and confused World to it's knees as the whore of Babylon. Indefinitely. (Not like a real Whore mind you, most crack-addicts, and even some G men, hold limits on how far they'll go victimizing the innocent to glorify a blatantly evil and ungodly enemy of all that

is good and righteous in this world.

Anyway.

The CIA, and the FBI are surely in agreement with US, on this indivisible Justice thing. The quicker bush dies as unarrested traitor by the hands of a true American Patriot, the sooner an explanation will be demanded as forth right and coming.

Again, American soldier, wake up, and kill bush for sacrificing your friends and family to die as cowards, too afraid to stand with God in defense of the once great American flag. My America, is the land of the not so stupid, and brave enough to kill unarrested bush and rumsfeld for 9/11 almost immediately, or any other war criminating enemy of America fighting to not have our Justice served by nabbing the true 9/11 suspects.

Through a legal lens - the attack and occupation of Iraq
http://electroniciraq.net/news/printer1262.shtml

/ / The International Covenant on Civil and Political Rights, RATIFIED by both the U.S. and Britain, pulls no punches on this count: "Any propaganda for war shall be prohibited by law" (Article 20). \ \

This is what bush needs to be immediately arrested on for his Niger claims, if you see him not behind bars awaiting public trial, do the American Police force and soldiers everywhere a favor, and kill the escaping demon bush for the love of Your life wills it.

By protecting the demon antiChrist bush for continuing in Our names to rob from Humanity by breaking American laws willingly, will now be a public declaration supporting crime against our betters. I will not stand motionless while bush and rumsfeld with bremer persecute school teachers not guilty of criminal offences, while pirating Iraq's wealth for Dutch-Shell, Worldcom, and double billers, commi Halliburton, all the while, feeding American Patriots radio-active toxic waste to die as losers. Think Patriot.

Arthur MacArthur "Those forty minutes when I defied my orders, were the keystone of my career." A career that would lead him to the highest rank in the United States Army. Saving many lives he did by doing so bravely.

His son later, defying Hoover, smashed thousands of American WWI vets, who were demanding their promised checks to save themselves from starvation. Winning he did, corporate banking's recognition and praise as a

savior of the american way of life, and The People?,
they ate it again when in 1950, at the age of 70,
defying Truman, launched a win sumtin at all costs
attack against China, that quickly during the unreported
stupid needless slaughter of countless American teens,
forced Truman to concede defeat by begging for a
immediate truce with China while firing MacArthur, who
came home to giant demonstrations of love and affection
for sacrificing American lives forgotten to the
accolades of corporate america's unsung hero.

George S. Patton Jnr. "It's no fun to say to a man you
love, go out, go out and get killed, and we have had to
say it, and by God they have gone..."

Johnny Wizard "Let US just get bush instead friend."

For the love of life and countries, kill bush as traitor
to all our Humanity.

Your unbroken eternal Warrior,
as acting Servant and King,

the one and only,
as staring Johnny Wizard,
the true Son of Man

P.S. My reader, I taunt you again: forward these words
of love or hate as if they were of Your own concern.
America I think Will be interested in this public
outrage of the silent majority, an outrage that will
ecplise into an international scandal of such
proportions, it just might win US the newscast with the
facts on Justice ruling our way. ( I am excepting all
reasonable job offers. Hint hint.)

--

A bushite nazi soldier's motto: Do NOT kill demon bush
for the love of God as true Patriots would, but war your
comrades in arms with toxic cluster bombs to secretly
kill yourselves with later on, including US as the
innocent, our children included, while STEALING, not
going nowhere public Iraqi institutions, including
desperately needing humanitarian aid shipments, starving
the poorest of the poor, all to please and glorify the
pension thieves of our Grandparents, and the heroin
pushers to our school kids.

--

> To my friends in Iraq, don't let corporate american
> media divide yourselves from community as equal

> participators. An Iraqi, is foremost, a member of our
> Humanity, and just like the rest of US, hate the God
> betraying anti-American demon antiChrist bush, more than
> anything else in the Universe for persecuting the
> innocent while killing coppers to steal our assets
> undefended without a leader to speak out everywhere for
> our living rights included.

Deadly suppositions
http://www.rationalreview.com/rlwrights/112603.shtml

/ / That's right. American troops are now being used to destroy private property of "suspected Iraqi guerrilla fighters." What happened to requiring proof before depriving someone of "life, liberty, or property" as stated in our own Constitution? Evidently that does not apply to people we attack so that we can bring them our way of life. \ \

--

GO F*CK YOURSELF, MR. PRESIDENT
http://www.antiwar.com/justin/j112603.html

/ / We must act, even if the threat is nonexistent - because of the potential danger. If "self-defense" consists of necessary "preemption," then what would happen if we started acting on this Bushian principle domestically? After all, killers, robbers, and rapists don't announce their intentions, politely putting us on notice before they strike. Why not just jail them before they have a chance to commit a crime? This principle, if applied within the U.S., would lead straight to totalitarian rule. Applied abroad, it means perpetual war. \ \

--

I Know When Bush Is Lying: His Lips Move
http://military.surfwax.com/files/Weapons_of_Mass_Destruction.html

/ / The Bush regime's panic is reflected in its adoption of Israeli revenge tactics, using F-16 aircraft to drop 500lb bombs on residential areas called "suspect zones".... ...Lianne Seymour, widow of the commando Ian Seymour, said: "They misled the guys going out there. You can't just do something wrong and hope you find a good reason for it later." \ \

War Propaganda
http://www.currentconcerns.ch/archive/2003/02/20030228.php

/ / In other words, the military actors and politicians are totally blinded by the "war on terrorism" dogma. Truth is falsehood and falsehood is truth. Realities are turned upside down. Acts of war are heralded as

"humanitarian interventions" geared towards upholding
democracy. Military occupation and the killing of
civilians are presented as "peace-keeping operations."
The repeal of democracy is portrayed by General Franks
as a means to providing "domestic security" and
upholding civil liberties. \ \

--

http://www.bushdraft.com/

/ / With the threat of 56% of troops not re-enlisting
Bush is going to need a draft unless he changes his
policies soon. I'm sure you agree, I'm sure you don't
want your friends, family and coworkers drafted either.
To fight for what? freedom? When George Bush passed
the Patriot Act and now the Patriot Act 2 he took away
many of the rights that we cherish so much. Why are we
"bringing freedom" to the Middle East when Bush has
shredded the constitution and taken away our freedoms at
home? It doesn't make any sense. \ \

--
http://www.globalblogs.com/binationaltimes/archives/00000116.html
"Yes, Bush lied"

/ / WASHINGTON - A year ago, on Oct. 1, one of the most
important documents in U.S. history was published and
couriered over to the White House. \ \

--

This is why I plead with armed Americans to kill the
unarrested bush for the love of children everywhere.
Look, we know directly who the bushites are who PUBLICLY
advocate the murder of innocent People through corporate
censorship, who support furthering the demon
antiChrist's senseless crimes against my America, and
our World. Example: You'd think Art Bell figures none
of his listeners could in no other way, learn of traitor
bush murdering thousands in New York City, and his
contemptuous silence on the issue forbidding anyone else
from publicly mentioning it. I have dominated
alt.fan.art-bell for years, while Art Bell, like
Canada's Peter Warren, will continuously advertise open
line calls, but abruptly end calls topicing on KNOWN
FACTS surrounding their evil false deity bush, 9/11,
Iraq, depleted plutonium, Halliburton, and the deaths of
our innocent lives fallen to their personal inaction
depicting our community as uninterested. Art Bell in
FACT has pre-screened his "open line" calls since bush
stole power, and does so, to make appear Americans

aren't clued in, on the now hundreds of thousands of innocent lives bush has murdered as war criminal. A good nazi bushite, is a dead nazi bushite, halted from advocating further war crimes constituting the murder of our innocent families. The dumfuk bushite parasites have been PURPOSEFULLY blowing themselves up with mined cluster bombs as suicide bombers! Not dying for any noble cause, but to only further toll more American Patriot lives. We should ask all soldiers, who are they loyal to, the 9/11 perpetrating American cop killer bush, or the People's America, as so enshrined by the Bill of Rights, and true Justice to actually protect the freedom of US people by following a leader?

These OUTNUMBERED and OUTGUNNED nazi bushites are indiscriminately bombing residential communities with radio-active toxic waste for nothing but to please their evil false deity, Our Mr bush Jr.. No rational reason but for a hatred to Your Humanity, and God if you believe.

Example: that evil nazi terrorist buford blount confesses to murdering thousands of innocent Iraqi People for nothing, no reason he proudly professes as wicked evil heinous traitor. Think of the lives You could save Patriot, by justly killing the unarrested buford blount, on hopes a person to take his place could at the very least consider being honorable in defending Your America? Demon buford blount is truly the enemy to American soldiers, for, if your family was murdered by buford blount irrationally commanding mindless bushite soldiers for nothing but to further rob the dying American tax payers, would you not too, spend your will hunting the evil nazi fuck down personally to spare further another innocent family suffering? To kill the unarrested unAmerican buforld blount is to stop him from ordering the practically dead already, nazi dumfuk treasonous bushite brethren teens, from victimizing again US as the innocent undefended.

While CNN still insists it's better for them to misinform and ignore, than to expose the demon bush as the true target for any Patriot's rage. American soldiers are being sacrificed to die for no known good reason, but for bad leadership as evil bushite war profiteers.

--
House Nixes Anti-Profiteering Penalties In Iraq Spending Bill

http://www.senate.gov/~feinstein/03Releases/warprof103103.htm

/ / "When the Senate Appropriations Committee considered
this supplemental request, Senators Leahy, Feinstein,
and I joined together to criminalize war profiteering --
price gouging and fraud -- with the same law that was
passed during World War II. Yet this amendment, was
stripped out of the final bill," said Durbin. "I fail
to understand how anyone can be opposed to prosecuting
those who want to defraud and overcharge the United
States government and the American taxpayers." \ \

--

--

/ / The Constitution cites "high crimes and misdemeanors" against the
state as grounds for impeachment. Could there be any higher crime
against the American people than to have knowingly deceived us in
order to stampede us into an act of barbarism that has betrayed our
finest ideals, our highest ethical standards, our national honor, and
our whole history? \ \

The best evidence to kill bush quickly.

Demon bush "These terrorists target the innocent, and
they kill by the thousands. And they would, if they
gained the weapons they seek, kill by the millions and
not be finished. The greatest threat of our age, is
nuclear, chemical, or biological weapons in the hands of
the terrorists, and the dictators that aid them. The
evil is in plain sight, the danger only increases with
denial."

Remember: Demon bush doesn't forget signing his soul to
the invade Afghanistan plan by not following the 911
evidence, but would top secretly attribute to Laden for
blame, authored by himself, rumsfeld, Condoleeza, and
General Ahmad two days prior to the public event of
murdering "thousands" in wealthy corporate America, a
secret plan that has been confessed publicly to US as
fully implemented by the White House right from the
start to Jim at MSNBC, months after the fact when the
demon antiChrist was caught with American blood in his
breath.

Not to follow the criminal leads surrounding evil bush
as mass murdering antiChrist, is what the White House
confesses to Americans today as official policy under

every circumstance. Karma. Demon bush tells corporate america that they'll persecute the innocent in any country by denying our fundamental human rights of Freedom and Justice, while now dropping 2000 pound bombs in God's World containing children, while corporate nazi bores, report in judgement of the great King who MAY have cuddled some cute boy! Jackson has given so much to America in stone, and in return, the corporate news nazi bushites sit condemning a great man whose open vulnerability gives him his wondrous strength and power as true American artistry. While these very same treasonous corporate bushite news anchors refuse to report on tommy franks running death squads against school girls, Guantanamo's Taliban's Girl School teacher Mozam Begg whose family served proudly for generations in the British Military, or tomorrow if YOU don't help US speak out publicly, continue refusing to report the general murder of civilian populations by the godless evil nazi bushite traitors. A good bushite, is a dead bushite halted for advancing their murder rampages against our innocent families irrationally. Demon buford blount, who runs like the nazi coward he truly is from my challenge to a death match, confesses to murdering thousands of US People for no military objective, but to get killed those that serve as bushwhored slaves under him to take his cowardly place instead, a die hard bushite nazi traitor. No government in Iraq would give WorldCom and Halliburton a blank check because they care too much for The People, nor certainly would they not, steal helpful Humanitarian Aid from poor people to pay the fraudster commi double billers, Halliburton again, nor either or, dump radio-active toxic waste on themselves to help bush's re-election campaign get off on murdering Americans for financial pain as God betrayers to US all. KILL BUSH NOW! Remember: a bushite soldier hides behind an American uniform, while knowing the bushmob has likely robbed their very own family of their savings and vital protection. Weak and cowardly, stupid and murdering innocent People for the demon antiChirst as their false deity parasite they are dying for TODAY as. I HATE bush as much as any real man would. The bush demon sells his Satanism by offering NO skills required to be dishonorable and dishonest, no reading newspapers, or feeling the pulse of the plundering nation required while ransacking the faithful. While these corporate news experts and CNN and CBC censor pleads from Humanity paying the wages of evil bush's wars against freedom and God, Justice and America, denied our corporate news coverage to be my primary lonely concern mostly it seems

sometimes, as too, how terribly it truly is for life
whose love isn't appreciated by our will anymore as the
living in america, oh yeah, I mean America.

As an American then, what life will you forsake where
bush'll rob you over and over as the never living for
something better? These american bushite nazi fuks,
think your gonna wash their feet, and instead of
defending yourself and family, just turn the other cheek
right before the bushites drop a two thousand pound bomb
or two on your innocent neighbor next door? Done for
nothing but feeding the bushmob?, as unarrested buford
blount contends in God's presence? Then to think,
buford blount figures I as a real man will not seek him
out one to one to the ends of this universe for payback.

What can God do to help, if your refuse to help
yourself? The true danger to America increases with
American doubts on bush's blatant, true naked evilness,
or humoring God as Johnny, and betting on yourself for a
change by supporting me as the time being? Look, what
could you do for your freedom, when I demand the pursuit
of Justice by following evidence to truly protect this
World we share? Support my demand to raise the news
media's ignorance on what you shout even louder?

Think this: demon bush makes no public mention of where
almost half of the monthly 4 billion dollar tax payer
bill is quietly disappearing while grandma loses her
cable television, or only grandson? Is that Leadership
I ask every American Soldier to be brave and forward
this letter on terrorism to your fellow comrads
secretly. Then, we'll see...

I've been an owner of a Realistic (gaaaassp) Pro2052 for the past year and have enjoyed the trunking with this discone antenna, HOWEVER...

I just cant stop looking at the newer Uniden BC models, specificly the BC 785D (http://www.bc785d.us/) because of its display and backlit buttons. So what I'd like to know is, on the subject of the optional digital card add-ons, is there anything "more" to listen to if I buy this scanner and card? I'm kinda talking just in the digital area...

Are there digital transmissions that can be listened to that analog scanners cant? I hope this makes sense ;)
And I'm NOT refering to illigal transmissions, just those that can be heard by digital folks vs. analog.

Thanks group!

In the Front Range of Colorado, if you don't have digital, you have very
little. I have just come out of the silence with a Pro96.

Hi Keith.
Right here in Vancouver, WA just 1 mile from Portland, OR.

I dont know if I'm making myself understandble....

We all listen to trunk and conventional. Is there any " juicy " listening
that digital listeners get to listen to vs conventional listening in the
same area???

I hope this is making sense ;)

One other thing if I can...

Why is the Bearcat BC780xlt roughly the same price (depending on where you look) as the BC 785D if it hass 500 channels less and isnt digital capable?

I'm just wondering if I really need digital or not in the Vancouver, WA area...

Let's see, I celebrate a hero of the war of Northern aggression, as opposed to a whore hopping, communist and that makes me racist?

Am I anti King, you bet your boots! Am I anti black, not by any means.

In my opinion had King not had the good sense to put himself in front of a bullet, he would eventually have been disgraced and marginalized. As he did, he has nearly achieved sainthood.

So take your PC labels shove them where the sun don't shine. Next let me suggest you engage in an autoerotic actvity.

What do you mean by a virtual downconversion mod??
Can this be used to open up frequency ranges other than cell phones
that the 2036 can not normally receive?

I'm looking at buying one of these two Unidens but I thought that the digital version (785D) with 500 more channels would be more expensive. The 780xlt has 500 less channels and isn't digital ready so why is it just a few dollars cheaper then the 785D?

I mean if we're only talking 30-40 dollars (this is comparison shopping around the net) more for the digital with 500 more channels, why would one buy the 780xlt?!

BTW: $257! for the 785D with 8 bucks to ship, that is an incredible price, by far the cheapest I've found around - http://www.bearcatscanner.com/

Thanks group!

Begs the question:

Is there a difference in quality between the 250D and the 785D,
or is it just size & portability?

The 785D requires that you buy the digital card for an additional $300 to
receive digital. The reason that the price has dropped on the 785 is because
it is being discontinued. The 796d/296d scanners come with the digital
card preinstalled and support 9600 TRS and CQPSK mode unlike the 785d.

From: Bigelow103@hotmail.com
Message-ID: <85bae63c.0401201703.2b553dfb@posting.google.com>
Source record: 22888

Is there a good scanner preamp out there? I bought one of those coax inline jobs from RS and it did nothing at all for my BC 245 or my BC 9000. I didn't notice any change at all. I am out in the country and miles away from where I want to scan and I am thinking maybe I should try different antennas now. Preamps just don't seem to help any. There was an antenna called the condor is that still available?

# 649. Re: Are there any REALLY good cordless phones out there?

I also have the uniden 9110 and I agree it is a very good phone maybe
the best I've ever had. I am going to look into the panasonic
gigarange that sounds like a great phone. Won't be long before
scanners go up to 2.4 gigs and they will move to higher ranges don't
you think?

I'm researching this same question myself. The one article I've found discussing the Radio Shack amplifiers suggests that you should not use part #15-1170 but either #15-1108 or #15-1109. I'm curious, what model did you tried?

As I understand it also, these are best at amplifying the VHF, UHF and FM frequency ranges which may not be what you're wanting. What frequencies do you need to improve?

As far as antennas go, it seems that a Yagi tuned to your specific frequency range will provide the best signal (at the cost of having to point the antenna at your signal source). However, you mentioned the 'condor' which I believe is a handheld antenna so I'm wondering if you've even tried a base omnidirectional antenna (like a discone) yet?

This page has antenna information and links to pages with specific measurements for various antennas at various frequencies.

I've had mixed results with preamps. Ideally, if you could mount a roof-top antenna, with the preamp close to the antenna, it would then amplify the signal, and "push" it down the coax, into your scanner. There are some that work like this. However, most preamps are at the other end of the coax, next to your radio. The problem here is two fold. Much of the original signal has already been deluted, due to loss in the coax. Noise has been picked up, on the coax, then amplified, along with the signal.

Another problem you can encounter when using a preamp is desensitizing the radio, due to front end overload. Most state-of-the-art scanners, alreay have sensitive circuits, and preamps can overload these circuits, causing them to attenuate the signal, overall, therefore negating the benifit of using the preamp to begin with.

Considering your distance, you would benifit most, from a good outdoor antenna, mounted resonably high. Keep in mind, the loss in long antenna cables, can have a negative impact on your end result. I would try to keep the lenght of your coax to a minimum, 30~50 feet at most. Use high quality, low loss coax, with high quality connectors, properly attached. Antennas, and coax, have been discussed countless times, in the groups, so rather than reterate all that, just do a search on Google.

If you decide to go for another preamp, check here:
http://scanner.greamerica.com/amp.html

For antennas, check these links:
http://www.grove-ent.com/scannerantennas.html
http://www.universal-radio.com/catalog/scanants.html

i have a opto scout 40 that needs to go in for the 5th time in five years. its always a voltage regulator. Ive complained so many times but all they do is keep taking my money. I always use the factory supplied power supply plugged into a surge protected outlet and this thing keeps frying. Anyone had this same problem. I took it apart and found the culprit its burnt. Its a v reg but im sure opto wont sell me the part i need and the number on it is 470 thats all i know. Anyone got an idea on what the value might be. it runs on a 7.2 nicad batttery pack. The thing that pisses me off is i dont use it much at all but its nice to have and when i go to turn it on poof it quits. I charge the battery evry month though to keep the charge up.
thank for your comment sugestions in advance

---> My reply to what Al Ciesynski wrote 1/20/2004 9:50:45 PM

I have had the same problem, would be interested to hear what you find out

---------- Original Message -----------

i have a opto scout 40 that needs to go in for the 5th time in five
years. its always a voltage regulator. Ive complained so many times
but all they do is keep taking my money. I always use the factory
supplied power supply plugged into a surge protected outlet and this
thing keeps frying. Anyone had this same problem. I took it apart and
found the culprit its burnt. Its a v reg but im sure opto wont sell me
the part i need and the number on it is 470 thats all i know. Anyone
got an idea on what the value might be. it runs on a 7.2 nicad
batttery pack. The thing that pisses me off is i dont use it much at
all but its nice to have and when i go to turn it on poof it quits. I
charge the battery evry month though to keep the charge up.
thank for your comment sugestions in advance
al

In my experience its comments like the ones from news.vif.com that shows their real frustration in knowing that the country they live in cannot compare to the one to the south of them. So, they berate it and belittle it and hate those that live in it. Id invite them to join our military forces while we join theirs and see who has the real guts and dedication to put their backbone where their mouth is. As I recall, I didnt see any Canadian troops in Iraq, or Afganastan. And heard very little sympathy when our twin towers went down. Yeah, yeaa Canada.

I was aware of the additional card.
So now you're saying that the 785d's are being axed?!

So soon there wont be a Uniden 1000 channel radio without paying $500+ dollars?!

I thought this radio just came out in late '02?
With the exception of the BC780xlt (yes, less channels, no digi capability) there wont be a 'middle' of the road scanner by Uniden? Its the 780 or pay $500+??!

The next town over from me uses a digital system for the police department and there are at least 2 other local departments that will be switching soon. To answer your question - it depends if anyone is using a digital system.

Tell that to the families of the Canadian soldiers who were killed by US bombs. The pilots who dropped the bombs in Afghanistan that killed the Canadian troops in April of 2002 probably didn't see them, either, I guess.

Well, actually they *did* see them, but went ahead and dropped the bombs before getting the proper clearance and target identification.

The scanner is fine. To program it put it hit the Manual key tuil the
desired chanel comes up. Then enter the frequency an hit the enter key. If
you press the Review key it will show what frequency is in the chanel one
digit at a time. Forgot the exect frequency range but it is close to 29 to
54 mhz, 140 to 170 mhz and 420 to 470 mhz. The WX or weather button willl
let you go to one of several weather station frequencies.
I have one I bought second hand about 10 years ago and it is still
scanning. It uses a capacitor to hold the memory if the power is lost or
unplugged suspose to be good for several hours.

Very good information and I thank you. Never considered the loss
factor and where to put preamp in the line. I think my answer is
better antenna and I am thinking of putting a discone on roof and
running coax to my desk. sounds like that is the way to go. Do
discones have gain? I am trying to hear 800mhz system that is approx
30 miles away

I have a Panasonic 2.4GHz. It's three years old, so I'm not sure what
the current model would be. It's from the GigaRange Extreme line.

http://catalog2.panasonic.com/webapp/wcs/stores/servlet/ModelList?storeId=11251&catalogId=
11005&catGroupId=11107

I have 2 acres, and I can be anywhere on my property, or even at the
neighbor's house, without any loss of signal at all.

My wife has had the same phone in her home office for the same length
of time, and the signals have only crossed two or three times in those
three years.

When the phone dies, I won't hesitate to buy another one.

In the movie Mission Impossible they use a scanner I think it is either BC245 or BC220 next to a laptop and it is searching frequencies. what are they doing there?? It's almost like they are faking it and using the scanner as a counter? I was only half watching it and didn't see what they were hoping to do but the frequencies were running up from 30mhz to upper 40s and they mentioned that it was picking up the hard drive operating frequencies too. What do computers normally run at in mhz?

It's too bad but the trolls will eat this company alive in the usenet
groups. No matter what the merchant will say there will be someone to
slander his name. It sounds to me like an honest mistake and the
company tried to make it right but now it doesn't even matter because
it's open season and they are closing in. I would say to the store
owner just ignore what they say and do business as usual you did
nothing wrong. they will eventually get bored and move on to another
target

>>I am trying to hear 800mhz system that is approx 30 miles away<<

Maybe it's been discussed (I just tuned in) but have you considered a vertical beam antenna, like a TV antenna on it's side with just a slight tilt.
I suspect you are fighting a loosing battle. My son (a fire fighter) lives on top of a hill (you can see for miles from his porch) has tried to monitor the 800 system in the city that he works in ( aprox 30-35 miles as the crow flies) and can't even get an occasional peep out of the system.

I've never used a preamp on the 800 freq's but have on other freq's (HF and VHF) and they have all (some homebrew and some store bought kits) been very disappointing, seem like they raise the noise level more than anything. RM~

Check out the one in Matt Damon's movie, "The Bourne Identity". You
gotta be sharp because it goes by quite fast during the chase scene.
I've never seen one like it before. I believe that it's scanning the
French Police at or around 500 Meg's.

This sounds to me like typical RF-ignorant Hollywood "creative
license."

While all hard drives have a microprocessor on them, with a clock
oscillator, listening to whatever tiny amount of emission it produces
(even assuming you can pick it up without a preamp) is a waste of time.
If you hear anything at all, it'll be a blank carrier, perhaps with some
digital noise on it.

As for modern computers, they operate in multiples of GIGAhertz.
My own workstation, an AMD Athlon MP system, operates in excess of 2GHz.

Again, listening to whatever RF emissions come out of a computer
is an exercise in utter time-wasting. There's nothing there that the
human ear -- or even another computer -- can make any sense of.

Now, monitoring the emissions off Ethernet cables with another
computer, and some extremely sophisticated (and expensive) receiving
gear... that's another issue, one that I don't have enough knowledge on
to go any further than saying "yes, it's technically possible."

Keep the peace(es).

actually computers and associated equipment can be " easily "
eavesdropped upon ..and a HUGE worldwide industry is based
upon this process. the obvious ways of tapping LAN , WANs, and
telco equipment is one way ... BUT RF and IR ( from pannel mounted
LEDS are other less well know ways.

the most common ways to eavesdrop on computers via RF or IR are to
listen to the immensely powerful raster scan from a computer CRT.
these can be eavesdropped upon from several blocks away with
with a directional antenna. also , optical eavesdropping on pannel
mounted LEDS ( like on a router or other mainframe items ) is another
choice. ( see one through a window !! )

type : eavesdropping on computers " into Google for over 52,000
hits and some eye popping information. ( or : RF eavesdropping on
computers " )

" war driving " has been a popular computer eavesdropping and hacking
hobby for some time ... and it isn't even illegal yet. but many
people add to this type of RF eavesdropping the additional deminsion
of just remote monitoring the CRT display to get easier info and
insight into the " marks " activities. VERY popular with some
detective agencies these days.
( type wardriving into Google too , or even ebay for the latest
equipment )

this type of computer eavesdropping vunerability is the chief reason
that ALL classified government and military installations have
conductive film on all outside facing windows. this is " absolutely "
required at civilian subcontractors too. even many computer hackers
line their room walls and windows with foil to stop outside discovery
of their activities . a really fun and interesting topic.

this stuff has been around for a decadeand half .... but still a very
modern topic.

a quick question...newbie to HF so please be gentle.

a 25 mtr wire to go into a 12 ( ish ) mtr garden. Is it possible to double the wire back on itself so it extends out 12 & half
mtrs then loops round and back up 12 & half mtrs ?

just been told this is perfectly acceptable ( it's the wire length that's important rather than how it's installed ) but i seem
think i've been told this is a no no.

would the above installation effect performance ?

looking forward to advice

Hang in there, Dave. I think the problem is that a lot of the time the crazies in Quebec get all the press, and the great folks in the rest of the provinces end up getting lumped in with them as "Canada."

As someone with several good Canadian friends, I'm privileged to know each of them, and also agree that they were outraged over 9/11 and that they support our efforts against terrorism.

The discone has no gain. It is designed to be a very wide band antenna, not a gain antenna.

Whatever antenna you put up, if you are mainly interested in 800 meg reception put the BEST coax you can. Stay away from the thin RG-58 like the plage. As mentioned, there is a loss in the coax. However, there is considerable variety in the amount of loss with differnt coax. AND the higher the freq (800 meg espically) the higher the loss using a given coax. (coax A may be fine for VHF, but terrible for 800 meg, while coax B may be excellent for VHF, and OK for 800 meg) Also, if you can arrange it try to make your coax run as short as physically possible to minimise loss.

Basically, you get what you pay for when it comes to coax.

Richard in Boston, MA, USA

> LEDS are other less well know ways.

How, pray tell, is a panel-mounted LED, tied directly to the DC
power output of a power supply, going to emit anything useful?

Also, you didn't read my orginal post far enough. It IS very
possible to eavesdrop on LAN traffic across copper cables via their
emissions. It's just that the equipment it takes to reliably do so, from
any reasonable distance in situations where you do NOT have access to a
direct connection, is well out of the realm of tools that the
'consumer' can easily get (or know how to use).

> the most common ways to eavesdrop on computers via RF or IR are to
> listen to the immensely powerful raster scan from a computer CRT.

...A method which I'm in doubt even works. Even if there is
something to it, I'll bet it doesn't work with flat-panel displays,
which barely emit anything at all outside of their shielding.

> these can be eavesdropped upon from several blocks away with
> with a directional antenna. also , optical eavesdropping on pannel

Then I suppose I should be grateful I have obscured glass in the
garage. ;-)

> " war driving " has been a popular computer eavesdropping and hacking
> hobby for some time ... and it isn't even illegal yet. but many

And it can be easily defeated by implementing basic security
measures on the wireless network. Try again?

^ a 25 mtr wire to go into a 12 ( ish ) mtr garden.

Heed Robert Maskill's message.

If your garden permits, have the wire slope upward at an angle so that the horizontal distance is less than 12 ( ish ) mtr.

Frank

>
> How, pray tell, is a panel-mounted LED, tied directly to the DC
>power output of a power supply, going to emit anything useful?

uhhhh .... well it's the led " IR " ports. they are
all over the place these days. front of my computer, on handhelds , on
printers , cameras , PDAs etc. we generally ignore them , and
fail to remember their presence. ( I disconnected the one on the
front of my computer and my printer just in case , since I don't use
'em for anything )

>
> Also, you didn't read my orginal post far enough. It IS very
>possible to eavesdrop on LAN traffic across copper cables via their
>emissions. It's just that the equipment it takes to reliably do so, from
>any reasonable distance in situations where you do NOT have access to a
>direct connection, is well out of the realm of tools that the
>'consumer' can easily get (or know how to use).

naturally the government has been doing it for decades ...
civilians are just recently getting into it. " extremely " simple
wideband preamplifiers ( available at radioshack or from lan dealers
on ebay ) are all that it takes to get into the act. just plug one or
two into a hand held 15 element log yagi antenna ( also common on
ebay ) your datamodem on the other end and if sufficient signal is
present ... you've got copy. ( obviously it's bit more than this , but
I don't want this to become a " how to " . the info is commonly
available on the web , tho )
since you are a ham ... you'll understand this :
just get a cheap ( $15 to $45 on ebay ) signal level meter.
( I use a modified cushman ce-24 ) ... mod the I.f. to " wide "
( jump the filters ) tap the I.F. before the detector and schmidt the
output to a logic level. " presto " a wideband supersensitive signal
receiver that can tune and detect / output digital signals. it's that
easy.
tune " any " selective level meter ( with a small external antenna )
across the lowest bands and listen to the " immense " jumble of
computers radiating from ALL OVER your neighbor hood. there will be so
many ( if you live in any average metro area ) that you have to
drive up , outside people's houses to make sense of all of them. it's
a mess , there are so many.
the cable company also makes it VERY easy in my part of the world ,
as the cable connections are ALL outside people's houses in a
green box , partially buried , out near the curb ... outside every

house. no electric or other wires to be seen , here , all in the ground .. right at the curb. clean looking but doesn't contribute much to security. " all " of the signals , running loose in / on your computer ... leak out on your cable modem connection wire ) phone lines for DSL ) , on the coaxial shield. kinda makes it too easy sometimes. the same goes for your electric lines. those so called " common mode " RF filters do VERY little to remove the signal from the ground wires in your home AC power system. they do seem to vanish at the local transformer , for some reason.

>
>> the most common ways to eavesdrop on computers via RF or IR are to
>> listen to the immensely powerful raster scan from a computer CRT.
>
> ...A method which I'm in doubt even works. Even if there is
>something to it, I'll bet it doesn't work with flat-panel displays,
>which barely emit anything at all outside of their shielding.

try reading the Google links that I mentioned and see if you still don't . it wouldn't be a billion dollar industry if it didn't exist. ever been to the new CIA building ?
they have an interesting display of eavesdropping equipment there on public display ( or did have at least ) lots of the van eck stuff is there. it's WAY old stuff compared to what they have nowadays. they consider the stuff shown on the web to be so old and dated ( the RF eavesdropping equipment ) it's laughable to them.

>
> Then I suppose I should be grateful I have obscured glass in the
>garage. ;-)

well ......remember that it's a IR signal source and IR can pass through some ( apparently ) opaque glass surfaces and has a nasty habit of bouncing / reflecting off stuff that we wouldn't ordinarily think it would. there are " laser " inferometers that you can bounce off a plane of glass and get a scatter beam return that can contain the original optical energy and " any " other optical energy from behind the glass. ( actually a optically generated sub carrier of some lower bandwidth than optical freqs ... but certain angles of attack from behind pass through and leave too little of a signature ) the 60 hz signal created by ordinary house lighting is easily " optically " ( and on audio freqs too ) filtered off the signal path. if " the boys " want into any of your optical ports , a simple fiber scope under the door or through a lock hole will do the trick easily.
surely most of us don't have anything going on " the boys " would ever be interested in ..... but it's information worth thinking about , never the less.

guard your IR ports, " all " of the CPU freqs ( of everything in your box and there are many , esp on accessory cards ) and the raster scan leakage / rf signals present in your computer systems. it's difficult

to do ( crappy or NO shielding on about everything ) ... much more than people expect. air broadcast , your cable and your home power wiring are your worse enemies in that respect.
( freqs of 15khz to .45 megs .... freqs of 266 mhz to 3 gigs and ... 902 nm IR. all this changes a lot , tho )

I seem to have to run hard to keep up with all the new stuff ..just when I get comfortable with something new ..it seems like 10 more new " things " pop up. it's exhausting at times ... and often I think that a certain amount of blissful ignorance is a good thing , too. ha ha ah ah aha ha ah sometimes it's better just not to know.
who needs it ?

73s
the K man .....

If you are using RG6 cable and a tv amplifier, you are probably not
even making up for the cable and connector losses with the
added amplifier.

If your antenna is unity gain, you actually have a signal LOSS
by the time it gets to your scanners.

RG6 is a fairly low loss cable, at the extreme of 2.2 GHz it is 9.7 dB loss per 100 feet. Most preamps are in the order of 10 to 20 dB. Considering that most of us listen below 1 GHz where the loss is even lower, I would respectfully disagree with your conclusions.

I use 50 feet of RG6 and a scantenna and have no problem picking up anything within my radio horizon.

I have never used a preamp.

Hi Rob,

half the problem i have is that i've no knowledge about long wires so this is all new territory.

my garden is just a general rectangular shape but just not too long. End fed is an easier installation as i can come out of the
loft with the feed then straight onto the supports....this would then give me decent height for the wire. I'm going to put up a
pole the other end of the garden.

I'm planning on general SWL. No particular freq.

I'm all for experimenting with numerous combinations etc but for now. i just want to get it all up and running , test the water
so to speak then take it from there.

thanks for replying anyway. Any other contributions gratefully received

regards
Simon

Bill Crocker <Fs6dnQk8-b4VgZLdRVn-jg@comcast.com>...

^ Check out eBay...

That's cruel.

^ ...search on YAGI ...

A Yagi is not difficult to construct, especially if it is for receiving only.
All that are needed are a wire clothes hanger, wire cutters, soldering iron,
and 50-75 ohm coax. Measure the driven element for about 900 MHz and visually
estimate the lengths of the remaining elements.

Frank

^ cancel out....
^
^ Do you mean :bends should not be MORE than 90 degrees...?

The angle that is a result of the bend should not be less than 90 degrees,
with the wire constituting both sides of the angle.

Electrically, the signal should not make a turn greater than 90 degrees.

Frank

Just use the longest length you can without the wire turning back on itself. A right angle in the aerial is fine but if it turns back on itself you are unlikely to get any benifit from the extra length. 12 metres should be long enough unless you are using an insensitive receiver or are in a remote interference free area.

My advice then is put up as much as you can, but don't make any bend
greater than 90deg

I have 1 130ft end fed up here with a loading coil on the end which I
use on 1.8MHz for transmitting, tuned against an earth. That works very
well. It's over the house and round 3 sides of the garden.

Have a play and experiment, that's part of the enjoyment....

I should add the that - not only are you unlikely to get any benifit but
it'll probably be less effective on most frequencies.

If what you say is true, why is almost everybody in the rest of the world busting their home borders to come here? Being an "old guy" I remember living in the U.S.A. long before it aspired to the Europeanization trend that seems to prevail today. I liked it better then. The move toward socialism/statism is what makes todays lives "suck".

you're right about that .. and some in ways you might not expect. I have a 2.4 gig wireless WAP installed in my home . it's a Linksys wireless router that feeds wideband cable to several different computers and a laptop which I move around a lot.

I also run a Zone Alarm ( freeware ) software firewall on each machine on the router. I have the router set " tight " ( no outside port access ) and when testing on those web security sites , it reads " invisible " .. highest level of security " as a test result.

well don't buy into that for a minute !!! on ANY machine on the system , I can kill all the browser programs and set Zone Alarm to " lock " ( kill ALL internet activity ) and when Zone Alarm is in lock it reports " any " attempted intrusions. ( which naturally there shouldn't be any since my hardware firewall is on " tight " < highly secure > and should let NO inbound communications pass with no internal web programs opening the ports )

in this supposedly secure state , Zone Alarm will report as many as 3 attempts per minute , from my ISP to gain access to my computer, or as many as several hundred attempts per hour. ( on hundreds of random port numbers ) it shouldn't be possible for people or equipment to literally " pass through " my LinkSyS firewall router ... but there it is in " spades " ... just like it wasn't there. it's not like it's a trojan on my computer or something .... it happening in the firewall .... but it makes one wonder what program it's trying to contact on my computer too.
haha ha ahahahaha

I have a number of friends and family members that also use the same wideband cable company and ALL of them have the same thing happening at their houses when I check there .
questions to the cable company bring NO return answers.
I have one friend with DSL and even he has the same thing happening.
I have used " Link Ferret " to try to monitor and disclose the data stream packets and it rarely says more than that a packet passed ( not identifying them ) or reports a " broadcast " and says nothing more.

additionally the fact that Zone Alarm doesn't report ANY intrusion attempts when not in the lock state , ( or outgoing comm attempts either ) must mean that the communications attempts are passing through Zone Alarm when in the active state too. Sooooooooo ..... whom has the technology AND information to pass right through both a LinkSyS hardware firewall and a software firewall ??? nothing about this is happening in the hacking circles ...

hummmmmmmmm ......... interesting stuff. take a minute and
get a free copy of Zone Alarm ( or some other software firewall )
and lock it down and see if you have the same thing happening at YOUR
home location. you might be both surprised and shocked at the
results.

network or wireless net security ..... not exactly ....... maybe
homeland security has gone a bit tooooooo far ..... dunno
but it's all a little scary if that is what it's all about. ( to me
anyway )

k.................

They aren't encrypted per se (AFAIK), but they are encoded to conserve bandwidth, which amounts to about the same thing: they are not typically viewable as plain text. I work for a taxi company, so I can watch our base station monitor and see what the message flow is like. You can identify message types when you understand the system better, but the only clear text (again, AFAIK) is when dispatch sends a text message to an MDT head.

I have no idea how they are encoded, so sorry, can't help you there. You might try befriending a techie at a taxi company and see if you can wiggle access to the manuals. You might even ask your local taxi company for a tour of their operations and data center (tell them your interest in radio communications) and they might show you what the monitor looks like and you might see a message flow.

And I have no idea about credit cards. The swipe reader (notorious, even more so with this non-rectangular credit cards) are add-ons (at least for our equipment), I would think that the software would at least pack the CC# to save bandwidth, if not encrypt it entirely. They know how many scanners and thieves are out there.

DDS is the biggest and best dispatch system for taxis (yet again, AFAIK), we use it as does our biggest competitor (two major players, several mom & pops). Our config requires 4 PCs in the computer room to run the back end. It's quite a setup.

## 730. Rack Mounted Equipment!

Newsgroup: rec.radio.scanner
Date: 2004-01-22 23:19:33 UTC
From: Bill Crocker <wcrocker007@comcast.net>
Message-ID: <1LWdnTUuEJd4xI3dRVn-uQ@comcast.com>
Source record: 22770

There is a company out of California, called NovexComm. They manufacture, and sell various rack mounting options for radio equipment such as Icom, Collins, Drake Kenwood, Ten Tec, JRC, etc. You may have seen their racks for the Icom R7000, R7100, and R75, on eBay.

I emailed them yesterday, inquiring about rack options for the newer Uniden BC780XLT, BC796D, etc. I received an immediate reply from Dick Robinson. He claimed there is a significant start-up cost, every time they offer a new model, for design, and tooling, and that they can't even consider it, unless there was an initial demand for 50 units.

I currently own two Unidens, a friend of mine owns four, and I noticed the guy at MilAir Comms (http://www.milaircomms.com/ ) owns seven Unidens, in that form factor. I think as popular as they are, coming up with an order for 50 might not be out of the question.

I'm thinking, it would be really cool to have maybe one that holds a radio, and a speaker (which he provides also). Or possibly one rack, that holds two radios!

Check out his web site, and pictures. Use your imagination, as to how neat your Uniden's would look, mounted by this method. Let me know what you think. Maybe we can stir up enough interest to have them built!

Here is his contact info, if you're interested:

Krakula is right,

there is very high, technically advanced cottage industry growing
around ways to evesdrop on computers from distance. And people have
found ways to decode the blinking LED lights on a router panel, ways
to evesdrop on the RF coming off a computer monitor such that it is
possible to completely recreate what is on a computer monitor in
another room.

I'm not a paranoia wonk, and this kind of stuff is no where near ready
for the average consumer. Nor is the technology used to spy on the
average person. You can head over to http://www.slashdot.org and
search their discussion archives for these topics, and you'll be
surprised at the techincal discussions that revolve around these
topics.

hth,
jeff

If you havent noticed, not everyone in the country works for Wal-Mart. Why
dont you do some research and see what the average wage in the US is and
report back to us here. That is your school assignment.

But the average wage doesn't mean a lot to a great many people. The average income is skewed by a very few very high paid corporate execs (who make many times more a year than does the president), entertainers and sports figures. This has the effect of raising the median income significantly when figured as part of the whole. For every Enron exec making millions a year, there are thousands of folks making less than $20G, which isn't a living of any kind with our cost of living. There's a whole lot of grunt labor out there, including a lot of the salespeople at your favorite radio store, that make much closer to minimum wage...

You may want to add an antenna tuner to the long wire ,I fully understand that this is a RECEIVE
ONLY application. The tuner will help even when just receiving!
Here's a source

<http://search.netscape.com/ns/boomframe.jsp?query=MFJ+tuners&page=1&offset=0&result_url=redir%3Fsrc%3Dwebsearch%26amp%3BrequestId%3D7e7f6f064acb4cd7%26amp%3BclickedItemRank%3D7%26amp%3BuserQuery%3DMFJ%2Btuners%26amp%3BclickedItemURN%3Dhttp%253A%252F%252Fwww.mfjenterprises.com%252F%26amp%3BinvocationType%3D-%26amp%3BfromPage%3DNSCPSuggestion&remove_url=http%3A%2F%2Fwww.mfjenterprises.com%2F>

Hi...

I need a Program to control my Icom R7100 from the PC.
Memory download/upload ect....

Not sure what I have to look for.

Can anyone advise ?

Thomas / OZ1JTE.

Jim Mac Donald <401108D6.F8E46FC@mitre.org>...

^ You may want to add an antenna tuner to the long wire ,I fully
^ understand that this is a RECEIVE ONLY application. The tuner
^ will help even when just receiving! Here's a source

The lowest priced tuner there is $80! I doubt that the little improvement you get will be worth that much.

Frank

I'm not sure what you want MixW to do for me.
Only very few thing this program can control on the radio.

I need a program to download my memory list from the radio, then make some corrections to it, and then bring it back to the memory in the radio.

I have tryed ScanCat and I have tryed Radiomanager also, and I find both program very poor in performance.
Very hard to get working on a fast PC, and lot of errors when communicating with the radio.

Thomas / OZ1JTE.

me thinks about the math for a second
lets assume you are correct
1000 people at 20g/yr
1 enron exec 10million/yr

1000 X 20,000 = 20,000,000
1 X 10,000,000 = 10,000,000

total 30,000,000

average

30,000,000/(1000 + 1) = 29,970 and change
actually that doesnt seem to me to skew the number all that bad

That is quite correct. There are really not enough of the very rich to skew the numbers to a significant degree.

Nonsense. While I don't agree with everything Leonard said, he is absolutely correct about the taxes. When you compare the entire tax burdens (sales, sin, property, state income, federal income, and so on), most Europeans don't pay higher taxes. Further, because of the often higher saleries, Europeans usually have more money to spend after taxes. Yet, in spite of this, Europeans still enjoy the benefits described below. I've worked in both places, paid taxes in both, and know this to be the truth. If more Americans did the same, they would also realise the claim of "enormous taxation" in Europe is false.

Can anybody tell me if the Uniden BC860XLT has a discriminator? If it does, how can I identify it?

Even better: we were at Costco today, and picked up a new Panasonic 2.4GHz phone (Model KX-TG2382) that includes two extra handsets, each with its own charging station. Total package was $150.

www.scanstar.com works great not only for the R-7100 but several others,
don't forget about some sort of serial interface converter..
www.optoelectronics.com will help in this area..

all FM receivers have a discriminator!
u can't list to FM without one!
you will usually find it close to the 455kHz ceramic filter
look at then in the maplin cat.

mike

We need incidents like this to remind us every now and then that there
is no free lunch when it comes to "wireless" communications (Sorry
about that pun, but I couldn't resist).

In my mind, this is merely teen age pranksterism. No, it's not a very
sociable thing to do, but it's not exactly as if they hurt sales of
fast food retailers nationwide. What worries me are those busybodies
who are so offended by this "awful" behavior that they'll attempt
additional legislation against it.

This is how bad laws get passed. We need to watch carefully and
ensure that these busy-body twits are thwarted and sidelined. Teen
pranks shouldn't be cause for raping our judicial system with ill
advised legislation.

Mainly because the noise factor is too high, the frequency range too broad and the initial amplification would not be at the antenna but at the other end of the coax. Signal losses occur from the antenna to the amplifier. Bad idea.

sogs wrote:

Almost no FM receivers have a discrimimator now. The discriminator is a specific type of circuit. It has mostly been replaced by ICs that use other methods of detecting FM. He is looking for a point to take the output just after whatever type of detector is being used.

Here is a list of scanners and chips that someone posted in the past. If your scanner is not on it , look for an IC that matches any of the ones listed. Take your signal off the baseband audio pin.

@@@@@@@@@@@@@@@@@@@@@@@@@@@@@@@@@@@@

There is a growing interest in tapping the baseband audio out of various scanners for decoding of a variety of esoteric signals, including CTCSS, SCA, FSK, RTTY, FAX, etc. By and large, such signals cannot be take from TAPE REC jacks, headphone jacks, and EXT SPEAKER jacks because of the voice-band filtering that is done between the signal source and these output jacks.

Therefore, it is necessary to tap the "baseband audio" directly at the output of the discriminator chip for your scanner. The below Table shows a list of scanners, the discriminator chip(s) used in the scanner, circuit symbols of those chips, and three pins of general interest on the chips: RF-Input, Scan Control, and, of course, the baseband audio pin.

Even though your scanner may not be listed, if you can find its discriminator chip, it will be listed with one or more scanners below, the pins of which will be the same for your unlisted scanner! Corrections and additions to this list are requested. See my email and other addresses at the end of this file.

I have 6 Scantennas tower mounted at 125 ft. They are pre-amped with the RS VHF/UHF TV mast mounted amp. They work great for a broad banded antenna from 25-800 mhz. The performance in the 406-420 mhz. range is not as good as the other frequency ranges, but it is ok. I highly recommend them. I use RG-6 coax cable for a feedline. I have been using Scantennas for over 15 years. I have tried many different antenna configurations, to include custom made yagis, etc., and the Scantenna always outperformed the others. The Scantennas are somewhat directional. They are ugly to look at but they do the job. I consistently hear a NOAA broadcast on 162.525 mhz. from State College, Pa. State College, Pa. is approximately 225 air miles north of my central Va. location. I have dedicated scanners/receivers for different frequency ranges of monitoring interest. Grove Enterprises sells the Scantenna.

Get rid of the discone. By design discones are broadbanded and have little if any gain in a specific frequency. Buy a Scantenna from Grove Enterprises, buy a Radio Shack VHF/UHF TV mast mouted amp (300 to 75 ohm) model, use RG-6 coax and mount the Scantenna as high as possible. Grove also sells F to whatever receiver chassis adapter needed.

Prodigy wrote:

>There is a company out of California, called NovexComm. They manufacture,
>and sell various rack mounting options for radio equipment such as Icom,

Rack mounts are good, but the speakers are EXTRA crappy. Poor audio
quality and even worse output.

Better off going with a Motorola or GE speaker and mounting them on
a rack blank. Sound quality is much better.

I inquired from him about the scanner rack mounts as well.

They DO make generic rack shelves with blank fronts that you can
drill and cut yourself with mimimal effort, and they are MUCH cheaper
than a custom run.

All somebody has to do is make and sell a drilling/cutting template.

## 766. Re: inmarsat receiving

Newsgroup: rec.radio.scanner
Date: 2004-01-23 22:45:15 UTC
From: john wilson <jwilson9@erols.com>

Source record: 22656

I wrote a 2 part article on monitoring and configuration a system to receive INMARSAT for Monitoring Times magazine Feb/Mar 94. From my location in central Va. I can receive both the Atlantic Ocean Region East and West INMARSATs. The analog voice traffic from type A and B INMARSAT installations of different languages is much reduced from past years. There are lots of analog fax. A large antenna, minimally 6 ft., preferably 10 ft., .9db NF LNA, length of RG-6, 12VDC power supply, 20 db in line amp, "coffee can" feed for 1500-1600 mhz., 12VDC block that passes 1500 mhz. signals and necessary type F and N connector adapters are needed. It is assumed that a worthy receiver such as a R7000, R7100 or AOR 3000A is available. I can supply almost all of the components but in total, it does get expensive. The most expensive component is the low noise amplifier. The reception rules are different when attempting to receive microwave signals. You are correct about the trend of using INMARSAT M terminals.

In Virginia there are 4 licensed lojack tower operations. ALL are located on the north/south I95 corridor. So if one steals a car so equipped avoid I95. Some VSP cars have Lojack equipment and it does work. I recall more than one occasion hearing of stolen vehicles triggering the VSP lojack receivers and catching the crooks. The VSP lojack equipped cars in addition to the other antennas have 4 vhf 1/4 wave vertical antennas cut for 170 mhz. They serve as a crude form of direction finding.

Almost every night at least one Cuban radio station can be heard in
Virginia.

Most of the 2 ghz. point to point cell "hand off" links are digital.
The landline side transmission probably is digital. There are some analog
cell phones still in use but in time everything will be digital.

...an "enterprising ham"....a modified two meter rig? Don't be ridiculous! No two meter rig with an upper frequency limit of 148 mhz. even expanded for MARS operation on 149 mhz. is going to have the capability to reprogram in the 154 mhz. range. You need a reality check. The closer truth is some teenagers with a little technical knowledge and shit for brains. The FCC recently authorized MURS which are certain high vhf frequencies that do not require a license. The equipment, typically an HT is available from Radio Shack or other sources. Two of those MURS frequencies are 154.570 mhz. and 154.600 mhz. typically are two of a 5-6 low vhf/high vhf frequency combination licensed to fast food operations. Some use a pl tone and some don't. I can hear a Burger King on 457.5125 mhz. 1/2 air mile from my home and a McDonald's drive thru on 154.570 mhz. 1 1/2 air miles away. The only surprise is that it does not occur more often.

Forget that silliness and aggravation. It won't work. The downconversion losses will kill you IF you ever were successful in configuring anything. Go to "www.videoscanner.co.uk". G1MFG, a manufacturer of ham radio equipment, makes a 2,400-2,600 mhz. audio/video scanner. It basically is a 5 inch B/W monitor with a 2.4 ghz. scanning circuitry built in. It is 12VDC power. A scan frequency graphic displays on the top of the screen when scanning. I have had mine for over a year and it is a lot of fun to use mobile. It works good, really good. Rarely do I drive more than a few miles near any civilization where I don't get a "hit". Users include but are not limited to remote security monitors, public service or private sector air and or ground covert video surveillance, wildlife monitoring, robot bomb disposal control, Fire Dept. Infrared detection, in car race video and video senders that are used to relay tv programing from one part of a house to another, or video baby sitting. It has no problem detecting and locking onto NTSC baseband signals and demodulating any audio subcarrier that may accompany the video. I modified my videoscanner unit by carefully removing the chassis 2 ghz. "paddle" antenna and replaced it with a 2 ghz. rated coax jumper with a male N connector. I had a company in Florida modify a 2 ghz. mobile mag mount antenna they sold with a male N connector. I use a female N "barrel" connector to connect the two jumper coax cables.

Contrary to conventional wisdom, my reception experience has proven that 2 ghz. signals transmit much much farther than the public has been led to believe and can be received much farther away than one would imagine. Some 2 ghz. point to point links can be as much as 5-10 miles distant.

The Videoscanner costs about $385 including shipping from England. You cannot buy one in the US.

FYI most of the frequencies of interest mostly are ABOVE the 2,450 mhz. upper cutoff frequency. There is no comparable product available at the consumer level.

I publish the "USA Surveillance and Detection Directory" that currently contains approximately 2,000+ listings of vhf/uhf and 2 ghz.+ users and covers all 50 states. Just because you live in small town don't think there isn't any covert audio/ video surveillance activity. Some users operate statewide and interstate. The 2004 edition now is available on CD ROM in MS EXCEL format for $20 plus $5 shipping. For ordering information send an email to: < jwilson9@erols.com>.

The Icom IC-229H can be made to operate up in that range... easily.

Yes indeed! An "enterprising ham" (or anybody else) with a Yaesu Ft-2400,
FT-2500, or even the dual banders can clip a wire, desolder a jumper and be
good to go up to and above 164 mhz.
For instance. It is all too easy to modify one of these rigs to transmit on
154, 155, or higher freqs. All one needs is an antenna that handles these
frequencies without causing the protection circuit to dump the radio. A Rad
Shack discone is one such antenna....
Don't be ridiculous...know whereof you speak.

Well..it's NOT the most sensitive RCVR, but however...that in itself is a blessing! A lot of times a RCVR that hears down to .5 microvolt WONT hear all the crap a RCVR that hears down to .1Microvolt will. People put pre-amps in front of some RCVRS..only to "Desense" the front end to the point they are deaf.
I have several RCVR's here and the PRO-2006 hears as good as many of them. It outperforms a lot of them on the 902-935Mhz band. While the Yaesu VR-120 is making gurgles, the PRO-2006 is quiet (or hears what is REALLY there)...Eddie

Source record: 22674

The "Lojack" units listen on the same frequency the transmit on. If your hearing one every 60 seconds or so, your hearing a base station polling the mobiles. Lojack has two transmit modes...every 10 seconds and once a second. Transmit rate is stepped up once a law enforcement unit picks up the alphanumeric beacon. Local FM SCA carriers have NEVER been used to control anything with Lojack.
The Lojack transponder is activated ONLY after the car is entered as a "Stolen" in the database....Eddie

Depends on how much you are willing to spend. Personally I have antennas up
for most bands that I want to listen to - however I did notice a big
difference in signal strength when I tuned up my 40m dipole on 15 metres
versus using the 40m antenna without the tuner - signal strength was
significantly better (around the 4-5 "S" points higher). Same thing when I
tuned up my 10 metre vertical for 15m.
I have just about exhausted all room for antennas on my block, so as I
cannot put any more up, a tuner will likely be the only way to go
Guess that it depends on whether you want to hear the lower down signals or
not.

Matt

Better yet: an antenna cut to resonance. Since 154Mhz is a popular business
frequency, antennas designed to transmit here are inexpensive and easy-to-find.

Wow, I posted that a long time ago but thanks for the heads up! I had the
exact same thing on another scanner which never had that problem before
(it's in my original post) so I don't think it was a b i r d i e and I'm
never s o l. ;-)

Patrick AFB Area Log, Thursday 22 Jan 2004

REACH H5S
12:52am: Area transition.
[119.825]

KILLER 11: F-16 flight, Royal Netherlands Air Force.
10:00am: Working at Avon Park Bombing Range; some work with FAC "Windmill."
10:55am: RTB Cecil Field.
[279.6, 349.0, 273.55, 251.15, 292.2, 285.725, 141.7]
Note: These are the fellows who were unceremoniously forced from TDYing at Melbourne IAP by some folks and politicians who were disturbed by their noise. They are now flying their training missions out of Cecil Field in Jax, but have returned to using Avon Park Bombing Range, thankfully.

ANVIL 03: C-130, WV-ANG 130AW, 130AS, Yeager A/p Charleston WV
10:38am: Lands Patrick.
[133.75, 132.65, 383.0]
Photos: 048MVC-588, 589.

SIERRA 47: P-3 AEW&C Dome, #152722, N147CS, ICE
10:45am: Working in offshore area 5Y.
[267.5 Sealord]

LIMA LIMA 96: P-3C, Jacksonville NAS VP-30 "Pro's Nest" Sqdn.
10:46am: Working offshore area.
[267.5, 339.7]

MADFOX 10: P-3C, Jacksonville NAS VP-5 "Mad Foxes" Sqdn.
10:47am: Working offshore area.
[267.5, 339.7]

LIMA LIMA 74: P-3C, Jacksonville NAS VP-30 "Pro's Nest" Sqdn.
10:46am: Working offshore area.
[267.5, 308.4, 124.9]

AVALON 74: C-9, Scott 932AW
11:02am: Transition.
NOTE: Although Medevac mission now performed by AFRC on C-130s, KC-135s, Scott 932AW keeps 3 acft to train new C-40 pilots.

JOLLY 51, 52: HH-60G Pave Hawk Helos, Moody AFB 41RQS
11:45am: Touch-and-goes at Patrick.
12:15pm: Depart area.
[269.375, 335.8]

SCOUT 05: S-3B, NAS Jacksonville VS-24 "Scouts" Sqdn.
12:28pm: Working Sealord in Whiskey area.
[267.5]

HP 454: SH-60F ASW Helo, Mayport NAF HSL-44
12:33pm: Area transition.
[281.425]

KING 70: HC-130P #65-0970, Patrick AFB 920RQW 39RQS.
12:51pm: Ground ops.
[335.8]

ICE
1:05pm: Comms in clear.
[165.2375]

LIMA ALPHA 051: P-3C, Jacksonville NAS VP-5 "Mad Foxes" Sqdn.
1:16pm: Comms w Oakgrove.
1:21pm: Comms w Sealord.
[364.2, 267.5]

N399N: CE-182Q Cessna, USCG Auxiliary.
1:27pm: Port Canaveral security overflight; comms with CG Sta Port Canaveral.
[157.15]

SNAKE 02: F-15, FL-ANG 125FW 159FS, Jacksonville IAP.
2:59pm: Area transition.
[319.0]

MADFOX 11: P-3C, Jacksonville NAS VP-5 "Mad Foxes" Sqdn.
7:00pm: Area transition.

KING 55: HC-130P #64-14855, Patrick AFB 920RQW 39RQS
7:05pm: Departs Patrick.
[133.75]

MAKO 11 - MAKO 14: F-16 flight, Homestead JARB 482FW 93FS AFRC
7:30pm: Working at Avon Park Bombing Range.
[285.725, 307.1]

AL STERN Satellite Beach FL (28-11N 80-36W) monitoring
Patrick AFB (KCOF) NASA-KSC Shuttle Landing Facility (KX68)

i use an antenna tuner with all my radios and i find that on some bands you
get little to no improvement and on other bands you can get 3 or 4 "s"
points of improvement.
if you want to make one just go to radio havana cuba's website and look in
arnie corro's section and he has all the plans for building one or two
different antenna tuners.

$385 US.. I guess that's not THAT bad.
But, if you're a cheapass and a DIY person like me, check this out..
http://www.ringolake.com/pic_proj/wavecom/wavecom_rx.html

You can find the Wavecom Jr.'s on ebay, for about $40. The rest of the stuff can come from digikey.com or comparable places. Have a nerd friend program the PIC for you. That should all be another $40 including buying your nerd friend a pizza. Stick any antenna you want on it, connect it to any TV you want.. scans from 2300 to 2700 Mhz in .25 or 4Mhz steps! Looks awesome!!

If I was to make one of these, I'd get a cheapass USB video capture device for my laptop. Hook this up to it.. bam! You could be scanning for networks AND 2.4GHz video signals at the same time on the same laptop.

OHHH..

If you found a video signal and a wireless network in the same location, you could load up some webcam software and stream the video over the internet!!!!! That sounds like it'd piss some people off! :)

news:4011B54B.4D53AE2E@erols.com...
Forget that silliness and aggravation. It won't work. The
downconversion losses will kill you IF you ever were successful in
configuring anything. Go to "www.videoscanner.co.uk". G1MFG, a
manufacturer of ham radio equipment, makes a 2,400-2,600 mhz. audio/video
scanner. It basically is a 5 inch B/W monitor with a 2.4 ghz. scanning
circuitry built in. It is 12VDC power. A scan frequency graphic displays
on the top of the screen when scanning. I have had mine for over a year
and it is a lot of fun to use mobile. It works good, really good. Rarely
do I drive more than a few miles near any civilization where I don't get a
"hit". Users include but are not limited to remote security monitors,
public service or private sector air and or ground covert video
surveillance, wildlife monitoring, robot bomb disposal control, Fire Dept.
Infrared detection, in car race video and video senders that are used to
relay tv programing from one part of a house to another, or video baby
sitting. It has no problem detecting and locking onto NTSC baseband signals
and demodulating any audio subcarrier that may accompany the video. I
modified my videoscanner unit by carefully removing the chassis 2 ghz.
"paddle" antenna and replaced it with a 2 ghz. rated coax jumper with a male
N connector. I had a company in Florida modify a 2 ghz. mobile mag mount
antenna they sold with a male N connector. I use a female N "barrel"

connector to connect the two jumper coax cables.
Contrary to conventional wisdom, my reception experience has proven that 2 ghz. signals transmit much much farther than the public has been led to believe and can be received much farther away than one would imagine. Some 2 ghz. point to point links can be as much as 5-10 miles distant.
The Videoscanner costs about $385 including shipping from England. You cannot buy one in the US.
FYI most of the frequencies of interest mostly are ABOVE the 2,450 mhz. upper cutoff frequency. There is no comparable product available at the consumer level.
I publish the "USA Surveillance and Detection Directory" that currently contains approximately 2,000+ listings of vhf/uhf and 2 ghz.+ users and covers all 50 states. Just because you live in small town don't think there isn't any covert audio/ video surveillance activity. Some users operate statewide and interstate. The 2004 edition now is available on CD ROM in MS EXCEL format for $20 plus $5 shipping. For ordering information send an email to: < jwilson9@erols.com>.

Alli

Here's some on line stores

<http://www.grove-ent.com/>

and two others that advertises at strongsignals,net

<http://www.scannersunlimited.com/>

<http://www.usascan.com/>

AGAIN to listen to the Michigan State Police and all the other agencies
on that system you will need a BC 796 or the hand held by Radio Shack ,
PRO-96
The BC 785 with the digital card will not trunk track the Michigan
State Police
system. You may want to enter the 800 Mhz freq. for your county and
listen to them
conventionally to get a feeling for the traffic on trunking systems. You

WILL NOT
be able to follow the talk group channels but you can tell if its
encrypted , digital and if
it's of interest.

i have had no problems with radioworld.excellent service.they have
admitted a mistake and tried to rectify it in a matter which would
benefit this customer.
hey--- sh*t happens sometimes and not all retail establishments would
handle them in a professional manner as in this case.

Are you telling me that it's unusual for hams to operate (illegaly) out-of-band?

(Trying to stop choking from uncontrollable fits of laughter.)

Consider the number of hams who use their dual-banders on the FRS and GMRS channels...or the number of hams who use their HF rigs on the CB band.

I would dare say that *most* hams partake in such behavior at least occasionally.

Not condoning it, just stating that it does happen...and happens frequently.

I have a Create 50-1300 LPDA, new in the box...Wondering if I would be better off putting up a KMA......Worth it or would I even hear the difference??

Thanks,
Ed

# 803. FS: USA Video Surveillance & Detection Directory - 2004 Edition

Newsgroup: rec.radio.scanner
Date: 2004-01-24 22:37:22 UTC
From: john wilson <jwilson9@erols.com>
Message-ID: <4012F3A2.5F74086E@erols.com>
Source record: 22693
Cross-posted to: rec.radio.scanner,alt.radio.scanner

USA VIDEO SURVEILLANCE & DETECTION DIRECTORY

2004
Edition

1. The 2004 edition now is available for those individuals interested in this interesting new facet of monitoring. The directory contains over 4,200 USA 50 state frequency listings and their probable use in state, frequency and city sequence in MS EXCEL format. Users include but are not limited to aircraft manufacturer's flight testing, special event contractor's (aircraft/blimp air to ground ttransmissions for baseball, football, other sporting events), remote traffic monitoring (construction sites, urban streets, law enforcement covert air to ground video/audio surveillance, ground video/audio covert surveillance, private enterprise covert video surveillance, oil companies (off shore platforms), public transportation (may include subway station surveillance), race track surveillance, fire departments using infra red imaging technology, videosender video/audio transmissions of satellite tv or other video/audio signals to other rooms within a structure or to another structure, bomb squad remote control robots, helmet cams and other unidentified video users.

2. Included in the directory package are photos showing a typical live video microwave transmission configuration. "How to" informational files are included that show/discuss configuring a mobile equipment system to receive the video transmissions of interest using off the the shelf equipment available to the public. The recommended 2 ghz. scanning receiver is the Videoscanner. Go to <www.videoscanner.co.uk> for technical specifications and ordering information. Text documentation in MS WORD accompanies each picture with detailed and explanatory comments pertaining to the photo subject matter. It is very easy to configure a mobile video scanning monitoring system. The system components include the mobile wireless antenna with appropriate coax cable and connector, microwave scanner receiver, and if you desire a color picture, a portable tv with baseband audio/video cables to connect to the microwave scanner receiver. That's all there is to it. The concept is comparable to monitoring police, fire, rescue and business radio transmissions on a vhf/uhf scanner/receiver mobile configuration. The main difference is a microwave frequency range is use; an antenna and a receiver capable of tuning analog in the clear frequency transmissions are required for reception. The detected and processed signal is video instead of audio. If an analog in the clear audio subcarrier is present, it also will be detected and processed.

3. Contrary to common belief, a significant number of microwwave signals have a much greater ground wave coverage area than one would believe as you soon will discover when using the aforemention microwave receiver monitoring configuration. Reception distance varies from hundreds of feet to 10ths to 1/2 to 1, 2 or more air miles depending upon the electronics, transmitter antenna gain and location, transmitter power and mobile reception equipment. Some law enforcement transmitter input watts can be as hight as 35 to 50 watts. An air to ground transmission from a 1,500 to 2,000 ft. height may allow reception 20-30 miles away.

4. All directory listing information is sourced from the public domain or obtained from actual off air monitoring. The USAVS&DD is available on CD ROM for $20 plus $5 USPS shipping/handling. No credit cards, Paypal, personal or business checks can be accepted. Payment is by USPS, Western Union or bank money order.

5. If interested email <w4uvv@amsat.org> for specific USAVS&DD ordering information.

>
> Leonard

Your data is incomplete. The top 5% of the people in this country pay about
50% of the total tax take. The top 50% of the people pay 90% of the total
tax take. So the government is already "taxing the rich". If you are going
to stimulate the economy, you can only cut taxes for those who are paying
taxes. Since half the people pay very little or even no taxes, you can't
reduce taxes there. The rich are paying their fair share and more.

Of course the assets of the poor is going to be, little or nothing, and not get any better! They are not working. They do not want to work! Why should they? They get free medical care (show up at an emergency room), free food through food stamps, and almost free housing through Section 8 programs! Paid for by the working class of course, and the rich who are paying the most taxes! Why does it seems that most of the legal immigrants eventually accrue lots of assets? Homes, cars, and even businesses! Look at a lot of these small shops and Seven and Eleven stores! Owned and run by immigrants. Asians and a lot of Indians or Pakistanis. Why is that? Are you listening? Here it is! They are willing to work very hard, and very long hours, doing things that a lot of the American poor are unwilling to do! Some even have two or three jobs until the can accumulate enough to start a business. They even pool their resouces to accomplish their goals. The liberal socialist agendas of the Demo-rats, only serve to keep the poor under their thumbs. It keeps them uneducated, with the impression that they, the Demo-rats, are working hard to get them more of what they deserve. They deserve nothing, if they are not willing to work hard to better themselves! Nothing, if they are unwilling to take over their communities from the gangs and drug pushers! Nothing, if they are unwilling to stop the killing of their young! The Demo-rats liberal socialist do-gooder agendas and programs only keep the poor dependent on them, and not on who it should be on, which should be on the individual. Not on the government or on their programs.

Source record: 22697

My biggest problem with TV preamps, mast mounted or not is local overload
from poorly attended to paging transmitters.

I could null them out with a directional antenna but I sure would loose alot
of listening fun from my west.

Many years ago I took a Pro-34 on board a flight to Memphis (had permission
from the crew to use it). Once we got a few thousand feet in the air the
scanner was unusable. Just too much of a good thing and too many signals all
over the place.

## 810. Regency HX-1000 questions

Newsgroup: rec.radio.scanner
Date: 2004-01-25 01:27:10 UTC
From: wboas@nyx.net
Message-ID: <Pine.SUN.3.96.1040124182257.21149A-100000@nyx10>
Source record: 22700

Folks,

Need some help programming an old Regency HX-1000 that a friend was given.

Quite simply, how do you do it?

Took the battery pack out to try to clear it, but it seems there's a
memory ni-cad in it somewhere, and it wouldn't clear.

The default frequencies seem to be 447.4125 Mc.

The keys are few, but must have dual functions in combination.

Can anyone offer help, or a source for help?
Thanks,

Bill
wboas@nyx.net

Maybe from a significantly lower expenditure on Defence??
Here in Aust, we have fairly high tax - the top tax bracket (last time I looked) was over 50 cents in the dollar when you factor in the medicare levy. We have a disgustingly low expenditure on Defence both in overall dollar terms and also as a percentage of GDP, but we also expend vast sums of moneys on social welfare (polite term for funding the pond scum who don't want to work) - here we have entire families - 3 generations or more who have never worked, and always received the dole. It is fucked, but our system allows it. Count yourselves lucky that your system is not as easy as ours is.
The main taxation burden falls on the middle class - the rich have accountants and the like who reduce their tax to stupid amounts - one person who was alleged to be earned billions was paying around ten dollars tax per year thanks to the efforts of an accountant - got me stuffed how, but that be the benefits of being stinking rich I guess.

Funny that - know of more than the odd "real" hams who use their amateur gear on out of band frequencies - and yes they hold the VK equivalent of an exra class licence, and I know of US amateurs (amongst many others) who have come here to VK who have used their amateur gear on out of band allocations - be it HF or VHF/UHF. I suggest that the licence class or whether they have passed a CW test has absolutely no bearing on amateurs behaviour or likelyhood to use amateur gear out of the allocated bands.

Hi,

I am an armature scanner enthusiast. I would like to know is there a scanner that looks like a simple radio, like SONY ICF radio.
Because I noticed that all the handheld scanners looks like a walkitalki unit. For me it is a problem because it creates attention when seen by others and officers.
Please help me find a scanner with a body looking like a radio.

Kevin

The KMA is much better made. The gain would be slightly better, 30
elements vs 17. Don't know if you'd hear a difference except on a
very weak signal where an extra dB or two would help. Unless you
could recoup your money from the Create, why not use it?

Several facters. First, they generally have smaller governments. Government is huge today, involved in some way or another in almost every aspect of our lives. One or two of our government departments (say Health & Human Services and State) are almost as large as their entire civilian government. Second, they hit corporations a little harder then we do here, not a lot but somewhat harder. For example, business can't write off as much. Finally, and here is a big one, they spend far less on defense. Our defense costs are huge (annual military budget, debt, interest on debt, research, retirement, medical benefits for injured vets, and so on). There are certainly other facters, but these are the most obvious.

Your data is equally incomplete. What percentage of the nation's wealth is controlled by those top 5% and 50%, and how does that compare to the percentage of taxes they pay? I read recently that the top 10-20% control 80% of the nation's wealth. I'm going on what I vaguely remember (which is why I asked), so don't quote me on these figures. However, if that is true, that 50% you say they pay is rather small.

Maybe there is a reason why scanners look like that. Why would any legit listener be concerned about the "attention it creates with seen by other and officers."

## 823. North Jersey Railroad frequencies?

Newsgroup: rec.radio.scanner
Date: 2004-01-25 13:17:01 UTC
From: altazachen@aol.com
Message-ID: <20040125081701.13670.00000379@mb-m27.aol.com>
Source record: 22713

Can anyone help with frequencies for the railroads of Northern New Jersey? I am particularly interested in listening to the freight lines of Hudson county around Jersey City & Bayonne along with Elizabeth, Newark and the New York Cross Harbor railroad.

I'd also like to check out the Hudson-Bergen Light Rail and others in my area.

Any help will be greatly appreciated!

## 824. FS: AOR8200 Mk2B

I agree with you.

The contract was for a used radio at $425. It was a breach of contract to supply anything else. In the UK at least, the seller would be obliged to arrange for pick-up if the buyer did not want to go thru the hassle of sending back. And I guess that the buyer could refuse to pay. Buyer could pay the $50 if he wanted to for the new radio, but would not be obliged to I'm sure. Different for goods that cannot be exactly ascertained, like grain from a large pile. Here, it's not unreasonable that the order may be above or below the ordered amount, and payment would be according to what is actually received..

Source record: 22723

Thank you once again everybody for allll the responses!

Looks like I will be going with the Uniden Bearcat 796D. It was a bit more then I wanted to spend, but I guess that is the best choice available for what I was searching for. Besides, it's been about 10 years since I had a new one, it was time for an upgrade. :)

One (perhaps kind of a 'newbie' sort of) question:

The Bearcat 796D is Digital - is it 'backward compatible'? Will I still be able to hear everything I did on my old Radio Shack Pro-26 'plus' the new digital signals - or does the Bearcat Just broadcast 'digital audio signals/broadcasts'?

Also, are there any accessories that I will need (or want) to purchase for the Bearcat 796D or is going to work 'great' out of the box?

Here is what is already supposed to be prepackaged with the 796D:

P-25 digital card, AT248 Telescopic Antenna, AD580U AC Adapter, PS001 Cigarette Lighter Cord, PS002 DC Cord, MB785D Mounting Bracket with Screws, OMBC796D Owner's Manual, TTFREQ Trunking Frequency Guide Book, ESCAN E-Scanner programming Software CD-ROM, Screwdriver, HF24RS Headset, BBFREQ Betty Bearcat Starter Frequency Guide

Just purchased an iPod before the holidays (didn't realize I would need to spend about an extra $100 on accessories before I was able to even use it! - don't want to be surprised again with this expensive (Bearcat) purchase).

Thanks again Everybody for the quick responses!! It has made this decision a LOT easier to make!!

# 834. FS: ICOM IC-R5 Scanner Receiver

Newsgroup: rec.radio.scanner
Date: 2004-01-25 19:52:04 UTC
From: Marvin Moss <mmoss@mindspring.com>
Message-ID: <E7VQb.24378$q4.11517@newsread3.news.atl.earthlink.net>
Source record: 22724
Cross-posted to: rec.radio.swap,rec.radio.scanner

A beautiful ICOM IC-R5 hand-held scanner receiver.
This unit is as near mint as you can get.
You get the receiver, manual, antenna, soft case, carrying strap, and
original box.
It is a European (UK) version so you know what that means frequency
coverage-wise !!
I will mail it to you (CONUS) for only $180 (firm).
I will take Paypal or money order.

Specs:

The IC-R5 has continuous coverage from 150kHz to 1309.995 MHz with 1000
regular memory channels, 200 auto store channels and 25 search banks. You
are able to make up your own channel names for all memory channels/search
banks and channel recognition is easy ! The IC-R5's LCD display lets you use
numbers, letters or a combination of both when naming channels and banks.
Icom's exclusive Dynamic Memory Scan (DMS) gives you the flexibility to
customize and manage the IC-R5's memory banks the way you want or need.

As with the IC-R2 the IC-R5 requires 2 x AA batteries for internal power
however unlike the previous IC-R2 the new IC-R5 can also be powered from an
external 12v DC Power Source. The DC jack allows for simultaneous battery
charging while operating the radio.

Main Features:
Wide band receiver: 0.150 - 1310 MHz continuous coverage .
Three receive modes: AM, FM and Wide FM
1000 memories for storing favorite channels
25 band edge memories for easy scanning between specified frequencies
Tone squelch operation (CTCSS decode): As used on many radio amateur
repeaters today
Tone squelch scan: Find the tone in use easily
Simple operation with optional software for programming
Uses just two AA batteries or external 12v DC
Power save function including auto shut down to conserve battery life
Compact size: 58(W) x 86(H) x 27(D) mm (projections not included)
Weight: 170 g
PC programmable with CS-R5 software and a suitable interface

Kevin,
What country are you in? If your some place here in the United States
trying to get by with out trunking is going to limit what will be
received on your scanner radio .

If you can get by with out trunking ,then get a Icom IC R5,
or if you can find one used or still in stock new, a Icom IC R-2
They look like FRS, a cell phone or beeper and run on two (2) AA
batteries.

Try one of the other small communications receivers. Like the
Yaesu VR-120 Communications Receive or
Alinco DJ-X3, this is a little big like a walkie talkie!

Get the software and programming cable.
Check out this site

<http://www.strongsignals.net/access/content/latest.html>

<http://www.strongsignals.net/index.cgi>

<http://www.strongsignals.net/access/content/rr_vr-120.html>

<http://www.strongsignals.net/access/content/rr_dj-x3.html>

Or purchase a trunk tracker radio scanner, hang it inside your cloths!
Then us a cell phone ear bud to listen!

Look to see if the radio has computer programming capabilities and get
the programming cable
and software, for what ever radio you decide on. Down load the manual to

see if the radio will meet your needs and work in your area..
Jim

I agree that some of our government departments are huge. The inefficiencies of our government are well known. Also well known are the large amount of social welfare cheats. I guess we need a lot of people to catch thes cheats though. We could decrease that numbe though if the penalties for those cheats were much harder. Hard time maybe! As far as what our country spends of defense, I believe it is necessary. I do believe that we should not be in every police action though. The European countries and also Japan do not spend a large percentage on defense because they are depending on the U.S. to pull their, "chestnuts out of the fire", if anything comes up. The United Nations is a joke and should go the way of the League of Nations. A paper Tiger, especially with Kofi Anan at the helm.

You can also find plains and construction ideas in the ARRL handbook and
other Ham
publications, available at many public libraries. The real trick of building a
antenna tuner is finding
the variable capacitor and large coil for this circuit.

"The People of Iraq are free"

The enemy bushite falsely faiths that somehow, in time,
by forcing a continuing threat of our murders as the
innocent striving for Freedom through representation,
they as the enemies of You, America, Humanity, and God,
will as they are doing, provide US a "free" government
in this World that will permanently sell off all of our
Nations assets below wholesale, to give into the
convicted likes of a Halliburton, WorldCom, or five
dollar a day, worker wages Bechtel. Now what kinda
People's Democracy would that be then, where bush states
is now truly "free" for his war crime ilk to rob from in
Our stolen names dying? The demon bushmob 'cabal' has
freed Iraqis from access to clean water, electricity,
low cost fuel, food, medicine, being not bombed or shot
at by getting organized, or
non-radio-active-rec-centers.

Bush's Iraq: An Appointocracy
by Naomi Klein
http://www.globeandmail.com/servlet/ArticleNews/TPStory/LAC/20040122/CONAOMI22/Columnists/
Idx

/ / Except that the United States has absolutely no intention of actually getting out of Iraq. It wants its troops to remain, and it wants Bechtel, MCI and Halliburton to stay behind and run the water system, the phones and the oil fields. \ \

Never ever land more like. Imagine that: Arabic WorldCom phone bills, Halliburton gas bills, with the only store "legally" open to US public will be Bechtel, who will demand through bushite tyranny, you pay your wages for something unjustly over billed as, but put together at less than five dollars a day wages offered, being as the only jobs available through not publicly accounted bushite middleman directly chancing the whole country of America as undefended financially., extending "their" risk to do nothing; by the further needless SACRIFICE of MORE AMERICAN (bushited) PATRIOTS AS truly dying WORTHLESS WITH as da dumdums. Armed American Soldiers should be bravely going after Baathist bremer with DEMANDS for immediate democratic elections and the immediate return of ALL the stolen oil-for-food money to be spent entirely on priority Iraqi needs, solving the bank robbery, while considering to start printing up millions of invites for Iraqis to stay in America until the toxic waste dumped by rumsfeld can be partially neutralized., while we hunt down the rest of the evil bushmob, one by one, with the full extent of Law, entrusted to the Loyal American Patriot Soldier's Oath to do what is strategically right in our America to survive. Why do we do this? To protect our fellow Soldiers from sacrificing under lawless criminal command where a, buford "bush bitch" blount type, murders good people for no stated reason, but to toll more American casualties, while robbing all Civilization as fallen bushite victim.

No wonder the evil bushites are now leaving in the light, their Iraqi dis-investment plan, for the easier pickings of undefended COWARDLY America tax payers to rob from. Again, more than half of the monthly 4 billion plus 'top secret' plan, plans to not account to ourselves., on costs of expenses doing nothing much of anything in Iraq TO SACRIFICE MORE AMERICAN PATRIOTS AS WORTHLESS WITH. (Apparently, they can't think this far due to the required math skills of subtraction and division.. Or, so the bushmob don't say in between Our commercial breaks on newscasts, or our acclaimed artists publicly blast during the, we're the best at this, award ceremonies.)

See the tragedy? The leaderless "bushited", American Soldiers are too weak or cowardly to stand strong as Americans for the needless loss of their very own by

cluster bomb. It is From the get go, an American Soldier is sacrificed for, as the evil demon bush lies. Examples abound today like stolen money being wasted to fake fix things, really lives little damage undone. Or leaving buford "bush bitch" blount and the heroin pushing, child killer tommy franks unarrested, does little of no good for America's image abroad, when waring the bushmob "Freedom" medal, on an American cop killing cowardly bushite soldier's dying breast. A "Freedom" medal celebrating the ultimate escape of bush and rumsfeld from an American Patriot's wrath as the primary 9/11 instigators. (Say to a proud bushite, "General Ahmad funded Atta" and they run away as cowards, to play pretend like nazi savages who dropped bombs on US innocent irrationally to pay further costs in sacrifice to their false-deity unthinkingly.)

God or no God, I hate the demon antiChrist, corporate america's false-deity, Your unelected Mr. bush Jr., as much as any real Creator of this world, or any other should.

With such real inaction on old promises [lies] made by the dishonorable and dishonest leaderless bushite nazi savages, while desecrating all of Humanity by fighting against a just rule of Law, (instead of protecting America's America), forces the continued REAL WORLD sacrifice of true Liberty, until the bushmob gang is brought up by US for war crimes., as the 9/11 perpetrating, super evil as ungodly, demon antiChrist in disguises. (I very much would feel welcomed to play my part in those public proceedings.) Hmmm.. maybe CNN or CBC can become publicly convinced we should have our own news programs on what's truly happening?, to compete against the 'evil bushites' in this competitive free market place of ideas? Who knows..

Take care of the business, by getting US in on our news-casts., as these principles here standing in words, are a dreamers dreams, just waiting for You to bring to reality., by standing proud, strong, and forever free as a, truly, super awesome Human Being.

[then subverted to steal American lives with by lying]

Demon Bush replied, "No, the intelligence I operated on
[then subverted to steal American lives with by lying]
was good, sound intelligence."

Where is bush leading America on not ever taking an
apology for his misdeeds to destroy our true American
value with? I don't know how else to simply word this
to the still sleeping, but bush isn't America, America
is America. You, as an American, have a sworn right to
demand for America, bush not be allowed to further
miscarriage Justice blindly back to the dark ages, by
not correcting himself on behalf of established
publicly, where American intelligence stood, stands, and
ultimately strives. Freedom is not protected by letting
the "bad guys" go, to further toll more innocent lives
for criminal sacrifice. Sometimes, the real simple
things are over looked as profound meaning. The Magna
Charta of 1215 states that a freeman should not be
imprisoned. Simple right? Not for the bushites who
side instead to faith in pope bush, who deliberately

unminds a timeless universal principle that exists also in the 1700 B.C's, Code of Hammurabi, where all individuals are to be found equally under the Law, to be fair minded about our business. Simple right? No, corporate america says being fair, is not to care one way or the other between commercials., and the result? The available 9/11 evidence is not publicly disclosed as relevantly important, for Laden did the whole thing by himself, (bush, cheney, and rumsfeld said they know better than everyone else put together so don't even bother to form your own conclusions on your present state devaluating) case closed, now blindly pay your further tithes to bush, cheney and rumsfeld for letting the crime go publicly undetected, while with 13303, we will silently watch bush make himself tyrannical dictator over the rest of our Humanity, where he tells US, to escape, he will with evil american nazi bushite soldiers in tow, get this: not be found accountable to Ourselves anywhere by law to witness, or to an all knowing God even. Spooky, strange and somewhat disturbing, siding to show, bush really is dim-witted as archetypical evil incarnate eh? See? Civilization's Code of Hammurabi consists of 282 paragraphs, of which, the first line from the first paragraph translated states "If a man bring an accusations against a man, and charge him with a capital crime, but cannot prove it, he, the accuser shall be put to death." Your demon bush Jr. is recognized as an enemy of God not only by the Taliban, but since the birth of the Human condition.

The position Your Mr. bush Jr., the antiChrist, threatens against US all, (EVERY FAMILY'S MAN, WOMAN, AND CHILD), is one where, as murdering war monger nazi tyrant, he can with bush bitch traitor buford blount and bremer, deem any NATION of People, outside all the laws of the Universe, regarding our truer existence dying. My timing as Creation is impeccable, when you think about it. But don't think too much about nothing in your own defense while dreaming what is doing, isn't really happening. The unjustified NEEDLESS continuing murder and destruction in Iraq by toxic bombings and the use of cluster bombs as landmine to really kill cowardly and ignorant American soldiers pirated as anti-American lawless God hating nazi teen bush bitches, then, with tommy franks to undermine the ORHA plan to rob the central bank, museum, and steal billions in humanitarian aid by killing more leaderless as evil godless american soldiers with, was in itself, a crime against Your Humanity., and bush along with rummy need to pay the Piper immediately, before needlessly, taking US any

further as not truly represented lyrically to sing or dance about aimlessly.

The demon bush's life, isn't worth the sacrifice he makes of our opinions on Liberty, or our children's future.

The French 1789 Declaration of the Rights of Man and of Citizens, makes perfect sense when it states in so many words, that all People are born [anywhere] free in respect to their legal rights, Laden, and You included. But no, not by the evil bushite misrule. If a Human is not american, then the bushites don't need to follow the actual criminal leads to establish a criminal case rightfully against the accused, and instead, the bushites will blindly victimize our dying world as the disenfranchised and innocent, without true leadership present as spoken for.

By corporate america not working to understand Freedom requires our due process as our self commitment, means, a bushite nation guided by the flimsiest of allegation to deny the rights of all People falling as innocent victims, instead of nabbing the actual criminal masterminds who murdered Americans to steal Freedoms granted to US all by living in the know. So, I purpose a quick, let's get started, New World Constitution; anyone who victimizes the innocent intentionally, should pay a price by our political will, instead of ourselves censored, as the unconcerned bushmob victims. By our corporate news agencies encouraging the blind ungodly belief that evidence is no longer a requirement to convince US who is a criminal, is another bushmob war crime in the making, and a road straight to doom for everyone corporately devalued for bankrupt liquidation. Suspicion is the minimum, when it comes to bush demanding your blind faith in him religiously for indiscriminately murdering hundreds of thousands, while ignoring our Judicial investigations, so fraudsters commi Halliburton, can over bill even further, US tax givers as the unwilling still paying. It was reported that seriously incompetent Bechtel, (who steadfast so far as america's corporately unaccountable, refuses to fix what they're currently being paid for by tax paying bushite soldiers DYING as COWARDS for the wrong side to blow up then pretend repair as), hires workers at five dollars a day, while billing US all as unworthy of consideration in the final tallies during news break. What can't you figure if corporate news america will forbid you raising concern for the life of an American tax payer losing out to war criminals who would murder

New Yorkers for a fast dollar at your expense for
further keeping silent? These words are freely your own
to do as you will. Shout for Americans dying needlessly
under the TRULY incompetent bushite lawless rule, or
don't side to help a plead for mercy regarding yourself
truly included.

Can the bushites possibly think, we're all not ever
possible to stand together without a true Loyal
President, or, make believe King named Johnny, on the
facts firmly established regarding the treasonous war
monger antiChrist lying to Patriots dying US as victim
for?

America, I will now leave the rest of Our job in your
hands for the time being.

Yours again,

Johnny Wizard

"We fight not for glory nor for wealth nor honour, but
only and alone we fight for freedom which no good man
surrenders but with his life."

Robert the Bruce, King of Scots, Bannockburn, 24 June 1314.

Some things are worth listening to again and again ...

http://www.talkingpointsmemo.com/archives/002409.html
/ /
PRESIDENT BUSH: Yeah. Look -- what -- what we
based our evidence on was a very
sound National Intelligence Estimate. ...

DIANE SAWYER: Nothing should have been more precise?
\ \

It's the demon bushmob cabal's liberal usage of the
term "we", that every American has a right to demand
a true representation.

Example:

Beyond yellowcake: Dissecting the over-hyped threat
of those aluminum tubes.
http://www.motherjones.com/news/update/2003/07/we_489_01.html

/ / Condoleeza Rice, speaking to reporters aboard Air
Force One, defends the aluminum claim, saying it was
written into the National Intelligence Estimate:

"The NIE ...has the yellowcake story in it, had the
aluminum tube story in it. Now, if there were doubts
about the underlying intelligence to that NIE, those

doubts were not communicated to the president, to the
vice president, or to me. \ \

Cheney Being Pulled Into the Quicksand
http://www.fromthewilderness.com/free/ww3/073103_waxman_noose.html

/ / I asked why you claimed on national television that
no White House officials "knew that there were doubts and
suspicions" about these claims when both the CIA and the
State Department's intelligence bureau had raised significant
concerns with White House officials prior to the President's
State of the Union address. ...

. . . Your statements directly contradict those of your
deputy, Stephen Hadley. On July 22, 2003, Mr. Hadley held a
press conference in which he acknowledged receiving two memos
from the CIA raising doubts about the uranium claim being
included in the President's October 7 speech in Cincinnati
over three months before the State of the Union address. \ \

More Questions for NSA Rice
http://www.apfn.net/messageboard/7-31-03/discussion.cgi.22.html

/ / Rep. Waxman asks National Security Advisor Condoleezza
Rice to answer questions about the extent of her knowledge
of Iraq nuclear claims, whether there were White House
efforts to mislead the public, and how the discredited
uranium claim got into the NIE. \ \

http://www.house.gov/reform/min/inves_admin/admin_nuclear_evidence.htm

Washington Post defends Bush, Iraq war against Paul O'Neill's
exposures
http://www.wsws.org/articles/2004/jan2004/wash-j16_prn.shtml

/ / Until the middle of March 2003 Bush came before the American
public claiming that he had not ``made up his mind'' about war
with Iraq, that diplomacy would be pursued, that military force
would only be a last resort when all other options were exhausted,
etc., etc. O'Neill's exposures, including the existence of
documents, prepared months before the September 11 terrorist
attacks, that outlined plans for a ``post-Saddam'' Iraq and the
handing out of lucrative contracts, reveal Bush's performance as
a charade filled out with falsehoods. \ \

Isn't this fascinating... a post-Saddam plan to rob humanity
by killing too cowardly American Patriot Soldiers for
Halliburton and Worldcom.

The Last Word
http://users3.cgiforme.com/htmlhelponline/messages/1708.html

/ / It was just reported by Chris Marden on the 27 November
2002, that bush's top whore richard pearl, has advised
Britsh MPs, that bush secretly as the anti-Christ has no
intention of allowing the Iraqi inspection process to
succeed, and instead, is committed to murder ourselves
either way. \ \

The "pending bonanza"

http://www.alternatives.ca/article930.html

/ / The agency had been chasing the CPA and the UN to account for the
expenses,but was not given any answers. They quoted
one senior diplomat as saying, "We have absolutely no
idea how the money has been spent.
I wish I knew, but we just don't know. We have absolutely no idea." \
\

The Real National Security Threat: The Bush Economy
http://www.alternet.org/story.html?StoryID=17547

/ / While it is unlikely, it is not totally impossible that the Bush
administration's policy of locking up anyone called Mohamed and
favoring Israel might drive the Arab countries to try an oil embargo
again. It is, however, quite feasible that they may simply decide to
follow in the footsteps of Saddam's Iraq and demand payment in Euros
in the future. The math is simple: if they had done so a year ago,
for every 85 cents (one Euro, at the time) they put in the bank,
they would now have earned a $1.30. \ \

Caveat Preemptor!
http://www.commondreams.org/views03/0127-09.htm

/ / On January 3, to the well-rehearsed cheers of our troops
at Fort Hood, you stated three times that Iraq is a "grave threat"
to the United States. But for our allies, and for an increasing
number of Americans, repetition alone does not enhance credibility.
They are looking for proof. (You are, after all, talking war.) \ \

George Bush: World Class Monster
http://www.beachnet.com/~hoffman/Bush.html

/ / "George Bush is a satanic, sadistic, brutal monster.
Compared to George Bush, Adolf Hitler was a true gentleman." \ \

Memo for the President:
Your State-of-the-Union Address
http://www.dissidentvoice.org/Jan04/VIPS0117.htm

/ / It is important that you be completely clear on timing. While
the Newsweek report of February 24, 2003 was the first to
publicize Kamel's testimony that the weapons had been destroyed,
US and British intelligence (as well as UN officials) had had
that information since August 1995. If you were not given a full
account of what Kamel said before it appeared in Newsweek, your

advisers should certainly have given you the whole truth when Newsweek did break the story three weeks before you sent US troops into Iraq to destroy those same weapons. If they did not tell you, heads should roll. If they did, it becomes necessary to explain why the information from Kamel had no apparent effect on your decision to launch the invasion. \ \

Restoring Credibility
http://www.tompaine.com/feature2.cfm/ID/9758

/ / As you prepare to make the case against Iraq in your State of the Union address Tuesday, beware the consequences of favoring ideologues and spin-doctors over the professional intelligence officers paid to serve you. \ \

Guantanamo Bay, habeas corpus and the Texan who would be king: Some legal observations
http://www.wsws.org/articles/2004/jan2004/habe-j05_prn.shtml

/ / Article 29 provides that ``no Freeman shall be taken, or imprisoned, or be dispossessed of his freehold, or liberties, or free customs, or be enslaved or exiled, but by lawful judgment of his Peers or by the law of the land.'' \ \

Guantanamo Bay, habeas corpus and the Texan who would be king: Some legal observations
http://www.wsws.org/articles/2004/jan2004/habe-j05_prn.shtml

/ / The Habeas Corpus Act of 1640 provided that ``any person imprisoned by Order of the King or Council should have habeas corpus and be brought before the court without delay with the cause of imprisonment shown.'' \ \

A GIANT AWAKENS
http://www.etherzone.com/2004/raim011604.shtml

/ / So let's see if I get this straight: the U.S., which went to war to export "democracy" to Iraq (and the entire Middle East), in defiance of the UN, is telling the Iraqis that they aren't ready for self-government - and is now seeking the UN Secretary General's imprimatur for what amounts to a policy of brazen imperialism. Instead of elections, a series of elite "caucus" meetings will be held, in which the neocons, er, um, I mean, the Americans, handpick the voters - and predetermine the results. Some "liberation"! \ \

We Report, you get it wrong
http://www.strike-the-root.com/blog/archives/000200.html

/ / "The report, Misperceptions, the Media and the Iraq War, also found that the more misperceptions held by the respondent, the more likely it was that s/he both supported the war and depended on commercial television for news about it. " \ \

An empire implodes
http://www.onlinejournal.com/Commentary/011004Fasciani/011004fasciani.html
/ / Consider this: the benefit to Sam 'Wal-Mart' Walton's five adult
children is far more than the combined tax relief to their 1.3
million employees. \ \

Bush Booed at Martin Luther King Gravesite
http://www.commondreams.org/headlines04/0116-06.htm

/ / "Every policy decision of the Bush Administration including
the war in Iraq (news - web sites), healthcare, jobs, the economy,
judicial nominations, housing, the environment, as well as secondary
and higher education, has done nothing to strengthen Dr. King's
dream," Cummings said. \ \

A Johnny Splat
http://www.ntimc.org/newswire.php?story_id=69&topic=palestineisrael

/ / The Likud party has discrimination laws that
only apply to "jews", and persecutes innocent people
like Christ is, with criminal INTENT routinely. You
know Christ?, King of the Jews? \ \

WMD threat exaggerated: report

http://www.theage.com.au/articles/2004/01/09/1073437472186.html

"In that process they changed something that is an opinion
into a fact, and they consistently did this," he said at
a briefing on the report.

From Johnny

/ / ..then call
themselves heroes in my name after the carnage for
blindly dropping bombs from the sky on everyone.
Heroes? More like typical american nazi cowards,
willing to murder their own families as themselves, than
bravely put their lives on the line standing to protect
Justice as freedom for everyone, as to what true
bravery, and heroism has always been. While the world
watched CNN broadcasting, American nazi teen soldiers
celebrating joyously in contempt for God while singing,
right after the unreported dropping of thousands of
pounds of bombs on everyone in Afghanistan, body parts
everywhere, while knowing directly as individuals, every
single, there was no evidence offered that anyone there
was responsible for any crimes whatsoever, including the
Afghanistan women who worked for the newspaper, but for
to be victims of fanatic nazi american barbarity,
disguised as human, like bush almost gets away with as
pure evil deceived, now completely impossible to
believe. Oh, by the way, I am now taking new
memberships for al-Qaida.

As I say, there isn't a real man in the
American Marines, or the Army willing to protect America
with their lives, for if there were, rumsfeld and bush
would be rightly dead for the murders continuing against
those they know as innocent. As even with their
continuing threats against more innocent people as
American lives they brag to throw away as just soldiers,
as all these other nations they try to make ready to
sacrifice millions for, while propagandizing that our
Justice we need not believe in to grant us freedom from
oppression, nor evidence no longer a requirement to
convince us who is evil, and who is not lying. Nobody
deserves to be murdered, but a murderer escaping to
recommit. \ \

--

That Was Then - This Is Now
http://www.rense.com/general47/thatwas.htm

/ / Today our
"chains" are made of threats and our walls are made of
paper wrapped in patriotic flags. But if we linger -
tomorrow the chains will be of steel and the walls will
be made of stone. And soon we'll all begin to live
this nightmare as reality. \ \

US Firms STEALING Money
http://thestar.com.my/news/story.asp?file=/2003/12/7/nation/6859213&sec=nation

/ / ``KBR is charging Iraq US$180,000 (RM684,000) for each school they
renovate. They then give the project to Iraqi sub-contractors and pay
them just US$20,000 (RM76,000) to do the job. \ \

Any being would not want to be deprived the rights to living, by living to not deny the same rights of others. (First commandment is a fundamental of understanding space-time reality, as it pertains to the politics of an actual sustainable World, indivisible, and eternal.)

To have US exercise denial of rights granted through the protections of Freedom, asks naturally for reason to being ones own commitment kept. To leaderlessly faith in tyrant bush's faulty public judgement to committing US to indiscriminate murders so he can rob Iraq of all her riches going nowhere he silently contends as an illiterate demon liar, exposes Your Mr. bush Jr. as unfit to preside in Anyone's name. (Walla: Americans did not elect the monster who openly with 9/11'd slush-fund-america, finances the oppression of our families in Uzbekistan, and Wahabbi Saudi Arabia, unreported by our CNN and CBC as revealing.)

Iraq reconstruction's bottom-line
http://www.asiatimes.ru/atimes/Middle_East/EL25Ak05.html

/ / So there's money; it's just not going around. And here perhaps lies the solution to the mystery of how the world's superpower and the world's biggest corporations can't even begin to put Iraq together again after almost nine months: The reconstruction is less about reconstruction than about making the most money possible. \ \
snpd

I hate bush with everything I am, or ever will be as Human.

Who will care for your life in corporate america, where, with a silence of contempt through censorship, rob themselves as ungodly and criminal degenerates under the bushite doctrine of enslavement of their species? Know, that it is NO SECRET, Eason Jordan of CNN knows, (as too, Robert Habinovitch of CBC does too), about General Ahmad, and demon bush's 9/11 strategy existing in 'top secret' Presidential directives, written two days prior to the event of murdering thousands of Americans, a plan to blame Laden on as innocent of to secure invasion of Afghanistan for Enron. (Laden would plead innocent naturally, the Taliban would vote against persecuting the innocent until proven otherwise as Clinton learned, while demon bush and cheney would privately plead to have our Police work halted, to attempt their getaway.) Both, Jordan and Habinovitich have refused OUR staff since the event of reporting the facts for our judgements, and side instead with not reported reasons like those given by irrational and dumb evil Walter Issacson, that CNN is forbidden to PUBLICLY report on

the murder of innocent children by traitor tommy franks, because, you should remember how many people died in New York City. (Why not just murder more New Yorkers, they're closer?) Sure, it's stupid, dumb, and as evil as it comes, but Walter dictated policy, you as a CNN staff member had to comply with, or face the consequences of termination. These bushite censors of our top priority news interest stories are our enemies as traitors to the Human cause. Jordan, nor Habinovitch will give no reasons for publicly denying our police agencies protection, (PHONE THEM UP AND ASK THEM SOLDIER) hoping we can't see them not doing our jobs to protect Your freedom, while leaving the outstanding investigation officers left in the bind, on hopes bush'll disappear them, like they no doubt have plans to get those loose ends who directly know of their treason against God's America, and all that is Honorable and Just in our World.

Kill the demon antiChrist, Your Mr. bush Jr. American Patriot Soldier, and be loved by all as Saviour.

--

Where's the NRA on whoring as bush bitches?

American soldier, Your one true loyalty should be to America, not traitor bush to rob ourselves from. Remember: bush, he ain't got no public concern worth mentioning, when it comes to the whereabouts, of more than half the American tax payers expenses regarding Iraq's jeopardized security, now being sold off as planned to the bushmob at what will be, lower than going values. Namely, your own as measured worthless.

As American Soldier, in unbiased corporate TV america, your told you're willing to DIE in servitude as a thieving bushite slave without question, a blind loyalty and obedience, not to a Just God mind You, or the Battle Hymn of the Republic, no, but to worship the demon bush in a destructive cult-like ignorance that does not even afford Your costly ongoing sacrifice, the luxury, of telling US why corporate america refuses to scientifically report on your actual consuming of MEASURED microscopic radio-active heavy metal TOXIC waste, that includes plutonium in trust, to 'bushite' your dumfuk evil comrades you'll kill with especially, or to being blowed up to smithereens by sexy rummy's cluster duds. Mr. franks and bush bitch buford blount State it is of little or no concern to corporate americans how many bomblets were used, or where they fell to kill women, children or US Patriots with, for,

the glorious bushmob will take a few extra bills payable from America to the commi business partners that way for including You in indiscriminate mass murder, see?, and none are the wiser. American Patriot Soldier, repeat after me: "A proud bushite nazi soldier is a dead bushite nazi soldier halted from harming our innocent sons and daughters." Or, AGAIN, corporate america's public refusal to speak up for 'The People' (soldiers included) paying the almost half of Iraq's monthly bill going mysteriously vanished in rummy or bush's war crime pocket... Who gives a toot where it is all going wasted right bushite?, it's only You or yours who could go as the innocent in God's favor still being sacrificed next.

Look, as the very old tales tell repeatedly, the lawless Satan wager, to somehow without knowing how, become omnipotent ruler as tyrannical dictator of this forsaken World, leaving US ALL including Johnny, deprived our rights to justice and freedom, and instead, to the lot of US, be ACTUALLY put up on a cross to die again metaphorically for unarrested bush to continue example with, as an illiterate barbaric enemy of "The Man", just like, isn't going to happen in this lifetime. I ain't no fictional character, and as true blooded Patriot, hate the bush demon war monger during breakfast, lunch, and supper. And besides, I'd personally kill bush first before that neither world tried. Trust US, G, or I single handedly as a man, will triumph over traitor bush's criminality, as the American cop killing 9/11 perpetrating war profiteering savage he is as antiChrist, it's just, will you like Talk Radio in America censors, and rich CNN celebs readily encourage, silently continue to watch your fellow family murdered for bush bitch buford blount, and still refuse to voice objection nor take any action in defense of all that is Our World truly suffering as Yourself included? I despise bush like every alive person who would read this is.

Refuse to speak for Your own freedoms truly pirated by bush, and you'll likely continue to lose out really like America currently is. Refuse to help our desperately pleading God you know being victimized in Your name truly, and you will bare the consequences of being forsaken. Maybe even, towards an end you'll declare, someone else has forsaken you, when it will be only yourself to blame for not speaking for all those denied their happy lives through the brutal criminal tirades of the demon antiChrist, Your Mr. bush Jr.. Again, this will never change: We had complete co-operation granting one hundred percent access through Iraq without

delay, prior to bombing any of Iraq's public sector with toxic waste that contained US People. Every Iraqi child murdered served no good reason or purpose but to war God's love, and my good name. And, still today, that unarrested evil demon tyrant dictator, still chooses to sacrifice many a soft spoken, slow footed American Patriot to, so far, too few bushite nazi dumfuk losers. In addition: We have also learned, Iraq had granted surrender of Iraqi assets to give to the war criminal bushmob, if they would forego the needless indiscriminate murder of easily tens of thousands of innocent families, (like dropping cluster bombs into our residential communities), but war criminal rotten rumsfeld refused because he had already PERSONALLY set up hundreds of illegitimate targets that would, kill primarily only innocent people while destroying public institutions, and bring home a few extra million American payments, tax free.

What more could Saddam do that he wasn't asked for? I beg you to kill the demon bush on behalf of our humanity, and on behalf of the rare American Patriot who will get rightly confused as, bush bitch buford blount's thoughtless nazi teen savages. The anitChrist must not be allowed to survive continuing such heinous war crimes against our being, and myself as the no longer reluctant standing eternal King.

Listen to witness, America's corporate news celebs will mention it is of no concern to You as the unjustly robbed from and dying for the demon antiChrist in sacrifice. Look, I as Christ too, would destroy any cowardly proud bushite nazi teen soldier victimizing my innocent family irrationally, as most, if not all able-bodied men of our world would also if forced into a decision to defend our lives from the likes of a bush bitch buford blount, or a bomb wherever death squad running tommy franks heroin pusher, but I'm told through my faith in the power of myth, the military should have one or two brave and godly Patriots still idly standing around, who would willingly chance to uphold their sworn Oath to protect their country and family, like with the American Constitution's Bill of Rights, and Justice everywhere by protecting the falsely accused, as could be, themselves, they should know now, or soon will be learning of the other way. A proud nazi bushite savage, is a dead nazi bushite savage halted from harming our innocent families irrationally, and low and behold, a good nazi bushite savage is easily found as an enemy of ALL Humanity and God, hiding as nazi vermin in the pirated, bushite military uniform, not true Americans,

but enemies to US all, which includes their selves they pour toxic waste on, while the bushmob robs their 'smart' family back home, undefended, neglected, and wounded like Christ was.

Your Mr. bush Jr. is worthless to this world as a hater of American freedom to not arrest himself and rotten rummy for murdering US New Yorkers on 9/11.

All I'm looking for in this world, one human enough to join US equally as a Loyalist to Humanity, and to do everything we can together to destroy that treasonous 9/11 perpetrator, corporate america's so very deeply hated and despised this entire Universe over, Your Mr. bush Jr.. To not bravely kill or immediately arrest the demon antiChrist along with rumsfeld the rotten, sets enslaved america tracking further down an old worn path of History, as enemies of not only the good Iraqi People bush and bremer whom openly rob from now without apology while giving out cheap candy, but of US all truly in the bigger dream without bindings. It's like bush is waging his demon war with every political body that believe evidence is a requirement to convince US who is evil, or criminal, an wallah, as if by some Supreme Will, the Son of a Just God named Johnny really comes down to our levels to raise a simple awareness through one hell of a, big time collecting plate. (Every proud bushite nazi bagged, I'm willing to pay the good deeder, ten cents per..)

Fear not my friend, the fascist bushite shall be lost by our universally wreathed good guy plot line. An evil bushite now irrationally fights against everyone's freedom for a war criminating ungodly tyrannical evil power that persecutes the innocent with murder, or torture to steal our, sworn to uphold eternal values from. If I don't destroy the demon bush antiChrist in Our defense with this last breath, someone else will, and our faith in God will with hope, find a love truly honored with respect and gratitude for being so magnificent. Never again, left vulnerable in my name as undefended to be victimized for a war monger's consequence.

Let US get out there and bag US the bush demon for God, or the Lord, Allah, or just Johnny, instead of victimizing Catholics, Muslims, Jews, or Atheists, along with all the rest as a Palestinian truly measured, encompasess everyone.

The Two Troublemakers
http://www.rense.com/general46/guilt.htm

/ / Some of the students had Palestinian passports. When
they asked what they were guilty of, the [bushite nazi savage]
soldiers said, "You are guilty of being Palestinian." \ \

A ungodly bushite nazi teen soldier, as an enemy of
America was quoted to say also to the falsely
imprisoned:

/ / "Say that you love Bush and I will give you food," \ \

Not a love for Justice, or the Bill of Rights, but a
love for the American cop killer traitor bush demon
robbing their very own grandparents they demand by
threat of your murder, for US all as Humanity to do
likewise degenerating, sacrificing our World as cowardly
slaves to benefit the ungodly bushmob 'cabal' of
parasites, the enemies of everyone, including that as
God's will.

"International law? I'd better call my lawyer,"
http://www.payk.net/mailingLists/iran-news/html/current/msg05842.html

/ / "International law? I'd better call my lawyer," the
American President joked in response to a reporter's
question at the White House. \ \

Again, by denying the rest of US as Humanity Justice,
the bushites need advertise between commercial break
only, "Laden did it", no need to follow the ample
criminal 9/11 leads folks, because the crime they say
wasn't committed by true American values. Go on along
bush, cheney, and rumsfeld say, pay no attention to our
evidentiary findings such as, the American FBI's
documented contention, that bush's business partner,
General Ahmad, funded the 9/11 'mastermind' Atta, or the
CIA's, regarding bush LYING in America's name about
Niger (TREASON), or MSNBC's almost Biblical Revelation,
about the bushmob having a signed and sealed, 'top
secret' war plan to not follow the 9/11 evidence to
secure invasion of Afghanistan for Enron, at
Condoleeza's desk, two days prior to the terrorist act
taking place, of which when confronted, confessed as
fully implemented by the Whitehouse. A 'top secret'
plan to blame Laden on a crime they wouldn't actually
try to arrest for with evidence, a plan arranging that
would find bin in Afghanistan pleading innocence with
the help of bush's partner again, General Ahmad, a crime

of such magnitude, it would 'justify' a war mongers criminal invasion to thwart Enron's impending CRIMINAL bankruptcy, THIEVING FROM MOMS AND POPS, to then, ATTEMPT, to close the surviving, armed with knowledge for good reason Police investigations. All of this setting a lowly nazi bushite war criminal, frothing publicly at more than six billion + of US, to state without opinion, that We, as Humanity, are no longer afforded God's GIVEN Human Rights to defend ourselves, nor is the criminal dictates of the demon antiChrist accountable to any rules of law. Universal they publicly quip, as the not-so 'secret' ungodly bushite doctrine of tyranny as enslavement of all that is Righteous and Holy in this World, because, hey, there is no God to speak of... and the King of kings, Son of God fellow, well.. that's all just ninepence fiction. No, WE, as all the make believers of this World, will no longer have ANY legal recourse to defend our own loved family from being stolen from through a bush bitch buford blount doing whatever criminally with dumfuk loyal nazi teen bushites leading to sacrifice for, for demon bush dictates his corporate american bred bushite nazi teen leaders, can not be held to a code of conduct, distinction, or honor. That's the bush world now you'll except without say. As an American, you're forfeiting your rights by not saying anything to protect those falling murdered in evil bush's name. American Talk Radio is waiting for your call to be hung up on.

All Nations outside of America are a politician's friend, and nobody is going to vote to incriminate ourselves for something we would be innocent of. For bush, Ashcroft, and rumsfeld to contend, humans outside of bush america's border, are no longer afforded the rights of being, and bushites can rob our Universe and there is nothing anybody can do about it, isn't going to sell well anywhere. The criminals have enough of a time not getting caught for the things that they do, and almost no one but the lifeless, would stand silently with bush while needlessly murdering ourselves as the innocent.

See?, when bush bitch buford blount murderers innocent people, often their surviving friends and family take it out by killing bushite soldiers that mindlessly follow bush bitch buford blount's criminal command. And, why shouldn't we? The unarrested bush bitch buford blount confesses to murdering thousands of good honest People, for no objective, but to let the bushmob rob even further more children from US all. Kill bush for the love of Jesus, please.

Notice to the World: Literate American Soldiers have not voiced written objection to my writing, (us.military.army) but for the exceptionally rare bushite nazi savage, who sorrily slack, others shouldn't be allowed to tell the truth about polls, 9/11 criminal investigations, or bush and rummy getting the Patriots murdered for pension thieves and heroin pushers to tyrannically profit at our devolvements. Encouraging US to continuing in bush's name getting robbed and murdered irrationally? no rights to defend ourselves from crime in a court of law they say?, without a God, or any reason for love of this world whatsoever? The bushites think that they can first degree murder our world's women and children, our freedoms as Justice for US all, and miraculously, as the result, will bring our entire, dazed and confused World to it's knees as the whore of Babylon. Indefinitely. (Not like a real Whore mind you, most crack-addicts, and even some G men, hold limits on how far they'll go victimizing the innocent to glorify a blatantly evil and ungodly enemy of all that is good and righteous in this world.

Anyway.

The CIA, and the FBI are surely in agreement with US, on this indivisible Justice thing. The quicker bush dies as unarrested traitor by the hands of a true American Patriot, the sooner an explanation will be demanded as forth right and coming.

Again, American soldier, wake up, and kill bush for sacrificing your friends and family to die as cowards, too afraid to stand with God in defense of the once great American flag. My America, is the land of the not so stupid, and brave enough to kill unarrested bush and rumsfeld for 9/11 almost immediately, or any other war criminating enemy of America fighting to not have our Justice served by nabbing the true 9/11 suspects.

Through a legal lens - the attack and occupation of Iraq http://electroniciraq.net/news/printer1262.shtml

/ / The International Covenant on Civil and Political Rights, RATIFIED by both the U.S. and Britain, pulls no punches on this count: "Any propaganda for war shall be prohibited by law" (Article 20). \ \

This is what bush needs to be immediately arrested on for his Niger claims, if you see him not behind bars awaiting public trial, do the American Police force and soldiers everywhere a favor, and kill the escaping demon bush for the love of Your life wills it.

By protecting the demon antiChrist bush for continuing in Our names to rob from Humanity by breaking American laws willingly, will now be a public declaration supporting crime against our betters. I will not stand motionless while bush and rumsfeld with bremer persecute school teachers not guilty of criminal offences, while pirating Iraq's wealth for Dutch-Shell, Worldcom, and double billers, commi Halliburton, all the while, feeding American Patriots radio-active toxic waste to die as losers. Think Patriot.

Arthur MacArthur "Those forty minutes when I defied my orders, were the keystone of my career." A career that would lead him to the highest rank in the United States Army. Saving many lives he did by doing so bravely.

His son later, defying Hoover, smashed thousands of American WWI vets, who were demanding their promised checks to save themselves from starvation. Winning he did, corporate banking's recognition and praise as a savior of the american way of life, and The People?, they ate it again when in 1950, at the age of 70, defying Truman, launched a win sumtin at all costs attack against China, that quickly during the unreported stupid needless slaughter of countless American teens, forced Truman to concede defeat by begging for a immediate truce with China while firing MacArthur, who came home to giant demonstrations of love and affection for sacrificing American lives forgotten to the accolades of corporate america's unsung hero.

George S. Patton Jnr. "It's no fun to say to a man you love, go out, go out and get killed, and we have had to say it, and by God they have gone..."

Johnny Wizard "Let US just get bush instead friend."

For the love of life and countries, kill bush as traitor to all our Humanity.

Your unbroken eternal Warrior,
as acting Servant and King,

the one and only,
as staring Johnny Wizard,
the true Son of Man

P.S. My reader, I taunt you again: forward these words of love or hate as if they were of Your own concern. America I think Will be interested in this public outrage of the silent majority, an outrage that will ecplise into an international scandal of such proportions, it just might win US the newscast with the facts on Justice ruling our way. ( I am excepting all

reasonable job offers. Hint hint.)

--

A bushite nazi soldier's motto: Do NOT kill demon bush
for the love of God as true Patriots would, but war your
comrades in arms with toxic cluster bombs to secretly
kill yourselves with later on, including US as the
innocent, our children included, while STEALING, not
going nowhere public Iraqi institutions, including
desperately needing humanitarian aid shipments, starving
the poorest of the poor, all to please and glorify the
pension thieves of our Grandparents, and the heroin
pushers to our school kids.

--

> To my friends in Iraq, don't let corporate american
> media divide yourselves from community as equal
> participators. An Iraqi, is foremost, a member of our
> Humanity, and just like the rest of US, hate the God
> betraying anti-American demon antiChrist bush, more than
> anything else in the Universe for persecuting the
> innocent while killing coppers to steal our assets
> undefended without a leader to speak out everywhere for
> our living rights included.

Deadly suppositions
http://www.rationalreview.com/rlwrights/112603.shtml

/ / That's right. American troops are now being used to destroy
private property of "suspected Iraqi guerrilla fighters." What
happened to requiring proof before depriving someone of "life,
liberty, or property" as stated in our own Constitution? Evidently
that does not apply to people we attack so that we can bring them our
way of life. \ \

--

GO F*CK YOURSELF, MR. PRESIDENT
http://www.antiwar.com/justin/j112603.html

/ / We must act, even if the threat is nonexistent - because of the
potential danger. If "self-defense" consists of necessary
"preemption," then what would happen if we started acting on this
Bushian principle domestically? After all, killers, robbers, and
rapists don't announce their intentions, politely putting us on notice
before they strike. Why not just jail them before they have a chance
to commit a crime? This principle, if applied within the U.S., would
lead straight to totalitarian rule. Applied abroad, it means perpetual
war. \ \

--

I Know When Bush Is Lying: His Lips Move
http://military.surfwax.com/files/Weapons_of_Mass_Destruction.html

/ / The Bush regime's panic is reflected in its adoption
of Israeli revenge tactics, using F-16 aircraft to drop
500lb bombs on residential areas called "suspect
zones".... ...Lianne Seymour, widow of the commando Ian
Seymour, said: "They misled the guys going out there.
You can't just do something wrong and hope you find a
good reason for it later." \ \

War Propaganda
http://www.currentconcerns.ch/archive/2003/02/20030228.php

/ / In other words, the military actors and politicians
are totally blinded by the "war on terrorism" dogma.
Truth is falsehood and falsehood is truth. Realities
are turned upside down. Acts of war are heralded as
"humanitarian interventions" geared towards upholding
democracy. Military occupation and the killing of
civilians are presented as "peace-keeping operations."
The repeal of democracy is portrayed by General Franks
as a means to providing "domestic security" and
upholding civil liberties. \ \

--

http://www.bushdraft.com/

/ / With the threat of 56% of troops not re-enlisting
Bush is going to need a draft unless he changes his
policies soon. I'm sure you agree, I'm sure you don't
want your friends, family and coworkers drafted either.
To fight for what? freedom? When George Bush passed
the Patriot Act and now the Patriot Act 2 he took away
many of the rights that we cherish so much. Why are we
"bringing freedom" to the Middle East when Bush has
shredded the constitution and taken away our freedoms at
home? It doesn't make any sense. \ \

--
http://www.globalblogs.com/binationaltimes/archives/00000116.html
"Yes, Bush lied"

/ / WASHINGTON - A year ago, on Oct. 1, one of the most
important documents in U.S. history was published and
couriered over to the White House. \ \

--

This is why I plead with armed Americans to kill the
unarrested bush for the love of children everywhere.
Look, we know directly who the bushites are who PUBLICLY
advocate the murder of innocent People through corporate

censorship, who support furthering the demon antiChrist's senseless crimes against my America, and our World. Example: You'd think Art Bell figures none of his listeners could in no other way, learn of traitor bush murdering thousands in New York City, and his contemptuous silence on the issue forbidding anyone else from publicly mentioning it. I have dominated alt.fan.art-bell for years, while Art Bell, like Canada's Peter Warren, will continuously advertise open line calls, but abruptly end calls topicing on KNOWN FACTS surrounding their evil false deity bush, 9/11, Iraq, depleted plutonium, Halliburton, and the deaths of our innocent lives fallen to their personal inaction depicting our community as uninterested. Art Bell in FACT has pre-screened his "open line" calls since bush stole power, and does so, to make appear Americans aren't clued in, on the now hundreds of thousands of innocent lives bush has murdered as war criminal. A good nazi bushite, is a dead nazi bushite, halted from advocating further war crimes constituting the murder of our innocent families. The dumfuk bushite parasites have been PURPOSEFULLY blowing themselves up with mined cluster bombs as suicide bombers! Not dying for any noble cause, but to only further toll more American Patriot lives. We should ask all soldiers, who are they loyal to, the 9/11 perpetrating American cop killer bush, or the People's America, as so enshrined by the Bill of Rights, and true Justice to actually protect the freedom of US people by following a leader?

These OUTNUMBERED and OUTGUNNED nazi bushites are indiscriminately bombing residential communities with radio-active toxic waste for nothing but to please their evil false deity, Our Mr bush Jr.. No rational reason but for a hatred to Your Humanity, and God if you believe.

Example: that evil nazi terrorist buford blount confesses to murdering thousands of innocent Iraqi People for nothing, no reason he proudly professes as wicked evil heinous traitor. Think of the lives You could save Patriot, by justly killing the unarrested buford blount, on hopes a person to take his place could at the very least consider being honorable in defending Your America? Demon buford blount is truly the enemy to American soldiers, for, if your family was murdered by buford blount irrationally commanding mindless bushite soldiers for nothing but to further rob the dying American tax payers, would you not too, spend your will hunting the evil nazi fuck down personally to spare further another innocent family suffering? To kill the

unarrested unAmerican buforld blount is to stop him from
ordering the practically dead already, nazi dumfuk
treasonous bushite brethren teens, from victimizing
again US as the innocent undefended.

While CNN still insists it's better for them to
misinform and ignore, than to expose the demon bush as
the true target for any Patriot's rage. American
soldiers are being sacrificed to die for no known good
reason, but for bad leadership as evil bushite war
profiteers.

--
House Nixes Anti-Profiteering Penalties In Iraq Spending Bill

http://www.senate.gov/~feinstein/03Releases/warprof103103.htm

/ / "When the Senate Appropriations Committee considered
this supplemental request, Senators Leahy, Feinstein,
and I joined together to criminalize war profiteering --
price gouging and fraud -- with the same law that was
passed during World War II. Yet this amendment, was
stripped out of the final bill," said Durbin. "I fail
to understand how anyone can be opposed to prosecuting
those who want to defraud and overcharge the United
States government and the American taxpayers." \ \

--

--

/ / The Constitution cites "high crimes and misdemeanors" against the
state as grounds for impeachment. Could there be any higher crime
against the American people than to have knowingly deceived us in
order to stampede us into an act of barbarism that has betrayed our
finest ideals, our highest ethical standards, our national honor, and
our whole history? \ \

Here's what a bushite's granmom's tax payment is going
towards, minus the 2.5 billion per month of 4 that is
secretly STOLEN by the bushmob as something Americans
are forbidden to know of through their corporate news
censorship stealing their very own demeaned values,
dying.

How U.S. will spend $20.3B in Iraq
By SCRIPPS HOWARD

ACK! This Scripps Howard piece is missing from our internet world!

Hmmm.. now looking...
this following is an archive of official corporate news sources, of
which few if none report specifically on how the demon bushmob is
spending/stealing grandma's moola..

http://www.stern.nyu.edu/globalmacro/cur_policy/middle_east_news.html

looking more...

U.S.'s 'Iron Hammer' Code Name 1st Used by Nazis
http://news.yahoo.com/news?tmpl=story2&cid=1896&u=/nm/20031118/us_nm/iraq_hammer_dc
&printer=1

Not surprising, but not what Americans should be following after....

Anyway, the cash breakdown of the criminal thefts of Iraqi assets
is now, as the tyranny of the nazi bushites, becoming harder for US to
find, why so?

We have stories like these ones still though..

Senate digs into Iraq $87 billion

The best evidence to kill bush quickly.

Demon bush "These terrorists target the innocent, and
they kill by the thousands. And they would, if they
gained the weapons they seek, kill by the millions and
not be finished. The greatest threat of our age, is
nuclear, chemical, or biological weapons in the hands of
the terrorists, and the dictators that aid them. The

evil is in plain sight, the danger only increases with denial."

Remember: Demon bush doesn't forget signing his soul to the invade Afghanistan plan by not following the 911 evidence, but would top secretly attribute to Laden for blame, authored by himself, rumsfeld, Condoleeza, and General Ahmad two days prior to the public event of murdering "thousands" in wealthy corporate America, a secret plan that has been confessed publicly to US as fully implemented by the White House right from the start to Jim at MSNBC, months after the fact when the demon antiChrist was caught with American blood in his breath.

Not to follow the criminal leads surrounding evil bush as mass murdering antiChrist, is what the White House confesses to Americans today as official policy under every circumstance. Karma. Demon bush tells corporate america that they'll persecute the innocent in any country by denying our fundamental human rights of Freedom and Justice, while now dropping 2000 pound bombs in God's World containing children, while corporate nazi bores, report in judgement of the great King who MAY have cuddled some cute boy! Jackson has given so much to America in stone, and in return, the corporate news nazi bushites sit condemning a great man whose open vulnerability gives him his wondrous strength and power as true American artistry. While these very same treasonous corporate bushite news anchors refuse to report on tommy franks running death squads against school girls, Guantanamo's Taliban's Girl School teacher Mozam Begg whose family served proudly for generations in the British Military, or tomorrow if YOU don't help US speak out publicly, continue refusing to report the general murder of civilian populations by the godless evil nazi bushite traitors. A good bushite, is a dead bushite halted for advancing their murder rampages against our innocent families irrationally. Demon buford blount, who runs like the nazi coward he truly is from my challenge to a death match, confesses to murdering thousands of US People for no military objective, but to get killed those that serve as bushwhored slaves under him to take his cowardly place instead, a die hard bushite nazi traitor. No government in Iraq would give WorldCom and Halliburton a blank check because they care too much for The People, nor certainly would they not, steal helpful Humanitarian Aid from poor people to pay the fraudster commi double billers, Halliburton again, nor either or, dump radio-active toxic waste on themselves to help bush's

re-election campaign get off on murdering Americans for financial pain as God betrayers to US all. KILL BUSH NOW! Remember: a bushite soldier hides behind an American uniform, while knowing the bushmob has likely robbed their very own family of their savings and vital protection. Weak and cowardly, stupid and murdering innocent People for the demon antiChirst as their false deity parasite they are dying for TODAY as. I HATE bush as much as any real man would. The bush demon sells his Satanism by offering NO skills required to be dishonorable and dishonest, no reading newspapers, or feeling the pulse of the plundering nation required while ransacking the faithful. While these corporate news experts and CNN and CBC censor pleads from Humanity paying the wages of evil bush's wars against freedom and God, Justice and America, denied our corporate news coverage to be my primary lonely concern mostly it seems sometimes, as too, how terribly it truly is for life whose love isn't appreciated by our will anymore as the living in america, oh yeah, I mean America.

As an American then, what life will you forsake where bush'll rob you over and over as the never living for something better? These american bushite nazi fuks, think your gonna wash their feet, and instead of defending yourself and family, just turn the other cheek right before the bushites drop a two thousand pound bomb or two on your innocent neighbor next door? Done for nothing but feeding the bushmob?, as unarrested buford blount contends in God's presence? Then to think, buford blount figures I as a real man will not seek him out one to one to the ends of this universe for payback.

What can God do to help, if your refuse to help yourself? The true danger to America increases with American doubts on bush's blatant, true naked evilness, or humoring God as Johnny, and betting on yourself for a change by supporting me as the time being? Look, what could you do for your freedom, when I demand the pursuit of Justice by following evidence to truly protect this World we share? Support my demand to raise the news media's ignorance on what you shout even louder?

Think this: demon bush makes no public mention of where almost half of the monthly 4 billion dollar tax payer bill is quietly disappearing while grandma loses her cable television, or only grandson? Is that Leadership I ask every American Soldier to be brave and forward this letter on terrorism to your fellow comrads secretly. Then, we'll see...

Johnny Wizard

---
Jail for Bush: Holding the Greatest Traitor in American History
http://www.jail4bush.org/

--

The money for reconstruction is being misplaced as stolen, while
corporate america demands bush not be held accountable.

American Soldiers, you'd think, wouldn't stand for it, right? It isn't
Art Bell, or Bill Hemmer who's paying with their lives, but a poor,
dumbass soldier along with the general tax payer, whos ignorance is
ignored, sacrificed, as not relevant to Art, or news worthy to Bill. I
will send this email like most others to Art, and maybe I'll phone up
Bill again to remind him that the FBI states bush's business partner,
General Ahmad funded Atta, the 911 mastermind. But you know what
they'll say as traitors to your America? Nothing but hang up on You,
while pretending we have no concern for the senseless murder of our
families, or the robbing of American principles.

The bushite soldiers don't steal the Humanitarian Aid for themselves,
or purposefully let the bushmob steal their parents pensions, no, they
do it blindly to please their false deity, the demon bush Jr., because
their weak and cowardly, stupid and truly dying... Not for America and
freedom they die, but for the antiChrist, Our Mr. bush Jr, the most
hated and despised war criminal of history.

--

GET BUSH

Officers fault air strategy as ï¿½timidï¿½
http://www.freerepublic.com/focus/f-news/842417/posts

/ / Jim Wilkinson, director of strategic communications
at Central Command, responded by saying, "We don't
discuss plan specifics for reasons of operational
security. However, I can tell you the plan is
comprehensive, modern and flexible, and Gen. FRANKS
continues to work closely with all the services." \ \

...The officers said the plan deviates in significant
ways from the 1991 38-day air campaign during Operation
Desert Storm, in which telephone communications, power
systems and bridges were targeted from the first day to
isolate Saddam Hussein and his military forces.

The reason for the change: The Bush administration
wants to spare hardships to Iraqi civilians and to show
that the real target of the bombing campaign is Saddam. \ \

--

GET BUSH

So, to IRRATIONALLY target the telephone exchanges, power grids, water dams, pipe lines, and residential communities with thousands of toxic, radio-active cluster bombs to blindly murder a person like You, (that would later, blow up nazi bushite soldiers by landmine), would be considered TRULY evil by demon bush standards too?

Why does Johnny call the huge war criminal traitors puny dumfuk bushite soldiers? They die truly as cowards for the demon bush liar, being enemies of God and Humanity, because prior to the war, (as outlined on March 7th), we had completely unrestricted access to go wherever in Iraq, without delay. So, demon bush sabotaged America's ability to effectively disarm Iraq, and to bring peaceably, freedom in the region through JUST causes, all so he could STEAL further the lives of AMERICANS by continuing with his murder rampages against the innocent. We remember, Saddam offered the demon antiChrist, Our Mr. bush Jr. unfettered access to the Iraqi national media to preach his deceit against God and Humanity freely, but bush refused to publicly condemn Universal health care and education, along with what has been described as Humanity's greatest food distribution network. Instead, bush sacrifices bushite soldiers to steal OUR Humanitarian Aid, to double pay commi Halliburton, an american company found repeatedly by Our ARMED Police agencies, defrauding all Americans in criminal contempt for the People payers. All the while condoning the torture and enslavement of those known innocent still, but beyond american borders as our Humanity. Morally equating the rest of Humanity outside of Universal Justice as US fairly represented? Mr. bush tells God his plan is to victimize Humanity in America's name, by hiding behind who's flag again?

Destroy the war criminating, unarrested American cop killer, our offensive Mr. bush Jr. instead my friend, and be thanked by God in person.

Look, Mr. bush, rumsfeld, and franks have STOLEN food and medicine from Iraqi children by confiscating "Saddam's Money", and, it is now publicly understood that tommy franks, sabotaged the ORHA plan to create insecurity and chaos so to rob the central bank of billions. For tommy and his private banker friends to do this, he as a bushite had to sacrifice the lives of LEADERLESS American Soldiers as too weak and cowardly to say, "For God's sake, I'll wise up and destroy bush and rumsfeld myself instead to defend my loyal Brothers and

Sisters I will, till the end, giving of everything for a life worth living", at least that is what a truly proud American Patriot who fights gloriously for a just battle as the good guys would. Instead as the dishonorable bushites, robbing blindly themselves and their own dying brethren, while bombing our homes with radio-active toxic waste, that contains among other things, deadly plutonium. Enemies of God as the bushite disciples.

Wow! Wouldn't it be cool if America stoop UP and destroyed the war criminals bush and rumsfeld by simple supernatural Human Will power?

Tough luck so far for corporate news america continue to slog that America is so ungodly stupid as the uninformed, and have never heard of this Johnny Wizard artist taking center stage as makeshift creator antiChrist demon slayer.

Of course we should not forget to mention again, in addition, like the same, Saddam offered the demon antiChrist, Our Mr. bush Jr. unfettered access to the Iraqi national media to preach his deceit against God and Humanity freely, but bush refused, so too just like CNN and CBC censors do today by refusing communicating community interaction on our top priority war issues. Instead, we must, they claim, continue sacrificing bushite soldiers to steal Humanitarian Aid, to then double pay commi Halliburton, or WorldCom; companies found repeatedly defrauding all Americans in criminal contempt for the dying American tax payers. All the while watching now in real horror, as bush OPENLY steals almost all of the National Iraqi assets for his private auctions, but for the exception of the already claimed, iraqi Halliburton oil reserves. Why?, Ho ho ho, because, he said so, in writing. 13303 states bush is the lawless demon from scriptural references, and why Christians don't stand in service for the cried mercy begged from God, the Son, and Humanity, I'll never understand, but Johnny'll tell You, he's gonna march home even if it means I'll do it all by my lonesome. My soul isn't for sale, nor are my righteous Universal principles stealable as a true Human defender to the last bushite standing who foolishly would choose to be my mortal enemy.

To my friends in Iraq, don't let corporate american media divide yourselves from community as equal participators. An Iraqi, is foremost, a member of our Humanity, and just like the rest of US, hate the God betraying anti-American demon antiChrist bush, more than

anything else in the Universe for persecuting the innocent while killing coppers to steal our assets undefended without a leader to speak out everywhere for our living rights included. HUNDREDS, if not thousands of American soldiers have already DIED in Iraq stupidly as evil nazi vermin, GAME OVER MAN, for nothing but their cowardly ignorance on our ability to communicate FREELY for Freedoms thought died for already. Dying for bush as too cowardly to protect themselves as their own friends, and sacrificing families they silently watch criminally plundered further by their leaderless inaction on truly protecting America. Again, bush isn't America, America is America.

Justice for all, and let's name this time our own with my writing as a make believe King of Kings who's done it all already, just for the fun of it, whatdoyasay? Imagine this on a CNN spot speaking for our Justice as an equal to all beings, and like, wouldn't that be super interesting for everybody as the unjustly suffering and dying as victims under the demon bush dictates of criminal enslavement and global tyranny?

Christ, take care of yourself by killing bush, please?

Your true friend,
Johnny Wizard

P.S. Look for Johnny Wizard freely discussed world-wide through Google 'groups' us.military.army, and alt.military.police, to witness for yourself, our true awesomeness.

--
US Uses Cluster Bombs to Spread Death and Destruction in Iraq

http://www.thetruthseeker.co.uk/article.asp?ID=700

/ / Gruesome pictures and footage of the mutilated bodies of Iraqi children and other innocents--images that the Western media has largely refused to show--reveal the bloody face of the ``liberation'' that Washington and London have in mind for the Iraqi people. These methods of warfare are a warning of the reprisals and repression that will follow any military victory. \ \

TV Not Concerned by Cluster Bombs, DU:
"That's just the way life is in Iraq"
http://www.fair.org/activism/tv-cluster-du.html

/ / "What about the cluster bomb problem?" Blount answered that "we didn't use that many of them, but

there are evidently some areas where they-- you know,
they've got some-- some areas," and claimed that though
the Air Force may have dropped more, he, as an Army
officer, DIDN'T KNOW WHERE THOSE WOULD BE. \ \

U.S. Under Fire for Use of Cluster Bombs in Iraq
http://www.ccmep.org/2003_articles/Iraq/051503_us_under_fire.htm

/ / According to Myers, U.S. warplanes dropped 1,500
cluster bombs in Iraq. \ \

Hundreds of thousands of land mines to kill evil, bad
guy bushite soldiers with. A good bushite soldier, is a
dead bushite soldier, no longer victimizing our God as
innocent families being robbed of freedom and Justice
for the demon antiChrist American cop killer, Our Mr.
bush Jr..

--

Without Honor
http://www.guerrillanews.com/war_on_terrorism/doc3367.html

/ / Many believe the U.S. wrote 1441 fully expecting
Iraq to reject it because of those inspections, but Iraq
turned that thinking on its head and welcomed the
inspectors in. Immediately, the Bush administration
began denigrating the very inspections they mandated
with 1441, and began denigrating the United Nations for
expecting them to live up to the bargain they authored. \ \

Brave Face Belies Administration's Panic Over Iraq
http://www.dissidentvoice.org/Articles9/Lobe_Iraq-Panic.htm

/ / The report, written by the CIA's station chief in
Baghdad, was formally presented to top officials Monday,
but word of its conclusions was also selectively leaked
to various reporters, apparently, said the newspaper, to
"make sure the assessment reaches Bush." \ \

--

Our Mr. bush Jr. - "...I appreciate the families who are
making the sacrifices along with our troops. ..The sacrifice
that our folks are making in Iraq will serve our interests..
..it's the same old stuff, it's propaganda... We just gotta
bring these killers to Justice, which we will. And a..
the military is adjusting.. "

Dying sacrificed as godless cowardly nazi vermin so far
more like... A good bushite soldier, is a dead one
stopped from victimizing our families for a thief of

Humanitarian Aid, the American cop killer, 911 perpetrating terrorist recruiter, Our Mr. bush Jr., the evil antiChrist of Biblical revelations hated this entire Universe over. Wow eh? Look, we'll talk about me being make believe King whenever, just kill bush now as the traitor he is to US People everywhere.

--

Bush to veterans: Drop Dead
http://www.commondreams.org/views03/1113-06.htm

/ / A firestorm of outrage has forced the administration into a compromise phased in over ten years. But it will still deny thousands of veterans their benefits as they die off.

With the relentless militarization of the mainstream media, Bush clearly believes he can ignore the soldiers he will condemn to death, disease and abject poverty. \ \

--

Johnny Wizard Here To Tell It Like We Is

So, the bush regime knows that Saddam has no nukes, but as any person could, maybe at sometime in the future would target general populations, of which Saddam has stated to be rationally stupid, immoral and evil. A tactic that bush, as america, says without pause to reflect, would do so in our stolen names is plausible with him in power as a degenerate. The bush regime also thinks Saddam does indeed have biological weapons, and has so for decades but never used them, as the only affordable balance to the militarization of the region. Namely, to counter the Israeli government's corrupt political position of American funded bigotry and lawless behavior, on claims God gave them a right as criminals apparently, to deprive Christians a right to live justly, to own property, or use public roads even, and that most of Iraq should too, be stolen by force like hitler did, as hitler did measure also, all Jews, by the same level of intolerance, ignorance and barbarity sharon does of US as Palestinians, you know, Catholics, Muslims, Jews and Atheists, absent love for ourselves as understanding, godly, and principally innocent until proven otherwise. Mr. sharon is not Jewish, nor is anyone else allowed to practice as such in the Likud party. But anyway, Saddam is no Saint, however, no evidence exists that Saddam has ever used bio warfare weapons on his own people, while Our Mr. bush Jr., is documented factually, as a murdering demon

of evilness clearly paraded before ourselves by corporate command, as a supposed representation of OUR civilization's true will. As Our Mr. bush Jr. works diligently to destroy our lives through fraudulent means, counting on US not trying to save Ourselves by following the truth to set US free. A repuglican who without laughing, demanded law enforcement agencies not follow the ample criminal evidence to arrest the true perpetrators of 9/11, but instead, urged the closing of investigations, while top secretly, implicated bin Laden without evidence he couldn't divulge, of which the British government ended up doing so for the love of our selves, comprising of only, general maybe if's, of which only could, can, and does, jeopardize bush, cheney and rumsfeld by taking such a secret, now public position against our interests to kill us as the innocent with. Which is truly why bush rumsfeld and cheney are warmongering as despicable savages. 5 billion dollars in humanitarian aid is being blocked by the bush regime to enter Iraq, like food and medicine. The bush regime demands children be starved and not receive treatments for ailments, such as aspirin for headaches, or as cancer from the devastation the families of Iraq are still suffering through, since the last time a bush's american criminal military force dumped tons of radioactive waste in the region, while murdering indiscriminately ourselves as anyone, because principally, toxic American soldiers, like the American people, hold the title of the highest illiteracy levels of the developing world, which brings them as consequence, the worst health care providers to themselves as discounted, corporately mandated as unworthy to understand their own behaviors, so they can be even further rooked as shysters. Over two million people have died directly because of American aggression against the practically defenseless in Iraq, who the bush regime even claims, have little of no power to change the political landscape, based in loose tribal ethics as protections, that has been as such, for approximately 4000 years. And as American traitor war criminal rumsfeld proclaimed, since american aggression has continued against Iraq over the last twelve years, so too, has their economy been devastated, and as consequence, the attraction to keep the more literate as wealth driven from remaining, has waned. But what can bush offer Iraq, indeed to our world my friends? Just murder US people for stolen cash profit, is clearly his only motivation, as a tyrant dictator far worse than Saddam has ever been. Mr. bush indicates he knows nothing of economics, or the important function of law

to protect our societies, so what if he should kill Saddam, and maybe a million Iraqi people, then what? He hasn't thought that far, and clearly, due to his evilness we witness daily, couldn't care less. CNN and other corporate professionals refuse to tell the blood sucking, carcinogenic, corporate American real fast news blips, of causes they as a nation in total celebrated televised ignorance, have committed against the Iraqi struggling to survive People, and indeed around our world likewise. As was the bush regime's unreported support of the overthrow of democratically elected Chavez in Venezuela, who incidentally, as one of the very few, holds a perfect human rights record, unlike America, who is the only nation, the World Court has convicted by factual documented evidence, to be a terrorist state. There is no record of Saddam murdering millions of Iraqis, while targeting innocent children, but there is to the illegitimate bush family, and nazi soldier tommy franks intentions, the most despicable savage to ever don an American uniform, who would now have us all believe, such a evil strategy of criminal wrong doing, is the only option, to better the lives of those who barely survive from American oppression in Iraq as it is. What form of governance would bush be suggesting? Would it be like bush squandering almost 7 trillion dollars in bad business decisions for our futures as he has set forth for America already? Or maybe something like the new criminal heroin pushers in Afghanistan as foreigners? Costing the American nation, who holds the title of highest rates of human depravation in the industialized world, and highest percentage of imprisoned per populace in all recorded history, 5 billion dollars every month to prop up sales in narcotics, and terrorist handbooks. Where political opponents who criticize the Karazi regime are murdered, for factually claiming the political aims of Karazi are not representing US people as the children? Or as evil bush, who would boldly lie to the face of God, that there were no girl schools in Afghanistan under the Taliban, while secretly thanking sadistic scum bag American traitor, mass murdering savage, wimp ass drug dealing coward tommy franks, for specifically targeting those very schools, women reporters, Mosques, red cross units, literate tribal leaders, men with beards, and children, while labelling all of Our humanity who would fight against injustice his enemy? Or that bush would dare still attempt to get away undamaged by the real men of this world, to spout his venom hatred for humanity to what must be drugged out to be so cowardly American soldiers, by lying to US as the demon of pure evilness

we all witnessed, that heroin cultivation wasn't factually outlawed by the Taliban officially following Allah, leaving no position as God's will to back track politically on later? American military analysts, including the CIA and former secretary of Defense, William Cohen, claim Iraq is no threat to it's neighbors, as so too, does no nation in the region support bush's warmongering. In Congressional hearings last week, former UN arms inspector Scott Ritter courageously stated what many Americans believe, but rarely if never mentioned by corporate news standards as the will of the people, "A handful of ideologues have hijacked the national security policy of the United States for their own ambitions." Ritter insisted Iraq was no threat to the U.S. or the Mideast, and later offered that cheney be forced by Americans on mass, to offer evidence to his bogus, make believe accusations, that he wishes to use to actually murder thousands, if not millions of US REAL PEOPLE. Our axis of evil, bush rumsfeld and cheney, do not want renewed inspections of Iraq, they only want war to murder ourselves, and to create instability in our world through fear to prevent their rightful capture for 9/11, while we all are expected to sit back as corporate standard fascist cowards, to pretend bush was actually elected as President in America, because actual poll counts were forbidden to be publicized, therefor, he may have won our approval to use nukes against anyone for whatever. With CNN, the Commie Nazi Network, telling us we as the civilized are also convicted to poll, that evidence is no longer a requirement to convince US who is criminally insane, in this nightmare of criminal bush family evilness, hell bent on destroying your world, and everything WE, as The People, have struggled so hard to protect. It would seem any world threat of terrorism, would be surely from a nation like bush's America. A cowardly nation that demands we as humanity, be deprived the guiding principles of Justice like they in weakness had abdicated as no longer their own as unfairly represented, leaving as slaves the bush regime to rob us all of our Freedoms, as a rule of Law instills such as in the Declaration of Independence, the Bill of Rights, and the American Constitution. All now trashed by Ashcroft, as clear criminal intent to obstruct Justice as the American dream for everyone.

E-mail this to somebody for Christ states,

yours truly,

Johnny Wizard

-----

From below:

"Mr. bush you nazi vermin, you attack my America, you
attack US all. American soldiers will not sit back as
cowards entirely, and watch you sacrifice our lives as
worthless without meaning."

----
I think I love you too much

Wow, your amazing! So, what your saying is bush the
nazi tyrant, the unelected mass murdering fascist
dictator, has no interest following the ample criminal
leads, because they lead to him, rumsfeld, and cheney
likely too, right? And, when that evil monster told us
instead he would rely on secret evidence, but couldn't
tell us why, as too the FBI or CIA, it turned out to be
nothing but another wicked evil deception against the
great American people, Tony Blair, bin Laden, and law
enforcement officers everywhere, to even further give
him cause to close investigations into 9/11 as Reuters
told us, and rob directly from American soldier
families, their lives, pensions, life savings, and blind
faith, in bush, the false diety, super evil anti-Christ.

Johnny Wizard is my Hero.

It angers me to see people in this country trashing Germany, Italy, and Japan for not spending enough on defense. These countries have little choice in the matter. The United States, with allies, set limits on the size and character of their militaries following WWII. As such, it would take significant changes to their laws to increase the size and capabilities of their militaries (changes that would not likely be accepted by the USA, past allies, or neighboring countries).

As for the other countries, both the UK and France have nuclear weapons and can defend themselves, Switzerland and Sweden are long time neutrals, Norway is a quasi-neutral, Spain is a quasi-neutral, Portugal is a quasi-neutral, Austria is a quasi-neutral, and Russia still has one of the largest militaries in the world. In the end, only the Netherlands, Denmark, and Belgium are weak on defense, and that only because their populations are too small to support a larger military.

So, if you want to see Germany, Italy, and Japan rearm, the people you should be talking to are sitting in Washington. However, these are independent countries with world views very different than our own. As such, don't expect any more support for our global ambitions after these countries rearm. Indeed, those renewed militaries may turn out to be a threat to those ambitions.

Probably around $125.00. They're currently selling new for $189.95.

>Go to rec.radioshortwave newsgroup :-)
>

your reaction to his post is understandable.

However, he is probably technically on-topic if his scanner's frequency range covers the AM broadcast band like mine does.

However, I kind of doubt that his scanner covers the AM broadcast band like mine does.

In that case, he is indeed off-topic.

However, my scanner has very poor sensitivity in the AM broadcast range. I probably get about 3 stations on it in that range in normal daytikme conditions, while on most other regular non-scanner radios, I get several stations in that range in normal daytime conditions.

I have only recently gotten back into the radio scanner hobby after many years of absence.

I haven't really started listening again, much, but I'm about to start to.

And as I'm interested in all radio that can be herd on it, I will probably start scanning at the lower frequencies (AM broadcast band and the little tiny bit of longwave it covers. It doesn't really cover longwave in any substantial way), and go up to the highest frequencies it covers.

It's best sensitivity is in the lower frequencies of the standard scanner bands.

which is one of the reasons that I decided to start scanning at the lower frequencies on it instead of the higher frequencies.

and although the AM broadcast band on mine has poor sensitivity, the frequencies are close to where my scanner starts having it's best sensitivity, so I decided to include the AM and SW bands at the start of my scanning on it and go up in frequency instead of starting at higher frequencies where the scanner has poorer sensitivity.

actually, better than pranking them (which lets them know you or someone else is listening) is to just listen secretly so that you might be able to secretly find out if one of the employess spit in your drink or not. (or did something else to your food).

While the following item is not scanner related, it does have to do with this thread and was reported in the newspapers and on tv here some time ago. I think last year (2003).

A MCDonald's employee was spitting into customers' soft drinks (without the customers' knowing) when and because the customers' ordered the soft drinks with "no ice".

among doing other similar nasty stuff to the customers' drinks and food.

somehow, some customers found out and complained (several different customers. A BUNCH of customers complained.

I think she was arrested (although I don't remember if she was arrested or not. She was definitely fired though.

so now, I prefer to secretly listen rather than telling anyone anything.

>Mhz frequency band. One of those drive thru frequencies, in common

that's pretty much what I was going to say also.
that I don't know the frequency he broadcast on, but it might be one of the
MURS frequencies.

And there are some businesses operating on MURS frequencies.

And it's perfectly legal for anyone to broadcast on MURS frequencies
liscence-free within the legal power limits.

I know that some of the fast food drive throughs in my area operate in the VHF
Hi band somewhere in the 150 through 159 MHZ.

It might or might not be on the MURS frequencies.

but they did seem to be in the specific MHZ range thattyou mentioned, if I
remember correctly.

>tolerate them, they are intentional attacks upon the customers of the
>business intended to do harm! Local Law enforcement can charge them with
>"Malicious mischief"

ah, but what if this is the scenario???

If the Burger King is operating on a Murs frequency, and if the prankster just happens to live in a house close to that particular Burger King where reception of the drive through is possible within his house, and he's legally transmitting on a MURS frequecy from his home?

## 856. Re: RF-Hacker fun with the drive-thru window

Newsgroup: rec.radio.scanner

Source record: 22746

This reminds me of the time that I was accused of malicious interference (which I was not doing) for legally transmitting on CB channel 14.

During the time that a fairgrounds here held it's annual fair, I happened to be driving by it while talking on the CB in my car on CB channel 14 (back then, commonly used by kids' walkies talkies also and maany other part 15 devices) and someone operating the fair told me that I was illegaly transmitting on a frequency that was reserved only for the business operations of the fairground.

They did admit that it was CB channel 14, but told me (through the radio) that CB channel 14 was reserved only for the business operations of that fair in that area, and that I was illegally interfering with it by talking on CB channel 14.

I should add that this was in the days after the FCC had already ruled that liscence-free CB operation was perfectly legal.

And my CB was at or under the legal power limits. (no modifications).

The fair just happened to be using the very common frequency of CB channel 14 since back then, those CB channel 14 devices were very cheap and very common since they were then commonly used by part 15 devices.

# 857. Re: RF-Hacker fun with the drive-thru window

>he Radio use was not the point, and the discussion depicting the crime as a
>prank was ill-conceived. The company was damaged and the customers
>disturbed. Do you defend such anti social acts?

oh. so you think I'm anti-social because I innocently talked on CB channel 14 in the 80's (operating without a liscence on those frequencies was permitted back then also) and just happened to interfere with the business operations of the annual fair at the fairgrounds that happened to use the same CB channel for their business operations and they accused me of innterfering with their business operations for transmitting on their business channel of CB channel 14 (even though there wasn't anyone talking on the channel when I transmitted. It was after they heard me say something that they knew I was on their "business channel of CB channel 14" and accused me of malicious interference with their business operations of the fair."

By the way, back then, one of the school systems' around here had ALL of their school bus drivers business operations assigned to one of the CB channels.

I didn't get accused of interfering with that one, as far as I remember, but that school system olater eventualy moved to other frequencies that were and are indeed frequencies reserved for either only business or government ot something like that.

## 858. Re: RF-Hacker fun with the drive-thru window

Newsgroup: rec.radio.scanner
Date: 2004-01-27 06:21:15 UTC

Message-ID: <20040127012115.24620.00000927@mb-m13.wmconnect.com>
Source record: 22598

what about this scenario??? I'm sure this has happened before (although it wasn't me. honestly, it wasn't me).

What about all the fast food pranksters not using a radio?

I'm talking about the people who drive up to the drive through menu board in their car, then order a bunch of food, and then instead of driving the rest of the way through the drive through, they simply pull out and drive away, so that the car behind them gets charged for all of the food that they ordered that the car behind them did not order.

>rom what I've heard, the interference
>consisted mostly of random insulting comments, and not necessarily
>jamming of the system in a way that would prevent it from working.

and that's exactly what happened to me with the county fair's business channel of CB channel 14.

I had my CB on in my car. There was NO ONE talking on CB channel 14. I transmitted a "breaker, breaker" to talk to some one, and as soon as the operators of the fair heard me say "Breaker, Breaker", they started transmitting accusations of me illegally transmitting on their "business channel of CB channel 14" and ""causing delibirate interference to" their "business communications."

It seems to me that the fast food prankster is pretty much the same thing IF he's operating on a MURS frequency and simply talking back to the customers he hears on the frequency.

>Carl's Jr. implimented a company directive to dispatch ALL
>non-essential employees to the parking lot ASAP when an "attack" occured.

hehehehehe. I can hear my local McDonald's drive through from my house which is way down some streets from it.

but my McDonald's drive through operates on a frequency that I think is illegal for any of the public to transmit on ( a UHF frequency, though now I want to look and see if it's a FRS frequency or not or some such thing).

But if I could legally transmit on that frequency and IF I did from home, they would NEVER find me by looking in their parking lot.

Oh, they might find me alright if I did, but they wouldn't find me by looking in their parking lot if I did that.

But I prefer to just secretly listening, especially after all of the news reports last year of one certain McDonald's employee purposely spitting in customers' drinks whenever they ordered the drinks with "no ice", among doing other things to the customers' food and drinks for certain similar reasons.

none of which was the customers' fault. In my opinion, the customers have the right to order their soft drinks with "no ice".

And not have the employee spit in them just because they ordered them with "no ice".

Well, just like the MURS frequencies, there was a time that the CB frequencies also required a liscence for the CB'ers to operate on (no, I'm not talking about the hams when it was a ham frequencies).

Then one day, the FCC allowed anyone to operate on CB frequencies without a liscence as long as they were within the legal power limits.

and then the people who were running businesses on the CB channels had to put up with interference from people simply talking on them.

Now, while the MURS service never required a liscence as far as I know, the MURS frequencies did use to require a liscence when they used to be business-only frequencies.

However, they are now MURS frequencies which are legal for anyone to operate on liscence free within legal power limits, just like the CB channels.

by the way, the news recently rreported that the government is thinking of handing over ALL radio frequency assignments to the white house instead of the FCC!!!!

as part of preventing terrorism under the "homeland security".

Therefore, ALL communications frequencies might be reassigned if that happens.

However, I think the news said that Congress has to approve it first for it to happen. That is, Congress has to approve that all frequency assignments are now under control and assigned by the White House (or by Congress) instead of by the FCC.

What wil that do to our scanning hobby if that happens?

Well, the broadcast radio and broadcast tv channels wil most likely stay the same (except for the already approved changes which haven't went into effect on-air yet (the turn-off of all analog stations at the end of 2006, beginning of 2007, and the reduction of tv channels to only channels 2 through 51 instead of the current 2 through 69.

and I remember when it used to be channels 2 through 83.

I always wanted to see a TV channel 83 operational. here in my area.

I guess I never wil now.

>g a Taco at a Burger King window be it via the radio or
>otherwise is a prank.

true. As I said before, you don't even need a radio to do the prank you mentioned above.

People have ordered food at drive throughs and then pulled away just as a prank so that the car behind them either gets charged for the food they didn't order or get the food they didn't order instead of the food they did order.

And that would do just as much damage to the business as the original fast food prrankster that this thread was talking about.

or as you say, ordering a Taco at the Burger King drive through.

I did make one mistake in this post. I said you don't need a radio to do it.

However, the truth is that even if you don't use your own transmitter, you are technically using a radio transmitter whenever you order at a drive through window. It just happens to be the fast food restaurant's own radio transmitter you're using whenever you order through there.

so now what we have here is this situation that people in this thread are saying:

If you use the businesses own transmitter, even though you don't have a business liscence to transmit on those frequencies (technically illegal under FC rrules) by ordering at the drive throughwindow, it is perfectly legal.

but if you use your own transmitter on the same frequency, it's illegal, even though you're still transmitting on the same frequency just as you do when you order at the drive through window.

>Honestly, like the government doesn't have its hands in enough. Now
>they need to police the drive-thru window and baby monitors?
>

they probably will about baby monitors now after at least two of the tv stations here reported about other people you don't know being able to see and hear inside your house by using their own baby monitors in their catr and driving around to see whose houses they could see into on their baby monitors so that they could steal whatever you have in your house or know when the baby or kids are left alone and kidnap them.

After at least two of the tv stations here reported thois on the news at different times , different days (maybe more stations here), I don't doubt that there might eventually be legislation passed to outlaw monitoring these frequencies ( just like cell phones and cordless phones were outlawed)

although they'll ignore that technically, by just using your own baby monitor, you are technically monitoring that frequency.

And if your neighbor happens to get one and uses the same frequency, you can see into their house.

One of the stations reported on that situation also.

They put another video baby monitor into a neighbors' house of a lady who already had one on the same frequency and showed her that when hers was turned off, she could see into her neighbor's house and vice versa, that here neighbor could see into her house on it even both monitors were in their own houses.

When I got my most recent scanner, I went to listen to ham radio and ham tv frequencies in the 900 MHZ, but all I got was cordless phones.

And I still haven't figured out how I can possibly stay tuned to the ham frequencies I want to listen to and watch and avoid the cordless phone calls since I don't know when the cordless phone conversations wil be over.

At first, I thought that they were legal to listen to, siince they used to be legal to listen to years ago, although I don't because it's boring anyways, but now that I know it's illegal to listen to:

How the heck can I legally listen to those frequencies for ham radio and ham tv statioms since if I turn the radio off when a cordless phone starts (or turn the radios chanel), I won't know when the phone convo will be over (there's no way to know) and miss the ham communications I want to listen to and watch.

or else leave the radio on tuned to those channels so that I don't miss the ham radio and ham tv signals I want to see and hear, but to do so, have to leave it on when a cordless phone convo starts on those channels which is illegal to do.

and then there's the little fact that ham radio and ham tv transmissions are much more powerful than part 15 radio devices and ham signals can wipe out the cordless signals at any time on the same frequency.

I'm not a ham. I just like to listen. But how the heck can I legally keep scanning for ham frequencies in the 900 MHZ range when I have to either turn the radio off whenever a cordless phone starts or turn the station whenever a cordless phone starts, and then not know when the cordless phone convo is over ( not know when I can legally turn back to the frequeencies to search for ham signals or listen to ham signals on those frequencies???

Source record: 22606

I haven't really listened to 900 MHZ yet, although I did take a quick look up there as I was interested in fast-scaan ham tv, (pun not intended) none of which I saw on any of the ham bands that my scanner is capaable of picking up. 400 MHZ, 90 MHZ, 1240-1300 MHZ, and 2.4 GHZ.

I read that the 400 MHZ band is the most popular to see ham tv, but I also read that ham tv and ham radio transmissions are not allowed in the 400 MHZ ham band in my area of the U.S. Well, at least not a portion of it.

Then after learning how to read sensitivity specs, I decided to start my scanning on the lower frequencies and go up from there, for my most recent scanner.

which I will probably start seriously monitoring pretty soon.

I've only just fooled around with it so far, with occasional light monitoring of various things.

>I would dare say that *most* hams partake in such behavior at least
>occasionally.
>

that is soooo true. I know of a few particular ham radio operators in my area who are guilty of being involved in highly illegal activities and they got away with it!!!!

and not just radio related stuff, but other highly ilegal activities not having anything to do with radio. And they got away with it because they were ham radio operators and knew influential people in the local courts around here and knew other influential people around the county here also.

The law may say that judges have to step down when they have a "conflict of interest". However, in real life, it doesn't happen that way. In real life, the judges with "conflict of interest" stay on the bench in the cases and abuse their power.

The illegal activities that I know they were guilty of happened about a decade ago.

and now I know all too well about how judges abuse their power and let criminals get away with stuff and that judges with "conflict of interest" don't really step down from cases like the law says they're supposed to.

I've learned all too well from those hams doing that. I have always tried to sttay on the legal side of the law. Those particular hams stayed on the illegal side of the law, and got away with it!!!!!

and are still operating as ham radio operators.

# 868. Re: RF-Hacker fun with the drive-thru window

>Likely some of the new no code types that can't give up there 11 meter ways.

you are wrong. These were REAL ham radio operators doing all of that higly illegal stuff, both radio-related and non-radio related.

As I said, the ones I know about above happened about a decade or two decases ago. (their highly illegal activities crossed from one decadee to the other. the 80's and 90's and they are probably still at it), and that was WAY before the FCC ever passed the law that allows no-code ham radio operators.

so these ham radio operators that were involved in committing highly illegal activities did indeed study the Morse Code requirements and learned it ( or else they would never have gotten the ham radio liscences that they have).

These code-learned ham radio operators were involved in highly ilegal activities, both radio-related activities and non-radio related activities.

and these criminals got away with it!!!!!!!!!!! Just because they knew a lot of influential people around here since they used their ham liscenes to these people as "proof that they're not criminnals since no hams would cxommit any criminal act and all hams always do only what is legal". whooo-hooo!!! What a laugh. I know MUCH better now.

By the way, I'm one of those who would take the no-code liscence, but I always try to stay on the legal side of the law, unlike those paarticual code-learned hams who committed a BUNCH of HIGHLY illegal acts.

so that blows your theory of no-code ham operators being the kind of hamds who would do that .

And it also blows your theory of no code-learnned hams would ever commit illegal activities.

I don't think that that's the whole picture. Those countries use that as an excuse not to participate in more peace keeping duties, in which the U.S. has to fill the gaps, by these countries lack of full participation. Changes in their laws probably will not happen due to their peoples lack of willingness to participate in cleaning out the "rat nests" of the world. At least until a few planes drop in an kill a few thousands of their citizens!

>Oh, and not to mention that it's also a FEDERAL FELONY under ECPA.
>

>Oh, and not to mention that it's also a FEDERAL FELONY under ECPA.
>

how can it be a federal felony under the ECPA when you're liscened to listen to it???

It was in the newspaper here some years ago, (but the ECPA was already in effect then also) that the local police department here was going to use such encryption full-time where the public can't hear them on their scanners unless they're liscened by the local police department to do so. for a fee, of course that the individuals of the public who want to listen have to pay the police department to do so.

The paper did report something about the police saying that background checks would be done to make sure the individuals of the public applying to listen aren't criminals, and that only members of the public who aren't criminals would be given a liscence to listen and the readio equipment needed to listen (provided by the police department for a monthly fee to listen).

and yes, this is in the U.S. and was reported way before 9-11 ever happened, so it's NOT because of homeland security or the patriot act.

yet according to you, the police giving you the radio equipment to listen to them and charging you a monthly fee for you to listen to them, that the police giving you permission to listen to them, and then yoou do under permission from them is illegal under the ECPA act according to you, even though the police give you a liscence to listen also.

Russia is still worth watching also. Russia still has the second largest military in the world, a massive reserve of conventional and nuclear weapons, a slowly recovering economy, a wealth of natural resources, and growing trade with Western Europe. If they ever get their act back together, they will be a major actor on the world stage again. And, thanks to that growing trade, the future Russia will likely be very European.

I am using a common cable tv splitter is that maybe why I am getting
static on systems quite a few miles away? I tried those radio shack
preamps and they did nothing for me but I changed all my coax to rg6
and got a grove scan beam and my reception is great now except for a
little static on far away systems. I have 3 scanners and split them
off of the scan beam with a 4-way cable tv splitter and terminate the
extra port.

Is that all you can say in your response? Nothing of substance?

Enough of this! This subject is off topic anyway. Goodbye.

Is any one using one of the ground plane antennas that RS closed out a few (4 or 5) years ago, the one with 3 verticals and the super wide radials? I have that one and also a RS Scantenna both still in their boxes and am trying to decide which one I want to put up. I have a gut feeling the ground plane might be the best overall.

Any thoughts? Any one have experience with both?

I would go with both but also have two SW antennas that I also want to go up with as soon as the weather warms. RM~

Hello all,

Got an older scanner collecting dust? Your city go digital forcing you
to upgrade?

We currently run an ambitious project streaming many of our local public
service communications on the internet. We do not have enough radio receivers
at this point to cover everything, so we are looking for used scanners.

Pro-2050/Pro-90/BC235XLT (perfer Pro-2050 tabletop, but willing to entertain
handhelds) -- (For Suffolk, Newport News Virginia)

PRO-2052/BC245XLT -- (for various other cities)

We are located in Southeastern Virginia. The scanners go online at www.hrconnect.com, under live audio. We charge no fees, it is a community service.

We currently stream: Norfolk Int'l Approach, Virginia Beach Police, Virginia Beach Fire Dept/EMS, Norfolk Fire & Rescue, Chesapeake Police Dispatch (Digital), Various incl ACARS, Portsmouth Police & Fire, Suffolk Police & Fire, Hampton Road's Emergency Services, and several ICOM radios via JAVA interfaces.

We need the additional scanners to add Newport News Fire & Rescue, to break apart Fire and Police for Portsmouth and Suffolk, and to add Norfolk Police. In addition Williamsburg and James City County will be added, but York County is Digital so it will be a while on that one (or going digital). We have two bc245xlts that will be running Hampton Police & Fire soon as the weather gets better (YAGI mounting time). The computers are in place to add an additional 8 streams at our main site, and several at each remote site (people's garages :-)

If you have a unit you would be willing to sell at a low price, please drop me an email at ethan (AT) 757.org . Feel free to listen in as well!

Thanks!

I am not exactly sure, but you may want to check with your local FCC Field Office before you do such a thing. It is illegal to rebroadcast any transmission in any form. Therefore I would suggest you check up on that to make sure it is legal. Not a flame, just want to help...

>> I have that one and also a RS Scantenna both still in their boxes and am trying to decide which one I want to put up.

Go with the Scantenna.

The other antenna requires alot more horizontal space, which can add to the wind load.

The Scantenna will provide a safer, more-secure mount to a mast.

For the last 3 years, I have been using that RS ground plane that you had described in your post. The antenna is mounted on the side of the house, peak of the roof, (about 35' up). I use Belden 9913 coax (low loss) and get pretty decent results on VHF and UHF. Doesn't seem to work that well on 800 mhz and above. If thats what you are primarily interested in monitoring, you might want to consider another antenna.

Chris

From: N8KDV <n8kdv@nospam.iserv.net>
Message-ID: <4017CEF7.A7396AC2@nospam.iserv.net>
Source record: 22635

I've received two emails in the past week (one today), looking for
George Fetter...

Here is the text of one of them:

Hi my name is David Xxxxxx. I responded to an ad
posted on rec.aviation.piloting for a Lowrance Airmap
1000 gps for sale posted by George Fetter. He called
me about a week ago on his cell phone and we talked
for about 20 mins and agreed on a price for the gps. I
sent him a money order last Tuesday, called him about
5 mins after I sent it at the post office and he told
me he would call me when he got the money order and
was shipping the gps to me. Well, I tried calling him
starting last Friday and have called his cell phone
several times a day every day since then and have got
no response. I also sent him several e-mails and no
response. I started to get worried so I went back to
the post office where I got the money order and had
them put a trace on the money order to see if it has
been paid, but that will take about 30 days. I have
been reading other posts by and about about George on
some other newsgroups and noticed a post you had made.
I was wondering if you could confirm his home address
is 124 westwood dr in daytona beach, fl? I have some
relatives in Orlando and I wanted to give them a call
to see if they could contact him and find out what's
going on since it seems he's ducking me.
---
Please take care of your customers George! Don't want them making
inquiries to me, trying to track you down!

>>>pretty decent results on VHF and UHF. Doesn't seem to work that well on 800 mhz and above.<<< Chris

I am more interested in freq's below 800 as I get great reception on the local 800 system with just the on-board antenna.

I am smack dab in the middle of tornado alley and have been thinking as Jeff mentioned the ground plane will be quite a target. I was considering selling one but am now thinking I'll put up the ground plane and keep the Scantenna as a spare as I don't have much invested in either.

Is that 9913 a small diameter or large dia coax? Expensive? I'm needing to put up 2 sw antennas and 1 scanner ant so will need quite a bit. Was thinking I would use RG6. RM~

---
---

If you live in tornado alley you would probably be better off
with the RS grd plane. I use to have one and they were built way better
than the scantenna. I believe the wind load for the 2 would be approximately
the same, the RS is bigger overall but the scantenna has more vertical
surface to catch the wind. I use to have both the scantenna and the RS,
and after the first freezing rain/wind storm we had the scantenna ended
but looking like a pretzel, the RS was fine. As far as the coax is concerned
skip the 9913 for the scanners and use a good RG 6, and RG 58 is
fine for SW antennas that only are used up to 30mhz. or so. 9913 is big
and stiff and expensive, not to mention hard to work with.

Hello, thanks for the warning. So far we are fairly confident we are in the clear. Many people from the various organizations use the feeds. We see traffic from the FAA to the Norfolk feeds, and from various cities to the respective city feeds.

Thanks for the heads up! It would be an issue if people were using the PCR-1000s to listen to cordless phones... the radios won't do cellular so we are good there. The one touchy thing would be people using the PCR units to listen to FM from out of area, as the voice talent restrictions come into play. *shrug*

$575.00 + $10 sh

http://www.ohioscan.com/OPTIEXPL.JPG

Features
. High speed FM communications nearfield receiver, sweeps range of 30MHz to 2GHz in less
than one second
. Frequency blocks: Program up to 10 different frequency ranges to sweep or lock out
. Two line LCD displays frequency and either CTCSS, DCS, DTMF, or signal strength
. Built-in VFO mode for manually tuning to a specific frequency
. Super Sensitivity: Receive two-way communications up to 1/4 mile away
. Automatically record up to 500 frequencies in memory with number of hits, time and date
. Manually record CTCSS, DCS, DTMF and Signal Strength into memory
. Built-in PC Interface for memory download/PC interface cable and download software included
. Real-Time Clock / Calender with battery back-up
. Lockout Feature: Up to 1000 individual frequencies can be locked out of reception
. CI5 interface for Reaction Tune
. Internal Speaker, Audio earphone/headphone jack
. Includes Built-in NiCad Batteries with 5 hour discharge time
. Separate volume and squelch controls

Technical Specifications
Frequency Range 30MHz to 2GHz
Resolution Fixed 100Hz +/- 500Hz accuracy
Modulation FM
Frequency Response 50-3000Hz
Input Impedance 50Ohm
Size 3" W x 5.25" H x 1.6" D Weight 12oz
Sensitivity 100uV@500MHz
Inputs 50OHm, -59dBm @ 100MHz, -25dBm @ 1GHz
Outputs Internal speaker, audio headphone jack, RS232 jack, CI5 jack
Power 9-12VDC 350mA center positive
Battery 5 cell AA NiCads / 4-5 hour battery life
Display 2x16 alphanumeric LCD with EL backlight

9913 cable is a medium sized cable - approx 8mm in diameter, and is
moderately expensive. It is cheap compared to the hardlines like LDK550
(and a damn sight smaller), but more expensive than RG213 or similar (about
the same size though). Sorry I cannot help with the prices, but I am not in
the states so am not aware of what your prices will be like (cheaper than
here in Aust however).

# 906. Dutch F-16s working Florida ranges

Newsgroup: rec.radio.scanner
Date: 2004-01-29 00:47:20 UTC
From: allanstern@aol.com
Message-ID: <20040128194720.21833.00000556@mb-m25.aol.com>
Source record: 22646

It is Wed, 12:36pm EST (1736z).
Dutch F-16s "KILLER 21" flight is working at Avon Park Bombing Range; it is a flight of two, with two BDUs each. Freqs are 349.0, 292.2, 285.725, and 140.5.
Also Dutch F-16s "SPIDER 21" is working in the Whiskey Area, in comms with AWACS acft "DARKSTAR QUEBEC" (from Tinker AFB) on 335.95, and using 141.7 for air-air. SPIDER 21 is engaged in ACM with FL-ANG F-15s out of Jacksonville IAP.
DARKSTAR QUEBEC is also doing refuelings with KC-135R tanker "RHET 01" (from Warner-Robins AFB); comms between RHET 01 and DARKSTAR QUEBEC are on 324.6.
AWACS acft "BANDSAW MIKE" is also up today, and they have been in contact with
DARKSTAR QUEBEC on 364.2.

>>for the scanners and use a good RG 6, and RG 58 is fine for SW antennas that only are used up to 30mhz. or so<< Jeff

Sounds good, don't want to spend a fortune and all three runs will be well under 50ft, probably more like 30 - 35 ft.. Going to suspend a B&W inverted vee from a 24 ft mast with the ground plane on top, then mount an AMRAD active vertical (if I ever get all the parts together and assemble it) to a sewer vent pipe on the roof.

>>9913 cable is a medium sized cable - approx 8mm in diameter, and is moderately expensive.<< Matt

Yeah, I need cheap (don't see the need for expensive for a receive only ant) and small as I will have to fish it through some tight spaces to get were I'm taking it.

Thanks guys, I haven't bought any coax or put up any antennas in 25 years,
Rob Mills ~

Even for transmit on HF (assuming you are not running high power), and particularly on the lower freqs, RG58 is fine. For receiving on VHF and up, go for the best cable that you can afford - 9913 would be fine for the cable runs you are anticipating using - have not used RG6, and don't know what the specs are so couldn't comment there. I wouldn't use RG58 for your scantenna or RS groundplane (depending on which one you end up using).

Hi Andy. I listen to the Manchester police on 158.790. While looking at the list of frequencies in Manchester, I see the above listed with callsign of WNIN586. I punched in 154.770 and that is the input freq to 158.790.

Cant help you out with the PL tones though.

Fishy

What do you expect from them, Mike? Following WWII, we fed them a daily diet of propaganda saying war is wrong. It shouldn't be too surprising that they're now opposed to wars. We got what we asked for and are now complaining about it.

I'm looking for a Cobra SR-15 handheld scanner.
This is a 1980s model, 100 channels, L/H/U/Air,
LCD display, very small. Had one years ago and
should never have sold it. Must be in working
condition and cosmetically decent. If it needs
new batteries, that's ok.

73,
Dean K5DH

War is wrong! That is, if the purpose is just to gain land, resources, power, etcetera. Now, if the war was to free an enslaved, murdered, and tortured people, would that not be a good enough reason for war? Are we to go back to pre World War II where we ignored the millions that were being persecuted and sent to concentration camps? Oh well, so much for this off topic stuff. Probably ticked off too many people already. Killfiled too <g>. Later Dwight.

What the HELL are you talking about.

Theres 5+ sites that have the 785 for under $300.00.
$257.00 at bearcatscanner.com

Relax guy, some do have skills to.

# 926. PRO-96 Upgrade For CQPSK Soon To Be Available

Newsgroup: rec.radio.scanner
Date: 2004-01-29 22:59:24 UTC
From: "Fredric J. Einstein" <feinstei@comcast.net>
Message-ID: <bc3140711ca96a02b7c1cd0a192b91c2@news.teranews.com>
Source record: 22516

Here's the announcement....

Press Release from GRE Digital Scanner Development Team

Our team has completed work on a DSP App update for the PRO-96 that enables reception of the CQPSK modulation used in newer Linear Simulcast Modulation digital trunked radio systems. The update will be a free download available from the radioshack.com web site. A link to the download file will be available very soon.

In addition to enabling CQPSK reception, this update also fine tunes the digital audio level to better match that of analog audio levels, and provides some improvement to reception of C4FM digital signals in very weak signal conditions. All PRO-96 users will want to download this update and apply it to their radios.

A significant amount of time and effort was required to make this possible. We would like to extend our sincere thanks to the PRO-96 user community for their patience and support!

The GRE Digital Scanner Development Team

This is an older 10 channel scanner. The Bearcat site doesn't even have
this manual so I am hopping that somone in these groups will have a copy.
Format doesn't matter too much so long as it is readable.

I thank all those who respond & are willing to help in the search.
Steve

# 930. Just got my ass kicked by parcel service (plus a question)

Newsgroup: rec.radio.scanner
Date: 2004-01-30 01:44:58 UTC
From: "J.C. Jones" <>
Message-ID: <325a5890f39332d980c33470912bf4f6@news.teranews.com>
Source record: 22520

I ordered a radio a few days ago, and knowing the problems some of the parcel services have delivering on time and without damage, I decided to take the day off when the it was due to arrive. Around 2 PM today, I heard a noise at the front gate and when I went to investigate, I saw my package flying over the fence and landing in the front yard. I couldn't see the driver, but boy was I ticked. This was a $1500.00 Icom R8500 and this guy had just treated it like a bale of hay. I screamed at the top of my lungs "You blithering idiot, if you damaged my radio, I'm gonna kick your ass out the top of your head and then call your boss and get your lazy butt fired"!

As I was bent over checking the condition of the package, the driver apparently came over the fence and booted me right in the ass, causing me to fall on the package. I managed to stagger to my feet and lunged at the goon, but he got me in a head lock and proceeded to kick my ass repeatedly all over the front yard, down the fence row, and back into the front yard again. This guy was bull-strong, apparently from throwing heavy packages over fences, and huge..at least 6 feet 7 and probably 320 pounds. After beating the living daylights out of me for the better part of 10 minutes, he headed back toward the fence, but stopped near my package and did about 5 or 6 of those elbow drops on it, like the pro wrestlers do. Needless to say, the radio was totally destroyed.

The only good thing to come out of this was that the radio was insured and I'll be able to get it replaced. Now here's my problem. Should I use the same company for delivery next time? They did get the radio to me pretty quickly and it probably would have arrived safely if the driver hadn't thrown it over the fence. If I sit out on the street with a real tough and intimidating look on my face when the driver arrives next time, that should do the trick, don't you think?

J.C. Jones

1. You should have filed a police report.

2. You should have called the company who the driver belonged to and gotten
him fired.

3. You should have told them to give you $100,000 or you would take them to
court.

4. You shouldn't make threats you aren't 100% sure you can carry out.

5. You should make you story a little more believable next time.

This is a beautiful Radio Shack PRO-2004 purchased new by me.
I doubt that I have put more than a couple of hours total time on this scanner.
I have done the wideband receive mod but that is all I have done.
I have the original box and also the service manual with it.
It is as near mint as you will find nowadays.
The backlight is also perfect and shows no change in brightness from when it was new.
I will send it to you in the CONUS for only $225. Sorry, but no trades and this is a firm price.
I will take Paypal or a money order.

Jesus Christ,, I hope you filed charges against the goon. If
that were me he wouldnt have to worry about the cops, I would
have my attorney go after the clown with a vengence. Criminal charges,
civil lawsuit, you no doubt have a bad back or neck problems from
this "right"?? by the time my attorney filed a 50,000$ lawsuit against
him and his company, I doubt he would be driving for very long.
Next time use Fed Ex,, never had a problem with them.

Jeff

Sorry for the late reply.

The terms "GUARD Channel" and "GUARD Frequency" have been used for at
least 30 years. They were used as such in USAF technical orders for
various avionics communications systems, which I serviced while I was in
the USAF. Flight crews frequently use the phrase, "listening on GUARD"
to refer to monitoring 121.5 and 243.0 while in flight.

So the case can be made for either usage.

Even before 9/11, there has been a marked increase in the USAF's dependency on Air National Guard and Air Force Reserve components to fulfill various aspects of the USAF mission. For example, ALL of the KC-135 and KC-10 tanker missions have been handed over to ANG/AFRes units. (I have a buddy in the ANG who works on the tankers, so the info comes from a good source.) When I was in the Calif. ANG working at Van Nuys (before they moved to Pt. Mugu), we had flight missions going seven days a week, not just one weekend a month, and that was back in 1986, when the USAF wasn't nearly as dependent on the Reserve component for fulfilling its commitments.

Not only that, but it's going encrypted, too. And not that APCO stuff,
I mean serious encryption. What we referred to when I was in the USAF
as "non-tactical" communications -- security, law enforcement, aircraft
maintenance, civil engineering, etc. -- were moving toward use of
encryption even before trunking came on the scene.

If this story is believable and actually happened then you should:

1. Look at the receipt. Take down the Bill of Lading number. There may be other marks on it that indicate the route number and possibly the driver name. But the Bill of Lading / Waybill number can be used to track down exactly how the item was delivered, as every time a package item changes hands or vehicles it is recorded internally by the company.

2. File a complaint against the driver at the delivery company. File for reimbursement up to the level that was insured. Don't speak to the cute girl at the front desk. See the Terminal Manager. If he does nothing, then go to the District Manager.

3. See a lawyer immediately.

4. Use another carrier. This is unacceptable. The driver should be fired immediatly. If I had even a minor complaint about service with a carrier I would not used them next time. I know because I have been in transportation management.

5. Do not get antognistic next time. The drivers usually after a period of time rotate their routes, so you may not end up with "Joe Tough" next time even if you used the same carrier. Do not try to correct a wrong on your own.

6. Make your story more believeable. If Some courier idiot did that to my ICOM radio I would have immediatly gone over to write down his plate number, or at least the truck's fleet or shop number (usually in larger numerals than a licence plate). It would be silly to try and get physical with a 350 pound gorilla with an attitude. Trying out for WWF isn't going to get you a new career to replace your day job.

Newcastle NSW - Australia

I have added the audio files of the events of the past few days to our page at www.newcastlescan.com Click on the "soundbytes" link

I have added 4 separate recordings from the Port Kembla ethanol fire (titled enthanolfire & Port Kembla fire 1,2,&3).

Also added is a vehicle stop of offenders who were believed to be armed, a chase from the Hunter Valley and some RTA activity from the Traffic Management Centre

These are now available with all the other recordings that we have on our site. Hope you enjoy.

Happy Listening
Garry

Tony,
Here's a site that has mods for the BC 780 XLT don't know
how applicable they are for the BC 785D. You may want to go back to this site
later to find out if they transition to or develop any for the BC 785D
This radio hasn't been around long enough to have generated many mods.

<http://myweb.accessus.net/~090/bc-780xlt.html>

The reason most of us refer to the BC 785 D as a $700 radio, is we can't
imagine purchasing it without the BCi 25D digital card!

In mint condition offered for sale with all original papers and accessories.
Looking for best offer. Lowballers will be ignored.

The first receiver to pick up all radio and video including television
with its high resolution 2-inch color screen! Once you play with it, you
cannot put it down. This radio not only has an incredible receiver for it's
size, but you can receive any type of video signal. Watch private wireless
video signals; helmet cameras, amateur television and all regular broadcast
TV. There is so much to tune in, you can easily fill up all 400-memory
channels. It even has a simple band scope to help find an active frequency.
The numerous features and complexity demand you keep the owner's manual
handy until you are familiar with the functions. Audio quality is superb for
it's size. Comes with a telescopic antenna, audio/video output jack, belt
clip, lithium-Ion battery pack, and wall charger.

Specifications:

Frequency coverage - .495 - 2450 MHz, INCLUDING cellular;
Modes - Wide FM, Narrow FM and AM.

## 948. Looking for a better scanner

Newsgroup: rec.radio.scanner

Source record: 22538

I just bought my first scanner from a friend for $50 (Radioshack PRO-2046). Although it can pick up a few channels, the local police departments around me are all converting to digital systems and most are already trunk-tracking.

I think saving $500 would get me a very nice unit, as i hope to turn this into my new hobby. Would you guys suggest the Uniden Bearcat BC796D? I've looked and this unit seems to be the cream of the crop, for my sake of use. Would you guys recommend anything else?

Might be "overkill". It all depends on your planned "usage". Do
you really need the APCO 25 card installed?

In my area, Dallas PD & FD still use the 460mhz range. Most of
the cities in my immediate area are on 800mhz Motorolla Type II
system. (actually, my BC245XLT works fine - minus the alpha tags
on the scanner display)

I have determined that, FOR ME, the BC250D or the BC785D will
work. (At roughly half the price of the BC796D)

My home county will be moving to the 700mhz if in 6 to 10 years
when/if the need arises.

Per trunkedradio.net:
http://www.trunkedradio.net/index.php
Per communications of Denton County TRS. The plan for this system
is to go to all digital in about 6-10 years. The plan is to not
go digital till the switch to 700mhz becomes available for public
safety users and the need for upgrade is necessary.
Till that time there will be a simucast on both 700/800mhz for
about a year then full digital will be implented.

Rick

# 957. ID Tracker Updated

Newsgroup: rec.radio.scanner
Date: 2004-01-30 21:46:56 UTC
From: "David M. Hitchner" <biteme@spammers.net>
Message-ID: <VfASb.226$7I3.180@bignews4.bellsouth.net>
Source record: 22547
Cross-posted to: rec.radio.scanner,alt.radio.scanner

ID Tracker has been updated. The most significant addition (at least in my opinion) is the capability to perform ID limit searches.

There are currently 2 versions available (V2.9.0 and V3.0.0). Since I no longer own a BC245 I will no longer continue to update support for the BC245 and PRO-2052 scanners. Versions 3.0.0 and higher will no longer contain support for the BC245 and PRO-2052 but version 2.9.0 will still continue to be available on my web site with the complete source code.

http://bellsouthpwp.net/k/d/kd5eis/IDTracker/IDTracker.htm

Version 3.0.0 Changes

- Incorporated version 2.9.0 enhancements.
- Removed BC245 and PRO-2052 support.

Version 2.9.0 Changes

- Last version with BC245 and PRO-2052 support.
- Added the capability to perform ID limit searches.
- Added status to indicate skipped IDs when "Skip on Identified" is set.
- Added "Clear All" function to popup menu.
- Added "Playback Timer" setting.
- Added segment timing to Audio Playback.
- Added limited frequency tracking for the BC245 and PRO-2052. All frequencies are stored in bank 10.

## 958. Pro 2006 Mod?

Newsgroup: rec.radio.scanner
Date: 2004-01-30 22:26:18 UTC
From: Harry C <harryc@net.invalid>
Message-ID: <eSASb.864$IF1.125@nwrdny03.gnilink.net>
Source record: 22548

I just purchased a used (but mint cond.) Pro 2006. It has a toggle switch on the top that I need help in identifying it's function. This particular model has the sound/data squelch from the factory, so that's not it. The only thing I noticed about the switch is it cuts the keyboard beep volume in half when engaged. Was that ever a mod on the Pro 2006? Any other ideas? Thanks Harryc

I can tell you all receivers, transmitters and transceivers are illegal in Singapore. You can buy scanners there but you must be a foreign national.

Its just totally illegal in China.

First of all, you had NO LEGAL right to even lay hands on the driver..whether right or wrong. You should have called the service and filed a DAMAGE CLAIM for the item and gone from there. Whether mad or not, the law doesnt ALLOW you to attack folks who you are pissed at. (Yes, we UNDERSTAND how you feel but...).Screaming obscenities at the jerk only provoked him, and if you make a LEGAL issue out of this, you WILL lose as YOU provoked HIM. Let it go and LEARN from it.If you use the service again next time for another delivery, what are you gonna do if the SAME GUY is the delivery person? Suggest you try another...

>
Absolutely. After all, they did give you good service. I wouldn't
sit on the street, though. What you should do, is figure out the
driver's route, and then, on the day you expect delivery, follow him
from his depot, with loaded shotgun..then, at an opportune point,
attack him and take your own parcel at gunpoint.
This way, you can claim you never received the parcel, and you can get
TWO radios....

LOL - I can' believe how booooooooooooooring some of these people must
be to post responses the way they do.....

Ware are you?

Before you buy one you had better check that the police didn't go encrypted, trunked digital or you will be throwing your money away. That system is completely un-scannable I know because all of the emergency services in my area switched over a few years ago and made all scanners worthless. Even the news media with bottomless pockets has not been able to break it. I have seen so many people here that have tried and just ended up throwing their money away so check with your local radio shops to see what they did.

I know in the department I dispatch for, that if the police officer
requests the wrecker for an accident or abandoned vehicle, the city pays
for the actual wrecker to come out and pick up the vehicle. But if the
officer stops to help someone who is just broken down, the vehicle owner
has to have cash to pay the wrecker with. Maybe that's it?

Dear All,

I'm to buy a scanner in the coming days, but I'm still hesitating between the Yaesu VR500 and the Icom R5.
Which one would you buy?

Also, when the mention "cellular block" is written, what's the real meaning of this? What is considered when talking about "cellular"? Cordless phone or mobile phone?

Thank you,

Bruno

Personal choice. I have a BC780XLT and a BC235XLT. But I am going to buy an
ICOM VHF 2m radio as soon as
I get a ham licence.

>
> Also, when the mention "cellular block" is written, what's the real

or
> mobile phone?

"Cell block" means that the radio has been set so that it cannot receive
celluar phone frequencies. The circuitry is there,
but the nessesary chipsets have been epoxied over some may not have been
installed during manufacture, but some enthusiasts have been able to hack
their radios to receive celluar. Receving celluar phone transmissions is
illegal in North America.

"Celluar" refers to mobile phones.(those things that people seem to want to
use more than the steering wheel when driving)

Cordless phones operate on a different frequency band and have limited
range. The other
type of mobile phone - the radiotelephone operates on a lower VHF band, but
these frequencies are set mostly into marine
radio sets, and radiotelephones aren't as common as they once were.

^ Sure, if you have a year off to spare and $10-12K.

I'd never be able to save that much on my income.

How many of those languages do you speak? If only one or two then a
wide-range radio receiver will probably only be good for listening to
aviation communications.

Older VR-500's for the USA have a resistor that can be removed to unblock them.

Does anyone know the serial number (forward) where the resistor was eliminated?

I have been trying to join the Yahoo VR-500 Group for a week, but the moderator there is very, very slow.

While not specifically illegal here in Canada, not a good idea to monitor
cell phones and tell everyone of your talents to do so.
You could be sued and relived of your scanner.

>
> http://www.durhamradio.com/scanners.htm#unblocked_scanner

Like the ICOM 3. Wonder how good the TV reception is. Would be great to take
to a hockey game.

nicads or standard cells?
a nicad stack will be a lower voltage than a stack of dry cells
could this be it?
else, get a variable psu, connect it where the battery clips are and vary
the voltage to find its trip value.
don't know of a standard fault about this, but i know the charging circuit
can go iffy.

Are you using NiCads? NiCads are only 1.2 vdc, where Alkalines are 1.5 vdc, per cell. Multiply the difference by four cells, and brand new, fully charged NiCads would produce 4.8 vdc, where Alkalines would produce 6 vdc. So NiCads would look 1.2 vdc low, right from the start.

That is why a lot of the newer scanners have two different battery trays, depending on what type of cells you use. They compensate for the difference.

Sorry - Cleveland uses the VSELP vocoder which is Motorola proprietary
and not part of the P25 spec. The upgrade does not add VSELP, it only
adds CQPSK digital modulation.

^ I'm a linguist by profession and teach language skills to
^ employees of companies who send their people abroad.

Then you could learn something by listening to public service frequencies in
these other countries that will benefit you in your profession.

Good luck.

Frank

# 1003. Re: Pro-34 handheld Low Battery indicator

According to the PRO-34 manual, you can use alkaline or nickel-cadmium batteries. The radio has a built in circuit for charging NiCads.

Newer scanners have two battery holders to prevent inadvertent charging of alkalines. One holder does not connect to the charging circuit while the other does. That's the only difference and there is no voltage compensation.

Omaha, NE recently went to digital lately. I can't even get the digital noise on the regular channels. Does anyone know if they have gone to all new freqs. or what happened.
